Dear Mr. Ronzio,

Re: Engagement and Communications Report for the Peace River Nuclear Power Project

Energy Alberta has been engaging with Indigenous Nations and Communities, local governments, landowners, stakeholder groups and members of the public on the Peace River Nuclear Power Project (the Project) since 2024.

To promote transparency and accessibility of information, Energy Alberta is choosing to submit annual engagement and communications reports throughout the impact assessment and licencing process.

Enclosed is the first Engagement and Communications Report for the Project. This report covers all engagement and communications activities undertaken from early 2024 to December 31, 2025. Energy Alberta anticipates submitting the next annual report by the end of Q1 2027.

Yours sincerely,

TISGs	Integrated Tailored Impact Statement Guidelines
%	percent

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

1 INTRODUCTION

Energy Alberta is an Alberta-based company founded in 2005. We are dedicated to building and operating a world-class nuclear electricity generating station that will transform energy production in the province. Energy Alberta is proposing to build a nuclear power generating station in the Peace River area of northern Alberta that would include two to four large-scale reactors. The facility would produce up to 4800MW of electricity to the grid, representing up to 25% of the province's existing electricity generation.

Energy Alberta is committed to open, transparent, and thorough engagement and communication as a vital component to the success of the Peace River Nuclear Power Project (the Project). The aim is to build and sustain meaningful relationships based on mutual respect and trust with Indigenous Nations and Communities, non-Indigenous stakeholders, local communities, and other potentially affected parties. Energy Alberta recognizes the importance of engaging early and often to understand each group's unique interests and concerns.

In alignment with its corporate policies, Energy Alberta is committed to undertaking engagement and communications that will meet or exceed requirements from federal and provincial agencies, and it will also draw upon best practices.

Energy Alberta has been engaging with Indigenous Nations and Communities since Q1 2024, non-Indigenous stakeholders, local communities, and other potentially affected parties since early 2025. In August 2025, Energy Alberta submitted a formal request to the Impact Assessment Agency of Canada (IAAC), requesting a temporary suspension of the timeline for the Planning Phase of the Impact Assessment (IA). This request was made in response to requests from Indigenous Nations and Communities for more time to engage in this early stage of Project development and build awareness and understanding of the nuclear energy industry.

During this pause, Energy Alberta continued active engagement with Indigenous Nations and Communities and public stakeholders to deepen our understanding of specific interests and concerns related to the Project. Energy Alberta has used this understanding to inform the design of the engagement program, to ensure that opportunities for involvement throughout the IA process are meaningful and inclusive. On March 2, 2026, following a request from Energy Alberta, IAAC resumed the 180-day time limit for the planning phase of the IA.

This report provides an overview of Indigenous and stakeholder engagement and communications activities completed by Energy Alberta between January 1, 2024 to December 31, 2025. Energy Alberta anticipates submitting annual Engagement and Communications Reports throughout the IA and Licencing process.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

2 INDIGENOUS ENGAGEMENT AND COMMUNICATIONS

Energy Alberta's Indigenous engagement and communications efforts are intended to be inclusive of Nations, Bands, Communities, and Métis Settlements and Groups potentially impacted by the Project. The term "Indigenous Nations and Communities" is used throughout Project documentation to represent this inclusion.

Meaningful engagement and communication with Indigenous Nations and Communities is a corporate value of Energy Alberta, and a vital component of the Project development process. Energy Alberta is committed to building meaningful, mutually-beneficial relationships with Indigenous Nations and Communities, guided by respect, integrity and a shared commitment to advancing reconciliation, and as outlined in its [Indigenous Relations Policy](#).

2.1 Indigenous Engagement Approach

Energy Alberta sought guidance from the Government of Canada First Nation Profiles Interactive Map and the Alberta Aboriginal Consultation Office Electronic Disposition System Landscape Analysis Tool, to determine a preliminary list of Indigenous Nations and Communities that may be potentially impacted by or have interest in the Project. Since the release of the Initial Project Description (IPD), additional Indigenous Nations and Communities have expressed an interest in engaging on the Project.

Engagement and communications efforts have been initiated and undertaken to varying degrees with the following 41 Indigenous Nations and Communities (listed in alphabetical order):

■ Asini Wachi Nehiyawak	■ Gift Lake Métis Settlement
■ Athabasca Chipewyan First Nation	■ Grande Prairie Métis Local
■ Beaver First Nation	■ Horse Lake First Nation
■ Cadotte Lake Métis Nation	■ Kapawe'no First Nation
■ Dene Nation	■ Kee Tas Kee Now Tribal Council (comprised of Loon River First Nation, Lubicon Lake Band, Peerless Trout First Nation, Whitefish Lake First Nation #459, and Woodland Cree First Nation)
■ Dene Tha' First Nation	■ Kikino Métis Settlement
■ Driftpile Cree Nation	■ Lac Ste. Anne Métis Community Association
■ Duncan's First Nation	■ Lakeland Métis Nation
■ East Prairie Métis Settlement	
■ Ermineskin Cree Nation	
■ Fort Chipewyan Métis Nation	
■ Fort McKay First Nation	

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

- Little Red River Cree Nation
- Loon River First Nation
- Lubicon Lake Band
- Mikisew Cree First Nation
- Nations of the North Peace (comprised of Beaver First Nation, Dene Tha' First Nation, Little Red River Cree Nation, and Tallcree First Nation)
- O'Chiese First Nation
- Otipemisiwak Métis Government
- Paddle Prairie Métis Settlement
- Peavine Métis Settlement
- Peerless Trout First Nation
- Sawridge First Nation
- Sturgeon Lake Cree Nation
- Sucker Creek First Nation
- Sucker Creek Off Reserve Elders Council
- Swan River First Nation
- Tallcree Tribal Government
- Treaty 8
- Valleyview Métis Local
- Whitefish (Goodfish) Lake First Nation #128
- Whitefish (Atikameg) Lake First Nation #459
- Woodland Cree First Nation

As the Project progresses, the list of potentially affected Indigenous Nations and Communities may be updated, based on interest and feedback from Indigenous Nations and Communities, and additional planning and guidance from applicable regulators.

2.2 Summary of Indigenous Engagement and Communication Activities

2.2.1 Engagement and Communication Activities Completed January 2024 to August 2025

Energy Alberta commenced its Indigenous engagement and communications for the proposed Project early in 2024. Since then, Energy Alberta has initiated contact with the Indigenous Nations and Communities listed in Section 2.1, and activities have been undertaken to varying degrees based on the Nation or Community's interest, responsiveness, and availability.

The following provides a summary of the Indigenous engagement and communications activities conducted prior to December 31, 2025.

- March 2024 through to July 2025 – Introductory emails containing the Project information package and mapping were sent to Indigenous Nations and Communities. Following January 2025, Project information packages and mapping was sent to Indigenous Nations and Communities as they made themselves known and interested in the Project.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

- April 2024 through to July 2025 – Introductory meetings held with Indigenous Nations and Communities, as they were available, to outline the Project scope, key objectives, deliverables, timelines, and roles and responsibilities of team members. This was also an opportunity to discuss expectations, identify potential concerns, and establish communication protocols to facilitate collaboration throughout the Project.
- January 2025 through to March 2025 – Discussions with Indigenous Nations and Communities that had already engaged more extensively with Energy Alberta regarding initial feedback on the draft IPD.
- February 2025 – A Project update email was sent to Indigenous Nations and Communities that introduced new Indigenous Engagement team members and contained information on how to stay connected, the results of Energy Alberta’s preliminary land investigations, an indication that the IAAC would be reaching out to facilitate its own consultation process, and a request from Energy Alberta to meet.
- April 2025 – Energy Alberta informed Indigenous Nations and Communities when the draft IPD was submitted to IAAC and provided a follow-up email with links to the document when they became publicly available. Energy Alberta also informed where hard copy versions of the documents could be accessed, locally.
- May 2025 – Energy Alberta kept Indigenous Nations and Communities informed of upcoming comment period deadlines. Energy Alberta offered capacity funding to Indigenous Nations and Communities to support efforts in reviewing planning phase documents (i.e., the IPD) and draft Integrated Tailored Impact Statement Guidelines (TISGs) within the timeframe specified by IAAC.
- July 2025 – Energy Alberta invited Indigenous Nations and Communities to participate in the early field data collection programs occurring that summer. Opportunities included River Channel Depth Survey (July 28 to August 1), Water Intake Siting Inspection (mid-August), and Wildlife Survey work (August 25 to 29).

2.2.2 Regulatory Pause August 2025 to February 2026

On August 18, 2025, Energy Alberta submitted a request to IAAC, requesting a suspension of the timeline for the planning phase of the IA. During this pause, Energy Alberta continued to engage with Indigenous Nations and Communities. A summary of engagement and communications activities completed during the pause is as follows:

- **Introductory Meetings:** Between August 2025 and February 2026, Energy Alberta has held introductory meetings with 19 Indigenous Nations and Communities. These meetings included presentations by Energy Alberta that provided information about the Project, the regulatory process, and the Canadian nuclear industry. Meetings were either in person or virtual, depending on the preferences and availability of each Indigenous Nation and Community. Meeting attendance varied depending on the preferences and protocols of each Indigenous Nation or Community, with some meetings including Chief, Council, and Elders, some involving community members, and some involving technical staff and consultants.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

- **Participation in Summer 2025 Fieldwork:** Interested Indigenous Nations and Communities were invited to participate in early fieldwork in summer 2025. This fieldwork was part of initial siting analysis and was not part of the IA process. Nine Indigenous Nations and Communities indicated an interest in participating in the fieldwork.
- **Agreements and Capacity Funding:** Energy Alberta continued to offer capacity funding intended to match funding provided by IAAC. Requests for bridge/interim funding received from Indigenous Nations and Communities were considered on a case-by-case basis.
- **Framework Agreements and Work Planning Meetings:** Energy Alberta met with interested Indigenous Nations and Communities and meetings continued to be scheduled into Q1 2026. These meetings sought to identify which aspects of the IA were of interest to each Indigenous Nation and Community and in what capacity they would like to be involved. Energy Alberta also commenced the development of confidentiality agreements for the protection of Indigenous Nation and Community-specific data.
- **Siting Workshops and Meetings:** Energy Alberta hosted an in-person siting workshop for Indigenous Nations and Communities in September 2025. The purpose was to provide information about initial site analysis and the identification of Energy Alberta's two siting options. Twelve Indigenous Nations and Communities sent representatives to participate in the workshop. Participant feedback at the workshop indicated that the information presented was too technical to bring back to communities and instead, was better suited for technical staff. Requests were received for this information to be provided virtually for Indigenous Nations and Communities who were unable to attend the in-person workshop.
- **Ongoing Project Updates:** Energy Alberta continued to provide ongoing Project updates by email to Indigenous Nations and Communities. Between August 2025 and February 2026 updates were provided on the following topics:
 - August 7, 2025: Summer Field Work Program and Capacity Funding Offer
 - August 18, 2025: Regulatory Pause
 - September 29, 2025: National Day for Truth and Reconciliation
 - October 7, 2025: Update on Technology Options for the Project
 - October 10, 2025: Indigenous Perspectives on Nuclear Power, a list of Indigenous leaders who have worked in or have knowledge of the Canadian nuclear sector and who have offered to share personal insights and experiences with Indigenous Nations and Communities.
 - October 21, 2025: Follow Up to Update on Technology Options for the Project
 - November 10, 2025: Indigenous Engagement Team Member Introduction
 - December 9, 2025: Plant Parameter Envelope (PPE) Approach
 - December 18, 2025: Holiday Greeting and Office Closure Information

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

The detailed Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025 can be found in Appendix A. These records were provided to each Indigenous Nation and Community for review and comment prior to inclusion in this report. Seven Indigenous Nations and Communities either provided feedback on their specific record, or indicated the records provided were complete and accurate.

2.2.3 Indigenous Nations and Communities Interests Identified to Date

Energy Alberta's engagement and communications with Indigenous Nations and Communities is ongoing and some but not all potentially impacted Indigenous Nations and Communities have identified topics of interest related to the Project. Feedback has been received through the activities listed in the preceding sections.

Energy Alberta has compiled a list of preliminary topics of interest identified Indigenous Nations and Communities, as shown in Table 2.2-1. While some topics listed may overlap or intersect, Energy Alberta has erred on the side of inclusion to ensure no topics of interest are overlooked.

At the time of writing, Energy Alberta has only received the draft TISGs which may change prior to being finalized. Energy Alberta is awaiting the final TISGs before determining how issues raised through engagement and communications may be addressed in the Impact Statement (IS).

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 2.2-1: Preliminary Topics of Interest - Indigenous

Theme	Key Issues/Interests Identified
Accidents or Malfunctions	Concerns regarding the risk of reactor malfunction Concerns regarding pollution in the event of an accident or malfunction Interest in reach of impacts in the event of an accident or malfunction
Agreements	Interest in Capacity Funding Agreements Interest in Engagement Framework Agreements Interest in development of Work Plan Agreements
Air Quality	Concerns regarding human health risks and wellbeing, including exposure to emissions Concerns regarding the impacts of steam and potential contaminants leaving the facility, including the potential for contaminants to precipitate out Interests regarding airshed considerations and dispersion modelling
Baseline Studies	Interest in Project scope, specifically baseline studies Interest in Indigenous participation in the Project, including baseline studies
Birds and Bird Habitat	Interests regarding migratory birds and their habitat
Capacity Funding	Concerns regarding the availability and amount of capacity funding from Energy Alberta, IAAC, and CNSC Concerns regarding Indigenous Nations subsidizing any part of the engagement process
Climate Change	Concerns regarding the potential for weather patterns to change over time due to climate change Interests regarding how climate change considerations will be covered in baseline studies and the IA
Consultation	Interests regarding materials that are easy to understand and culturally relevant (e.g., plain language, translation to Indigenous languages, visual representations) Interests regarding timelines for consultation Interests regarding proponent participation in community and on the land Interests regarding nuclear science education Interests regarding Indigenous participation in the Project Concerns regarding early and meaningful engagement
Country Foods	Concerns regarding contamination of harvested foods, and human health impacts related to consumption of these foods

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 2.2-1: Preliminary Topics of Interest - Indigenous

Theme	Key Issues/Interests Identified
Cumulative Effects	Interests regarding how cumulative effects will be assessed Concerns regarding the cumulative effects of water usage; given the variety of industries and projects currently being proposed Concerns regarding overall industry in the area gradually eroding the ability to practice Treaty Rights, and interest, and how this will be reflected in the cumulative effects assessment
Economic	Interests regarding Indigenous Nations and Communities economic inclusion and equity partnerships Interests regarding economic impacts in the region resulting from the Project Concerns regarding housing affordability, jobs, and an increase in population Interests regarding a desire to see real, lasting benefits for communities Interests regarding benefits specifically for Indigenous Nations and Communities
Emergency Management	Concerns regarding how Indigenous Nations and Communities would be contacted in the event of an emergency given poor cell reception generally in the area Concerns regarding financial responsibility for emergency management Interests regarding financial security and guaranteed funding set aside for emergency response Interests regarding the timeline for how and when emergency planning would occur and who would be responsible
Employment and Training	Interests regarding employment opportunity for Indigenous people Interests in early education opportunities so that Indigenous people are in a position to benefit from opportunities Interests regarding skilled jobs training
Environmental Monitoring and Mitigation	Interests regarding environmental mitigation measures Interests regarding post-closure monitoring
External Events/Hazards	Concerns regarding terrorism hazard
Fire and Explosion Hazards	Concerns regarding increasing wildfire hazards and overall facility safety
Fish and Fish Habitat	Concerns regarding impacts of water withdrawal and water quality on fish habitat Concerns regarding sedimentation
Geotechnical	Concerns regarding borehole depth, location and future site investigations Interest in suitability of bedrock
Human Health Effects	Concerns regarding human health risks and wellbeing, including radiation exposure

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 2.2-1: Preliminary Topics of Interest - Indigenous

Theme	Key Issues/Interests Identified
Impact Statement	Interests regarding Project scope, Indigenous Nations and Communities input, and timing
Indigenous Knowledge	Interests regarding incorporation of Indigenous Knowledge into siting, studies, and IA
Indigenous Physical and Cultural Heritage	Concerns regarding impacts to Indigenous and Treaty Rights Concerns regarding impacts to culture and way of life, including cumulative effects and accommodations Interests regarding cultural and spiritual aspects of the Peace River and the Peace–Athabasca Delta Concerns regarding cultural preservation
Indigenous Sites of Significance	Concerns regarding culturally sensitive sites Concerns regarding hunting and gathering areas Interests regarding cultural, spiritual, and environmental significance of the Peace River including the Peace–Athabasca Delta
Indigenous Traditional Land and Resource Use	Interests regarding Traditional Land and Resource Use Interests regarding potential impacts to wildlife habitat (i.e., Site Option 2 covers well-used hunting areas) Interests regarding collection of wild medicines in the area of Site Option 2
Infrastructure Services	Concerns regarding increased use of infrastructure and services Interests regarding community services Concerns regarding the impact of construction and operations workforce on local airports and roads
Land and Resource Use	Concerns regarding potential impacts to outdoor recreation Concerns regarding potential impacts to hunting and gathering areas
Meteorological Conditions and Hazards	Concerns regarding extreme weather events and their potential impact to the facility Interests regarding changes to current weather patterns and new weather hazards
Physical Protection	Concerns regarding how radiation would be contained in the event of malfunction or accident
Power Costs and Rates	Interests regarding whether power would be cheaper for local Indigenous Nations and Communities Interests regarding the provision of free power to impacted Indigenous Nations and Communities
Powerlines	Interests regarding whether transmission lines would be part of the IA Concerns regarding that the impacts of transmission lines should be part of the cumulative effects assessment Interests regarding where the power would be directed

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 2.2-1: Preliminary Topics of Interest - Indigenous

Theme	Key Issues/Interests Identified
Procurement/Business Opportunities	Interests regarding procurement opportunities for Indigenous businesses Interests regarding partnership opportunities for construction camps
Project Need	Interests regarding the proportion of increased power demand provided by the Project Interests regarding alternate options analysis, including comparison to solar and wind Concerns regarding Project need and site location in the Peace Region Interests regarding where the power would be needed Interests regarding whether power would serve the grid or specific uses such as data centres
Project Phases and Schedule	Interest in understanding Project timelines
Radioactivity	Concerns regarding human health risks from radiation exposure Interests regarding monitoring of radioactivity
Regulatory Process	Interests regarding opportunities for Indigenous Nations and Communities participation in regulatory process and the format of the regulatory process
Rights of Indigenous Peoples	Concerns regarding United Nations Declaration on the Rights of Indigenous Peoples and specifically free, prior, and informed consent Concerns regarding impacts to Indigenous culture and way of life Concerns regarding impacts to Treaty Rights, particularly on Crown land Concerns regarding rights under the Natural Resources Transfer Agreement
Riparian and Wetlands	Concerns regarding riverbank fragility and stability
Safety of Community	Concerns regarding risks to residents living near the facility
Safety of Facility	Interests regarding how the facility would be designed/constructed to ensure safety Interest in facility design and safety measures that ensures worker safety
Security	Interest in understanding how security would be managed at the facility
Seismic	Concerns regarding seismic activity in the area, including both fracking and earthquakes Concerns regarding recent seismic events recorded in the area Concerns regarding the siting of a nuclear facility in an area with fracking
Site Evaluation	Interest in how the two siting options were selected Interest in criteria used to select siting options

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 2.2-1: Preliminary Topics of Interest - Indigenous

Theme	Key Issues/Interests Identified
Siting and Selection	Interest in how the siting decision would be made and what inputs would be considered Concerns regarding siting decisions being made without fulsome engagement
Social – Gender Equality	Concerns regarding safety of women in communities Concerns regarding safety risks posed by workforce influx
Social – Vulnerabilities	Interests regarding ensuring the protection of vulnerable community members, including children and Elders
Social Conditions and Effect	Interests regarding socio-economic conditions and impacts Concerns regarding housing affordability Concerns regarding potential impacts of population influx, both temporary and permanent
Species At Risk and Habitat	Interests regarding the identification of species at risk
Integrated Tailored Impact Statement Guidelines	Interests regarding what would be included in the TISGs
Technology Selection	Concerns regarding how the IA would address multiple technology options Concerns regarding dependence on other countries due to enriched uranium use
Topography, Soil, and Sediment	Concerns regarding existing sedimentation in the Peace River and the potential for this Project to negatively affect existing conditions
Vegetation	Concerns regarding impacts to terrestrial habitat and wild plant medicines
Waste Management – Storage	Interest in learning more about where and how waste would be stored, both on-site and long-term Concerns regarding the risks of storing nuclear waste Concerns regarding absence of operational long-term waste storage in Canada Interest in the management of all levels and all types of waste, including the potential for the release of radiated water
Waste Management - Transportation	Concerns regarding the transportation of waste from the site to long-term storage

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 2.2-1: Preliminary Topics of Interest - Indigenous

Theme	Key Issues/Interests Identified
Water	Concerns regarding Project effects to the Peace River, including the Peace–Athabasca Delta Interests regarding the cultural and environmental importance of the Peace River Concerns regarding current health of the river Concerns regarding sedimentation in the Peace River Concerns regarding potential for contaminants in precipitation from steam released Concerns regarding water use volumes and return flows to the Peace River concerns regarding water quality in storage ponds (i.e., perception that they are the same as oilsands tailing ponds) Concerns regarding volume of water needed given recent lower-than-normal river levels Concerns regarding risk to Grimshaw aquifer Concerns regarding the potential for contamination of water downstream of facility
Wildlife and Wildlife Habitat	Concerns regarding impacts to traditionally important species such as bear, elk, fish, moose, caribou, and squirrel Concerns regarding impacts to wildlife habitat, particularly in well-used hunting areas within Site Option 2 Concerns regarding impacts to terrestrial habitat

CNSC = Canadian Nuclear Safety Commission; IA = Impact Assessment; IAAC = Impact Assessment Agency of Canada; TISGs = Integrated Tailored Impact Statement Guidelines.

2.3 Future Indigenous Engagement and Communications Activities

Engagement and communications will continue through the IA, construction and operations phases of the Project. Activities will be based on each Indigenous Nation or Community's interest and degree of potential impact. Energy Alberta has identified the following activities for this next phase of Indigenous engagement and communications.

- **Introductory Meetings:** Energy Alberta will continue to pursue introductory meetings with interested Indigenous Nations and Communities.
- **Agreements and Capacity Funding:** Energy Alberta will continue to work with interested Indigenous Nations and Communities to establish framework agreements.
- **Participation in Impact Statement Studies:** Energy Alberta will work with interested Indigenous Nations and Communities to develop work plans for participation in the IA process. Work plans will be unique to each Nation and Community and will reflect areas of interest, anticipated or potential community impacts, culture and ways of knowing, and regulatory requirements. Participation in the IA process could include but are not limited to, Indigenous monitors, observing data collection, reviewing data and reports, participation with technical experts on study design, development or co-development of studies and reports. Energy Alberta will provide Indigenous Nations and Communities with capacity funding to support participation.
- **Community Information Sessions:** Energy Alberta will make community information sessions available to interested Indigenous Nations and Communities. Topics covered and format for the sessions will be determined in collaboration with communities.
- **Ongoing Project Updates:** Energy Alberta will provide Indigenous Nations and Communities with notification in advance of regulatory filings and to provide updates as the Project progresses through the regulatory process.

Energy Alberta has already completed the following engagement and communication activities in early 2026.

- **Nuclear Fundamentals Workshop:** In January 2026, Energy Alberta sponsored a workshop led by Tracy Primeau of Agile Bear Consulting. This workshop was offered in response to requests from Indigenous Nations and Communities for an Indigenous perspective on nuclear energy. Energy Alberta may look at making this workshop available virtually.
- **Virtual Siting Workshop and Meetings:** In response to requests for a virtual opportunity to learn about siting, Energy Alberta hosted virtual workshops and meetings Indigenous Nations and Communities in Q1 2026. The intent was to explain the siting criteria used in identifying siting options 1 and 2, and to seek feedback that would inform Energy Alberta's selection of a preferred site that would be the focus of IA studies.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Engagement and communications activities for 2026 and beyond will continue to be informed by feedback received through ongoing engagement with Indigenous Nations and Communities and through the formalization of Indigenous Nation and Community-specific agreements and work plans.

3 PUBLIC AND STAKEHOLDER ENGAGEMENT

Energy Alberta is committed to open and transparent engagement with stakeholders and members of the public throughout the life of the Project. Public engagement activities are intended to maximize information available to the public, increase the public understanding of the Project, and gathering input from the public to be incorporated into Project plans, where practicable. Public engagement will continue throughout the lifecycle of the Project.

Feedback loops will be created to facilitate dialogue between the public and Energy Alberta. Feedback collected through public engagement activities will be integrated into Project planning.

3.1 Summary of Public and Stakeholder Engagement

3.1.1 Local Governments

Engaging with local governments is essential for Energy Alberta to understand community priorities, considerations and concerns, including the capacity of local infrastructure and services to support the construction and operation of the Project. Energy Alberta also engages with local governments to build positive, long-term partnerships in local communities.

Energy Alberta has undertaken engagement activities with the following 18 local governments since the submission of the IPD:

■ Birch Hills County	■ Town of Grimshaw
■ Clear Hills County	■ Town of Manning
■ County of Northern Lights	■ Town of McLennan
■ Municipal District of Fairview No. 136	■ Town of Peace River
■ Municipal District of Peace No. 135	■ Village of Berwyn
■ Municipal District of Smoky River No. 130	■ Village of Donnelly
■ Northern Sunrise County	■ Village of Girouxville
■ Town of Fairview	■ Village of Hines Creek
■ Town of Falher	■ Village of Nampa

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Since early 2024, Energy Alberta has held formal delegations and staff-level meetings with the following local governments:

■ Birch Hills County	■ Town of Falher
■ County of Northern Lights	■ Town of Grimshaw
■ Municipal District of Fairview No. 136	■ Town of Manning
■ Municipal District of Peace No. 135	■ Town of Peace River
■ Municipal District of Smoky River No. 130	■ Village of Berwyn
■ Northern Sunrise County	■ Village of Hines Creek
■ Town of Fairview	

Energy Alberta has reached out to all 18 local governments listed above, and at the time of submission for this report, has been actively engaging or in communication with 13 local governments. Energy Alberta will continue to reach out and offer opportunities for engagement with all local governments listed above.

Delegation presentations provided councils with an overview of the proposed Project, anticipated Project timelines, the IA process and opportunities for collaboration throughout the regulatory process.

Siting Workshop

On September 23, 2025, Energy Alberta hosted representatives from six local governments at an in-person siting workshop. In addition to the local government representatives, interest groups, Chambers of Commerce and tourism associations were also invited to attend. The purpose of this workshop was to provide information about initial site analysis and the selection of Energy Alberta's two potential siting options, offering an opportunity for participants to view the results of the initial assessment. Subject matter experts explained the siting criteria that was used in identifying siting options and requested initial feedback from a local perspective to inform the selection of a preferred site.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Chief Administrative Office Meetings

In December 2025, Energy Alberta held virtual meetings with the Chief Administrative Officers (CAOs) of the local governments. Meetings provided an introduction to the Project, an update on recent engagement activities including feedback received from local residents and introduction of future opportunities for local government engagement on the socio-economic assessment.

Further details regarding engagement and communication activities undertaken with local governments during the reporting period can be found in Appendix B.

3.1.2 Chambers of Commerce

Energy Alberta is committed to ensuring that local communities benefit from the economic opportunities presented by the Project. Engaging with local Chambers of Commerce will help Energy Alberta communicate with local business owners about procurement opportunities, industry standards and training requirements. Local Chambers of Commerce will also serve as an important conduit to local businesses, enabling Energy Alberta to gather data in support of the IS and to develop a local business registry and business capacity assessment for the region.

Energy Alberta will engage with the following local Chambers of Commerce on the proposed Project:

- Peace River & District Chamber of Commerce
- Manning & District Chamber of Commerce
- Fairview & District Chamber of Commerce
- Grimshaw & District Chamber of Commerce
- Smoky River & District Chamber of Commerce
- High Prairie & Area Chamber of Commerce

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

■ Valleyview & District Chamber of Commerce

Energy Alberta has completed the following engagement activities with Chambers of Commerce since 2024.

- In April 2024, Energy Alberta met with Municipal Councillors and the Peace River Chamber of Commerce to introduce Energy Alberta's proposed Project, discuss Project technical details, and understand community interests and questions.
- On January 29, 2025, Energy Alberta met with Grimshaw & District Chamber of Commerce, Peace River & District Chamber of Commerce, Lac Cardinal Regional Economic Development Board, Northern Sunrise Economic Committee, Peace Region Economic Development Alliance, Town of Peace River Economic Development Committee, and Town of Peace River Legislative Services to discuss technology, workforce expectations, anticipated facility footprint, regulatory process and upcoming studies.
- On March 11, 2025, Energy Alberta attended and presented at a luncheon organized by the Peace River & District Chamber of Commerce. Chamber of Commerce members heard a presentation about the Project.
- On September 23, 2025, representatives from the Grimshaw Chamber of Commerce and the Town of Peace River's Economic Development Committee attended a siting workshop held by Energy Alberta at the Chateau Nova. This workshop's goal was to share an in-depth look at how Energy Alberta came to select the two potential site option areas that are currently being assessed.
- On January 27, 2026, Energy Alberta hosted an open house for local business owners in collaboration with the Peace River & District Chamber of Commerce. The goal of the event was to introduce the Project and potential future procurement opportunities to local business owners. Discussions focused on qualifications to work on nuclear projects, potential range of opportunities during construction and operation phases, impact of the Project on labour force, wages and local communities and future opportunities for outreach to business owners.

Further details regarding engagement and communication activities undertaken with local Chambers of Commerce during the reporting period can be found in Appendix B.

3.1.3 Industry and Business Associations

Energy Alberta engages with industry and business associations to share Project information and hear about emerging best practices, through attendance and participation at events such as the Small Modular Reactor Canada Summit, the Independent Power Producer Society of Alberta Conference, and the Canadian Nuclear Association Conferences.

In addition, Energy Alberta has engaged with the Peace Regional Energy Committee (PREC), given its purpose to look at opportunities to bring all forms of power generation to the Peace Region. Energy Alberta also collaborated with the PREC on a panel discussion at the Small Modular Reactor Canada Summit in March 2025.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Further details on engagement activities undertaken with business associations can be found in Appendix B.

3.1.4 Non-Governmental Organizations and Environmental Groups

Energy Alberta will engage with local Non-Governmental Organizations and Environmental Groups through the IA process, as their perspectives will help inform the IS and Project plans. To date, Energy Alberta has held introductory meetings with the Mighty Peace Watershed Alliance and the Peace River Area Monitoring Program. Energy Alberta will engage with each of these groups on the scoping and development of baseline studies relevant to their area of focus.

Energy Alberta will seek to engage with other local environmental organizations, recreational groups and tourism associations as we move into the IS phase of the regulatory process. The focus of these engagements will be to aid in baseline data gathering, to identify local interests and concerns, share potential impacts associated with the proposed Project and develop mitigation measures.

Further details regarding engagements with non-governmental organizations can be found in Appendix B.

3.1.5 Residents and Landowners

Energy Alberta continues to engage with landowners and residents within and adjacent to the two siting options. Once a preferred siting option is selected, landowner engagement will focus on landowners and residents within and adjacent to the preferred site. Engagement activities conducted with landowners and residents has included:

- **March 2025:** Energy Alberta contacted landowners and residents within and adjacent to the two siting options. An Energy Alberta representative met in person with adjacent landowners and residents and provided a Project update letter and a personal invitation to the March 2025 open house.
- **April 2025:** Energy Alberta provided landowners and residents within the identified potential site areas with a Project update letter. The letter provided a Project update and advised that Energy Alberta had formally submitted the IPD to IAAC and CNSC and that a public comment period was open from April 14 to May 14, 2025. The letter provided website links to the English and French versions of the full IPD report and plain language summary, and a list of locations where printed copies of the IPD could be accessed.
- **June 2025:** Energy Alberta completed outreach to landowners and residents within and adjacent to the two site option boundaries. Engagement activities included either an in-person meeting, a phone call, or written correspondence offering a meeting when landowners could not be reached in person.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

- **July 2025:** Energy Alberta distributed a notice of activity by mail and via email, where possible, of upcoming summer 2025 fieldwork near the proposed siting options 1 and 2.
- **November and December 2025:** Energy Alberta conducted landowner and resident visits providing a brief update on the status of the Project, including information on the regulatory timeline pause and ongoing Project planning activities. Where landowners could not be contacted in person, Energy Alberta sent a follow-up letter providing the Project update and inviting landowners to connect directly with Energy Alberta representatives.

Further details regarding engagement and communications with neighbouring residents and landowners can be found in Appendix C.

3.1.6 General Public

Providing opportunities for education, enhancing general understanding about the Project and the associated potential impacts and benefits, is a key objective of engagement with local residents and members of the public. Energy Alberta plans to use a variety of activities to engage with the public, including open houses, engagement sessions, workshops, participation in community events, community pop-up conversations and direct access email and phone lines. For the general public and local residents who may prefer or not be able to engage in person, Energy Alberta will provide online engagement tools.

Public engagement activities completed to date include:

- **March 2025 – Public Open House:** Energy Alberta conducted a public open house on March 11, 2025, at the Weberville Community Hall and welcomed approximately 350 individuals, including community members, local government officials, and local business owners. Following the open house, Energy Alberta published a report entitled “Listening First: What We Heard at the Peace River Open House” which can be found on our website at: <https://www.energyalberta.com/blog-posts/peace-river-open-house-march2025>

A summary of feedback received from open house attendees can be found in Appendix D.

- **September 2025 – Public Engagement Sessions:** Energy Alberta returned to the Peace Region to host a series of four public engagement sessions taking place between September 22 and 25, 2025. Engagement Sessions were held in Peace River, Weberville, Grimshaw and Manning. Energy Alberta welcomed over 250 attendees over the four sessions. In these sessions, Energy Alberta sought to share more detailed information on nuclear fundamentals, environmental effects, community impacts, employment, training and procurement and siting to seek feedback and inform the scope of the TISGs.

In the form of an asynchronous townhall, subject matter experts spoke to small groups at stations, giving a 15-minute presentation on their topic followed by a facilitated Question and Answer period.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

A summary of what we heard during these sessions can be found on our website at: <https://www.energyalberta.com/blog-posts/what-we-heard-peace-region-engagement-sessions-september-2025>. Detailed feedback from attendees can be found in Appendix E.

- **September 2025 – Peace River Job Fair:** Energy Alberta hosted a booth at the Peace River Job Fair in September 2025, engaging with attendees on the types of jobs that would be needed based on existing facilities and answering general Project-related questions.
- **Ongoing – Participation in Community Events:** To date, Energy Alberta has participated in two high-traffic public community events, taking the opportunity to answer questions and speak with hundreds of community members about interests and concerns related to the proposed Project.

3.1.7 Preliminary Topics of Interest

Energy Alberta has compiled a list of preliminary topics of interest communicated by stakeholders to date including, but not limited to, those listed in Table 3.1-1. While some topics listed may overlap or intersect, Energy Alberta has erred on the side of inclusion to ensure no topics of interest are overlooked.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 3.1-1: Preliminary Topics of Interest – Public and Stakeholders

Theme	Key Issue or Interest Identified
Accidents or Malfunctions	Interests regarding accident and malfunction scenarios that will be assessed Concerns regarding worst-case scenarios, including major nuclear accidents and long-term regional consequences Questions regarding emergency evacuation zones, accident modelling, and abnormal release scenarios Interests regarding emergency response scenarios, including financial and social recovery Interests regarding potential impacts of hydrogen buildup, industrial fire risks, and nearby facilities on the facility Concerns regarding emergency suppression systems and accidental releases Concerns regarding the potential for a fire or explosion on site and emergency response plans to ensure worker and community safety
Archaeology	Interests regarding how archaeological resources and heritage sites will be identified and protected Interest regarding how baseline field work will influence final site decision process
Air Quality	Concerns regarding contaminants (chemical and radioactive) entering the atmosphere Questions and interests regarding steam plumes, ice fog, and long-term atmospheric releases Concerns regarding auxiliary emissions (e.g., diesel generators, transport, maintenance chemicals) Interests regarding whether ongoing monitoring data will be made publicly available Interests regarding placement of the air quality monitoring station Interests regarding parameters for ongoing air quality management programs Concerns regarding chemical releases, heavy metals, solvents, and industrial waste Interests regarding transparent disclosure of contaminant releases to the environment (radiological and non-radiological) Concerns regarding long-term soil and agricultural impacts due to air contamination
Baseline Studies	Interests regarding ensuring credible, local baseline data is collected to inform the IA Concerns regarding whether sufficient historical data exists for northern Alberta conditions Interests regarding desires for publication of all baseline studies
Birds and Bird Habitat	Concerns regarding migratory birds, waterfowl, and species interacting with cooling ponds or plumes
Capacity Funding	Interests regarding the insufficiency and availability of non-Indigenous participant capacity funding Interests in obtaining funding for independent technical reviews and third-party expertise Concerns regarding lack of participant funding undermining consultation process

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 3.1-1: Preliminary Topics of Interest – Public and Stakeholders

Theme	Key Issue or Interest Identified
Climate Change	Interests regarding the Project's long-term impacts on climate change Interests regarding ensuring assessment on the effects of the Project on the environment including construction and uranium mining Interests regarding climate effects on the Project, particularly as it relates to potential drought or wildfire situations
Community Investment and Sponsorship	Interests regarding a desire for visible, long-term community contributions beyond the construction phase
Cumulative Effects	Concerns regarding potential combined cumulative effects with pulp mills, dams, oil and gas, agriculture, and other industry Interests regarding total regional demand on water, land, and services
Economic – Community Development	Interests regarding opportunity for the Project to prevent regional economic decline and stimulate growth Concerns regarding impacts on inflation and local affordability
Engagement	Interests regarding desires to understand engagement programs with local communities Interests regarding desires for ongoing, transparent, face-to-face engagement Interests requesting studies, findings, and responses be shared in plain language Interests regarding understanding proponent's plans for engaging youth and underrepresented groups
Project Economics	Interests regarding whether the Project has a strong business case Interests regarding long-term business competitiveness of adding a facility like this to the Alberta power grid Interests regarding Project funding and investors
Economic Effects	Concerns regarding boom-and-bust cycles during construction, operations, and decommissioning Concerns regarding wage inflation and worker shortages, putting non-Project businesses and service providers under financial strain Concerns regarding potential long-term impacts on resource-based livelihoods, such as hunting, fishing and agriculture Interests regarding the potential distribution of tax revenue generated from the Project
Emergency Management	Interests regarding adequacy of emergency preparedness and response plans Interests regarding evacuation planning, response capacity, and hospital readiness Interests regarding ensuring the proponent coordinates with local emergency services Interests regarding long-term site security and contractor roles

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 3.1-1: Preliminary Topics of Interest – Public and Stakeholders

Theme	Key Issue or Interest Identified
Employment and Training	Interests regarding importance in local hiring, youth scholarships and paid training pathways Interests regarding defining “local” and “regional” as it relates to employment opportunities Interests regarding a bursary or scholarship program for training local workforce Interests regarding ensuring training and employment are accessible to all demographics
Environment – General	Concerns about duration and irreversibility of environmental effects
Environment – Water	Interests regarding whether there will be cooling water or thermal discharge into the Peace River Concerns regarding Peace River water withdrawals, allocation and drought scenarios Interests regarding water licensing limits and upstream dam coordination Interests in understanding closed-loop cooling and discharge management Interests regarding potential aquifer impact Interests regarding river temperature, flow reduction and aquatic ecosystem changes Concerns regarding contaminants (non-radioactive and radioactive) entering waterways Concerns regarding management of competing water users and low-flow conditions
External Events and Hazards	Concerns regarding potential impacts of wildfires, oil and gas incidents, flooding and extreme cold conditions on the facility
Fish and Fish Habitat	Interests regarding long-term monitoring of fish health and spawning
Human Health	Interests regarding understanding long-term health effects and monitoring Concerns regarding radiation exposure and potential for release of carcinogens Concerns regarding potential contamination of fish, wildlife, farmland, and food chains
Indigenous Knowledge	Interests regarding understanding of how the proponent is conducting meaningful engagement and incorporation of Indigenous knowledge Interests regarding consultation and benefit-sharing opportunities
Indigenous Sites of Significance	Interests regarding mapping, setbacks, and consultation before making a siting decision Concerns regarding protection of sacred and culturally significant sites
Indigenous Traditional Land and Resource Use	Interests regarding potential effects on traditional land use and food systems and long-term stewardship Concerns regarding potential impacts on hunting, trapping, fishing and generational legacy Interests regarding desire to protect Indigenous cultural identity

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 3.1-1: Preliminary Topics of Interest – Public and Stakeholders

Theme	Key Issue or Interest Identified
Infrastructure and Services	Concerns regarding potential impacts to local housing and price inflation Interests regarding potential effects of increased housing demand on homelessness, seniors, and low-income residents Concerns about potential housing oversupply after construction Concerns regarding pressures on schools, hospitals, policing, healthcare, and social services Interests regarding sequencing, funding, and responsibility of infrastructure and services upgrades prior to workforce arrival Interests regarding Peace River airport upgrades/reopening for commercial flights
Land and Resource Use	Interests regarding agricultural compatibility and land use within exclusion zones Concerns regarding loss of agricultural land for facility footprint Interests regarding desire to preserve “pristine farmland” Concerns regarding farmland loss and soil compaction Concerns regarding the potential impacts to agricultural food pathways Interests regarding setbacks from wells, aquifers, and oil infrastructure
Meteorological Conditions and Hazards	Concerns regarding steam plumes due to mechanical cooling and the potential effects on fog, frost, precipitation, and winter ice formation Interests regarding modelling local weather effects
Power Costs and Rates	Interests regarding electricity pricing, long-term contracts, and cost to consumers Interests regarding cost of power comparison to natural gas and other forms of renewables
Powerlines	Interests regarding transmission expansion and power destination (local versus export) Concerns regarding new transmission corridors and potential land impacts
Procurement and Business Opportunities	Interests regarding local procurement opportunities and clear contracting pathways Interests regarding the need for early communication of vendor requirements Interests regarding the desire for Indigenous and regional business inclusion
Project Need	Interests regarding whether Alberta requires additional baseload capacity Interests regarding energy independence vs. interconnection with U.S. grid Interests regarding whether power will be supplied to potential Artificial Intelligence (AI) Data Centers in the region Interests regarding electricity demand projections, and export intentions

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 3.1-1: Preliminary Topics of Interest – Public and Stakeholders

Theme	Key Issue or Interest Identified
Project Phases and Schedule	Interests regarding timelines for siting decision and construction Concerns raised regarding early-stage design uncertainty Interests raised regarding a timeline for an operator to be selected
Radioactivity	Concerns regarding potential radiation exposure pathways Concerns regarding airborne tritium, long-term waste radioactivity, and dose modelling Interests regarding potential production of medical isotopes
Regulatory Process	Concerns regarding regulator trust and outdated regulations Interests regarding compliance with evolving international standards Interests regarding understanding efficiencies in regulatory process that could improve timelines Interests regarding the timeline for a federal government decision on the Project Concerns regarding the region's stance as a "willing host" Questions regarding whether local consent or plebiscites will influence federal decision-making Interest in ensuring IS is adequately inclusive of community interests, concerns, and priorities Interests regarding how the federal and provincial governments will collaborate on the provincial Environmental IA
Rights of Indigenous Peoples	Interests regarding consultation depth, consent, and potential veto authority from Indigenous Nations and Communities
Riparian and Wetlands	Interests regarding setbacks from wetlands Concerns regarding Peace River arch and groundwater salinity
Community Resilience and Safety	Concerns regarding influx of workforce, out-migration, and long-term community destabilization Concerns regarding community disruption, crime, and social stress Concerns regarding long-term lifestyle change and loss of rural community character Concerns regarding stress, division, and erosion of local identity Interests regarding preserving quality of life and northern character Interests regarding plans for integrating temporary workers into communities
Safety of Facility	Interests regarding understanding safety features of the facility Interests regarding long-term safety upgrades and modernization Interests regarding decommissioning plan and bonds
Security	Concerns regarding extreme scenarios (e.g., war, terrorism, hacking, dam breach) Interests regarding cybersecurity standards and oversight

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 3.1-1: Preliminary Topics of Interest – Public and Stakeholders

Theme	Key Issue or Interest Identified
Seismic	Interests regarding how fracking, kimberlite pipes and regional seismic history factor into facility design Interests regarding maximum design-basis earthquake capacity Interests regarding seismic tolerance and geological stability
Site Evaluation	Interests regarding understanding the difference between screening vs detailed analysis on siting Interests regarding data sources and use of Light Detection and Ranging (LiDAR) technology for geological studies
Siting and Selection	Concerns regarding potential impacts to agricultural land use and river proximity Interests regarding distance between site options and access routes Interests regarding understanding rationale for Peace River location
Species At Risk and Habitat	Interests regarding endangered species present in the region and mitigation plans Interest in cumulative habitat fragmentation
Surface Water	Concerns regarding Peace River flows, allocation percentages and drought Concerns regarding potential dam breach scenarios and downstream effects
Integrated Tailored Impact Statement Guidelines	Interests regarding how local feedback shapes TISG requirements Interests regarding a desire for public feedback to be reflected in federal guidelines
Technology Selection	Interests regarding reactor technology options and PPE approach Interests regarding a desire to better understand the differences between the two potential technology options
Topography, Soil and Sediment	Interests regarding erosion, sediment transport, and soil contamination Concerns regarding potential impacts on agricultural productivity Interests regarding historical riverbank instability in the region
Transportation – Airports	Interests regarding potential airport upgrades and commercial viability Interests regarding proponent’s plans for workforce transport and regional connectivity
Transportation – Waste Management	Concerns regarding transport of nuclear materials through the region Interests regarding tracking, regulation, and accident risk
Waste Management – Storage	Concerns regarding lack of viable and approved permanent nuclear waste repository in Canada for this Project Interests regarding dry storage duration and long-term responsibility of management
Water Use and Water Supply Waterways	Interests regarding on-site water storage ponds and reserve quantity

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Table 3.1-1: Preliminary Topics of Interest – Public and Stakeholders

Theme	Key Issue or Interest Identified
Wildlife and Wildlife Habitat	Concerns regarding potential impacts to wildlife due to habitat disruption Concerns regarding long-term ecosystem disturbance and cumulative impacts

AI = Artificial Intelligence; IA = Impact Assessment; IS = Impact Statement; TISG = Integrated Tailored Impact Statement Guideline; PPE = Plant Parameter Envelope.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

3.2 Future Public and Stakeholder Engagement Activities

Public and stakeholder engagement activities planned for 2026 and beyond include:

- **Ongoing Meetings:** Energy Alberta will continue to be available to meet with interested stakeholder groups to present Project information and address any questions or concerns. Planned standing meetings will include a quarterly CAO update for local governments and regular delegation presentations to municipal councils.
- **Community Pop-ups:** Energy Alberta will continue to hold informal small group discussions in local venues to connect with the public on the proposed Project, gather feedback, and answer questions.
- **Community Information Sessions:** Energy Alberta will hold public engagement sessions as needed to share Project updates and to seek input into Project plans at key points in time.
- **Workshops:** Conduct topic-specific technical workshops that allow attendees to discuss the potential Project impacts, share their perspectives, and contribute to the planning process.
- **Socio-economic Working Group:** Energy Alberta plans to form a working group made up of local government representatives and social service providers to help inform the development of the socio-economic effects assessment.
- **Community Events:** Energy Alberta will continue to seek opportunities to participate in local community events where they provide an opportunity to engage directly with members of the public on the Project.

Stakeholder engagement activities will continue to adapt as additional input from the public and other interested parties is received on how they would prefer to be engaged.

4 COMMUNICATIONS

The following summary for Communications includes the work that Energy Alberta has conducted since the outset of the Project through to December 2025, as well as plans for ongoing and upcoming communications initiatives. Our approach is guided by a commitment to transparency and accountability and a dedication to delivering open, honest, and frequent communications based on the following principles:

- **Inclusivity:** Use multiple channels and styles of sharing information to meet the needs of our diverse stakeholders and the public.
- **Relationship building:** Develop authentic and positive long-term relationships.
- **Respect:** Respect individual values, recognize the legitimacy of concerns and questions.
- **Responsiveness:** Provide timely feedback and information in response to questions or issues raised.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

- **Adaptability:** Adjust approaches as the Project progresses and new information or feedback emerges.

Since the outset of the Project, Energy Alberta has implemented an integrated and multi-channel communications approach designed to ensure widely available, transparent information about Project planning, milestones, industry and technical information and opportunities for engagement. This approach includes digital channels (website and social media) to help us share information and tell stories about key topics, media relations to provide information and foster relationships with journalists and media outlets as well as information sharing by way of an e-newsletter and two-way communication through a Project information email and toll-free phone line to receive and respond to inquiries from the general public.

Company Website (EnergyAlberta.com)

The website serves as the central source for all Project information, including news, updates, fact sheets, key documents, and engagement opportunities. The site is regularly updated with Project announcements and resources to inform stakeholders and the public about progress and next steps. The site also provides contact information, a procurement registry, a jobs registry and the ability to sign up for Energy Alberta's e-newsletter (The Power Source). Since launching the initial website on December 19, 2024, and the more comprehensive version on February 20, 2025, Energy Alberta has welcomed more than 9,000 visitors to the site.

Content about the Project on the website is presented by the following key sections and sub-sections. The content on the website is maintained to reflect the most current information and status of the Project:

- Project – Project Overview, Benefits, Regulatory
- Sustainability – Engagement, Indigenous Peoples, Environment, Safety
- News – News & Insights, Resources, Events
- About Us
- Contact Us

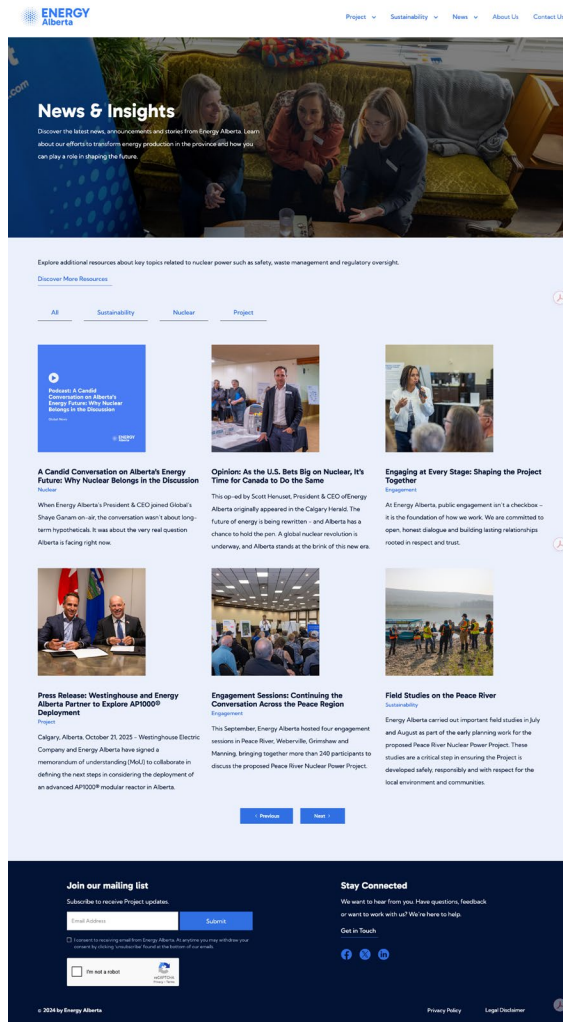

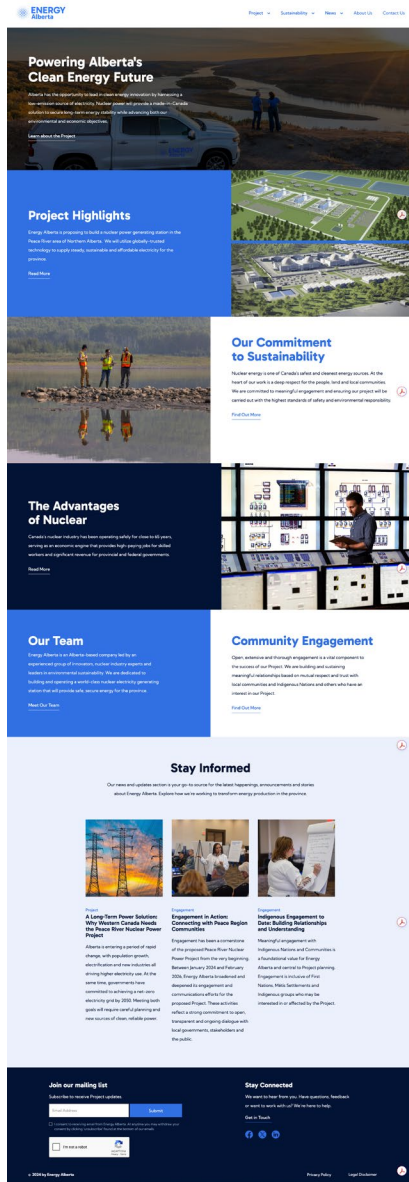

In addition to the main content on the website, information in our *News & Insights* sub-section is presented in narrative, or story format and a series of Fact Sheets are maintained in the *Resources* sub-section on key topics raised by stakeholders and Indigenous Nations and Communities. Over the reporting period, this content included:

- 29 [Web Stories and News Releases](#) on a variety of topics with content aimed at reporting on our activities and providing Project updates. The narrative format often includes photos, video content, and quotes from senior leadership to help provide information in an easy-to-read and narrative manner.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

- Nine [Fact Sheets](#) in printable, PDF format on topics including Project Overview, Nuclear Energy, Jobs and Procurement, Waste Management, Radiation Safety, Water Use, Land Use, Nuclear Safety and Community Resources (Appendix F).

Project Email Address

A public email address info@energyalberta.com was established to provide a channel for stakeholders and those interested in the Project to send emails through the website or their own email service. This contact information is published on the Energy Alberta website and is on public materials including Fact Sheets and business cards.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Between January 2025 and January 2026, Energy Alberta responded to 80 emails to the Project email address.

Media Outreach and Relations

A dedicated media email address was established (Media@EnergyAlberta.com) to ensure timely responses to inquiries from journalists and media organizations, facilitating accurate and transparent reporting on the Project. Energy Alberta issued press releases and executive commentary on strategic developments, partnerships and the broader energy context to amplify understanding of Project goals.

In the reporting period, Energy Alberta received 48 media requests through the media inbox, responded to 35 questions or requests for information, and provided 13 interviews with senior leaders or subject matter experts. Spokespeople were also made available to media outlets during in-person engagement events, and eight interviews were provided to radio stations and print outlets in the Peace River region. Content from these interviews or requests for information appeared in national and local news media.

Active Social Media Presence

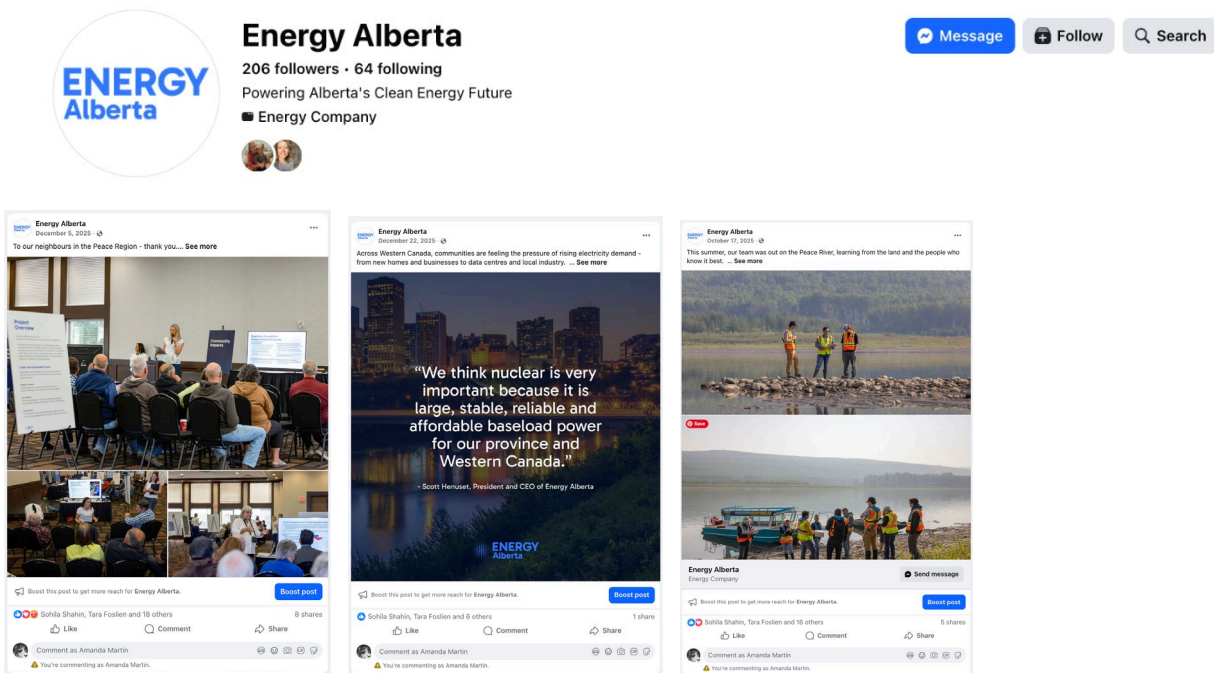

Energy Alberta maintains active profiles on LinkedIn, X (formerly Twitter), and Facebook to share updates, announcements, and engage in dialogue with the broader public.

Facebook

In its first year on Facebook, Energy Alberta focused on building awareness, sharing Project information and creating space for constructive dialogue about the Project. A total of 50 posts were published, resulting in 148 new followers. This steady growth reflects increasing interest in Project updates, engagement activities, and broader conversations about nuclear energy in Alberta.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

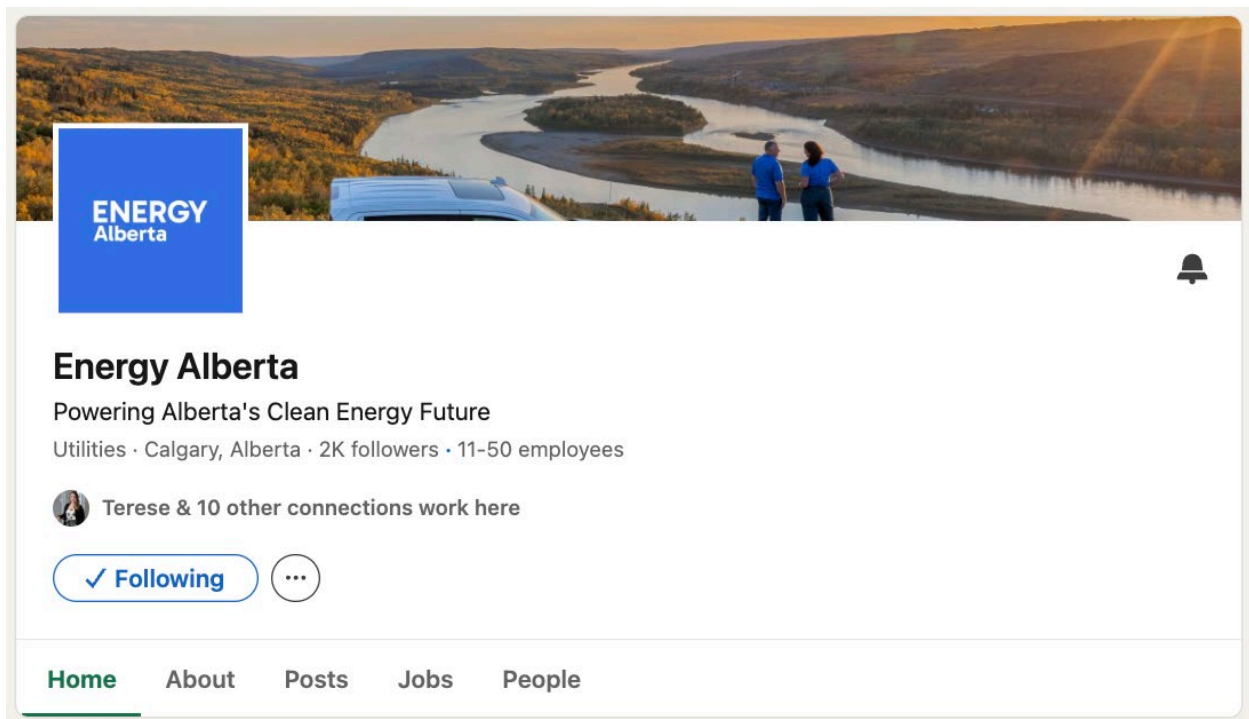

LinkedIn

In its first year on LinkedIn, Energy Alberta established a strong presence among business, government and industry audiences while advancing awareness of the Project. Energy Alberta published 63 posts, maintaining a steady and consistent content cadence. The page welcomed 1,482 new followers, with the largest concentrations in key economic and policy centers. This distribution reflects growing engagement from corporate leaders, policymakers and industry professionals across Canada.

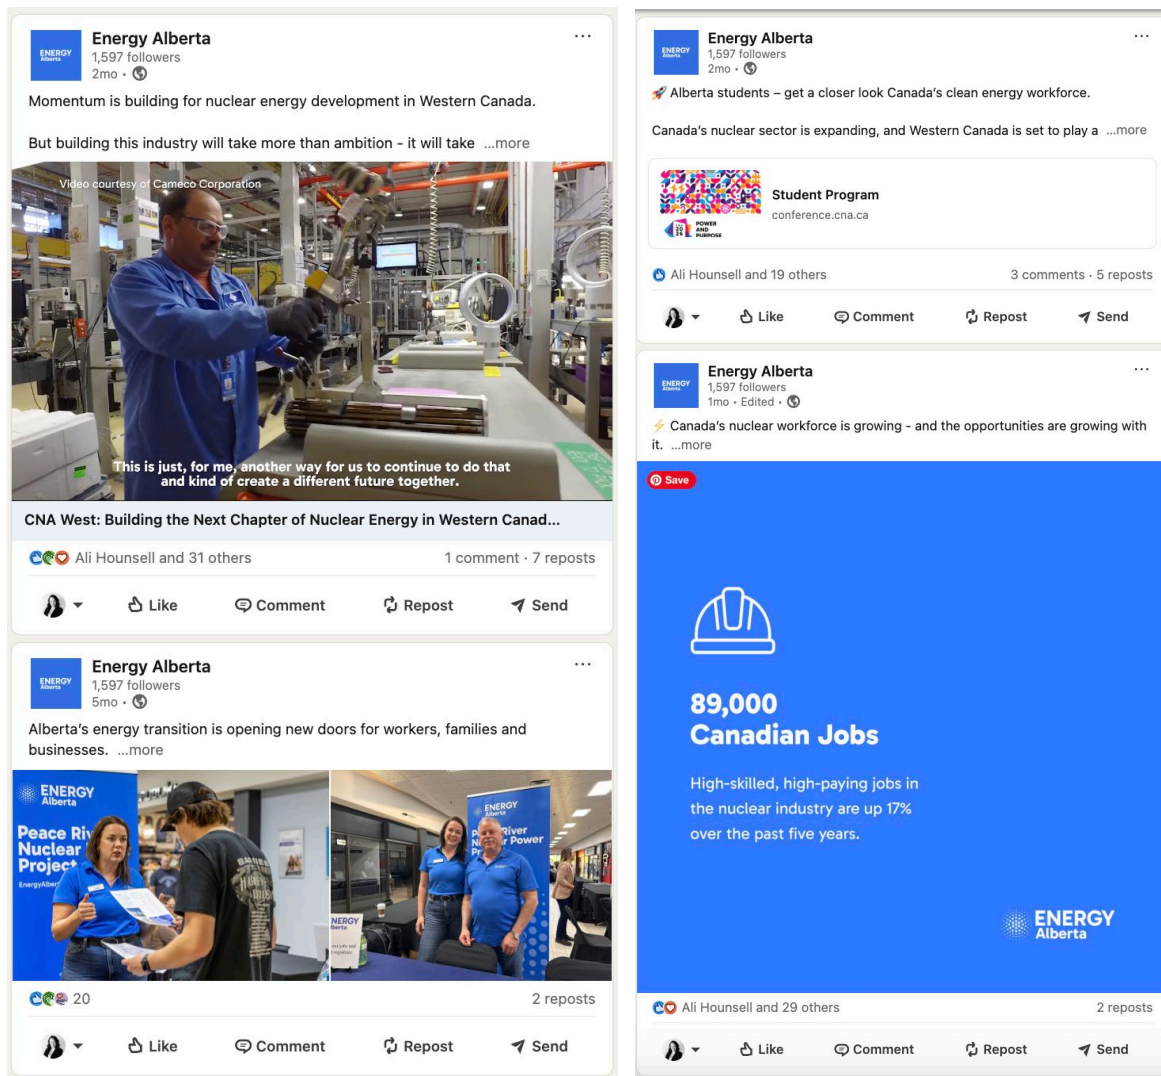

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

X

In its first year on X, Energy Alberta used this platform to share timely updates and reinforce key messages related to the Project. A total of 45 posts were published, reflecting a consistent and active presence. The account welcomed 41 new followers, demonstrating continued interest in Project updates and broader energy conversations.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

E-Newsletter - The Power Source

In 2025, Energy Alberta initiated an e-newsletter, *The Power Source*, to deliver key Project news, milestones, and engagement opportunities straight to subscribers' inboxes, enabling stakeholders to stay informed and receive updates on an ongoing basis. Past issues are also available in PDF format on the [Resources](#) page of the website.

Since 2025, five newsletters were distributed and published. As of December 31, 2025, more than 900 people are registered to receive regular newsletter updates. Sign-ups for *The Power Source* were collected at in-person engagement events and there is a box at the bottom of every page of the Energy Alberta [website](#) to "Join Our Mailing List" encouraging people to subscribe to receive email updates.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

Assessments Relevant to the Project

There are no regional assessments as defined in Sections 92 and 93 of the *Impact Assessment Act* (IAA) in the region near the Project.

PEACE RIVER NUCLEAR POWER PROJECT

Engagement and Communications Report for the Period of January 1, 2024 to December 31, 2025

The Strategic Assessment of Climate Change (SACC; ECCC 2020) is a strategic assessment under Section 95 of the IAA and is relevant to the Project. This relates to the extent to which the Project hinders or contributes to the Government of Canada's ability to meet its commitments in respect of climate change, such as the Paris Agreement, Canada's 2030 target, and the goal of Canada achieving net-zero emissions by 2050. The quantification of greenhouse gas (GHG) emissions per the SACC and its supporting guidance documents is presented in Section 7.8 of ECCC (2020). In particular, descriptions will be provided on how the Project will help Canada achieve the 2050 net-zero carbon emissions target by contributing to decarbonization pathways.

There are no other strategic assessments as defined in Section 95 of the IAA that are relevant to the Project.

Indigenous Knowledge studies will be conducted as the Project progresses, starting from the early stages throughout the IA process. These studies are essential so that the concerns and perspectives of Indigenous Nations and Communities are appropriately understood and addressed. Incorporating Indigenous perspectives can provide valuable insights into the local environment, climate resilience, and sustainable development practices that align with the values of Indigenous Peoples. The use of Indigenous Knowledge will be integrated into environmental monitoring, IA, and the design of mitigation strategies, so that the Project supports the interests of the Indigenous Nations and Communities in the region.

Other Relevant Studies

The following studies or plans may be relevant to the development of the Project:

- **County of Northern Lights Municipal Development Plan Bylaw #10-61-270:** This plan outlines the development guidelines and regulations for the County of Northern Lights, which includes one of the potential sites for the Project.
- **Integrated Watershed Management Plan of the Peace and Slave Watersheds:** This plan focuses on managing water resources in the Peace and Slave watersheds, ensuring sustainable use and protection of water quality.
- **Peace River Water Use Planning:** This plan addresses the use and management of water resources in the Peace River, which is crucial for the Project's water needs.
- **Wood Buffalo National Park World Heritage Site Action Plan:** This plan aims to protect and manage the natural and cultural heritage of Wood Buffalo National Park, which is located near the Project area.

These studies and plans help the Project development align with local development guidelines, sustainable water management practices, and environmental protection efforts.

Appendix A: Indigenous Engagement and Communications Records

ASINI WACHI NEHIYAWAK

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR ASINI WACHI NEHIYAWAK (AWN)

ID	Date	Interaction Type	Summary
C-02189	August 12, 2025	Email	Energy Alberta introduced its team members to AWN and advised that IAAC and the CNSC were seeking comments on the draft integrated TISGs and draft IEPP. Energy Alberta provided information about the summer 2025 field work program and capacity funding and advised it was committed to including Indigenous Knowledge in the Impact Statement. Energy Alberta advised it had begun conducting baseline studies and noted opportunities to participate were available. Energy Alberta advised the capacity funding was meant to support the participation in the planning phase of the Project and provided an application and electronic funds transfer forms for completion. Energy Alberta provided website links to access the English and French versions of the IPD and requested to be contacted for any questions.
C-02176	August 12, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-02183	August 12, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-04424	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02190	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02177	August 28, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02191	September 12, 2025	Email	Energy Alberta sent a reminder of the invitation for the Nation to participate in the Introduction to Siting Workshop on September 24, 2025. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta reminded the Nation of the additional opportunity to attend public engagement sessions will be held from September 22 to 25, 2025
C-02666	September 12, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-05126	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01949	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02178	October 7, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-02184	October 7, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-01911	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02179	October 10, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-02185	October 10, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-01965	October 12, 2025	Email	Project Lead for Asini Wachi Nehiyawak requested information on participation funding for the Project.
C-01966	October 13, 2025	Email	In response to an email from the Project Lead, dated October 12, 2025, Energy Alberta resent and email dated August 12, 2025 that provided information on capacity funding.
C-02180	October 13, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-02186	October 13, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-01988	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02181	October 21, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-02187	October 21, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02138	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02182	November 10, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-02188	November 10, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-02449	November 15, 2025	Email	Energy Alberta received capacity funding application forms from AWN. AWN indicated it looked forward to engagement and site monitoring of the area as soon as possible before any Ground Disturbance.
C-02482	November 18, 2025	Email	Energy Alberta confirmed receipt of AWN's application for capacity funding and indicated it would review the application and get back to AWN as soon as possible.
C-02667	November 18, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-02754	November 28, 2025	Email	Energy Alberta has requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options are attached for review. Input from Indigenous groups is sought before finalizing site selection and moving into the Impact Assessment process. A virtual information session can be arranged to discuss the Project and gather feedback.
C-02756	November 28, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-02757	November 28, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-04425	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02803	December 2, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-02804	December 2, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02889	December 4, 2025	Email	Energy Alberta indicated it was looking to identify Indigenous businesses or individuals that provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta requested recommendations for contacts with relevant experience and expertise, along with any available portfolios or websites.
C-03279	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03317	December 9, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.
C-03318	December 9, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-03401	December 13, 2025	Email	Energy Alberta encouraged the Project Lead to apply for IAAC capacity funding.
C-03403	December 13, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-03548	December 14, 2025	Email	The Project Lead requested contact information for the IAAC Funding application.
C-03547	December 15, 2025	Email	Energy Alberta provided contact information for the Crown Consultation Coordinator at IAAC.
C-03550	December 15, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.
C-03697	December 18, 2025	Email	Energy Alberta wished Asini Wachi a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would be available via cell phone during this time.
C-03729	December 18, 2025	Email	Energy Alberta received an automated response to its email, indicating Council would respond as soon as possible.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03730	December 18, 2025	Email	Energy Alberta received an automated response to its email, indicating that someone would respond as soon as possible.

ATHABASCA CHIPEWYAN FIRST NATION
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR ATHABASCA CHIPEWYAN FIRST NATION (ACFN)

ID	Date	Interaction Type	Summary
C-00188	January 31, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-00189	January 31, 2025	Email	ACFN advised all notifications of consultation must be submitted through Athabasca Chipewyan First Nation Dene Lands and Resource Management and entered into the CKK system. ACFN provided information on the system and advised they would invoice proponents contributing to the CKK for the cost of the screening process within the system. ACFN provided their requirements for engagement and potential consent of activities on ACFN's territory and provided the CKK rate sheet and contact information to the regulatory department.
C-00170	February 12, 2025	Email	Energy Alberta requested a CKK account and to be connected with the finance department to facilitate payment.
C-00166	February 13, 2025	Email	ACFN provided a rate sheet for CKK engagement fees, and inquired which subscription Energy Alberta preferred.
C-02237	February 27, 2025	Email	Energy Alberta indicated it was in the process of obtaining a CKK membership and would upload the necessary materials upon receiving access. Energy Alberta provided an update on its Peace River Nuclear Project, emphasizing the desire for open dialogue and collaboration. Energy Alberta indicated a draft IPD was expected by the end of March, along with preliminary land investigations. Energy Alberta informed that IAAC would begin its engagement process soon. Energy Alberta introduced its key contacts to the Nation.
C-02211	March 7, 2025	Email	The ACFN and its DLRM office acknowledged the update regarding the Energy Alberta Peace River Nuclear Energy Project and indicated it would review the Project submission. ACFN emphasized the need for early engagement, information sharing, and reimbursement for costs as part of their consultation policy.
C-02240	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available. Energy Alberta indicated they were working to comply with ACFN's Community Knowledge Keeper program and would provide updates, as necessary.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02212	April 7, 2025	Email	ACFN Dene Lands and Resource Management expresses thanks for the update on the Peace River Nuclear Power Project. ACFN indicated its main point of contact for the Project and that it looked forward to participating in the comment process with IAAC. ACFN requested that Energy Alberta submit its IPD through NationsConnect.
C-02241	April 8, 2025	Email	Energy Alberta thanked ACFN for sharing the point of contact for ADFN DLRM and indicated that they would update its contact information. Energy Alberta advised it was still working on getting a registration/sign-in for NationsConnect.
C-02242	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-03006	April 28, 2025	Email	Energy Alberta confirmed it had established its profile in Community Knowledge Keeper facilitated through NationsConnect and has uploaded previously emailed documents related to the Peace River Nuclear Energy Project. Uploads included the Initial Introductory Package, notices of upcoming filings, and the updated Project summary. Energy Alberta provided links to additional Project information for the Nation's awareness.
C-02213	April 28, 2025	Email	In response to the April 14, 2025 email from Energy Alberta, the ACFN contact requested to be included in all correspondence regarding the Project and acknowledged the comment period.
C-02243	April 28, 2025	Email	Energy Alberta acknowledged the update to contacts for ACFN and indicated its contact list would be updated.
C-02205	April 30, 2025	Email	NationsConnect confirmed Energy Alberta staff had been added to the Energy Alberta Peace River Nuclear Energy Project on NationsConnect.
C-02244	May 5, 2025	Email	Energy Alberta requested confirmation that ACFN had received the IPD for the Peace River Nuclear Power Project. Energy Alberta indicated it had recently uploaded the documents to NationsConnect. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-02214	May 6, 2025	Email	ACFN thanked Energy Alberta for the notification and links to the information. ACFN indicated it would be reviewing all information throughout the consultation process.
C-02215	May 6, 2025	Email	ACFN acknowledged it had received the notification regarding the IPD for the Peace River Nuclear Power Project and would provide comments to the IPD to the IAAC/CNSC within the specified timeframe and would highlight any impact to treaty rights. ACFN indicated it had no questions but was open to a meeting later when the summary of issues was available.
C-00174	May 12, 2025	Phone	Energy Alberta called ACFN and left a voice mail about capacity funding and requested a call back.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02245	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02475	May 13, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-02246	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support ACFN's efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-02216	May 28, 2025	Email	ACFN indicated it would review the attached documents and provide a response within the week. ACFN reminded Energy Alberta to include ACFN's main contact in all Project-related emails.
C-02217	May 30, 2025	Email	ACFN submitted the capacity funding form and indicated the EFT form had been provided in February 2025.
C-02218	June 11, 2025	Email	ACFN requested if Energy Alberta had reviewed the capacity funding form ACFN had submitted. ACFN indicated it was aware that the Draft Tailored Impact Statement Guidelines had been posted, and that their review would need to start soon with the required funding.
C-02247	June 12, 2025	Email	Energy Alberta indicated it had reviewed the Nation's capacity funding Application and that it would provide funding that matched the funding provided by IAAC. Energy Alberta noted it would welcome the opportunity to meet with you and discuss a collaborative approach between Energy Alberta and ACFN to develop a workplan and associated capacity funding for future phases of the Assessment process and requested a time to meet.
C-02249	June 16, 2025	Email	Energy Alberta advised that all necessary capacity funding paperwork has been received and would be processed. Energy Alberta indicated it was checking on available dates for a meeting.
C-02219	June 16, 2025	Email	ACFN accepted Energy Alberta capacity funding offer and the invitation to meet to create a workplan. ACFN offer potential dates to meet.
C-02248	June 16, 2025	Email	Energy Alberta provided possible dates and times for a meeting with ACFN.
C-02220	June 17, 2025	Email	ACFN acknowledge receipt of Energy Alberta's June 16 email.
C-02250	June 19, 2025	Email	Energy Alberta indicated that the best date for its team for a virtual Introductory meeting would be July 24 from 1 to 2 PM, with a follow-up in-person meeting to be planned for a later date. Energy Alberta requested confirmation of ACFN attendees.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02251	July 2, 2025	Email	Energy Alberta followed up on its June 19 email to confirm if an Introductory meeting on July 24 from 1 to 2 pm was a possibility for ACFN.
C-02221	July 3, 2025	Email	ACFN indicated its availability on July 24 from 1-2 pm and requested Energy Alberta send a meeting invite.
C-02252	July 9, 2025	Email	Energy Alberta confirmed it has sent a calendar invite for the Introductory Meeting on July 24, 2025.
C-02222	July 9, 2025	Email	Energy Alberta received an automatic out of office reply from ACFN indicating the representatives away period from July 7-9.
C-02253	July 9, 2025	Email	Energy Alberta indicated it has submitted a document titled "Response to the Summary of Issues" to ACFN via NationsConnect on June 25, 2025 and that the status of the submission had not yet changed to Acknowledged. Energy Alberta requested confirmation that the document had been uploaded correctly and if any further action was needed.
C-02223	July 9, 2025	Email	ACFN checked their records and confirmed they had seen the documents Energy Alberta had uploaded.
C-02236	July 11, 2025	Email	Energy Alberta received confirmation of attendance at the Energy Alberta Meeting with ACFN DLRM.
C-02254	July 16, 2025	Email	Energy Alberta shared that it aimed to incorporate Indigenous knowledge into the Impact Statement for the Peace River Nuclear Power Project by inviting participation in summer field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.
C-02224	July 16, 2025	Email	Energy Alberta received an automatic out of office reply from ACFN indicating the representatives away period from July 11 to 18.
C-02225	July 21, 2025	Email	ACFN confirmed they were interested in participating in the data collection programs, advised they had a participant available for the following week, and requested additional information regarding transportation, a program schedule, PPE, and survey requirements. ACFN inquired about the travel reimbursement options and payment schedule. ACFN advised they had two potential participants for the water intake trip and requested additional logistical information. ACFN advised they were interested in participating in the wildlife survey trip.
C-02206	July 21, 2025	Email	Energy Alberta provided a list of required PPE and items for participants in the upcoming field studies. Energy Alberta indicated that confirmation of meeting locations and times was still pending. Energy Alberta advised of the honorarium rates it would cover related to the water studies and the wildlife survey.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00175	July 22, 2025	Phone	Energy Alberta and ACFN had a phone conversation to discuss fieldwork logistics. ACFN inquired about the travel reimbursement options. Energy Alberta confirmed travel costs, including transportation and accommodations, would be covered. ACFN inquired about the time of the August 28, 2025 meeting. Energy Alberta advised it would follow up to confirm meeting time and location.
C-02162	July 22, 2025	Email	ACFN thanked Energy Alberta for the update and indicated it would await the confirmed location and start time for the 2025 Summer Field Program Opportunities before booking travel.
C-02207	July 23, 2025	Email	Energy Alberta advised of the details for participation in the bathymetry study on July 28 and 29, 2025, including the start time and meeting location. Energy Alberta indicated that participants would need to provide their own meals and noted it would reimburse meal costs. Energy Alberta requested that ACFN provide the participant's name and cell phone number for coordination.
C-02226	July 23, 2025	Email	ACFN provided the contact information for its community member participating in the bathymetry study and provided a table outlining their set travel expenses.
C-02208	July 23, 2025	Email	Energy Alberta introduced the ACFN Indigenous participant in the river channel depth survey to the Survey Leads. Energy Alberta provided emails and cell numbers and details for the start time and location.
C-02192	July 23, 2025	Email	Indigenous participant in the river channel depth survey of the Peace River Nuclear Power Project thanked Energy Alberta for the contact information.
C-02193	July 24, 2025	Email	Nation's representative confirmed attendance for the Energy Alberta Meeting with ACFN DLRM scheduled for July 24, 2025.
C-00178	July 24, 2025	Virtual / Online meeting	Energy Alberta had an Introductory Meeting with the Nation and discussed various aspects of its proposed Project, including scope, regulatory processes, construction timelines for reactors, site selection, and community engagement. ACFN raised concerns about construction timelines, employment opportunities for Indigenous communities, social assessments, water usage, and treatment, and the Project's alignment with UNDRIP and Bill C-5. Energy Alberta provided information on mitigations, water management, and consultation funding, and expressed willingness to engage with ACFN on economic partnerships and relationship agreements. Energy Alberta indicated that it anticipated site selection completion by the end of 2025, with workshops planned for community participation.
C-02209	July 24, 2025	Email	Energy Alberta provided a copy of the slides reviewed in the July 24, 2025 Introductory meeting and indicated that a list of action items would be provided the following week.
C-02194	July 25, 2025	Email	ACFN confirmed receipt of the July 24, 2025 presentation and advised it would follow up if they had any questions.
C-02195	July 28, 2025	Email	ACFN informed Energy Alberta that it had heard that the River Channel Depth Survey had not commenced on July 28, 2025 as planned and the work would shift to start on July 29, 2025 instead.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02255	July 28, 2025	Email	Energy Alberta confirmed that the start date for the Channel Depth Survey work had been postponed to July 29. Energy Alberta indicated that any further changes in schedule would be communicated.
C-02196	July 28, 2025	Email	Energy Alberta received out of office messages from ACFN related to its July 28 email.
C-02256	July 28, 2025	Email	Energy Alberta provided the Indigenous participant with an update regarding the start of the River Channel Depth Survey work and that they would now start on July 30, 2025. Energy Alberta advised they would provide any further updates, as necessary.
C-02197	July 28, 2025	Email	The ACFN thanked Energy Alberta for the update and indicated that the delay would exceed the time the participant had anticipated to be working in Peace River area and would need to obtain approval from the office.
C-02257	July 28, 2025	Email	Energy Alberta thanked the Indigenous participant for the update.
C-02198	July 29, 2025	Email	Indigenous participant indicated the return flight had been extended but would not be able to extend it any further. Indigenous participant requested confirmation that work would proceed as planned the following day.
C-02258	July 29, 2025	Email	Energy Alberta confirmed that the Channel Depth Survey work was confirmed to start on July 30, 2025.
C-02199	July 29, 2025	Email	Indigenous participant thanked Energy Alberta for the update.
C-02238	July 31, 2025	Email	Energy Alberta received an invite from the Chief to ACFN's inaugural Decolonizing Lands and Water Summit.
C-03007	July 31, 2025	Email	Energy Alberta provided the list of action items from the July 24, 2025 meeting and requested ACFN provide any missed action items. Energy Alberta provided a website link to the Nuclear Waste Management Organization and advised it would follow up with information regarding the next meeting.
C-02228	August 12, 2025	Email	ACFN thanked Energy Alberta for the follow up email and indicated it was looking forward to hearing more on the workshop and continuing with the filed work visits.
C-02163	August 14, 2025	Email	Energy Alberta thanked ACFN for participating in the recent water channel depth survey. Energy Alberta invited ACFN to send a participant to the preliminary water intake siting tour for the Peace River Nuclear Power Project on September 3, 2025. Energy Alberta provided additional information including meeting location, personal protective equipment requirements, and compensation offered. Energy Alberta requested a response with the participant's contact information before August 22, 2025.
C-02259	August 16, 2025	Email	Energy Alberta thanked the Indigenous participant for his support in the River Channel Depth Survey and requested his perspectives on the experience.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02200	August 17, 2025	Email	The ACFN participant provided an overview of his participation in the River Channel Depth Survey and indicated that the Nation was working to see if someone could participate in the next field study on September 3, 2025.
C-02201	August 18, 2025	Email	ACFN confirmed a participant would be able to attend the siting intake tour.
C-02210	August 18, 2025	Email	Energy Alberta thanked ACFN for the confirmation and advised it would provide meeting location and start time of the water intake siting tour in a follow-up email.
C-05134	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-00186	August 28, 2025	Email	Energy Alberta provided information about the upcoming water intake siting tour including its date and time, meeting location, refreshments, personal protective equipment requirements, compensation offered, a media waiver, and contact information for logistical questions. Energy Alberta advised refreshments would be provided on the boat and requested the participants' dietary preference. Energy Alberta advised a photographer would be accompanying the tour and requested participants return the executed media waiver if they consented to having their photograph taken.
C-02260	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification provided an update related to the pause in the regulatory timeline for the Project and requested ACFN's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02229	September 4, 2025	Email	ACFN thanked Energy Alberta for purchasing tickets to attend the Decolonizing Land and Water Summit and requested the names of the two attendees.
C-02261	September 4, 2025	Email	Energy Alberta provided the names of the people who would be attending the Decolonizing Land and Water Summit.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02230	September 4, 2025	Email	ACFN thanked Energy Alberta for the information provided and requested confirmation if the attendees would be joining the evening gathering.
C-02262	September 4, 2025	Email	Energy Alberta requested information on the evening gathering.
C-02231	September 4, 2025	Email	ACFN provided details of the evening gathering.
C-02232	September 5, 2025	Email	ACFN confirmed they were interested in attending the September 24, 2025 Project siting workshop and advised the website link to register for the public engagement session did not work. ACFN requested an information package for the siting tour and inquired if Energy Alberta had planned any virtual information sessions.
C-02263	September 6, 2025	Email	Energy Alberta requested the name of the attendee from ACFN for the September 24, 2025 Project siting workshop and whether or not that person has any dietary restrictions. Energy Alberta confirmed that there were no virtual options for attendance at the public information sessions.
C-02202	September 6, 2025	Email	Energy Alberta received an out of office message from the ACFN participant.
C-02233	September 8, 2025	Email	ACFN confirmed the ACFN participant's contact information and dietary restrictions for the Project siting workshop.
C-02264	September 8, 2025	Email	Energy Alberta confirmed receipt of ACFN's September 8, 2025 email providing information of the participant attending the siting workshop.
C-02265	September 11, 2025	Email	Energy Alberta advised the names of the people who would be attending the Summit and the evening Gathering on September 17, 2025.
C-00020	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-00056	September 23, 2025	Email	The Nation thanked Energy Alberta for the pre-reading material.
C-05131	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-02269	September 29, 2025	Email	ACFN Chief thanked Energy Alberta for its acknowledgement of the National Day for Truth and Reconciliation and Orange Shirt Day and looked forward to meeting the Energy Alberta team to talk about possible partnerships and ownership in the Project.
C-02266	September 29, 2025	Email	Energy Alberta indicated to the ACFN Chief that it had followed up with ACFN staff regarding his request for a meeting to discuss potential partnerships and ownership related to a Project.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02267	October 2, 2025	Email	Energy Alberta followed up with ACFN staff regarding discussion at the recent Summit regarding a meeting requested by ACFN Chief with leadership at Energy Alberta to discuss potential partnerships in the Peace River Nuclear Power Project. Energy Alberta requested potential dates for the meeting.
C-02164	October 3, 2025	Email	ACFN indicated it would look into available dates and get back to Energy Alberta.
C-01913	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01946	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02234	October 8, 2025	Email	ACFN indicated it had reviewed the Technology letter and indicated it would request further technical information on the technology being considered. ACFN indicated that they expect further conversations to be had in the community and would be in touch about dates and times to set up a meeting with Energy Alberta.
C-01964	October 9, 2025	Email	Energy Alberta advised it was exploring various reactor technology options while maintaining key safety features and operational functions consistent with the Project scope. Energy Alberta advised that IAAC had been informed of these considerations, and any necessary changes to regulatory documentation would be addressed. Energy Alberta advised that feedback from stakeholders remains important, and further technical information will be provided to the Nation, along with plans for community discussions and meetings.
C-01910	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02235	October 10, 2025	Email	Energy Alberta received an automatic out office email noting a period from October 10 to 13.
C-04430	October 15, 2025	Phone	Energy Alberta and ACFN discussed the potential for an in-person meeting in Calgary to share an overview of Accden and explore opportunities to work together. Energy Alberta clarified that the original request to meet and discuss economic opportunities had come from the Chief when Energy Alberta team members attended the Decolonizing Lands and Water Summit.
C-02203	October 15, 2025	Email	ACFN followed-up to the phone call held that day regarding the potential to meet in-person in Calgary and suggested some potential meeting dates. ACFN indicated that the separate meeting request from the Chief to Energy Alberta would be coordinated by his colleague.
C-02204	October 15, 2025	Email	Energy Alberta received an invoice for travel expenses incurred by ACFN staff members and their recent trips to the Peace River area.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02239	October 17, 2025	Email	ACFN indicated that it follows a defined due diligence process for partnerships and business opportunities. In terms of a potential meeting between Energy Alberta and the Chief regarding potential opportunities, ACFN requested that Energy Alberta follow the established process.
C-02268	October 17, 2025	Email	Energy Alberta reminded ACFN that the request to meet was initiated by the ACFN Chief, and that it was happy to step back and follow the defined process, however Energy Alberta also want to ensure that in doing so, the Chief's specific request was not missed.
C-02165	October 17, 2025	Email	ACFN thanked Energy Alberta for the additional context and indicated it would discuss with Chief and get back to Energy Alberta, likely after the first week of November.
C-01989	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02166	October 27, 2025	Email	ACFN thanked Energy Alberta for the update on the technology being considered for this Project. ACFN requested technical and safety information of the reactors being considered.
C-02139	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they are included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02167	November 10, 2025	Email	ACFN out of office mail indicated its offices would be closed on Sept. 11th in observance of Remembrance Day.
C-02148	November 10, 2025	Email	ACFN welcomed the new Energy Alberta team member.
C-02679	November 21, 2025	Email	ACFN Land and Resource Management office provided a link to all the presentations, photos, and videos from the Decolonizing Lands and Water Summit.
C-02795	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02963	December 2, 2025	Email	ACFN indicated it would review its schedules and let Energy Alberta know if they would be attending. ACFN asked if Energy Alberta would cover travel costs and if there would be a virtual option for attendance.
C-02839	December 2, 2025	Email	Energy Alberta advised it would not cover travel costs for an optional training workshop on nuclear energy fundamentals, but will cover the trainers fee, venue, and lunch. Energy Alberta mentioned there was currently no virtual option for the workshop, but a request for one had been noted.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02965	December 2, 2025	Email	ACFN indicated it looked forward to hearing about virtual or in community sessions.
C-02881	December 3, 2025	Email	ACFN indicated they would be interested in a virtual workshop or a workshop in their community. Energy Alberta team member committed to responding when information about other options were available.
C-02890	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Recommendations for contacts with relevant experience and expertise were requested, along with any available portfolios or websites. The aim was to advance economic opportunities for members of the Nation.
C-02958	December 4, 2025	Email	ACFN provided a link to entrepreneurs from ACFN and also copied their Employment Liaison Advisor.
C-02957	December 4, 2025	Email	Energy Alberta thanked ACFN for their correspondence on its request for digital graphic design or visual narrative services and agreed to review what ACFN provided.
C-03257	December 9, 2025	Email	ACFN indicated that they may have a graphic design contact, and will check if they would like to have their contact information shared with EA.
C-03258	December 9, 2025	Email	Energy Alberta thanked ACFN for their reply regarding graphic design services.
C-03278	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of the proposed Project, and that all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Energy Alberta mentioned that selection of a specific nuclear reactor technology and detailed design is not required for early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that looks at ranges for key features such as cooling water needs, building size and land area, that covers general requirements for many designs rather than for a specific reactor. Energy Alberta provided links to two potential reactors that were under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03316	December 9, 2025	Email	Energy Alberta received an automated response indicating that the ACFN consultation contact would be out of the office from December 8 to 9, 2025.
C-03570	December 15, 2025	Email	ACFN DLRM team requested that Energy Alberta send their emails directly to its core team and not to the Chief's email and that they would keep Chief and Council updated on all ongoing consultations.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03571	December 16, 2025	Email	Energy Alberta thanks ACFN DLRM for the feedback and confirmed they would update their contact list with this information provided.
C-03686	December 18, 2025	Email	Energy Alberta wished ACFN a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

BEAVER FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR BEAVER FIRST NATION (BFN)

ID	Date	Interaction Type	Summary
C-00192	October 16, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-00212	October 28, 2024	Email	Energy Alberta followed up on the October 16, 2024 initial Project introduction package and requested BFN's availability for a meeting the first week of November 2024. BFN advised they would provide their availability, inquired about the purpose of the meeting, and inquired whether consultation process had begun. Energy Alberta advised it would be a Project introductory meeting, and noted the consultation process was not yet underway however Energy Alberta wanted to provide Project information to BFN prior to submission to regulators.
C-00213	October 30, 2024	Phone	Energy Alberta left a voicemail inquiring as to whether BFN had reviewed the October 16, 2024 initial Project introduction package and requested a call back regarding arranging a meeting in November 2024.
C-00214	November 1, 2024	Phone	Energy Alberta phoned and left a voicemail requesting a call back to schedule a meeting to discuss the Project.
C-00215	November 1, 2024	Email	Energy Alberta followed up on their October 30, 2024 voicemail to BFN and requested BFN's availability for a meeting on November 6 or 7, 2024.
C-00216	November 5, 2024	Email	Energy Alberta followed up on their request for BFN's availability for a Project meeting, and provided their availability for November 13 or 15, 2024.
C-00217	November 5, 2024	Phone	Energy Alberta phoned and left a voicemail requesting BFN's availability for a meeting to discuss the Project on November 13 or 15, 2024. Energy Alberta advised they would follow up via email.
C-00218	November 5, 2024	Email	Energy Alberta followed up on their voicemail from earlier that day and requested BFN's availability for a Project meeting on November 13 and 15, 2024.
C-00219	November 5, 2024	Email	BFN provided their contact information to Energy Alberta to arrange a meeting.
C-00220	November 6, 2024	Phone	Energy Alberta phoned and left a voicemail requesting their availability for a Project meeting on November 13 or 15, 2024.
C-00221	November 6, 2024	Email	Energy Alberta emailed in follow-up to the voicemail message left earlier that day and requested BFN's availability for a Project meeting on November 13 or 15, 2024.
C-00222	November 6, 2024	Email	BFN provided their availability for a meeting on November 13, 2024.
C-00223	November 6, 2024	Email	Energy Alberta provided a website link for the November 13, 2024 virtual meeting.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00224	November 6, 2024	Email	Energy Alberta requested a list of attendees for the November 13, 2024 meeting.
C-00225	November 13, 2024	Phone	Energy Alberta phoned and left a voicemail inquiring if BFN were able to join the Energy Alberta team as scheduled for that morning. Energy Alberta indicated they would wait another 10 minutes before leaving the meeting and requested that if BFN was unavailable to the planned meeting they could provide future dates that they would be available to meet.
C-00226	November 13, 2024	Email	BFN advised they had been unable to attend their scheduled meeting due to connectivity issues.
C-00245	November 13, 2024	Text message	Energy Alberta sent a text message to BFN's indicating they had waited for 15 minutes in the meeting to discuss the Project. Energy Alberta requested future meeting availability with the land department, or Chief and Council.
C-00229	November 13, 2024	Email	BFN advised Chief and Council did not meet for consultation and advised a separate meeting would need to be arranged with them.
C-00228	November 13, 2024	Phone	Energy Alberta phoned and left a voicemail requesting their availability for a meeting on November 15, 2024. Energy Alberta requested a call back and provide the contact information.
C-00227	November 13, 2024	Email	Energy Alberta advised a new meeting could be arranged to discuss the Project and acknowledged it would arrange a separate meeting with Chief and Council.
C-00230	November 13, 2024	Phone	Energy Alberta phoned and left a voicemail for BFN requesting their availability for a Project meeting on November 15, 2024.
C-00232	November 26, 2024	Email	BFN requested Energy Alberta's availability for a meeting to discuss the Project.
C-00231	December 2, 2024	Email	Energy Alberta requested BFN's availability for a meeting on December 5 or 6, 2024.
C-00239	December 4, 2024	Email	Energy Alberta followed up on its December 2, 2024 email and provided its availability for December 11, 2024.
C-00242	December 9, 2024	Phone	Energy Alberta called BFN and advised that it would submit a draft IPD to IAAC on December 16, 2024. Energy Alberta advised it would provide BFN with a copy of the draft IPD the following day.
C-00241	December 9, 2024	Email	Energy Alberta followed-up on its December 9, 2024 voicemail to BFN advising that it would like to meet to discuss the Project. Energy Alberta advised that the IPD would be submitted to the IAAC on December 16, 2024.
C-00234	December 12, 2024	Email	BFN provided their availability for a meeting the week of December 16, 2024.
C-00233	December 12, 2024	Email	Energy Alberta requested potential dates for a meeting the week of December 16, 2024.
C-00237	December 12, 2024	Email	BFN provided their availability for a meeting on December 19 or 20, 2024.
C-00236	December 12, 2024	Email	Energy Alberta requested confirmation of BFN's availability for a meeting on December 20, 2024.
C-00240	December 12, 2024	Phone	BFN confirmed their availability for a meeting on December 20, 2024.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00193	December 13, 2024	Email	Energy Alberta provided the draft IPD for review and advised that the draft IPD would be submitted to IAAC in Q1 of 2025. Energy Alberta advised capacity funding was available for the Project and requested BFN provide correspondence outlining how the funding would be used. Energy Alberta requested BFN's availability for a meeting in January 2025.
C-00194	December 13, 2024	Email	Energy Alberta provided the draft IPD for review and advised that the revised IPD would be submitted to IAAC in Q1 of 2025. Energy Alberta advised capacity funding was available for the Project and requested BFN provide correspondence outlining how the funding would be used. Energy Alberta requested BFN's availability for a meeting in January 2025.
C-00238	December 13, 2024	Email	Energy Alberta provided the invitation and website link for a Project introduction meeting on December 20, 2024.
C-00196	December 18, 2024	Email	BFN advised they only received the IPD letter from the December 13, 2024 email.
C-00195	December 18, 2024	Email	Energy Alberta provided a copy of the draft IPD.
C-00197	December 20, 2024	Virtual / Online Meeting	Meeting to introduce the Project. Topics of discussion included regulatory timeline, IPD, Indigenous opportunities, benefits of nuclear energy, water process, public opinion, leakage concerns, impact to wildlife, cumulative impacts, location selection, Project timeline, alternative power options, and community engagement.
C-00198	January 3, 2025	Email	Energy Alberta followed up on its request for a meeting in January 2025 to discuss the IPD and provided its availability for an in-person meeting in Peace River, Alberta on January 21 or 22, 2025. Energy Alberta requested information on how the proposed capacity funding would be used and provided a link to its updated website.
C-00199	January 16, 2025	Email	Energy Alberta provided a revised copy of the draft IPD with corrections to Section 2.3.2. and requested BFN's availability for a meeting in February 2025 to discuss it. Energy Alberta requested an in-person meeting on January 29, 2025 in Peace River, Alberta.
C-00200	January 31, 2025	Email	Energy Alberta requested BFN's availability for a meeting on February 5, 6, 11 or 12, 2025 to discuss the Project. Energy Alberta provided a tentative agenda for the meeting and advised it would follow up to coordinate the next steps.
C-00243	January 31, 2025	Phone	Energy Alberta left a voicemail for BFN requesting their availability for a half-day meeting on February 6, 2025. Energy Alberta requested a call back to schedule the meeting.
C-00244	January 31, 2025	Text message	Energy Alberta requested BFN's availability for an in-person meeting on February 4 or 6, 2025 in Peace River, Alberta and provided a tentative agenda.
C-00246	February 4, 2025	Phone	Energy Alberta left a voicemail following up on its voicemail, text messages, and email dated January 31, 2025. Energy Alberta requested BFN's availability for an in-person meeting on February 6, 2025 to discuss the Project and IPD. Energy Alberta requested a response.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00201	February 21, 2025	Email	Energy Alberta requested a meeting to discuss the Project and advised it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta advised the IAAC would follow up with BFN for an introduction to their process.
C-00247	February 26, 2025	Phone	Energy Alberta left a voicemail following up on its Project update email. Energy Alberta advised there would be an open house in Peace River, Alberta on March 10, 2025. Energy Alberta advised the IPD submission deadline was at the end of March 2025 and requested a meeting for engagement planning and design. Energy Alberta advised the IAAC would commence early engagement and introduced new Energy Alberta team members. Energy Alberta requested an in-person meeting for March 10, 2025.
C-00248	February 27, 2025	Email	Energy Alberta requested an in-person meeting on March 10, 2025 to discuss Project engagement, and provided information regarding the Project open house on March 11, 2025. Energy Alberta advised the IAAC was commencing early engagement and would follow up to provide an introduction to their regulatory process.
C-00258	April 1, 2025	Phone	Energy Alberta phoned and requested confirmation of contact information to provide a draft MOU. BFN advised the contact information was accurate.
C-02279	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02270	April 7, 2025	Email	Energy Alberta provided a draft MOU as a starting point to establish a framework for engagement regarding its proposed nuclear power Project. Energy Alberta indicated that the MOU aimed to foster a cooperative relationship, ensuring meaningful involvement of Beaver First Nation in the Project's development, including environmental stewardship and economic participation. Energy Alberta requested feedback on the draft and suggested a meeting be arranged to discuss it further.
C-02280	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02281	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation that the Nation had received the IPD for the Peace River Nuclear Power Project. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02282	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02476	May 13, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-02283	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-00206	June 25, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta noted the application form would support it in understanding BFN's capacity funding requirements and the EFT form would facilitate quick payments. Energy Alberta advised funding was intended to support BFN's review of the IPD and the TISGs within the IAAC's timeframes, and requested the forms be completed and returned by May 30, 2025 if BFN wished to receive the funding.
C-02284	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-00207	July 16, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02285	July 16, 2025	Email	Energy Alberta shared that it aimed to incorporate Indigenous knowledge into the Impact Statement for the Peace River Nuclear Power Project by inviting participation in summer field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.
C-02289	July 17, 2025	Email	Beaver First Nation indicated that it would like to send a couple people to attend 2025 Summer Fieldwork Program.
C-02286	July 17, 2025	Email	Energy Alberta thanked the Nation for indicating an interest in participation in the 2025 Summer Field Program.
C-02272	July 21, 2025	Email	Energy Alberta provided information regarding the mid-August site visit for the Peace River Nuclear Power Project's water intake locations. The field survey aimed to verify preliminary water intake sites and identify feasible alternatives. The survey would last two days and participants must have water and boat safety experience, be comfortable in water, and possess Personal Protective Equipment (PPE).
C-00252	August 5, 2025	Email	BFN requested an update on the fieldwork program and its start date.
C-02273	August 5, 2025	Email	Energy Alberta advised that the water intake siting inspection work had moved to September and confirmation of those dates would be provided when available.
C-02274	August 14, 2025	Email	Energy Alberta provided details for the preliminary water intake siting tour for the Peace River Nuclear Power Project scheduled for September 3, 2025. Energy Alberta indicated that participants would receive an honorarium and travel expenses would be covered. Energy Alberta requested a response by August 22, with the name and contact information of the participant from the Nation.
C-02271	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02275	August 21, 2025	Email	Energy Alberta followed-up regarding the water intake siting tour to confirm plans to proceed with the tour during the period when it had requested pause in the Impact Assessment Agency's regulatory timeline. Energy Alberta requested the name and contact information of the participant from the Nation.
C-02290	August 25, 2025	Email	Beaver First Nation thanked Energy Alberta for the information regarding the 2025 Summer Fieldwork Program/
C-02276	August 27, 2025	Email	Energy Alberta requested the cell phone number of the Indigenous participant so that field crews could have it in the event that there were any last-minute changes.
C-02291	August 27, 2025	Email	Beaver First Nation provided the requested contact information.
C-00257	August 28, 2025	Email	Energy Alberta provided information about the upcoming water intake siting tour including its date and time, meeting location, refreshments, personal protective equipment requirements, compensation offered, a media waiver, and contact information for logistical questions. Energy Alberta advised refreshments would be provided on the boat and requested the participants' dietary preference. Energy Alberta advised a photographer would be accompanying the tour and requested participants return the executed media waiver if they consented to having their photograph taken.
C-02287	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02278	September 3, 2025	Email	Energy Alberta received an email from the BFN Indigenous participant indicating he would not be able to travel to Peace River to participate in the water intake siting tour. BFN Indigenous participant inquired if there would be any other days available to participate.
C-00255	September 3, 2025	Email	Energy Alberta noted a spring tour could be arranged depending on interest and advised it would follow up.
C-02288	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-05130	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01948	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01909	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-01987	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02137	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02673	November 24, 2025	Email	Energy Alberta reminded BFN that it had requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options were attached for review. Input from Indigenous groups would be sought before finalizing the site and proceeding with the Impact Assessment process. Meetings can be arranged to discuss the Project and gather feedback.
C-04493	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02891	December 4, 2025	Email	Energy Alberta is looking to identify Indigenous businesses or individuals that provide Digital Graphic Design and/or Visual Narrative services. Recommendations for contacts with relevant experience and expertise was requested, along with any available portfolios or websites. Energy Alberta indicated it would connect with potential candidates whose services align with current needs to advance economic opportunities for the Indigenous community.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03280	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03709	December 18, 2025	Email	Energy Alberta wished Beaver First Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would be available via cell phone during this time.

CADOTTE LAKE MÉTIS NATION
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR CADOTTE LAKE MÉTIS NATION (CLMN)

ID	Date	Interaction Type	Summary
C-00310	December 19, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-00311	February 12, 2025	Email	Energy Alberta followed up on its email containing the early information package and requested CLMN's availability for a virtual meeting to discuss the Project.
C-00279	February 12, 2025	Email	CLMN requested Energy Alberta provided dates it would be available for a virtual meeting regarding the Project.
C-00280	February 14, 2025	Email	Energy Alberta requested CLMN's availability for March 7 or 12, 2025.
C-00281	February 14, 2025	Email	Energy Alberta indicated that March 12 was no longer available, however March 7 was still available. Alternatively, March 25 would also work.
C-00284	February 14, 2025	Email	CLMN confirmed their availability to meet on March 7, 2025.
C-00283	February 14, 2025	Email	Energy Alberta confirmed receipt of CLMN's email and provided a meeting invitation for March 7, 2025.
C-00282	February 14, 2025	Email	Energy Alberta provided a Teams invitation for a meeting to discuss the Project.
C-00285	February 21, 2025	Email	Energy Alberta advised a meeting was scheduled for March 7, 2025 and that it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with CLMN for an introduction to their process.
C-00286	March 7, 2025	Virtual / Online meeting	Energy Alberta met with CLMN to discuss a Project overview and update, timeline, regulatory process, IPD, economic participation, water use, nuclear waste, Indigenous Relations Policy, UNDRIP, and capacity funding agreement.
C-00312	March 7, 2025	Email	Energy Alberta provided a website link to join the March 7, 2025 meeting as the CLMN participant was having access issues.
C-02322	April 4, 2025	Email	Energy Alberta advised that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02311	April 4, 2025	Email	Cadotte Lake Métis Nation acknowledged receipt of the Notice of IPD Submission - Peace River Nuclear Power Project email.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02323	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02324	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email and requested confirmation of receipt of the IPD, inquired as to whether CLMN had any questions or wanted to arrange a meeting to discuss the submission. Energy Alberta provided a reminder of upcoming deadlines including the 30-day public comment period on the IPD closing on May 14, 2025.
C-02325	May 13, 2025	Email	Energy Alberta emailed to correct some of the information it had provided in a previous email related to IAAC for grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02308	May 13, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided. The letter requested Energy Alberta be contacted if the communities required additional funding and provided its contact information. The letter requested communities provide information on how the additional funds would be used. The letter outlined the purpose of the Project and its guiding principles, and advised Energy Alberta was available for further discussion.
C-02326	May 22, 2025	Email	Energy Alberta requested the President's phone number to speak to an opportunity related to capacity funding.
C-02327	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email and provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-02292	May 26, 2025	Email	The President, Cadotte Lake Métis Nation, requested a meeting to discuss capacity funding.
C-02328	May 26, 2025	Email	Energy Alberta provide dates when it would be available to discuss capacity funding and requested an indication from the CLMN on which date would work best for them.
C-04237	May 28, 2025	Email	Energy Alberta indicated it would like to provide a sponsorship for the upcoming Peace River Pow Wow.
C-04236	May 26, 2025	Email	CLMN provided an invoice and e-transfer information as requested related to Energy Alberta's Sponsorship of the Peace River Pow Wow.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02293	May 29, 2025	Email	The President, Cadotte Lake Métis Nation, provided some possible meeting dates and indicated their lawyer would attend the meeting.
C-00321	May 29, 2025	Phone	Energy Alberta and CLMN had a phone conversation regarding meeting arrangements to discuss capacity funding.
C-02329	May 29, 2025	Email	Energy Alberta thanked CLMN for the quick chat earlier that day. Energy Alberta confirmed that it could meet virtually on June 6 from 10 to 11 am and provided a list of Energy Alberta attendees at the meeting, including its Legal Counsel. Energy Alberta indicated it would send a calendar invite to confirm the meeting.
C-02294	June 11, 2025	Email	The President, Cadotte Lake Métis Nation, confirmed receipt of the May 23, 2025 email and provided the completed EFT form.
C-02330	June 11, 2025	Email	Energy Alberta indicated it had received the EFT form, but not the capacity funding Application form. Energy Alberta requested the Nation complete and return the form.
C-02295	June 11, 2025	Email	The President, Cadotte Lake Métis Nation, indicated that the capacity funding form could be completed by Energy Alberta based on recent conversations.
C-00319	June 11, 2025	Email	Energy Alberta confirmed it would complete CLMN's capacity funding application form using information from their phone conversation on May 29, 2025.
C-02331	June 13, 2025	Email	Energy Alberta informed the Nation that it had approved its capacity funding request.
C-02332	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-02333	July 16, 2025	Email	Energy Alberta shared that it aimed to incorporate Indigenous knowledge into the Impact Statement for the Peace River Nuclear Power Project by inviting participation in summer field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.
C-00300	July 24, 2025	Email	CLMN requested a meeting to discuss next steps regarding the Project and provided a proposed agenda which included capacity funding, engagement and consultation timelines, fieldwork participation opportunities, a fall workshop, and a community dinner.
C-02320	July 24, 2025	Email	Energy Alberta advised it would arrange a meeting to discuss the Project.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02315	July 24, 2025	Email	Energy Alberta offered potential meeting dates and times for CLMN's consideration.
C-02296	July 28, 2025	Email	The President, Cadotte Lake Métis Nation, indicated they would like to send a participant to the 2025 Summer Field Program if it was still possible.
C-02334	July 30, 2025	Email	Energy Alberta sought confirmation on proposed dates for a meeting to discuss engagement and capacity funding.
C-02298	July 30, 2025	Email	The President, Cadotte Lake Métis Nation, indicated July 31, 2025 worked for the meeting to discuss engagement and capacity funding.
C-00309	July 30, 2025	Email	Energy Alberta provided the July 31, 2025 meeting invitation and agenda.
C-02312	July 30, 2025	Email	Cadotte Lake Métis Nation acknowledged the meeting invite for July 31, 2025.
C-02335	July 30, 2025	Email	Energy Alberta indicated that there were still spots available for the River Channel Depth Survey and requested to know if the Nation had someone available to attend.
C-02297	July 30, 2025	Email	The President, Cadotte Lake Métis Nation, indicated the name of the participant in the 2025 Summer Field Program.
C-02336	July 30, 2025	Email	Energy Alberta provided the Indigenous participant with details regarding the River Channel Depth Survey scheduled for August 1 and 2, 2025.
C-00302	July 31, 2025	Virtual / Online meeting	Energy Alberta met with to discuss the engagement and capacity funding agreement, fieldwork schedule, and community workshop. Energy Alberta provided updates on the Project including that it was engaging with federal and provincial entities and expecting a final TISG by October 2025. Questions from CLMN included the national interest designation of the Project, impacts on harvesting, employment opportunities, and the possibility of an office for nuclear energy information. Energy Alberta mentioned it was developing a program for local workforce training. A draft MOU for the engagement and capacity funding agreement was offered for CLMN's review, and a request for bridge capacity funding was also considered. Collaboration with other Indigenous Nations was noted.
C-02307	July 31, 2025	Email	Energy Alberta provided a list of Action items from the July 31 meeting.
C-02337	July 31, 2025	Email	Energy Alberta advised that the crew requested participants meet them at the boat launch the next day and provided a link to the location. Energy Alberta requested confirmation of receipt of its email.
C-02299	July 31, 2025	Email	The President, Cadotte Lake Métis Nation, indicated that the participant would be at the boat launch for the start of the River Channel Depth Survey.
C-02310	August 1, 2025	Email	Energy Alberta Field Crew provided details for the start of work on the River Channel Depth Survey - August 1 and 2, 2025,
C-02338	August 8, 2025	Email	Energy Alberta followed up on the action item sent on July 31 and inquired if a date for a community dinner/session in the fall could be selected.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02313	August 12, 2025	Email	Cadotte Lake Métis Nation emailed a letter requesting a voluntary pause in Planning Activities for the Peace River Nuclear Power Project.
C-02339	August 12, 2025	Email	Energy Alberta acknowledged receipt of the August 12, 2025 email and attached letter from the President of Cadotte Lake Métis Nation and indicated that they would get back to the Nation as soon as possible.
C-02340	August 12, 2025	Email	Energy Alberta resent the August 12, 2025 email and attached letter to all recipients and noted an error in the email addresses for CNSC and IAAC recipients.
C-02316	August 14, 2025	Email	Energy Alberta thanked Cadotte Lake Métis Nation for offering a participant for the River Channel Depth Survey on September 3, 2025. Energy Alberta provided information about the upcoming water intake siting tour including its date, meeting location, personal protective equipment requirements, and compensation offered. Energy Alberta requested a response with the participant's contact information before August 22, 2025.
C-02317	August 14, 2025	Email	Energy Alberta provided the PPE requirements as mentioned in a previous email.
C-02341	August 16, 2025	Email	Energy Alberta thanked the Indigenous participant for his support in the River Channel Depth Survey and sought his perspectives on his participation in the survey work.
C-02309	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: 2025 Summer Fieldwork Program - Water Intake Siting Inspection - Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies - An ongoing review and refinement of technology
C-02300	August 20, 2025	Email	The President, Cadotte Lake Métis Nation, requested information on a possible keynote speaker for the Indigenous Youth Career Workshop on October 15, 2025.
C-02342	August 20, 2025	Email	Energy Alberta requested additional information regarding the Indigenous Youth Career Workshop scheduled for October 15, 2025.
C-02318	August 21, 2025	Email	Energy Alberta followed-up regarding the Peace River Nuclear Power Project water intake siting tour and confirmed its plans to proceed with the tour. Energy Alberta requested the name and contact information of the CLMN participant.
C-02301	August 22, 2025	Email	The President, Cadotte Lake Métis Nation, confirmed the participant in the 2025 Summer Field Program.
C-02319	August 25, 2025	Email	Energy Alberta thanked the CLMN for the requested contact information and indicated that additional details would be provided as available.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00325	August 28, 2025	Email	Energy Alberta provided information about the upcoming water intake siting tour including its date and time, meeting location, personal protective equipment requirements, compensation offered, a media waiver, and contact information for logistical questions. Energy Alberta advised refreshments would be provided on the boat and requested the participants' dietary preference. Energy Alberta advised a photographer would be accompanying the tour and requested participants return the executed media waiver if they consented to having their photograph taken.
C-02343	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02344	September 3, 2025	Email	Energy Alberta provided a draft MOU for CLMN's review and requested their availability for a follow-up meeting to discuss comments added by its legal counsel.
C-02345	September 3, 2025	Email	Energy Alberta followed up on its August 20, 2025 email requesting additional information about the October 15, 2025 Indigenous Youth Career Workshop.
C-02303	September 5, 2025	Email	The President, Cadotte Lake Métis Nation, provided the requested information for the Indigenous Youth Career Workshop October 15, 2025.
C-02346	September 5, 2025	Email	Energy Alberta indicated it has someone in mind for the Keynote Speaker and would be requesting permission from that person to put her name forward.
C-02347	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals would be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02304	September 22, 2025	Email	The President, Cadotte Lake Métis Nation, indicated that due to the potential Teachers strike the Indigenous Youth Career Workshop would be postponed until April 29, 2026.
C-02348	September 22, 2025	Email	Energy Alberta sought confirmation of the CLMN attendee as to which session he would be attending.
C-02305	September 22, 2025	Email	The President, Cadotte Lake Métis Nation, confirmed the participant in the Siting Workshop.
C-02306	September 22, 2025	Email	The President, Cadotte Lake Métis Nation, inquired if people had to register for the evening public information sessions.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00059	September 22, 2025	Email	Energy Alberta indicated it was asking people to register in the evening, so it is quicker to get them in the door and start the sessions on time.
C-05096	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-02314	September 30, 2025	Email	Cadotte Lake Métis Nation emailed a letter that outlined proposed next steps to further Energy Alberta's and the Nation's discussions on engagement and capacity matters.
C-02349	September 30, 2025	Email	Energy Alberta confirmed receipt of CLMN's proposed interim funding measure and indicated it would review the document and get back to them as soon as possible.
C-02321	September 30, 2025	Email	Energy Alberta acknowledged receipt of the email dated September 30, 2025 and indicated it would respond as soon as possible.
C-01923	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01947	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01904	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02474	October 13, 2025	Email	Energy Alberta indicated it would be in the area on October 16, 2025 and wondered if the President would be available for an informal meeting.
C-02350	October 15, 2025	Email	Energy Alberta requested a phone call to discuss outstanding Action Items.
C-02483	October 17, 2025	Email	Energy Alberta provided its response to the interim funding proposal submitted by Cadotte Lake Métis Nation. Energy Alberta acknowledged the offer was reflective of costs incurred to date by the community and in co-development of a detailed work plan and anticipated capacity funding over the next 2 to 3 months.
C-02022	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02136	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02160	November 11, 2025	Email	Energy Alberta sent a reminder to the participant in the Indigenous Siting Workshop held on September 25, to submit the form for reimbursement of the honorarium and reasonable expenses.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02481	November 20, 2025	Email	Energy Alberta requested a meeting to check in with CLMN. Energy Alberta shared a progress update on previously agreed action items that it owes to the Nation.
C-04514	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02921	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Recommendations for contacts with relevant experience and expertise were requested, along with any available portfolios or websites. The aim was to explore economic opportunities for members of the Nation.
C-02970	December 4, 2025	Email	Cadotte Lake Métis Nation shared that it had applied for additional federal capacity funding.
C-03281	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of the proposed Project, and that all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Energy Alberta mentioned that selection of a specific nuclear reactor technology and detailed design is not required for early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that looks at ranges for key features such as cooling water needs, building size and land area, that covers general requirements for many designs rather than for a specific reactor. Energy Alberta provided links to two potential reactors that were under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03720	December 18, 2025	Email	Energy Alberta wished Cadotte Lake Métis Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.
C-03942	December 23, 2025	Email	Cadotte Lake team member wished Energy Alberta a happy holidays.

DENE NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR DENE NATION (DN)

ID	Date	Interaction Type	Summary
C-02357	August 12, 2025	Email	Energy Alberta introduced the Dene Nation to its Team working on the Peace River Nuclear Power Project. Energy Alberta indicated it had learned of the Nation's interest in the Project through IAAC. Energy Alberta provided information on the opportunities with IAAC and the CNSC as they were currently seeking feedback on draft guidelines and plans related to the Project. Energy Alberta advised that it would be conducting baseline environmental studies and invites the Nation to participate. Energy Alberta indicated that capacity funding was available to support Indigenous Nations in reviewing Project documents. Energy Alberta provided hyperlinks to additional resources, including the Initial Project Description. Energy Alberta offered the opportunity to schedule a meeting to discuss any of the information provided.
C-05158	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02351	August 15, 2025	Email	The Dene Nation acknowledged the email Energy Alberta sent on August 12, 2025 and indicated that someone on the Team would get back to Energy Alberta.
C-02358	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02352	August 28, 2025	Email	The Dene Nation acknowledged the email Energy Alberta sent on August 28, 2025 and asked that its team members copied be included in all future correspondence. The Dene Nation indicated that one of its team members would get back to Energy Alberta.
C-02353	August 28, 2025	Email	The Dene Nation provided contact information for an additional team member that should be included in all future correspondence.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02359	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02356	September 12, 2025	Email	Dene Nation member indicated they would be attending the siting workshop.
C-02354	September 12, 2025	Email	Dene Nation indicated that it intended to send the Chief, its water consultant and a staff member to the siting workshop.
C-00021	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-05127	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01917	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01952	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02672	October 8, 2025	Email	Dene Nation indicated it would invoice Energy Alberta for the stipulated amounts.
C-01906	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02355	October 10, 2025	Email	Dene Nation acknowledged receipt of the email sent by Energy Alberta on October 10, 2025.
C-02021	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02135	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02159	November 11, 2025	Email	Energy Alberta sent a reminder to the participant in the Indigenous Siting Workshop held on September 25, to submit the form for reimbursement of the honorarium and reasonable expenses.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02450	November 12, 2025	Email	Dene Nation representative indicated he had not attended the Indigenous Siting Workshop.
C-02454	November 18, 2025	Email	Energy Alberta confirmed the Dene Nation members who were in attendance at the siting workshop and referenced an earlier from Dene Nation indicating the Finance Department would send Energy Alberta an invoice for the honorarium and expenses.
C-02484	November 18, 2025	Email	Dene Nation copied its Finance Department regarding the invoice for the honorarium and expenses to be sent to Energy Alberta.
C-04506	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02934	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03282	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03701	December 18, 2025	Email	Energy Alberta wished Dene Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would be available via cell phone during this time.

DENE THA' FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR DENE THA' FIRST NATION (DTFN)

ID	Date	Interaction Type	Summary
C-00407	January 31, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-02668	February 27, 2025	Email	Energy Alberta initiated engagement with the Nation regarding its proposed Peace River Nuclear Project. Energy Alberta indicated it was in the early planning stages and anticipated submitting an Initial Project Description by the end of March. Preliminary land investigations, including drilling for core samples, were planned with environmental management and safety measures in place. Key contacts for further discussions were introduced, and a meeting was requested to address any questions. An Early Project Information Package is attached for reference.
C-02363	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02386	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02417	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification and requested confirmation that the Nation had received the IPD for the Peace River Nuclear Power Project. Energy Alberta provided a reminder of upcoming key deadlines related to the comment period and a funding application deadline.
C-00412	May 12, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding and requested a return call.
C-02504	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02555	May 13, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-00415	May 20, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding related to the Project.
C-00416	May 22, 2025	Phone	Energy Alberta left a voicemail regarding Capacity funding related to the Project.
C-02577	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-00417	May 29, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding related to the Project.
C-02528	June 25, 2025	Email	Energy Alberta advised that IAAC and CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-02669	July 16, 2025	Email	Energy Alberta provided an update on its proposed Peace River Nuclear Power Project and emphasized the importance of Indigenous knowledge in the Impact Statement. Energy Alberta indicated it would conduct baseline environmental studies in July. Energy Alberta indicated it would engage further with Indigenous representatives for future studies and invited inquiries regarding participation in upcoming fieldwork.
C-05135	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02670	August 25, 2025	Email	DTFN provided Energy Alberta with a letter dated August 25, 2025 and indicated that IAAC had recently notified DTFN regarding Alberta Energy's proposed Peace River Nuclear Power Project. DTFN s indicated that it was aware that Energy Alberta had been engaging directly with some First Nations in the Peace River area and expressed concern that DTFN had been excluded. DTFN invited Alberta Energy to use the pause in the IAAC process to begin engaging directly with DTFN in the interest of mutually beneficial relationships, guided by respect, integrity and a commitment to advancing reconciliation. DTFN attached a copy of its submission to IAAC dated May 14, 2025 for Energy Alberta's awareness.
C-00421	August 28, 2025	Email	Energy Alberta provided a response letter to address DTFN's August 25, 2025 letter. The letter outlined confirmed Energy Alberta's intent to engage with DTFN, its engagement efforts to date with DTFN, and contact information of the DTFN representative with whom it had been engaging. Energy Alberta provided its contact information and requested they contact to arrange a meeting.
C-02610	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02671	August 28, 2025	Email	Energy Alberta emailed a letter in response to the DTFN letter received on August 25, 2025. Energy Alberta confirmed that its preliminary outreach to the Nation began in January 2025 and that its staff had sent several emails and made several phone calls with the intent of both sharing information about the proposed Project and to have an introductory meeting with the Nation. Energy Alberta indicated its latest update sent to the Nation on August 18, 2025 provided details regarding its request to IAAC for a regulatory timeline suspension. Energy Alberta provided the contact information that it had been sending communications to and requested confirmation that it had the correct information. Energy Alberta indicated that to date it had not heard back from the Nation regarding its communications with the Nation and requested that the Nation's staff reach out to Energy Alberta staff so as to make best use of this timeline suspension in advancing its engagement with the Nation.
C-02641	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05129	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01951	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01907	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02020	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02134	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02675	November 24, 2025	Email	Energy Alberta reminded DTFN that it had requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. Energy Alberta provided an information package, and a map of two proposed siting options are attached for review. Energy Alberta indicated that input from Indigenous groups was being sought before finalizing the site and proceeding with the Impact Assessment process. Energy Alberta indicated that a meeting could be arranged to discuss the Project and gather feedback.
C-04505	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities and would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02892	December 4, 2025	Email	Energy Alberta indicated it was looking to identify Indigenous businesses or individuals that provide Digital Graphic Design and/or Visual Narrative services. Recommendations for contacts with relevant experience and expertise were requested, along with any available portfolios or websites.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03283	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR DRIFTPILE CREE NATION (DPCN)

ID	Date	Interaction Type	Summary
C-00439	January 8, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-00442	January 9, 2025	Email	DPCN requested an in-person meeting to discuss the Project.
C-00444	January 9, 2025	Email	Energy Alberta advised it was in the early stages of engagement and would follow up to arrange a meeting to discuss the Project.
C-00443	January 13, 2025	Email	Energy Alberta advised it would be in Peace River on January 21 and 22, 2025 and requested DPCN's availability for an in-person meeting for either of those dates.
C-00440	February 12, 2025	Email	Energy Alberta followed up on its email containing the early information package and requested DPCN's availability for an in-person meeting in Peace River, Alberta the week of March 10, 2025.
C-00441	February 21, 2025	Email	Energy Alberta advised it was interested in scheduling a meeting with DPCN and that it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with DPCN for an introduction to their process.
C-02362	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-03010	April 11, 2025	Email	DPCN Consultation Director confirmed that he had spoken to Energy Alberta about the Project recently and that the Nation looked forward to a meeting regarding the Project.
C-03011	April 11, 2025	Email	Energy Alberta indicated that it anticipated the IPD for the Peace River Nuclear Power Project would available online early the following week. Energy Alberta indicated it would welcome a meeting provide an introduction to the Project and an overview of the IPD. Energy Alberta indicated it would look for potential meeting dates and get back to the Nation.
C-02385	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02418	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation that the Nation had received the IPD for the Peace River Nuclear Power Project. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-00450	May 12, 2025	Phone	Energy Alberta phoned DPCN to discuss capacity funding related to the Project. DPCN advised he was awaiting another call and would call back when he was done.
C-02505	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02556	May 13, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-03012	May 13, 2025	Email	The Chief indicated that the Nation definitely wanted to be part of Energy Alberta's proposed Project and indicated that he would pass the letter on to the Nation's consultation director to ensure they apply for the capacity funding.
C-00460	May 20, 2025	Phone	Energy Alberta phoned DPCN to discuss capacity funding related to the Project. Energy Alberta clarified that she was calling on behalf of a proponent and not a regulator. DPCN requested an in-person introductory meeting with Energy Alberta in Edmonton either on June 4 or 5. DPCN indicated his consultation team would attend the meeting.
C-02578	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-00452	May 23, 2025	Phone	DPCN left a voicemail for Energy Albert, requesting a callback regarding the capacity funding letter and email sent on May 23, 2025.
C-00453	May 23, 2025	Phone	Energy Alberta and DPCN had a phone conversation. DPCN advised that all correspondence should be going the Consultation Director and not the Chief directly. Energy Alberta confirmed that it would make note of that request and would work with him to coordinate all Energy Alberta / DPCN engagement going forward. Energy Alberta inquired about an MOU / Agreements that would normally go to the Chief, and DPCN advised he will work with Chief to make sure they respond.
C-03015	May 27, 2025	Email	DPCN submitted its funding application to Energy Alberta.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00438	May 29, 2025	Phone	Energy Alberta phoned to discuss capacity funding and arrangements for an introductory meeting with DPCN. DPCN indicated that the June 4 or 5 dates would no longer work, and suggested June 19 or 26 as alternates. Energy Alberta indicated she would check dates and get back to DPCN.
C-03018	May 29, 2025	Email	Energy Alberta confirmed that an introductory meeting on June 26 at 1:00 pm in Edmonton worked for its team members. Energy Alberta requested confirmation of the date, time, location, and attendees from DPCN, and indicated that once confirmed Energy Alberta would send a calendar invite.
C-03019	May 30, 2025	Email	Following a phone call with the Nation earlier that day, Energy Alberta provided its capacity funding application form so that the Nation could provide additional information requested. Energy Alberta provided a link to the funding currently available from the IAAC, along with contact information for the person at IAAC that they should speak to.
C-03020	May 30, 2025	Email	DPCN thanked Energy Alberta for the phone call and indicated that she would pass the information on to the consultation director and get back to Energy Alberta as soon as possible.
C-00462	June 3, 2025	Phone	Energy Alberta left a voicemail requesting a return call to discuss capacity funding documents and the in-person June 26, 2025 introductory meeting in Edmonton, Alberta.
C-03021	June 8, 2025	Email	Energy Alberta followed up to confirm if the Nation was still able to meet in Edmonton is June 26 and requested the location for the meeting as well as who from the Nation would be attending.
C-03022	June 11, 2025	Email	The Nation confirmed the meeting on June 26, 2025 and provided a location for the meeting in Edmonton. The Nation also confirmed the attendees.
C-03023	June 11, 2025	Email	Energy Alberta thanked the Nation for the confirmation and meeting details and indicated that it looked forward to meeting with the Nation. Energy Alberta indicated it would send a calendar invite the following day confirming all the details. Energy Alberta indicated that it had heard that the community may have been evacuated and expressed hope that all from the community remained safe. The Energy Alberta team expressed concern for the people in and around the Peace area affected by the fires and sent its thoughts to all.
C-00466	June 12, 2025	Email	Energy Alberta provided a meeting invitation for June 26, 2025 in Edmonton, Alberta.
C-03024	June 12, 2025	Email	DPCN attendees accepted the calendar invite for the meeting on June 26, 2025 in Edmonton, Alberta.
C-03025	June 19, 2025	Email	Energy Alberta inquired if it was possible for one of its attendees to join the meeting on June 26, 2025 via Teams, as she is unable to be in Edmonton in person.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02529	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-00465	June 26, 2025	Email	Meeting to discuss the Project. Topics of discussion included overview of the Project, proposed Project site locations, overview of the Project stages and anticipated timelines, overview of a nuclear power plant, nuclear waste management, regulatory oversight for nuclear projects in Canada, overview and timeline of the regulatory and engagement phases, summary of key issues raised during the planning phase, Indigenous Relations Policy, framework for Indigenous engagement approach, feedback opportunities for Indigenous Nations and Communities, economic benefits of a nuclear facility, including potential economic participation and procurement opportunities. No interests were raised.
C-03026	June 30, 2025	Email	In follow-up to the June 26, 2025 meeting Energy Alberta provided a copy of the slide deck used in the meeting is attached. Energy Alberta inquired about the consultation document that the Nation indicated it would provide. Energy Alberta inquired about the potential to schedule a follow-up meeting to discuss next steps, including a relationship agreement and involvement in upcoming studies. Energy Alberta requested possible dates for the next meeting that would work for the Nation.
C-03028	July 2, 2025	Email	DPCN provided Energy Alberta with a copy of its Consultation & Accommodation Laws manual for review and files.
C-03029	July 2, 2025	Email	Energy Alberta thanked the Nation for the Consultation & Accommodation Laws manual and indicated that it would be in touch if it had any questions.
C-02600	July 16, 2025	Email	Energy Alberta shared that it aimed to incorporate Indigenous knowledge into the Impact Statement for the Peace River Nuclear Power Project by inviting participation in summer field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03030	August 8, 2025	Email	Energy Alberta followed up regard possible dates for a meeting to begin discussing next steps including some form of relationship agreement and how the Nation would like to be involved in the upcoming studies. Energy Alberta indicated it would be ideal if a date could be possible in the next week or so, because it had some studies planned for early September that it would like to discuss with the Nation.
C-05159	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02628	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02640	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-00014	September 15, 2025	Email	Energy Alberta followed-up regarding the phone call with DPCN and a meeting proposed for October 24 in Edmonton to discuss an Agreement type document during a 3 to 6 month pause period.
C-03032	September 19, 2025	Email	The Consultation Director requested a meeting invite for September 12, 2025 and that he would look into securing a venue for the meeting.
C-03033	September 19, 2025	Email	Energy Alberta indicated that it had sent the calendar invite as requested and would add the meeting location once provided by the Nation.
C-03034	September 19, 2025	Email	The Nation accepted the meeting invite for October 24, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05128	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01950	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03035	October 7, 2025	Email	The consultation director requested a phone call to discuss the letter sent by Energy Alberta on October 7, 2025.
C-03036	October 8, 2025	Email	Energy Alberta indicated it was available that day, anytime after 3 pm, for a phone call.
C-03037	October 9, 2025	Email	The Consultation Director inquired if Energy Alberta was available for a phone call that day.
C-01963	October 9, 2025	Email	Energy Alberta indicated it was available for a phone call.
C-00099	October 9, 2025	Email	Following a phone conversation with the Consultation Director, Energy Alberta confirmed that the email sent on October 7 referenced the current 3 to 6-month regulatory suspension, not an additional pause. Energy Alberta confirmed that the meeting on October 24th, would include a discussion of a draft an agreement and potential studies related to the TISGs.
C-01905	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02019	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03040	October 22, 2025	Email	The consultation Director replied to the October 21, 2025 sent by Energy Alberta regarding technology and indicated that this would be discussed at the upcoming meeting.
C-02451	October 22, 2025	Email	Energy Alberta shared a copy of its draft MOU for the Nation's reference.
C-03041	October 22, 2025	Email	The Consultation Director thanked Energy Alberta for the copy of the draft MOU and indicated that it could be discussed at the upcoming meeting.
C-01968	October 24, 2025	Phone	The Nation confirmed via phone call that the meeting will proceed as originally planned and its legal counsel would be attending virtually.
C-02997	October 24, 2025	In person meeting	Energy Alberta met with DPCN, and they informed Energy Alberta they would not sign the MOU until further review. DPCN sought clarity on engagement processes and technology reviews, expressed concern about nuclear projects, including environmental impacts and safety. Discussions included the need for community engagement, capacity funding, and addressing specific health and social concerns. DPCN emphasized the importance of protecting water and land and requested further information on health impacts and comparative data for baseline studies.
C-02030	October 26, 2025	Email	Energy Alberta provided DPCN with a copy of the slide deck use in the October 24, 2025 meeting.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02109	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta inquired if the Nation had any feedback on the draft MOU and if a follow up meeting could be booked to further discussion on the preliminary list of studies reviewed in the October 24, 2025 meeting. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02709	November 25, 2025	Email	Energy Alberta emailed to see if the Nation had a chance to look at the MOU or if they had another version of an agreement that they would like Energy Alberta to look at. Energy Alberta also inquired about booking a working meeting to further explore the studies shared with the Nation on October 24, 2025 and begin the development of a work plan for the Nation's participation.
C-02802	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-03284	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03725	December 18, 2025	Email	Energy Alberta wished Driftpile Cree Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would be available via cell phone during this time.

DUNCAN'S FIRST NATION

for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR DUNCAN'S FIRST NATION (DFN)

ID	Date	Interaction Type	Summary
C-00471	April 10, 2024	Phone	Energy Alberta phoned to provide a Project introduction. Energy Alberta advised it would follow up with information regarding Energy Alberta, the Project email provided to Treaty 8 leadership, and nuclear energy introductory information.
C-00470	April 11, 2024	Email	Energy Alberta provided information regarding Energy Alberta, introductory information to nuclear energy, an image of the Pickering Power Plant and location to the neighbouring city, and a copy of the email previously provided to Treaty 8 leadership. Energy Alberta requested DFN's availability for a meeting on April 15, 2024.
C-00522	October 16, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-00570	November 5, 2024	Email	Energy Alberta requested DFN's availability for a meeting on November 12 or 15, 2024.
C-00571	November 6, 2024	Phone	Energy Alberta phoned and left a voicemail requesting DFN's availability for a Project meeting on November 12 or 15, 2024.
C-00572	November 6, 2024	Email	Energy Alberta followed up on their voicemail and requested DFN's availability for a meeting on November 12 or 15, 2024.
C-00573	November 12, 2024	Email	Energy Alberta followed up on their request for a Project meeting and advised the early engagement process for the Project was ongoing. Energy Alberta advised that regulators would be following up with DFN as part the formal consultation process.
C-00472	December 1, 2024	Phone	DFN requested a meeting to discuss the Project and provided their availability for December 6 and 10, 2024.
C-00473	December 2, 2024	Email	Energy Alberta provided their availability for a meeting on December 9, 11, and 12, 2024.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00525	December 12, 2024	Virtual / Online meeting	Meeting to introduce the Project. DFN raised the following interests: ■ In-depth and comprehensive consultation to support understanding of the Project's potential risks, impacts, and benefits. ■ Consideration of potential cumulative impacts on DFN's rights, culture, and way of life. ■ Full independent risk assessment to determine human health safety risks ■ Early assessment on the viability of a nuclear Project in Alberta ■ Long term water flow and potential water shortages resulting from climate change. ■ Spent nuclear fuel potentially remaining on the DFN territory until NWMO facility would be approved, constructed, and prepared to manage the waste. ■ Capacity funding for community engagement work, EA/IA assessment, human health risk assessments, regulatory and legal engagement and discussions with Energy Alberta.
C-00523	December 12, 2024	Email	Following a meeting earlier in the day, Energy Alberta provided the Project presentation and advised it would provide the draft IPD the following day.
C-00474	December 13, 2024	Email	Energy Alberta provided the draft IPD for review and advised that the revised IPD would be submitted to IAAC in Q1 of 2025. Energy Alberta advised capacity funding was available for the Project and requested DFN provide correspondence outlining how the funding would be used. Energy Alberta requested DFN's availability for a meeting in January 2025.
C-00524	December 16, 2024	Email	DFN provided it notes from the December 12, 2024 meeting.
C-00526	December 16, 2024	Email	Energy Alberta confirmed receipt of the December 12, 2024 meeting minutes.
C-00528	December 17, 2024	Email	DFN confirmed receipt of the draft Project IPD and advised they would assign an interim working group to provide initial comments. DFN inquired about Project capacity funding.
C-00527	December 18, 2024	Email	Energy Alberta provided its edits to the December 12, 2024 meeting minutes taken by DFN.
C-00475	January 3, 2025	Email	Energy Alberta followed up on its request for a meeting in January 2025 to discuss the IPD and provided its availability for an in-person meeting in Peace River, Alberta on January 21 or 22, 2025. Energy Alberta requested information on how the proposed capacity funding would be used and provided a link to its updated website.
C-00476	January 6, 2025	Email	DFN advised they would follow up to provide their availability for a meeting on January 21 or 22, 2025.
C-00477	January 16, 2025	Email	DFN requested an introduction meeting in January or February 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00478	January 16, 2025	Email	Energy Alberta requested an in-person meeting in Peace River, Alberta on January 29, 2025 and another meeting in February 2025 to discuss the draft IPD. Energy Alberta provided a revised copy of the draft IPD with corrections to Section 2.3.2.
C-00578	January 21, 2025	Phone	DFN phoned to schedule an introductory meeting on January 29, 2025 in Peace River, Alberta.
C-00574	January 22, 2025	Email	Energy Alberta provided an in-person meeting invitation for January 29, 2025.
C-00577	January 22, 2025	Phone	DFN phoned to confirm their availability for an introductory meeting on January 29, 2025 in Peace River, Alberta.
C-00530	January 27, 2025	Email	Energy Alberta provided a meeting website link and advised it would provide a presentation at the January 29, 2025 meeting.
C-00541	January 27, 2025	Email	Energy Alberta provided a meeting invitation for January 29, 2025.
C-00576	January 28, 2025	Phone	Energy Alberta requested an attendee list for the January 29, 2025 Project information meeting.
C-00575	January 28, 2025	Email	Energy Alberta followed up on its call from earlier that day requesting an attendee list for the January 29, 2025 Project information meeting.
C-00479	January 29, 2025	Email	Energy Alberta advised it would follow up with potential dates for a one-day DFN community event in February 2025.
C-00480	January 29, 2025	Email	DFN provided a tentative attendee list for the January 29, 2025 Project information meeting and requested to discuss the coordination of a one-day DFN community event including a leadership meeting and community information session.
C-00482	January 29, 2025	Email	DFN confirmed their availability for the January 29, 2025 meeting and advised they would follow up with scheduling a separate meeting with the council and the community.
C-00512	January 29, 2025	Phone	DFN requested the website link for the January 29, 2025 virtual meeting.
C-00511	January 29, 2025	Email	Energy Alberta confirmed the website link for the January 29, 2025 meeting had been provided.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00496	January 29, 2025	Virtual / Online meeting	Energy Alberta met with DFN to discuss engagement approach, workplans, and capacity funding agreement. DFN raised the following interests: ■ Assessing cumulative effects ■ Baseline studies ■ Education on Nuclear for its members ■ Western science - Indigenous knowledge related to acceptable risk ■ Commented on Free, Prior, and Informed Consent (FPIC) ■ Waste storage ■ Site selection ■ Seismicity and risk ■ Fish and habitat ■ Relationship agreement
C-00529	January 31, 2025	Email	Energy Alberta requested DFN's availability for a half-day meeting in February 2025 to discuss the Project. Energy Alberta provided its availability, a tentative agenda and advised it would follow up to coordinate next steps.
C-00481	February 2, 2025	Email	DFN followed up on the January 29, 2025 meeting and advised the Project meeting was informative. DFN advised they were interested in engagement with Energy Alberta and relevant regulatory agencies. DFN requested a community Project information day and luncheon with the community and council and a separate technical session on the topics provided by Energy Alberta on January 31, 2025.
C-00531	February 3, 2025	Email	Energy Alberta requested a meeting to discuss the Project and IPD and provided its availability for an in-person meeting on February 6, 2025.
C-00532	February 3, 2025	Phone	Energy Alberta phoned and left a voicemail to schedule a meeting regarding the Project and IPD. Energy Alberta requested a call back.
C-00533	February 5, 2025	Email	DFN advised they were not available to meet on February 6, 2025 and they would follow up with their meeting availability.
C-00534	February 6, 2025	Email	Energy Alberta provided its availability for an in-person meeting on February 13, 2025 to discuss the IPD.
C-00483	February 8, 2025	Email	DFN advised they would confirm their availability for the February 13, 2025 meeting to discuss the Project, IPD, capacity funding, agreements, and community day.
C-00484	February 11, 2025	Email	Energy Alberta requested confirmation of DFN's availability for a meeting on February 13, 2025 and advised some representatives would attend virtually.
C-00485	February 11, 2025	Email	DFN confirmed their attendance at the February 13, 2025 meeting and advised they would follow up with another meeting with Council, Elders, and the community.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00486	February 12, 2025	Email	Energy Alberta confirmed its in-person attendance at the February 13, 2025 meeting.
C-00487	February 12, 2025	Email	DFN confirmed receipt of Energy Alberta's email from earlier that day.
C-00488	February 12, 2025	Email	DFN requested a website link to attend the February 13, 2025 meeting virtually.
C-00489	February 13, 2025	Virtual / Online meeting	Meeting to discuss ■ Project Overview ■ input and feedback on Draft Initial Project Description ■ Agreement ■ Planned future engagement activities ■ DFN Monitor to participate in upcoming drilling program
C-00493	February 13, 2025	Email	DFN advised they would provide information regarding their business partners and requested scopes of work related to the Project.
C-00492	February 14, 2025	Email	DFN followed up on its February 13, 2025 email advising they were not partnered with a contractor working on the Project site and advised they had not received any information regarding the business opportunities.
C-00490	February 18, 2025	Email	Energy Alberta advised it was making business arrangement with DFN and would provide additional information during their meeting the following day. Energy Alberta advised it would prepare a list of requirements for a DFN monitor to observe the upcoming drilling activities.
C-00491	February 18, 2025	Email	DFN followed up on their request for information on business opportunities and scopes of work.
C-00494	February 19, 2025	Email	Energy Alberta indicated it would follow-up to discuss IPD inputs and DFN's participation in drilling activities. A scope memo outlining HSSE requirements would be shared. Drilling was expected to continue through March. Engagement opportunities with the community were sought, including an info-day and agreements to be worked on.
C-00495	February 21, 2025	Email	Energy Alberta followed up on the February 13, 2025 meeting and advised it would file a draft IPD in Q1 of 2025. Energy Alberta requested a meeting to discuss the Project and advised IAAC would follow up with DFN for an introduction to their process. Energy Alberta advised it would provide a memo from the Project risk assessment and safety plan related to March, 2025 drilling for preliminary land investigations and would provide updates as it progressed.
C-00580	February 26, 2025	Email	Energy Alberta requested a phone call for later that day to discuss the Project and a meeting to discuss the IPD and future engagement. Energy Alberta requested DFN's contact information.
C-00497	February 27, 2025	Email	Energy Alberta requested DFN's availability for a meeting to discuss an opportunity for DFN to participate in its drilling program and advised it had a scope document with more information.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00498	February 27, 2025	Email	Energy Alberta provided information about drilling being undertaken to evaluate geotechnical and hydrogeological characteristics of a potential Project site between March 1 and 31, 2025. Energy Alberta advised DFN could send a community member for field monitoring purposes and outlined the terms and conditions of such work. Energy Alberta provided mapping of the drilling site, requirements related to personal protective equipment for the DFN field monitor, and requirements related health and safety for drilling activities at the site.
C-00499	February 27, 2025	Email	Energy Alberta advised that drilling work was being conducted on private land and consultation was not required.
C-00501	February 27, 2025	Email	DFN inquired whether sonic drilling would occur on the lake.
C-00500	February 27, 2025	Email	Energy Alberta advised that drilling would occur on private agricultural land and that there was no lake.
C-00581	February 27, 2025	Phone	DFN inquired about economic participation opportunities and whether consultation was required for the drilling program.
C-00502	March 4, 2025	Phone	Energy Alberta phoned DFN to discuss the environmental monitor role, scope requirements and business arrangements. DFN advised they would provide a monitor for the fieldwork.
C-00582	March 4, 2025	Phone	Energy Alberta phoned DFN to discuss the environmental monitor role including scope requirements, business arrangements, and plans to mobilize a DFN community member for the monitoring role, DFN's approach to reconciliation and engagement, and land value.
C-00585	March 5, 2025	Phone	Energy Alberta phoned DFN to discuss the environmental monitor role, compensation, training, and PPE and scope of the work. DFN advised the name of the monitor that would participate in the fieldwork.
C-00503	March 6, 2025	Email	Energy Alberta followed up on its conversations regarding the environmental monitor role and provided information regarding the scope of the fieldwork and final compensation. Energy Alberta requested that DFN invoice Energy Alberta directly once the fieldwork had concluded. Energy Alberta advised the guidance instructions for the monitor were discussed in the February 27, 2025 email and advised it would follow up with DFN the following day to discuss the next steps. Energy Alberta advised it would be available to meet in-person the following week for any additional assistance.
C-00535	March 6, 2025	Email	Energy Alberta requested a meeting to review the IPD and how it had incorporated the information provided in the previous two meetings.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00583	March 7, 2025	Email	Energy Alberta provided information regarding the upcoming drilling work scheduled in March 2025. Energy Alberta advised DFN had agreed to provide an environmental monitor and provided the scope of the monitor's work and directions to the WSP laydown site. Energy Alberta provided mapping of the site, the shift supervisor's contact information, required PPE, and health and safety protocols. Energy Alberta provided the compliance conditions and instructions for the DFN environmental monitor. Energy Alberta advised photos and videos of the program would be captured.
C-00593	March 7, 2025	Phone	Energy Alberta phoned to discuss monitoring roles for the drilling program, readiness, equipment, and logistics.
C-00584	March 8, 2025	Email	Energy Alberta advised that its March 7, 2025 email to DFN regarding environmental monitoring related to the drilling for the Project had been incorrectly addressed and provided an additional copy of the original email.
C-00536	March 13, 2025	Email	Energy Alberta advised it would follow up on the draft discussion document and DFN's previous emails. Energy Alberta requested a meeting to discuss DFN's IPD preliminary input and advised it would follow up with a phone call the following day.
C-00537	March 14, 2025	Email	Energy Alberta followed up on the IPD preliminary input and the process to complete early engagement input for the submission of the IPD. Topics of discussion included IPD input and feedback from DFN, DFN memo and approach to IPD comments, and approach on agreements.
C-00538	March 14, 2025	Email	Energy Alberta provided a copy of the IPD and Engagement Design Workbook and advised they would be included in the IPD submission later in March 2025. Energy Alberta advised the comments in the workbook were preliminary and that formal comments would be received throughout the engagement process. Energy Alberta advised it would follow up on March 17, 2025.
C-00539	March 17, 2025	Email	DFN submitted its initial technical memorandum to Energy Alberta that included its initial comments and indicated they should be reflected and taken into account in Energy Alberta documents and any Record of Engagement. DFN indicated once it had a chance to undertake a formal review of the Project Description it would provide formal comments and a more fulsome document setting out DFN's views in relation to the Project at this stage. DFN also provided Energy Alberta, for its awareness, with copies of their statement of claim against the Province of Alberta, the May 2022 letter to the former Premier of Alberta, the September 2024 letter to the Minister of Indigenous Relations of Alberta, and a letter with initial comments on the Project.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00540	March 17, 2025	Email	DFN provided a draft engagement and capacity funding letter that provided historical information about DFN and their rights, DFN's reasons for engaging with the Project, DFN's initial comments on the Project, a request for capacity funding to review the Project, and DFN's terms and conditions for the capacity funding. The letter stated that, in order to identify potential impacts of the Project to their rights and interests, DFN must have the ability to review, understand, and work with relevant technical and engineering aspects, anticipated Project interactions, potential risk aspects, adverse impacts, cultural values, cumulative interactions, mitigation strategies, and the regulatory and consultation processes. The letter provided an overview of DFN's proposed engagement plan including community participation and information sharing, community knowledge building of uranium powder production, rights and cultural impacts research and report, land use planning, Impact Assessment (IA), regulatory review, access to technical expertise, potential community Project benefits, and DFN's informed consent of the Project. The letter provided mapping of the proposed Project site and DFN's traditional territory.
C-00504	March 18, 2025	Email	Energy Alberta provided clarification on the intent of the IPD and Engagement Design workbook and advised it would include the interests DFN provided the previous day.
C-00505	March 18, 2025	Email	DFN advised they had reviewed the draft IPD and Engagement Design Workbook and advised that it did not capture important context related to DFN's issues, interests, and concerns. DFN requested their interests be captured verbatim in the workbook or that formal initial memorandum, provided by DFN on March 17, 2025, be attached to provide context.
C-00506	March 18, 2025	Email	DFN confirmed receipt of Energy Alberta's March 18, 2025 email regarding the IPD and Engagement Design Workbook.
C-00587	March 18, 2025	Phone	Energy Alberta texted to discuss DFN's monitor arrangements and logistics.
C-00589	March 18, 2025	Email	Energy Alberta provided a follow up to its text message from earlier that day and a copy of the March 6, 2025 email regarding the environmental monitor role. Energy Alberta provided mapping of the laydown area at the Project site.
C-00543	April 1, 2025	Email	Energy Alberta advised it was working towards finalizing the IPD for submission. Energy Alberta requested confirmation from DFN that Energy Alberta could include DFN's correspondence as a supporting document to the IPD filing.
C-00590	April 1, 2025	Email	Energy Alberta requested confirmation of contact information to provide a draft MOU. DFN advised the contact information was accurate.
C-03047	April 1, 2025	Email	Energy Alberta advised that it was undergoing some organization change and that they were working on finalizing the IPD for submission. Energy Alberta noted that it planned to submit DFN's correspondence as an appendix to the IPD filing and inquired if DFN would have any concerns with that.
C-03048	April 2, 2025	Email	DFN advised Energy Alberta that a meeting was being organized between the Nation and the IAAC concerning the proposed Peace River Nuclear Power Plant Project.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00507	April 4, 2025	Email	DFN confirmed receipt of the April 4, 2025 email regarding the IPD submission notice.
C-02361	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-00542	April 4, 2025	Email	DFN acknowledged receipt of the April 4, 2025 from Energy Alberta.
C-03049	April 7, 2025	Email	Energy Alberta shared a draft MOU which was intended to establish a framework for engagement between the Nation and Energy Alberta regarding the proposed Project. Energy Alberta welcomed feedback on the draft and proposed a meeting to discuss the MOU further.
C-00508	April 14, 2025	Email	Energy Alberta followed up on its notification that the IPD had been submitted to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised IAAC was hosting a 30-day public comment period on the IPD from April 14, 2025 to May 14, 2025. Energy Alberta provided a website link to the English and French versions of the IPD and public notice, a list of locations to access a hard copy of the IPD for public comment, and information about subscribing for Project updates.
C-00588	April 30, 2025	Email	DFN provided an invoice for the environmental monitoring undertaken in March 2025.
C-00586	April 30, 2025	Email	Energy Alberta advised it would process DFN's invoice for payment.
C-00591	May 1, 2025	Email	The Chief of DFN was copied on an email that Treaty 8 First Nations of Alberta sent to Energy Alberta that advised they would follow up with their availability for a rescheduled meeting the week of May 5, 2025.
C-02419	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta provided a reminder of upcoming deadlines including the 30-day public comment period on the IPD closing on May 14, 2025 and the application for IAAC's participant funding program closing on May 16, 2025. Energy Alberta advised a notification would be provided in May 2025 for the 30-day comment period on the TISG.
C-00548	May 6, 2025	Email	Energy Alberta inquired if the representative would be in Calgary and could potentially meet to discuss some work regarding the Project.
C-00549	May 6, 2025	Email	DFN suggested a virtual meeting instead to discuss their involvement in the Project.
C-00550	May 6, 2025	Email	Energy Alberta advised it would check its calendars for availability and requested DFN's indicate his availability for the next couple of weeks.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00551	May 12, 2025	Email	DFN advised they were available for a meeting after May 19, 2025, and requested an invitation for a virtual meeting.
C-00552	May 12, 2025	Email	Energy Alberta inquired about DFN's availability for a meeting on May 26, 2025.
C-00544	May 12, 2025	Email	Energy Alberta advised it would follow up with an invitation to the virtual meeting and tentative agenda prior to the May 26, 2025 meeting.
C-00553	May 12, 2025	Email	DFN confirmed their availability for a meeting on May 26, 2025, and advised they would internally follow up with DFN representatives to attend the meeting.
C-02506	May 13, 2025	Email	Energy Alberta emailed to correct some of the information it had provided in a previous email related to IAAC for grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02557	May 13, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-00545	May 21, 2025	Email	Energy Alberta provided the contact information of an attendee that was to be included in the May 26, 2025 meeting.
C-03051	May 21, 2025	Email	DFN indicated it was looking forward to the meeting on Monday May 26, 2025. DFN provided Energy Alberta with a copy of its submission to IAAC and CNSC that provided initial comments on the IPD. DFN indicated they had a meeting with IAAC and CSNC and DFN on May 1, 2025.
C-03052	May 21, 2025	Email	Energy Alberta acknowledged receipt of the May 21, 2025 email from DFN.
C-02579	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-03053	May 23, 2025	Email	Energy Alberta provided a proposed Agenda to DFN for the meeting on May 26, 2025.
C-03054	May 23, 2025	Email	DFN indicated its agreement with the proposed agenda and asked that one topic, Economic Opportunities, be deferred to a future discussion. DFN inquired if Energy Alberta was in agreement with both parties having legal counsel present to observe at the meeting.
C-03055	May 23, 2025	Email	Energy Alberta confirmed agreement with having legal counsel for both parties observe during the meeting.
C-03056	May 23, 2025	Email	DFN acknowledged that legal counsel would attend the meeting and indicated this would be received well by DFN Council.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03057	May 23, 2025	Email	DFN provided the names of its meeting attendees to Energy Alberta.
C-00554	May 26, 2025	Virtual / Online meeting	Meeting with DFN and DFN legal counsel to discuss ■ Engagement and workplan development ■ Capacity funding ■ MOU / relationship agreement ■ Impact statement timeline ■ Economic participation DFN raised the following interests: ■ Project was progressing quickly ■ Submitting a letter requesting a pause in the regulatory process timeline ■ Lack of knowledge on how nuclear power worked ■ Need to establish a capacity funding agreement ■ Timeline to submit an impact statement ■ Existing capacity constraints due to involvement in multiple projects and an ongoing court case on cumulative effects, assessing the cumulative effects of all the projects in the area ■ Preferred the idea of a workplan and wanted to change the way Energy Alberta engaged with DFN
C-03058	May 26, 2025	Email	Energy Alberta inquired about scheduling meeting with the Nation while the Team was in Peace River and provided its available dates of June 2 to 4, June 5 to 6, and June 9 to 10. Energy Alberta requested feedback on which date would work best for the Nation.
C-03060	May 27, 2025	Email	The Nation provide Energy Alberta with a copy of a letter it submitted to IAAC that expressed concerns regarding the aggressive timeline imposed on the Nation during the EA/IA review, particularly due to the lack of essential pre-application work. The Nation was requesting that IAAC delay the completion of the Summary of Issues to allow for necessary preparatory steps, engagement plans, and capacity arrangements, as the Nation had limited resources and indicated it would be at a disadvantage without a reasonable pre-application period.
C-03061	May 28, 2025	Email	In follow-up to the meeting on May 26, 2025 the Nation requested a two-hour teleconference meeting to discuss engagement and capacity goals, a phased approach to engagement, draft engagement workplans, and a draft funding agreement. The Nation provided potential meeting dates and times. The Nation provided the names of its attendees and indicated that a follow-up in-person session may be planned based on progress made.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03062	May 29, 2025	Email	Energy Alberta indicated its availability for a two-hour virtual meeting from 10 am to noon on June 3, 2025 to discuss the items suggested by the Nation. Energy Alberta provided the names of its attendees at the meeting and indicated it would send a Calendar invite
C-00556	May 29, 2025	Phone	Energy Alberta phoned DFN to confirm their June 3, 2025 meeting.
C-03063	May 30, 2025	Email	The Nation advised Energy Alberta that it would be applying for funding through CNSC's Indigenous and Stakeholder Capacity Fund - Stream 1: Indigenous Capacity Support.
C-03064	May 30, 2025	Email	The Nation provided Energy Alberta with a copy of its comments on the IPD that it had submitted to CNSC.
C-03065	June 2, 2025	Email	The Nation's attendees accepted the meeting invite for June 3, 2025.
C-03066	June 2, 2025	Email	In advance of the meeting on June 3, 2025, Energy Alberta provided information outlining its anticipated Baseline Studies for its Project. Energy Alberta provided its comments/questions related to the key discussion points identified by the Nation including engagement and capacity goals, a phased approach to community engagement, draft engagement workplans, and a draft funding agreement.
C-00514	June 3, 2025	Virtual / Online meeting	Energy Alberta met with DFN to discuss capacity goals, engagement approach and workplans, and capacity funding agreement. DFN raised the following interests: ■ Peace River was an endangered river ■ Information on baseline studies and to what extent studies considered the cumulative effects ■ Information on how to educate their members ■ Western science does not necessarily align with Indigenous knowledge and their level of acceptable risk ■ Free, Prior, and Informed Consent (FPIC) ■ Waste storage ■ Criteria for site selection ■ Seismicity and risk of the site selection ■ Diminishing consumption of fish ■ Emergency response ■ Relationship agreement or an MOU
C-00519	June 13, 2025	Email	DFN provided information regarding their July 10, 2025 Treaty Days event.
C-03069	June 13, 2025	Email	Energy Alberta advised the Nation that it would provide sponsorship for DFN Treaty Days on July 10, 2025 and inquired about the best way for it to send the funds to the Nation.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03070	June 18, 2025	Email	The Nation provided contact information for the person who would provide the information Energy Alberta had requested regarding sponsorship payment for DFN Treaty Days.
C-02530	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03071	June 30, 2025	Email	Energy Alberta provide a list of Action Items from the May 26, 2025 and June 3, 2025 meetings. Energy Alberta inquired about potential dates for scheduling the next meeting to include water and siting Subject Matter Experts.
C-03072	July 9, 2025	Email	Legal Counsel for the Nation advised Energy Alberta that it would like to schedule a 30-minute meeting on July 11, 2025 to discuss the planning process and inquired if Energy Alberta's team was available to meet on that day.
C-03073	July 9, 2025	Email	Energy Alberta indicated it would check on its team's availability for a meeting on July 11, 2025 and get back to the Nation.
C-04315	July 11, 2025	Email	Energy Alberta received a letter dated July 11, 2025 from DFN requesting that Energy Alberta consider a 6-month pause in the planning phase to allow DFN the opportunity to engage meaningfully and contribute effectively to the impact assessment process. DFN cited the following factors in its ability to meaningfully participate in the process: ■ Need for Technical Expertise ■ High Demand on Limited Resources ■ Integrity of the Process ■ Inadequate Funding
C-03076	July 11, 2025	Email	Energy Alberta was copied on an email that the Nation sent to IAAC and CNSC. DFN provided IAAC AND CNSC a copy of its July 11, 2025 letter to Energy Alberta requesting a 6-month pause in the planning phase to allow DFN the opportunity to engage meaningfully and contribute effectively to the impact assessment process.
C-03077	July 13, 2025	Email	Energy Alberta acknowledged receipt of the July 11, 2025 letter from the Nation requesting a pause.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02601	July 16, 2025	Email	Energy Alberta shared that it aimed to incorporate Indigenous knowledge into the Impact Statement for the Peace River Nuclear Power Project by inviting participation in summer field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.
C-03078	July 18, 2025	Email	Energy Alberta acknowledged the Chief's recent re-election and provided a letter dated July 18, 2025 that provided a response to the Nation's letter dated July 11, 2025 that requested a six-month pause in the Planning Phase of the Impact Assessment Process for the Peace River Nuclear Power Project. Energy Alberta acknowledged the challenges raised by the Nation and indicated that in it would like to continue working with the Nation to develop a detailed work plan that would ensure meaningful participation in the impact assessment process. Energy Alberta proposed revisiting the request for a pause in September 2025, once the work plan discussions had advanced.
C-03079	July 18, 2025	Email	DFN requested Energy Alberta's availability for a virtual meeting and provided a list of topics for discussion: ■ Updated Energy Alberta Workplan / Field Study Schedule ■ Energy Alberta's request for DFN Participation in Field Studies ■ Interim / Bridge Funding Agreement between DFN and Alberta Energy ■ Update on DFN Work planning and Identification of Pool of Qualified Technical Assistance ■ Time Frame for DFN and EA Engagement and Capacity Agreement ■ Introduction Meeting for EA Senior Management and New DFN Council ■ Planning for DFN / EA In Community Information Day and Luncheon
C-03081	July 18, 2025	Email	Energy Alberta indicated that it would look at the dates proposed and get back to the Nation.
C-03082	July 18, 2025	Email	Energy Alberta requested DFN's availability for a meeting on July 24, 2025 and advised it could follow up with a meeting invitation.
C-03083	July 18, 2025	Email	Legal Counsel for the Nation requested a meeting invite for 11am to 12pm MT on July 24, 2025 and indicated they would confirm with the Nation and get back to Energy Alberta the following week.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03084	July 22, 2025	Email	Legal Counsel for the Nation confirmed July 24 worked and requested 1-hour to meet. Legal Counsel indicated that it would like to discuss: - Energy Alberta's response to the Nation's request for a pause - Details regarding the baseline studies occurring in the summer - Information regarding Energy Alberta's request for member participation in field studies - Ongoing need for bridge funding
C-03085	July 23, 2025	Email	Energy Alberta advised it provided an updated July 24, 2025 meeting invitation and inquired as to whether DFN was available to meet at that time. Energy Alberta requested to include the workplan and framework agreement as a discussion point to the meeting agenda.
C-03086	July 23, 2025	Email	Legal Counsel for the Nation confirmed receipt of the meeting invite and indicated agreement with the proposed addition to the agenda.
C-00594	July 24, 2025	Virtual / Online meeting	Meeting with DFN who raised the following interests: - Energy Alberta's request for participation in baseline fieldwork studies - Framework that would result from the baseline studies - Had its response to the TISG had been posted. - Capacity funding to participation in the IA regulatory process. - Disappointed by the denial of a regulatory timeline pause - Timeline for baseline studies and how many seasons were needed - Level of engagement and capacity funding required to advance the workplan discussion with DFN. DFN legal counsel advised that they would prepare a document outlining their immediate needs and costs associated with the work.
C-03087	July 24, 2025	Email	Energy Alberta provided a copy of the July 16, 2025 email and inquired as to whether a DFN community member would participate in the July 30 or 31, 2025 river channel depth survey. Energy Alberta advised a meeting could be arranged to review the bathymetry results and provided information about honoraria and reimbursements for the river channel depth and wildlife surveys undertaken for the baseline studies. Energy Alberta requested a DFN representative's contact information.
C-03088	July 24, 2025	Email	Legal Counsel for the Nation thanked Energy Alberta for the information provided regarding the 2025 Summer Field Program Opportunities.
C-03089	July 24, 2025	Email	Energy Alberta provided a list of Action Items from the July 24, 2025 Meeting.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03090	August 6, 2025	Email	Legal Counsel for the Nation provided Energy Alberta with a bridge funding proposal to support the Nation's participation in the planning phase of the Peace River Nuclear Project integrated assessment process. Legal Counsel for the Nation indicated they would be available to meet with Energy Alberta to discuss the proposal.
C-03091	August 6, 2025	Email	Energy Alberta acknowledged receipt of the bridge funding proposal and indicated they would arrange a meeting to discuss the proposal further.
C-03093	August 14, 2025	Email	Energy Alberta indicated that it understood that the Nation may be interested in sending a member to participate in the upcoming preliminary water intake siting tour for the Peace River Nuclear Power Project. Energy Alberta provided details of the tour, requirements for personal protective equipment and reimbursement information for honorarium and reasonable travel expenses. Energy Alberta requested a response by August 22, 2025 with the name and contact information for the participant from the community who would be participating in the tour.
C-03097	August 18, 2025	Email	Energy Alberta emailed a letter dated August 18, 2025 to the Chief, in response to its request for a pause. Energy Alberta indicated that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-03095	August 18, 2025	Email	The Consultation Consultant for the Nation indicated its interest and sought clarification on the nature of community participation in the studies and how Energy Alberta intended to reflect such participation in consultation logs and future engagement reports to regulators.
C-03094	August 18, 2025	Email	The Consultation Consultant for the Nation requested a short update call with Energy Alberta to discuss ongoing and proposed field work and biophysical studies at the Project site, including the involvement of DFN community members. The Consultation Consultant acknowledged that the work undertaken by Energy Alberta aimed to inform its Project application and Environmental Assessment, which may evolve through the Tailored Impact Statement Guidelines process. The Consultation Consultant acknowledged that the bio-physical work would be distinct from the Nation's information gathering and impact assessment activities, which it would be proposed to Energy Alberta in a work plan and budget. The Consultation Consultant identified the participants in the call from the Nation.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03096	August 18, 2025	Email	Energy Alberta indicated it would check with the Team on availability to meet with the Nation and respond as soon as possible.
C-03098	August 19, 2025	Email	Energy Alberta provided multiple dates/times when it would be available to meet virtually to discuss proposed field work and biophysical studies occurring on and near the Project site and the Nation's participation in that work. Energy Alberta requested confirmation of the Nation's preferred dates/time and indicated it would send a Teams invite once confirmed. Energy Alberta indicated that it was still reviewing the bridge funding proposal and would get back to the Nation as soon as possible.
C-03099	August 23, 2025	Email	The Consultation Contractor for the Nation provided his cell number and indicated he would contact the Energy Alberta Team Member on August 25, 2025.
C-00564	August 27, 2025	Phone	Energy Alberta had a phone conversation with DFN regarding its 2025 Summer Field Program Opportunities.
C-03100	August 27, 2025	Email	Energy Alberta thanked the consultation contact for speaking with her earlier that day about the upcoming water intake siting tour. Energy Alberta indicated it understood from the conversation that the Nation would like to send two Elders to participate in the tour, and provided details including meeting location and start time, personal protective equipment requirements, and reimbursement of an honorarium and reasonable travel expense. Energy Alberta requested confirmation of the names and contact information of the attendees.
C-02629	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River area should members wish to attend.
C-03101	August 28, 2025	Email	Legal Counsel for the Nation requested a 1-hour meeting and provided a draft agenda: Update on Energy Alberta's experts, review of draft capacity funding agreement, and pause in planning phase. Legal Counsel for the Nation provided multiple meeting dates and times for Energy Alberta's consideration.
C-03102	August 28, 2025	Email	Legal Counsel for the Nation provided an update to the dates and times provided that corrected a typographical error.
C-03103	September 2, 2025	Email	Legal Counsel for the Nation provided an updated list of available dates for the meeting request and requested confirmation from Energy Alberta.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03104	September 3, 2025	Email	The Nation requested an initial map of the Grimshaw Gravel Aquifer, including its features and buffers, to be plotted against the sites of the Peace River Nuclear Power Plant and the broader Project zone. The Nation indicated that the aquifer was ecologically significant to it and other Indigenous groups in the area.
C-03105	September 3, 2025	Email	Energy Alberta provided its response to the bridge funding proposal from the Nation and indicated the Nation could contact Energy Alberta if it had any questions. Energy Alberta provided a preliminary list of necessary baseline studies for the federal Impact Statement and indicated the list was subject to changes as guidelines were finalized. Energy Alberta indicated it had received an email from the Nation's legal counsel, dated August 28, 2025, requesting a 1-hour check-in meeting and indicated that the best date/time for its team was September 8 from 8:30 to 9:00 am (Pacific) or September 10, from 8 to 9 am (Pacific). Energy Alberta requested confirmation if either of those date/times work for the Nation and indicated it would send a calendar invite once confirmed.
C-03106	September 5, 2025	Email	Legal Counsel for the Nation confirmed September 10, 2025 from 8 to 9 am PT and indicated it would be sharing a draft capacity funding agreement before the meeting, and requested that be added to the agenda.
C-03107	September 5, 2025	Email	Attendees from the Nation accepted the meeting invite for September 10, 2025
C-03108	September 9, 2025	Email	Energy Alberta referenced an email dated August 28, 2025 from the Nation's Legal Counsel and indicated that it had not yet received a copy of the draft capacity funding agreement. Energy Alberta requested a copy of the document so that it could be prepared for that discussion in the meeting the following morning.
C-03109	September 9, 2025	Email	Legal Counsel for the Nation indicated that it planned to share the draft capacity funding Agreement in the meeting.
C-03110	September 10, 2025	Email	Legal Counsel for the Nation provided Energy Alberta with a copy of the draft capacity funding Agreement and note that it was being shared on a without prejudice basis, for discussion purposes only.
C-03111	September 10, 2025	Email	Energy Alberta confirmed receipt of the draft capacity funding Agreement and indicated it would review and get back to the Nation as soon as possible.
C-02642	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals would be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03113	September 15, 2025	Email	DFN indicated it had considered Energy Alberta's request to attend the Siting Workshop and suggested instead that Energy Alberta prioritize a full-day workshop with the Nation in early October 2025. The Nation emphasized the importance of community-derived criteria in the siting process and indicated it was opting not to send a single representative to the workshop, that its preference was to engage in more comprehensive community discussions. The Nation referenced its bridge funding proposal that supported community engagement. The Nation also indicated it had applied for capacity funding from the Canadian Nuclear Safety Commission.
C-00034	September 19, 2025	Email	Energy Alberta indicated that the September 24 workshop aimed to provide an overview of site selection and preliminary criteria to Indigenous Nations and Communities, seeking input on engagement strategies. Representatives were not expected to provide substantive input at this stage. Energy Alberta proposed a full-day in-community workshop and suggested potential dates.
C-00033	September 19, 2025	Email	Energy Alberta provided a map of the Grimshaw Gravel Aquifer as requested.
C-03114	September 19, 2025	Email	The Nation acknowledged receipt of the map they had requested.
C-03115	September 26, 2025	Email	The Nation provided an advisory to third parties and companies proposing projects within its Traditional Territory, that addressed two matters critical to the Nation: ongoing legal action filed against the Government of Alberta concerning cumulative impacts on its rights, and a reclarification of the Nation's Traditional Territory.
C-05125	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-03116	September 30, 2025	Email	The Nation requested a meeting/workshop with Energy Alberta and proposed potential dates of November 4th, 5th (preferred), 12th, and 13th (preferred). The Nation suggested a format that included a morning meeting with Chief and Council and Elders, a community luncheon, and afternoon Project presentations. The Nation indicated there was also a possibility of a technical workshop on site selection methodology. The Nation requested confirmation of a preferred date(s).
C-03117	September 30, 2025	Email	The Nation shared correspondence regarding peat bog mining on the east side of the Peace River, near their William Mackenzie Indian Reserve. The information provided context to the Nation's concerns about the cumulative impacts of ongoing development in its territory.
C-03118	September 30, 2025	Email	Energy Alberta indicated it would welcome the opportunity to come to DFN and meet with Chief and Council, Elders, and other community members. Energy Alberta indicated it would review the dates suggested and respond as soon as possible.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03119	October 1, 2025	Email	Legal Counsel for the Nation advised it had reviewed Energy Alberta's revisions to the draft capacity funding Agreement and that it had largely accepted the proposed changes with a few exceptions. Legal Counsel for the Nation advised it would be happy to discuss further and noted that it continues to be shared on a without prejudice basis.
C-02485	October 3, 2025	Email	Energy Alberta provided its proposed edits to the capacity funding Agreement, on a without prejudice basis.
C-01954	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03120	October 7, 2025	Email	The Nation inquired about the proposed dates for a community meeting in early November and whether any of the suggested dates were suitable.
C-03121	October 7, 2025	Email	Energy Alberta confirmed November 12th and 13th as the best dates for meetings with the Nation and provided a proposed schedule including a technical workshop on November 12th and meetings with Chief and Council, a community luncheon, and Project presentations on November 13th.
C-03122	October 7, 2025	Email	The Nation confirmed the dates of November 12th and 13th and indicated availability of AV support and printing materials.
C-02452	October 8, 2025	Email	DFN requested that Energy Alberta ensure all correspondence be sent to all DFN representatives, including key team members and legal counsel to help manage the Project's complexities and deadlines effectively. DFN requested that the Chief confirm the request by response to all parties on the distribution list for the email.
C-01880	October 10, 2025	Email	The Nation requested a meeting to discuss key points regarding technology selection for a Project, planning for a community meeting, the status of Energy Alberta's review of the Nation's bridge funding proposal, and a final review of the proposed capacity funding Agreement.
C-01870	October 10, 2025	Email	Energy Alberta indicated its available for a meeting on October 17 before noon (MST) and inquired about the best time for DFN.
C-01908	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-03123	October 10, 2025	Email	The Nation confirmed October 17 at 10 am.
C-02350	October 15, 2025	Email	Energy Alberta requested a phone call to discuss outstanding Action Items.
C-03124	October 15, 2025	Email	The Nation requested an update on the status bridge funding proposal as it would be a topic at the Council meeting that day.
C-03125	October 15, 2025	Email	Energy Alberta indicated its review was ongoing and anticipated being able to provide a response in the coming days.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03126	October 16, 2025	Email	The Nation's attendees accepted the meeting invite for October 17, 2025.
C-01970	October 20, 2025	Email	Energy Alberta responded to the Nation's bridge funding proposal. A letter summarizing the response and rationale for the adjusted funding, including adjustments for previously received capacity funding, was attached.
C-00565	October 21, 2025	Email	Energy Alberta followed up on the October 16, 2024 initial Project introduction package. DFN confirmed receipt of the email and advised it was provided to Chief and Council. Energy Alberta requested a meeting regarding the Project. DFN advised they would follow up with their availability.
C-02018	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-00566	October 28, 2025	Email	Energy Alberta inquired as to whether DFN had reviewed the October 16, 2024 initial Project introduction package and requested a meeting. DFN advised the information had been provided to their lands department and requested Energy Alberta's availability for a meeting.
C-00567	October 28, 2025	Email	Energy Alberta provided its availability for a Project meeting on November 4, 6, or 7, 2024.
C-00568	October 30, 2025	Email	Energy Alberta followed up on its October 28, 2024 email requesting DFN's availability for a meeting.
C-00569	November 1, 2025	Email	Energy Alberta requested DFN's availability for a meeting on November 6 or 7, 2024.
C-02089	November 3, 2025	Email	The Nation requested teleconference to discuss logistical matters and planning for the in-community meetings on November 12 and 13, 2025.
C-02090	November 3, 2025	Email	Nation's representative confirmed availability for a teleconference to discuss logistical matters and planning for the in-community meetings on November 12 and 13, 2025.
C-02091	November 3, 2025	Email	Energy Alberta reminded the Nation of a meeting booked on November 3, 2025 to discuss logistical matters and planning for the in-community meetings on November 12 and 13, 2025.
C-02092	November 3, 2025	Email	Nation's representative queried another of the Nation's attendee regarding their availability for the meeting on November 3, 2025
C-02093	November 3, 2025	Email	Nation's representative confirmed availability for the November 2, 2025 meeting.
C-02098	November 4, 2025	Email	DFN confirmed attendance at the November 4 virtual meeting.
C-02099	November 4, 2025	Email	Energy Alberta confirmed additional DFN attendees had been added to the November 4 virtual meeting invitation.
C-03129	November 4, 2025	Email	Legal Counsel for the Nation provided a proposed agenda for November 12th, including a site visit with Energy Alberta and a community dinner featuring Project presentations, and November 13th including a meeting with Chief and Council, a luncheon with a Project presentation, and a technical workshop on site selection methodology. The afternoon was intended for community engagement without technical discussions, encouraging input on the Project process.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03130	November 4, 2025	Email	Energy Alberta requested confirmation of names of attendees for the site visit.
C-03131	November 4, 2025	Email	The Nation indicated between 6 to 9 people would be on the site visit and provided names.
C-03132	November 4, 2025	Email	Energy Alberta raised concerns that site visit as proposed would make timing tight for its attendance at a community dinner. Energy Alberta recommended an earlier departure to allow sufficient time for site visits and preparation. Energy Alberta indicated a need to inform landowners about potential increased traffic. Energy Alberta raised concerns regarding the technical level of discussions planned for November 13th, with a preference for less technical presentations to engage the community more effectively. Energy Alberta reiterate the importance of technical discussions on siting criteria and workplans and requested clarity on when these discussions could occur.
C-02102	November 5, 2025	Email	DFN confirmed the schedule of events for the upcoming in community meetings.
C-03133	November 5, 2025	Email	In follow-up to the call earlier that day to discuss the schedule for the meetings on November 12th and 13th, Energy Alberta provided an adjusted schedule and requested confirmation of the updates,
C-03134	November 5, 2025	Email	Energy Alberta requested confirmation of the changes in the schedule for November 12 and 13.
C-03135	November 5, 2025	Email	The consultation contact indicated they had not heard back from Council and indicated they anticipated being able to respond the following day.
C-03137	November 6, 2025	Email	Energy Alberta requested confirmation of the schedule for the November meetings
C-03138	November 6, 2025	Email	The consultation contact indicated that they were working on confirmation.
C-03139	November 6, 2025	Email	The Nation provided confirmation of the adjusted schedule for the meetings in November.
C-03140	November 7, 2025	Email	The Nation confirmed preparations for the upcoming meeting with Energy Alberta: Elders were invited, meeting notices were distributed.
C-03141	November 7, 2025	Email	Energy Alberta requested a 30-minute briefing at the Chateau Nova in Peace River before heading to the site.
C-03142	November 7, 2025	Email	The Nation confirmed the briefing.
C-02133	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04357	November 12	In-Person / Community Meeting	Energy Alberta met with Chief, Council and Elders and provided Project Overview and Nuclear Fundamentals presentation, followed by a community dinner. The following interests were raised: ■ Who is Energy Alberta and why is the Project needed ■ Site Selection ■ Commencement of environmental studies ■ Earthquakes and other disasters ■ Waste storage and transportation ■ Water quality and quantity ■ Fish and habitat ■ Free, Prior and Informed Consent (FPIC) ■ Education and Awareness ■ Safety ■ Regulatory process ■ Cumulative impacts ■ Engagement process ■ Pollution – air, land and water ■ Jobs and procurement ■ Training and education ■ Equity – long term financial benefits ■ Socio-Economics

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04358	November 13	In-Person / Community Meeting	Energy Alberta met with DFN Staff and community members. A site visit was planned but deferred due to weather concerns. The following interests were raised: ■ Peace River water levels - levels are down, and huge demands from other industries ■ Hunting areas (moose) ■ Safety ■ Earthquakes ■ Regulatory process ■ Cumulative impacts ■ Training ■ Economic benefits ■ Emergency Planning ■ Climate change ■ Traditional land use ■ Participation in field work
C-02751	November 13, 2025	Email	DFN requested information on the siting criteria and indicated they would review and provide an initial response to Energy Alberta.
C-02488	November 14, 2025	Email	Energy Alberta expressed gratitude to DFN leadership and community members for their engagement during a recent meetings, and for the opportunity to share details about its proposed Project. Energy Alberta acknowledged the community's concerns regarding the proposed Project's potential impacts. Energy Alberta reaffirmed its commitment to maintaining a relationship with the Nation and that it looked forward to future visits.
C-02487	November 14, 2025	Email	DFN expressed gratitude to the Energy Alberta team for their recent visit to the community, which facilitated discussions about the Project and its potential impacts. DFN indicated that community members showed significant interest in understanding the Project's effects on their rights, culture, health, and safety. DFN indicated that concerns were raised about the Project's implications in an already impacted area and had inquiries about how Energy Alberta might address local social and economic challenges. DFN indicated it planned to provide feedback on bridge funding and engagement agreements. DFN requested documentation on site selection criteria. DFN Council also thanked the Energy Alberta team for a gift.
C-02489	November 14, 2025	Email	Energy Alberta requested an opportunity to follow-up with the Chief regarding discussions they had at the community meetings on November 12 and 13, 2025.
C-03143	November 14, 2025	Email	Energy Alberta Team Members expressed gratitude to Elder Green for his kind words and that she looked forward to future conversations.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02387	November 17, 2025	Email	A follow-up was made regarding assessments and studies for nuclear projects in Ontario, providing links to the Environmental Assessment for the Darlington Nuclear Project, the Bruce C Nuclear Project, and the Deep Geological Repository impact assessment. Additional studies related to the operations and refurbishments of the Darlington, Pickering, and New Brunswick Power Plants are available on the CNSC website.
C-02490	November 18, 2025	Email	Energy Alberta followed up with a community member who had requested an opportunity to speak one-on-one with Energy Alberta staff. Energy Alberta requested dates and times for a virtual meeting to be arranged.
C-02491	November 18, 2025	Email	Energy Alberta followed up with a community member who had requested an opportunity to speak one-on-one with Energy Alberta staff. Energy Alberta requested dates and times for a virtual meeting to be arranged.
C-02486	November 20, 2025	Email	Energy Alberta requested alternate contact information for the Chief so that she could follow up on a few items that they discussed during the community meetings on November 12 and 13, 2025.
C-02681	November 21, 2025	Email	The Nation shared a copy of a letter from the Chief to the Minister of Energy and Natural Resources regarding its request for a Regional Assessment in their Traditional Territory. DFN emphasized the necessity of such an assessment due to the region's environmental stress and the need for a comprehensive understanding of cumulative impacts on their rights. The Nation also shared a recent Canadian Energy Regulator (CER) report that referenced traditional project assessments.
C-02680	November 21, 2025	Email	Energy Alberta thanked the Nation for sharing a copy of its correspondence with the Alberta Government and the recent CER Report a proposed Project in the Nation's Territory.
C-02753	November 22, 2025	Email	DFN requested contributions for its annual Christmas event.
C-02762	November 26, 2025	Email	Energy Alberta followed up on its request for an opportunity to chat with the Chief about a few things that came up at the recent in community meetings. Energy Alberta requested a preferred data/time to connect.
C-02760	November 27, 2025	Email	DFN provided a copy of the revised capacity funding Agreement between the Nation and Energy Alberta for review. DFN indicated the agreement was still subject to final approval by Chief and Council, but incorporated changes requested by them. DFN indicated that Chief and Council would meeting on December 2, 2025 for final sign off and requested Energy Alberta's response by December 1, 2025.
C-02759	November 27, 2025	Email	Energy Alberta confirmed receipt of the revised capacity funding Agreement and indicated it would review and get back to DFN as soon as possible regarding the latest proposed changes.
C-04359	November 27, 2025	Virtual / Online meeting	Energy Alberta met with consultation contact to discuss next steps following the in-community meeting earlier in the month.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02758	November 28, 2025	Email	Energy Alberta attached the presentation used at the Siting Workshop to provide an overview of the site selection process. Energy Alberta indicated that the workbook was too large a file to send by email and offered to review the workbook with DFN in a meeting. Energy Alberta requested dates that would work a review of the document with DFN.
C-02783	December 1, 2025	Email	Energy Alberta informed DFN of its donation for their Christmas Event. An EFT form was attached for processing the payment.
C-02784	December 1, 2025	Email	DFN acknowledged receipt of Energy Alberta's email
C-02786	December 1, 2025	Email	Energy Alberta confirmed its agreement with the edits redlined in the document titled: DRAFT DFN-EA capacity funding Agreement - November 27, 2025.
C-04515	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02867	December 3, 2025	Email	Energy Alberta followed up with a community member that had attended a recent community meeting to see if she still wanted to have a one-on-one conversation with Energy Alberta.
C-02868	December 3, 2025	Email	Energy Alberta followed up with a community member that had attended a recent community meeting to see if she still wanted to have a one-on-one conversation with Energy Alberta.
C-02888	December 4, 2025	Email	Energy Alberta share the action items resulting from the November 27, 2025 Virtual / Online meeting. ■ DFN will send comments on the engagement agreement ■ DFN will check with the Council about preferences for a work planning session
C-02893	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that provide Digital Graphic Design and/or Visual Narrative services. Recommendations for contacts with relevant experience and expertise were requested, along with any available portfolios or websites. The aim was to explore economic opportunities for members of the Nation.
C-03244	December 7, 2025	Email	Energy Alberta thanked the Nation for the information an asked that they keep Energy Alberta informed of any response they receive from the Minister.
C-03245	December 8, 2025	Email	DFN advised that it would accept Energy Alberta's bridge funding offer made on October 20, 2025. The Nation requested receipt of the letter and then it would submit invoices for expenses. The Nation also requested that going forward, all communications between Energy Alberta and the Nation should include its legal counsel.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03246	December 8, 2025	Email	Energy Alberta confirmed receipt of the letter submitted by the Nation and provided an EFT form for payment to the Nation. Energy Alberta provided direction on how the Nation should submit its invoices. Energy Alberta confirmed it would update its contact list to include the Nation's legal counsel on correspondence going forward.
C-03285	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03336	December 10, 2025	Email	DFN consultation contact advised that the Chief preferred to receive Project related information and 'keep in touch' through email so that she can keep track of incoming/outgoing communications, and that she tends to use text for internal DFN communications. Email ensures that DFN team assigned to projects is aware of and following up on commitments, tasks and undertakings.
C-03357	December 11, 2025	Email	Energy Alberta offered to have the Nuclear Fundamentals training delivered specifically for DFN members. Energy Alberta indicated that January 14th or 15th were available and requested confirmation that this was something the Nation would like to do.
C-03359	December 11, 2025	Email	Legal Counsel for DFN provided the signed capacity funding Agreement and Band Council Resolution.
C-03360	December 11, 2025	Email	Energy Alberta confirmed receipt of the signed capacity funding Agreement and Band Council Resolution and indicated it would have the document signed and returned to the Nation as soon as possible.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03381	December 12, 2025	Email	The DFN Project Team requested a meeting with Energy Alberta to discuss: - Technology –update on PPE - Site Selection - January Presentation – discuss possibility of EA meeting with DFN leadership and staff about the Project and consult on site selection - Workplan & Budget – next steps for 2026
C-03382	December 12, 2025	Email	Energy Alberta indicated it would check on possible dates and send a calendar invite.
C-03395	December 12, 2025	Email	DFN team members confirmed attendance at the December 19, 2025 meeting.
C-03397	December 12, 2025	Email	Energy Alberta provided status updates to the Action Items sent on December 4, 2025.
C-03696	December 18, 2025	Email	Energy Alberta wished DFN a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.
C-04360	December 19, 2025	Virtual / Online meeting	Energy Alberta met with DFN and discussed: - Technology: update on moving to PPE, including submission of new IPD and timelines - Site Selection: update on site selection process and whether Energy Alberta aims to decide in 2025 - Presentation: details on January 14 to 15 - January In-Person Meeting: consider Energy Alberta meeting with DFN leadership and staff to discuss the Project and consult on site selection - Workplan & Budget: next steps for 2026 workplan and budget
C-03775	December 19, 2025	Email	Energy Alberta informed DFN that the donation DFN Christmas Event will be sent that day.
C-03778	December 19, 2025	Email	Energy Alberta provided siting presentation.
C-03941	December 23, 2025	Email	DFN acknowledged the December 18, 2025 Holiday email and indicated it look forward to continuing work together.

EAST PRAIRIE MÉTIS SETTLEMENT
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR EAST PRAIRIE MÉTIS SETTLEMENT (EPMS)

ID	Date	Interaction Type	Summary
C-00598	January 8, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-00599	February 12, 2025	Email	Energy Alberta followed up on its January 8, 2025 email and requested EPMS's availability for a virtual meeting to discuss the Project.
C-00600	February 21, 2025	Email	Energy Alberta indicated its interest in engagement with EPMS and that it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with EPMS for an introduction to their process.
C-02366	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02391	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-01447	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta provided a reminder of upcoming deadlines including the 30-day public comment period on the IPD closing on May 14, 2025 and the application for IAAC's participant funding program closing on May 16, 2025. Energy Alberta advised a notification would be provided in May 2025 for the 30-day comment period on the TISG.
C-02420	May 5, 2025	Email	Energy Alberta requested confirmation that East Prairie had received the IPD for the Peace River Nuclear Power Project. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-00606	May 12, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding and requested a return call.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02507	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02573	May 15, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-00607	May 20, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding and requested a return call.
C-00608	May 22, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding and requested a return call.
C-03042	May 26, 2025	Email	Energy Alberta advised that it was offering capacity funding to support participation in the Impact Assessment process for the Peace River Nuclear Power Project and attached an application form to assess funding needs and an Electronic Funds Transfer form for quick fund disbursement. Energy Alberta requested that the forms be complete and return by May 30, 2025.
C-00609	May 29, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding and requested a return call.
C-02531	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the community to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03144	July 16, 2025	Email	Energy Alberta provided an update on its proposed Peace River Nuclear Power Project and emphasized the importance of Indigenous knowledge in the Impact Statement. Energy Alberta indicated it would conduct baseline environmental studies in July. Energy Alberta indicated it would engage further with Indigenous representatives for future studies and invited inquiries regarding participation in upcoming fieldwork.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05157	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02609	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02643	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03145	September 22, 2025	Email	East Prairie provided the name of the attendee that would attend the siting workshop in Peace River.
C-00058	September 22, 2025	Email	Energy Alberta confirmed the attendee at the workshop on September 24, 2025.
C-05124	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-00060	September 29, 2025	Email	The Settlement thanked Energy for the acknowledgment of September 30, the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01918	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01953	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01877	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02017	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02132	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02161	November 11, 2025	Email	Energy Alberta sent a reminder to the participant in the Indigenous Siting Workshop held on September 25, to submit the form for reimbursement of the honorarium and reasonable expenses.
C-02676	November 24, 2025	Email	Energy Alberta has requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options are attached for review. Input from Indigenous communities is sought before finalizing the site and proceeding with the Impact Assessment process. Meetings can be arranged to discuss the Project and gather feedback.
C-02730	November 24, 2025	Email	EPMS shared a link to a document for Energy Alberta's review.
C-02731	November 24, 2025	Email	Energy Alberta requested confirmation that the link and document that was sent was intended for Energy Alberta and not sent in error.
C-02732	November 24, 2025	Email	EPMS confirmed that it was a RFQ for its upcoming project.
C-02733	November 24, 2025	Email	Energy Alberta requested additional context related to EPMS's upcoming project.
C-04507	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02922	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations of candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03286	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03717	December 18, 2025	Email	Energy Alberta wished East Prairie Métis Settlement a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

ERMINESKIN CREE NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

RECORD FOR ERMINESKIN CREE NATION (ECN)

ID	Date	Interaction Type	Summary
C-03146	July 16, 2025	Email	Energy Alberta introduced the Nation to its Team working on the Peace River Nuclear Power Project. Energy Alberta indicated it had learned of the Nation's interest in the Project through IAAC. Energy Alberta provided information on the opportunities with IAAC and the CNSC as they were currently seeking feedback on draft guidelines and plans related to the Project. Energy Alberta advised that it would be conducting baseline environmental studies and invites the Nation to participate. Energy Alberta indicated that capacity funding was available to support Indigenous Nations in reviewing Project documents. Energy Alberta provided hyperlinks to additional resources, including the Initial Project Description. Energy Alberta offered the opportunity to schedule a meeting to discuss any of the information provided.
C-05136	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02612	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02644	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01957	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-05123	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01903	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02016	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02131	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02695	November 24, 2025	Email	Energy Alberta advised provided an information package and a map of two proposed siting options are attached for review. Energy Alberta informed it was seeking input from Indigenous groups before finalizing site selection and moving into the Impact Assessment process. Energy Alberta offered a virtual information session to discuss the Project and gather feedback.
C-04516	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02848	December 2, 2025	Email	The consultation contact for the Nation requested a virtual option to attend the Nuclear Fundamentals Workshop. The consultation contact for the Nation invited Energy Alberta to meet with Chief and Council for an Introductory Meeting and offered some possible dates for consideration.
C-02852	December 2, 2025	Email	Energy Alberta informed that it would not cover travel costs for the optional training workshop on nuclear energy and that there was currently no virtual option for attendance at the workshop, and that the Nation's request would be noted. Energy Alberta indicated it would welcome the opportunity to provide a Project overview at a meeting with Chief and Council and requested possible dates. Energy Alberta inquired if the Nation's offices would be closed over Christmas.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02847	December 2, 2025	Email	The Nation advised that its offices will be closed from December 19, 2025 to January 5, 2026 and they will return to regular business hours on January 6, 2025.
C-02853	December 2, 2025	Email	Energy Alberta acknowledged that the Nation's office would be closed during Christmas.
C-02894	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02962	December 4, 2025	Email	Energy Alberta provide two dates in January that it would be available to have an in-person Introductory Meeting. Energy Alberta requested a virtual attendance option for one member of its team.
C-03004	December 4, 2025	Email	The consultation contact suggested January 28, 2026 at 1 pm for an in-person meeting with Chief and Council and confirmed that a virtual option for attendance would be possible.
C-03027	December 5, 2025	Email	Energy Alberta thanked the Nation for confirming the date and indicated it would send a calendar invite and provided the names of the team members who would be attending.
C-03335	December 8, 2025	Email	Energy Alberta requested a change in the meeting time scheduled for January 28, 2026.
C-03287	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03361	December 11, 2025	Email	Energy Alberta followed up with the Nation to confirm if the meeting start could be adjusted
C-03378	December 11, 2025	Email	Ermineskin First Nation confirmed the start of the meeting could be adjusted to 12:30 and go until noon, then a light lunch followed by the remainder of the meeting.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03379	December 12, 2025	Email	Energy Alberta thanked the Nation for accommodating the adjusted time.
C-03699	December 18, 2025	Email	Energy Alberta wished Ermineskin Cree Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

FORT CHIPEWYAN MÉTIS NATION
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR FORT CHIPEWYAN MÉTIS NATION (FCMN)

ID	Date	Interaction Type	Summary
C-00628	January 31, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-00629	February 27, 2025	Email	Energy Alberta advised it planned to file a draft IPD in March 2025. Energy Alberta stated it was conducting preliminary land investigations, including drilling for core samples on private land, and would provide updates as it progressed. Energy Alberta advised the IAAC was commencing early engagement on the Project and would follow up to introduce to their regulatory process. Energy Alberta provided contact information for Project point-of-contact representatives and requested a meeting to discuss the Project.
C-02365	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02390	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta were also provided.
C-02421	May 5, 2025	Email	Energy Alberta requested confirmation that Fort Chipewyan had received the IPD for the Peace River Nuclear Power Project. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-03148	May 9, 2025	Email	The Consultation Contact indicated an interest in providing comments on the IPD and noted their comments would not be available until the end of May. The Consultation Contact inquired about an Agreement.
C-00635	May 12, 2025	Phone	Energy Alberta attempted to phone FCMN, there was no voice mail option. Tried again later in the day and still no answer.
C-02508	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02571	May 15, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-03152	May 22, 2025	Email	Energy Alberta provided the Consultation Contact with a copy of the capacity funding Letter sent to the President on May 15, 2025. An email with the letter attached is provided, and a follow-up email with application details is expected soon. Energy Alberta requested an introductory meeting to discuss the Project and address any questions.
C-02581	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support FCMN efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested FCMN complete and return the attached documents by May 30, 2025.
C-02532	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the community to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03153	July 16, 2025	Email	Energy Alberta provided an update on the Peace River Nuclear Power Project, emphasizing the importance of Indigenous knowledge in the Impact Statement. Energy Alberta advised it would be conducting baseline environmental studies starting in July, with limited participation opportunities for Indigenous Nations and Communities that had already expressed an interest. Energy Alberta indicated it remain interested engaging with FCMN about the Peace River Nuclear Power Project.
C-00652	July 24, 2025	Phone	Energy Alberta phoned FCMN to discuss their capacity funding application, developing work and engagement plans for the Project, and a meeting to discuss fieldwork participation. FCMN commented that they were primarily interested in the impacts to the river and water modelling. Energy Alberta advised a meeting could be arranged to discuss the Project and requested FCMN's availability for a meeting.
C-03154	August 5, 2025	Email	FCMN provided its completed capacity funding application.
C-03155	August 5, 2025	Email	FCMN requested an introductory meeting to discuss the proposed Project and develop a workplan. The Consultation Contact for FCMN was unsure if the correct contacts had been reached and requested the email be redirected, as necessary. The Consultation Contact for FCMN requested date and time options for the week of August 11 to 15, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03156	August 5, 2025	Email	Energy Alberta indicated it would check for potential meeting dates and get back to FCMN.
C-03157	August 6, 2025	Email	Energy Alberta provided its availability for a virtual meeting on August 14 and 15, 2025. Energy Alberta requested confirmation from FCMN on the dates provided and indicated it would send a calendar invite once confirmed.
C-03158	August 8, 2025	Email	FCMN advised they were unavailable to meet during the week of August 11, 2025. FCMN provided their availability for the week of August 18, 2025 and requested Energy Alberta's availability.
C-03159	August 11, 2025	Email	Energy Alberta advised it was unavailable the week of August 18, 2025 and provided its availability during the week of August 25, 2025. Energy Alberta requested confirmation from FCMN.
C-05156	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-03160	August 26, 2025	Email	Energy Alberta followed up on its August 11, 2025 email advising they were no longer available to meet during the week of August 25, 2025 and requested FCMN's availability in September 2025. Energy Alberta advised it had approved FCMN's capacity funding request to support their review of the IPD and TISG in the timeframe specified by the IAAC.
C-02611	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested FCMN's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03161	September 3, 2025	Email	FCMN indicated it was available to meet with Energy Alberta on either September 25 or 26, 2025.
C-03162	September 3, 2025	Email	Energy Alberta indicated it would check the September dates and get back to FCMN.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03163	September 3, 2025	Email	Energy Alberta indicated that its Team was already booked for September 25 and 26 and inquired about FCMN's availability the following week.
C-03164	September 4, 2025	Email	FCMN provided additional dates they were available to meet on - September 29, 30, and October 1, 2025.
C-03165	September 11, 2025	Email	Energy Alberta confirmed its availability on September 29 from 2 to 3 PM and indicated it would send a calendar invite.
C-02645	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals would be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-00016	September 16, 2025	Email	Energy Alberta followed up to a table conversation it had with FCMN at the Decolonizing Land and Waters Summit and indicated it has updated the calendar invite as discussed, confirming a meeting with FCMN to discuss the Project.
C-05122	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-03166	October 6, 2025	Email	FCMN invited Energy Alberta to its first-annual Joint Venture Showcase.
C-03167	October 6, 2025	Email	Energy Alberta thanked FCMN for the invitation and inquired if either of the consultation contacts would be attending.
C-03168	October 6, 2025	Email	The consultation contact indicated that they would most likely not attend and introduced Energy Alberta to a contact within FCMN's business arm.
C-03169	October 6, 2025	Email	The contact for the business arm provided a registration link to the Joint-Venture Showcase.
C-03170	October 6, 2025	Email	Energy Alberta indicated it would check schedules and register if they were able to attend,
C-03171	October 7, 2025	Email	The business contact provided additional information about the Joint-Venture Showcase
C-01956	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01901	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-01879	October 10, 2025	Email	FCMN thanked Energy Alberta for the list of Indigenous leaders with knowledge of the Canadian nuclear sector willing to share insights to support community awareness and education about nuclear energy.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02015	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03172	October 22, 2025	Email	Energy Alberta advised that they had registered to attend the showcase.
C-03173	October 22, 2025	Email	The business contact thanked Energy Alberta for registering.
C-03174	October 30, 2025	Email	Energy Alberta indicated that they were no longer able to attend the showcase and suggested a virtual call for introductions.
C-02130	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they are included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within FCMN's community.
C-02149	November 10, 2025	Email	FCMN welcomed the new Energy Alberta Team member and requested an update on the Project.
C-02150	November 11, 2025	Email	Energy Alberta indicated it could provide a Project update and requested a meeting to discuss the planning of environmental baseline field studies and community input, including identifying Indigenous valued components and metrics. Dates and times for the meeting were requested for scheduling.
C-02479	November 20, 2025	Email	FCMN thanked Energy Alberta for its message and outline for next steps. FCMN indicated its interest in a meeting to receive Project updates and continue the discussion on community input for environmental baseline field studies. FCMN noted that with the upcoming holiday season, it would be best to schedule the meeting in the new year. FCMN agreed to send potential dates after they return from holidays on January 12th.
C-02492	November 20, 2025	Email	Energy Alberta requested a preferred date for a meeting time in the New Year.
C-02682	November 20, 2025	Email	The community provide a few of its available meeting dates and time for Energy Alberta's consideration.
C-02685	November 21, 2025	Email	Energy Alberta indicated it was available on January 19, 2026 and that she would send a calendar invite shortly.
C-02683	November 21, 2025	Email	Energy Alberta received an out of office notice in relation to its November 21, 2025 email.
C-04517	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02925	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03288	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of the proposed Project, and that all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Energy Alberta mentioned that selection of a specific nuclear reactor technology and detailed design is not required for early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that looks at ranges for key features such as cooling water needs, building size and land area, that covers general requirements for many designs rather than for a specific reactor. Energy Alberta provided links to two potential reactors that were under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03670	December 17, 2025	Email	Fort Chipewyan Métis Nation provided an update on the leadership with the appointment of a Board of Directors for the 2025–2029 term.
C-03684	December 18, 2025	Email	Energy Alberta wished FCMN a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

FORT MCKAY FIRST NATION
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR FORT MCKAY FIRST NATION (FMFN)

ID	Date	Interaction Type	Summary
C-03410	May 14, 2025	Email	Energy Alberta was copied on a letter that Fort McKay First Nation submitted to IAAC with respect to the Peace River Nuclear Power Project and comments the Initial Project Description.
C-03176	May 15, 2025	Email	Energy Alberta confirmed it had received the letter from Fort McKay First Nation with respect to the Initial Project Description for the Peace River Nuclear Power Project.
C-03181	May 26, 2025	Email	Energy Alberta offered capacity funding to support Fort McKay First Nation's participation in the Planning Phase of the Impact Assessment process. The email included a capacity funding letter, an application form to assess funding needs, and an Electronic Funds Transfer form for quick fund disbursement. Energy Alberta requested a response by May 30, 2025.
C-02533	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03182	July 16, 2025	Email	Energy Alberta introduced its Indigenous engagement team and encouraged feedback on the draft Integrated Tailored Impact Statement Guidelines and Indigenous Engagement and Partnership Plan. Energy Alberta advised its summer fieldwork program would begin in July, focusing on baseline environmental studies, with limited participation opportunities for interested Indigenous groups. Energy Alberta offered capacity funding to support the Nation during the Impact Assessment process, and provided application forms and links to additional resources, including the Initial Project Description.
C-03183	July 22, 2025	Email	The Nation provided its comments on the draft integrated TISG regarding the proposed Peace River Nuclear.
C-03184	July 24, 2025	Email	IAAC communication - do not include in ROC
C-05137	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: 2025 Summer Fieldwork Program - Water Intake Siting Inspection - Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies - An ongoing review and refinement of technology

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03185	August 18, 2025	Email	FMFN Senior Manager – Environmental & Regulatory Affairs confirmed receipt of Energy Alberta's August 18, 2025 notification regarding its request to pause the IA process for the Project.
C-03186	August 19, 2025	Email	FMFN Director of Sustainability confirmed receipt of Energy Alberta's August 18, 2025 letter regarding its request to pause the IA process and advised it would follow up with questions after their review.
C-02613	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested FMFN's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03187	August 28, 2025	Email	The Nation indicated its availability for an Introductory Meeting on September 22, 2025
C-03188	September 9, 2025	Email	Energy Alberta indicated it was unavailable on the date requested as it would be hosting a series of public information sessions in the Peace River area the week of September 22 to 26, 2025. Energy Alberta inquired if the Nation had someone that would be able to join the Introduction to Siting Workshop for Indigenous Nations and Communities on September 24.
C-02646	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-05121	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01955	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03189	October 7, 2025	Email	The Nation confirmed receipt of the October 7, 2025 correspondence and indicated it would provide potential meeting dates.
C-01902	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-03190	October 14, 2025	Email	The Nation thanked Energy Alberta for providing the contact information of Indigenous leaders a willingness to speak to Nations about the Canadian nuclear sector.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02014	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03191	October 22, 2025	Email	The Nation thanked Energy Alberta for providing an update on technology considerations.
C-02129	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02699	November 24, 2025	Email	Energy Alberta has requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options are attached for review. Input from Indigenous groups is sought before finalizing site selection and moving into the Impact Assessment process. A virtual information session can be arranged to discuss the Project and gather feedback.
C-04509	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02808	December 2, 2025	Email	Energy Alberta received a response indicating that the FMFN consultation team was already booked that day and would be unable to attend. FMFN inquired if a virtual option would be available.
C-02825	December 2, 2025	Email	Energy Alberta indicated that they did not currently have a virtual option for the workshop and would note this request. Energy Alberta mentioned that the participant does not need to be a staff member.
C-02879	December 2, 2025	Email	Fort McKay First Nation inquired if Energy Alberta would provide funding for travel to attend this training.
C-03192	December 2, 2025	Email	Energy Alberta advised it would not be covering travel costs for attendance at the optional training opportunity.
C-02895	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02971	December 4, 2025	Email	Fort McKay First Nation indicated it would check internally for suggestions for Indigenous Graphic Design Services.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02919	December 4, 2025	Email	Energy Alberta acknowledged that Fort McKay First Nation was checking on possible graphic design services.
C-02942	December 4, 2025	Email	Fort McKay First Nation provided contact information for two community that may have experience in graphic design.
C-02943	December 4, 2025	Email	Energy Alberta acknowledged the contact information provided by Fort McKay First Nation.
C-03289	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03722	December 18, 2025	Email	Energy Alberta wished Fort McKay First Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

GIFT LAKE MÉTIS SETTLEMENT

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR GIFT LAKE MÉTIS SETTLEMENT (GLMN)

ID	Date	Interaction Type	Summary
C-00664	January 8, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-00665	February 12, 2025	Email	Energy Alberta followed up on its January 8, 2025 email and requested GLMS's availability for a virtual meeting to discuss the Project.
C-00673	February 21, 2025	Email	Energy Alberta advised it was interested in continuing engagement with GLMS and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with GLMS for an introduction to their process.
C-02364	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02389	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta were also provided.
C-02422	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta provided a reminder of upcoming deadlines including the 30-day public comment period on the IPD ending on May 14, 2025 and the application for the IAAC's participant funding program ending on May 16, 2025. Energy Alberta advised a notification would be provided in May 2025 for the 30-day comment period on the TISG.
C-00677	May 12, 2025	Email	Energy Alberta phoned main office number for GLMS, they provided the cell number for the consultation contact.
C-00670	May 12, 2025	Phone	Energy Alberta phoned cell number for the consultation contact to discuss capacity funding related to the Project. Energy Alberta left a voice mail and requested a callback.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02509	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02574	May 15, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-00676	May 20, 2025	Phone	Energy Alberta had a phone conversation with GLMS regarding capacity funding relate to the Project. Energy Alberta agreed to provide details of their upcoming trip to the Peace River area in a follow-up email.
C-03193	May 20, 2025	Email	Energy Alberta had a phone call with the consultation contact and emailed in follow-up to the conversation. Energy Alberta indicated it would like to arrange a meeting to share information about its proposed Project and address questions. Energy Alberta indicated that they planned to be in the Peace River area the weeks of June 2 to 6 and again June 9 to 10 and inquired if it would be possible to meet with GLMS.
C-03194	May 20, 2025	Email	The Project Manager for Gift Lake Métis Settlement inquired about capacity funding for the review of the IPD. He requested an application form and information on available funding amounts.
C-03195	May 21, 2025	Email	Energy Alberta thanked the Project Manger for his inquiry and advised that information would be sent by the end of the week.
C-02582	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-00682	June 20, 2025	Community Event	A GLMS vendor at Woodland Cree Treaty Days provided contact information for a GLMS Council member and requested Energy Alberta follow up with him to discuss the Project.
C-02534	June 25, 2025	Email	Energy Alberta advised that IAAC and CNSC had initiated a comment period for the Planning Phase documents for the Peace River Nuclear Power Project. Energy Alberta encouraged GLMS to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03196	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program, emphasizing the importance of Indigenous knowledge in the Impact Statement. Energy Alberta indicated it would be conducting baseline environmental studies starting in July, with limited participation opportunities for Indigenous Nations and Communities that had already expressed interest. Energy Alberta noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested GLMS follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.
C-05155	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: 2025 Summer Fieldwork Program - Water Intake Siting Inspection - Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies - An ongoing review and refinement of technology
C-02614	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02647	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-05120	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01960	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01900	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-03197	October 13, 2025	Email	Energy Alberta advised that they would be in the GLMS area and wondered if the consultation contact would be available for an in-person visit.
C-03199	October 15, 2025	Email	GLMS indicated that they would be available in the community by 9:00 a.m. the following day.
C-02493	October 15, 2025	Email	The GLMS consultation contact indicated they looked forward to meeting with Energy Alberta when they visited the community.
C-03200	October 16, 2025	Email	Energy Alberta inquired if the meeting would be at the Settlement Office.
C-03202	October 16, 2025	Email	Energy Alberta requested directions to the Settlement office. When Energy Alberta arrived at the office, a discussion was had with the Director of Consultation. Energy Alberta inquired if GLMS would be interested in an Introductory Meeting. Energy Alberta indicated it was also seeking feedback from GLMS on the two siting options.
C-04380	October 16, 2025	In person / community meeting	Energy Alberta stopped in for an informal meeting with the GLMS consultation contact. Energy Alberta discussed the potential of doing an Introductory Meeting with GLMS, either with the technical team or with Council. GLMS indicated it would check on interest and get back to Energy Alberta.
C-02013	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02128	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they be included in all future communications. Energy Alberta requested a meeting date. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02684	November 20, 2025	Email	Energy Alberta followed up to its informal meeting with the GLMS consultation contact on October 16 and inquired if GLMS had any updates regarding the potential for an Introductory Meeting, either with the technical team or Council.
C-02796	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by a prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02926	December 4, 2025	Email	Energy Alberta inquired about any Indigenous businesses or individuals in Gift Lake Métis Settlement that could potentially provide Digital Graphic Design and/or Visual Narrative services. Recommendations for candidates with relevant experience and expertise are requested, along with any available portfolios or websites. Energy Alberta stated that they plan to reach out directly to potential candidates whose services align with their needs.
C-03290	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of the proposed Project, and that all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Energy Alberta mentioned that selection of a specific nuclear reactor technology and detailed design is not required for early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that looks at ranges for key features such as cooling water needs, building size and land area, that cover general requirements for many designs rather than for a specific reactor. Energy Alberta provided links to two potential reactors that were under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03700	December 18, 2025	Email	Energy Alberta wished Gift Lake Métis Settlement a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would be available via cell phone during this time.

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR GRANDE PRAIRIE MÉTIS LOCAL (GPML)

ID	Date	Interaction Type	Summary
C-00688	August 12, 2025	Email	Energy Alberta advised the IAAC and the CNSC were seeking comments on the draft integrated TISG and draft IEPP and provided information regarding the summer 2025 field work program and capacity funding. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs. Energy Alberta advised it had begun conducting baseline studies and noted opportunities to participate were available. Energy Alberta advised the capacity funding was meant to support the participation in the IA and planning phase of the Project and provided the application form and electronic funds transfer form for completion. Energy Alberta provided website links to access the English and French versions of the IPD and requested to be contacted for any questions.
C-05171	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-03595	August 27, 2025	Email	Grande Prairie Métis confirmed receipt of Energy Alberta's August 18, 2025 email regarding its request or regulatory timeline pause and advised they were meeting with IAAC and CNSC August 28, 2025.
C-03596	August 27, 2025	Email	Energy Alberta confirmed that it was the proponent and that the Impact Assessment Agency and the Canadian Nuclear Safety Commission were the regulators for its proposed Project. Energy Alberta affirmed that it was open to having a virtual Introductory Meeting with the Grande Prairie Métis and requested available dates/times.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00691	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested Grande Prairie Métis' availability for a meeting to discuss the Project and engagement efforts. Energy Alberta provided information and an invitation to its planned Project siting workshop, noting all nuclear projects were required to undergo a comprehensive site selection assessment to ensure the selected site adhered to the social, safety, and technical criteria set by Canadian and international regulatory authorities. Energy Alberta advised participants would be provided information regarding the criteria for site selection during the workshop and an information package in advance of the workshop. Energy Alberta provided information about the workshop's arrangements and advised an honorarium would be provided to all participants. Energy Alberta provided information about four planned public engagement sessions from September 22 to 25, 2025 and provided a website link to register for the sessions.
C-03600	September 1, 2025	Email	The President of the Grande Prairie Métis Local, copied the President of Valleyview Métis Local and a consultant supporting both locals in the Grande Prairie Métis District, and requested a meeting on September 5, 2025 between 1:00 to 2:00 pm.
C-02494	September 3, 2025	Email	Energy Alberta indicates it was not available on September 5, 2025 and inquired about days the following week the Métis Locals might be available
C-03601	September 3, 2025	Email	The President of the Grande Prairie Métis Local, copied the President of Valleyview Métis Local and a consultant supporting both locals in Grande Prairie Métis District, and indicated that September 18, 2025 would work for them for a meeting.
C-03602	September 8, 2025	Email	The President of the Grande Prairie Métis Local shared resolutions from its Council and the Valleyview Council authorizing her as the direct contact for any consultation in Grande Prairie Métis District 13.
C-03603	September 8, 2025	Email	The President of the Grande Prairie Métis Local advised the name of its representative at the siting workshop.
C-03604	September 8, 2025	Email	Energy Alberta acknowledge receipt of the siting workshop participant's name and inquired about dietary restrictions.
C-00022	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-03610	September 19, 2025	Email	Siting workshop participant requested confirmation of the process for travel and accommodation expenses.
C-03605	September 19, 2025	Email	Energy Alberta indicated it would be providing an expense form shortly.
C-03611	September 19, 2025	Email	Workshop participant informed Energy Alberta he was no longer able to attend and provide the name and contact information for the alternate participant.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05119	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-03606	October 7, 2025	Email	Workshop participant inquired if the expense form had been provided.
C-01921	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01959	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01878	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02012	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02495	October 22, 2025	Email	Workshop participant provided its expenses for the meeting on September 24, 2025 in Peace River.
C-02496	October 24, 2025	Email	President of the Grande Prairie Métis Local advised that the President of Valleyview Métis Local and a consultant should both be copied on emails to the Grande Prairie Métis Local.
C-02110	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02455	November 19, 2025	Email	Grande Prairie Métis and Valleyview Métis locals requested an Introductory Meeting sometime after November 29, 2025.
C-02497	November 19, 2025	Email	Energy Alberta confirmed it would be happy to arrange a meeting the first or second week of December and requested dates/time in either of those weeks that could be checked against Energy Alberta calendars. Energy Alberta indicated it would send a Teams invite once a date/time could be confirmed.
C-02686	November 19, 2025	Email	The President indicated that they would send a few potential dates once President Brown was back.
C-02743	November 27, 2025	Email	Energy Alberta followed up with the workshop participant regarding the expense form for the September Siting Workshop and requested the attached EFT form be completed in order to process the payment. Energy Alberta clarified the mileage expense.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04494	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02927	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03000	December 4, 2025	Email	Grande Prairie Métis Local provided a recommendation for Indigenous Graphic Design Services.
C-02977	December 4, 2025	Email	Energy Alberta indicated it was familiar with the person recommended.
C-02987	December 4, 2025	Email	An Indigenous Graphic Designer expresses enthusiasm for collaborating work with Energy Alberta and a portfolio was provided.
C-03251	December 8, 2025	Email	The President suggest December 16th at 1:00 pm as a potential meeting date.
C-03252	December 9, 2025	Email	Energy Alberta indicated that December 16th at 1:00 pm was already booked and inquire about possible dates in the New Year.
C-03315	December 9, 2025	Email	The President suggested January 8, 2025 at 10 am for the Introductory Meeting.
C-03291	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03329	December 10, 2025	Email	Energy Alberta confirmed that January 8 at 10 am worked and would send a calendar invite.
C-03330	December 10, 2025	Email	Grande Prairie and Valleyview Métis Local attendees confirmed attendance at the January 8, 2026 teams meeting.
C-03546	December 15, 2025	Email	Energy Alberta reminded the workshop participant that expenses from the September siting workshop cannot be processed due to missing EFT information. An EFT form is attached for completion.
C-03632	December 16, 2025	Email	Energy Alberta received a request that the meeting time on January 8 be moved to 1 pm
C-03667	December 17, 2025	Email	Energy Alberta confirmed it could move the meeting time and would send an updated calendar invite.
C-03669	December 17, 2025	Email	Attendees confirmed that the adjusted time would work.
C-03635	December 17, 2025	Email	The President provided the required EFT information.
C-03636	December 17, 2025	Email	Energy Alberta indicated that it would send a confirmation when the payment had been made.
C-03715	December 18, 2025	Email	Energy Alberta wished Grande Prairie Métis a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.
C-03738	December 18, 2025	Email	The President replied with a holiday greeting.
C-03737	December 19, 2025	Email	Energy Alberta requested the President contact the Energy Alberta accounting department regarding the EFT information. The contact information was provided for follow-up.
C-03744	December 19, 2025	Email	The President requested its accounting person to contact Energy Alberta as soon as possible.
C-03745	December 19, 2025	Email	Energy Alberta acknowledged the Presidents request of its accounting person.

HORSE LAKE FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR HORSE LAKE FIRST NATION (HLFN)

ID	Date	Interaction Type	Summary
C-00731	October 23, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-00732	January 17, 2025	Email	Energy Alberta requested HLFN's availability for a virtual meeting in February 2025 to discuss the Project.
C-00733	January 24, 2025	Email	Energy Alberta requested HLFN's availability for a meeting on February 12 or 13, 2025 to discuss their concerns regarding nuclear energy.
C-00734	January 24, 2025	Email	HLFN advised they were opposed to nuclear energy and would fight nuclear projects in their area. HLFN advised alternate methods of power generation were required.
C-00735	February 21, 2025	Email	Energy Alberta advised it was interested in engagement with HLFN and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with HLFN for an introduction to their process.
C-02367	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02388	April 14, 2025	Email	Energy Alberta followed up on April 2025 notification of the IPD submission and advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02423	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-00743	May 12, 2025	Phone	Energy Alberta phoned HLFN to confirm receipt of the IPD and discuss capacity funding. HLFN requested all Project communications be directed to their Chief. Energy Alberta requested a contact number for the Chief and was advised to send all communications by email and that information was provided by HLFN.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00744	May 13, 2025	Email	Energy Alberta provided introductory information about the Project and its consultation and engagement activities, noting they were in the early engagement phase. Energy Alberta indicated it was aware that HLFN had been opposed to nuclear energy projects. Energy Alberta advised it was interested in including HLFN in the engagement process. Energy Alberta provided its availability for an in-person Project introduction meeting the weeks of June 2 and 9, 2025 and requested HLFN's availability. Energy Alberta provided its contact information.
C-02510	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period and included the Chief as requested by HLFN. Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-00745	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email and provided an application form, an EFT form, and a capacity funding letter. The letter noted Energy Alberta was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's Impact Assessment and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. The letter requested Energy Alberta be contacted if the communities required additional funding and provided its contact information. The letter requested communities provide information on how the additional funds would be used. The letter outlined the purpose of the Project and its guiding principles and advised Energy Alberta was available for further discussion. Energy Alberta noted the application form would support it in understanding HLFN's capacity funding requirements and the EFT form would facilitate quick payments. Energy Alberta advised the funding was intended to support HLFN's review of the IPD and the TISG within the IAAC's timeframes and requested the forms be completed and returned by May 30, 2025 if HLFN wished to receive the funding.
C-02535	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03206	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including Indigenous knowledge in the Impact Statement by participating in field data collection programs. Energy Alberta advised interested Indigenous Nations could participate in baseline environmental studies beginning in July 2025 and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested HLFN follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement. Energy Alberta received an out-of-office response from HLFN.
C-05154	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: 2025 Summer Fieldwork Program - Water Intake Siting Inspection - Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies - An ongoing review and refinement of technology
C-02616	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested HLFN's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03207	September 2, 2025	Email	HLFN provided correspondence dated September 2, 2025 that affirmed its opposition to the Project and requested the letter be forwarded to the Alberta Premier.
C-03208	September 2, 2025	Email	Energy Alberta thanked the Industry Coordinator for the phone call and confirmed by email that it had received the Nation's letter, and it understood that the Nation was opposed to the proposed Project. Energy Alberta affirmed that its door remains open, and it was more than willing to have a conversation with the Nation should it wish to meet at anytime in the future.
C-03209	September 2, 2025	Email	Industry Coordinator requested that the Alberta Premier be included in the email exchange as requested.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03210	September 2, 2025	Email	Energy Alberta reminded the Industry Coordinator that it had mentioned on their phone call, that she did not have an email address for Premier Danielle Smith and provided a website link and contact information, if the Nation wanted its letter on the record related to the Nuclear energy engagement that the province was conducting. Energy Alberta indicated it had circulated the Nation's letter to key members of its Project Team. Energy Alberta advised that its proposed Project was being reviewed Federally, by the IAAC and the CNSC and provided links to that registry where the Nation could also submit its letter.
C-02648	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-05118	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01958	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01898	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02011	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02127	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they are included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-03212	November 12, 2025	Email	The consultation contact advised Energy Alberta that following a recent election, HCFN has a newly elected Chief who should be included in all correspondence going forward.
C-03213	November 12, 2025	Email	Energy Alberta confirmed it would update its contact list.
C-02409	November 17, 2025	Email	Energy Alberta extended congratulations to the new Chief and leadership team of Horse Lake First Nation following their recent election. Energy Alberta indicated it was aware that HLFN was opposed to the Project and extended an offer to meet and discuss the proposed Peace River Nuclear Power Project, regardless of its opposition. The intention is to engage and understand the Nation's interests better, with a willingness to build a respectful relationship. Contact information was provided for further communication regarding a potential meeting.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02734	November 24, 2025	Email	Energy Alberta provided an information package about the Project as well as a map showing its two proposed siting options that have been identified based on preliminary technical feasibility. Energy Alberta indicated it was important to gather Indigenous input on the two locations proposed prior to selecting a site and moving into the Impact Assessment process. Energy Alberta indicated it would be pleased to set up a virtual or in-person meeting to introduce the Project to the Nation and gather initial feedback on the siting options and discuss how the Nation would like to be involved going forward.
C-02735	November 24, 2025	Email	HLFN responded that the best location would be the City of Calgary with the Bow River running through the City. HLFN expressed concern that the sites proposed were in an area where animals live.
C-02736	November 26, 2025	Email	Energy Alberta acknowledged that HLFN was opposed to the proposed Peace River Nuclear Power Project. Energy Alberta indicated its team remained open to discussions to understand the Nation's concerns, particularly regarding site location. Energy Alberta shared factors influencing site selection include technical requirements for cooling water, which limit options in southern Alberta due to water allocation restrictions. Energy Alberta invited further dialogue to address additional concerns from the Nation.
C-04510	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-03241	December 2, 2025	Email	The Industry Coordinator expressed that only sending emails to the Nation's consultation email was unacceptable. He reminded Energy Alberta that he is the main contact for Horse Lake First Nation. He advised that if Energy Alberta was willing to put aside 1 billion dollars for a clean up in case the plant was damaged or an environmental disaster happens, then the Nation would be willing to sit down and have a talk with Energy Alberta.
C-02896	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Recommendations for contacts with relevant experience and expertise were requested, along with any available portfolios or websites. The aim was to advance economic opportunities for members of the Nation.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03249	December 8, 2025	Email	Energy Alberta apologized for missing the Industry Coordinator in its recent email and indicated it had updated the contact list to ensure he received all future correspondence. Energy Alberta shared information about the Nuclear Liability and Compensation Act that requires nuclear facility operators to maintain insurance coverage of up to CAD\$1 billion for nuclear incident damages.
C-03292	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of the proposed Project, and that all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Energy Alberta mentioned that selection of a specific nuclear reactor technology and detailed design is not required for early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that looks at ranges for key features such as cooling water needs, building size and land area, that covers general requirements for many designs rather than for a specific reactor. Energy Alberta provided links to two potential reactors that were under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03693	December 18, 2025	Email	Energy Alberta wished HLFN a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would be available via cell phone during this time.

KAPAWE'NO FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR KAPAWE'NO FIRST NATION (KFN)

ID	Date	Interaction Type	Summary
C-00805	October 23, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-00788	October 29, 2024	Email	KFN requested hard copies of the Project information package and mapping provided on October 23, 2024.
C-00789	January 17, 2025	Email	Energy Alberta requested KFN's availability for a virtual meeting in February 2025 to discuss the Project.
C-00790	February 12, 2025	Email	Energy Alberta followed up on its January 17, 2025 email and requested KFN's availability for a virtual meeting to discuss the Project.
C-00791	February 21, 2025	Email	Energy Alberta advised it was interested in engagement with KFN and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with KFN for an introduction to their process.
C-02368	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02396	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02424	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02559	May 13, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. The letter outlined the purpose of the Project and its guiding principles and advised Energy Alberta was available for further discussion. The letter requested Energy Alberta be contacted if the communities required additional funding and provided its contact information. Contact information for further inquiries and funding requests was provided. A delivery failure receipt was received.
C-00787	May 13, 2025	Phone	Energy Alberta received an error message related to its recent communication and phoned KFN to confirm the contact information for KFN Hereditary Chief. KFN confirmed the contact information.
C-03214	May 14, 2025	Email	Energy Alberta forwarded to the consultation contact, an email sent by its President to Hereditary Chief Harlcrow. Energy Alberta indicated that the email address they had, indicated the email was undeliverable and requested confirmation of the correct email address.
C-02512	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-03215	May 20, 2025	Email	The Consultation Manager indicated she would pass the email on to the Hereditary Chief and requested information on attaining funding support through the IAAC.
C-00800	May 21, 2025	Email	Energy Alberta provided information about IAAC capacity funding.
C-02583	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-03217	May 29, 2025	Email	The Nation acknowledged receipt of the capacity funding information and indicated it would follow-up.
C-03218	May 29, 2025	Email	Energy Alberta indicated that it was still getting an error email when sending information to Hereditary Chief Halcrow and requested confirmation that it had the correct email address.
C-03219	May 29, 2025	Email	The consultation manager provided the correct email address for Hereditary Chief Halcrow.
C-03302	May 29, 2025	Email	Energy Alberta thanked the Nation for the updated email address and indicated it would update its contact list accordingly.
C-03220	June 6, 2025	Email	Kapawe'no Consultation office requested a copy of the capacity funding application in word format.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03221	June 6, 2025	Email	Energy Alberta advised the capacity funding and EFT forms were provided in an editable format and requested clarity on their request for the alternative format.
C-03222	June 6, 2025	Email	Kapawe'no Consultation office advised that they did not have adobe and requested a word file.
C-03223	June 6, 2025	Email	Energy Alberta provided the requested documents in word format.
C-03224	June 6, 2025	Email	KFN provided the completed capacity funding application form and advised their finance department would complete the EFT form.
C-03225	June 13, 2025	Email	Energy Alberta advised that it had approved capacity funding for Kapawe'no First Nation to support its efforts in reviewing the Planning Phase documents including the IPD and TISGs within the timeframe specified by the IAAC.
C-03226	June 13, 2025	Email	Energy Alberta requested the EFT for payment of the capacity funds.
C-03227	June 18, 2025	Email	Kapawe'no Consultation provided the EFT form
C-02536	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03228	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program, emphasizing the importance of Indigenous knowledge in the Impact Statement. Energy Alberta indicated it would conduct baseline environmental studies starting in July and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested KFN follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.
C-03229	July 23, 2025	Email	Kapawe'no Consultation office inquired if the Peace River Nuclear Plant was related to the Capital Power and Ontario Power Generation project.
C-03230	July 24, 2025	Email	Energy Alberta informed that the projects were not related and that the Peace River Nuclear Power Project was being proposed by Energy Alberta and provided a link to its website.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05153	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02617	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested KFN's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta also extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02649	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03231	September 12, 2025	Email	The Consultation Manager indicated that she would attend the September 24 workshop and that she would also be interested in a virtual session.
C-00023	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-03232	September 23, 2025	Email	The workshop attendee indicated she was no longer able to attend and provided the name of an alternate attendee.
C-03386	September 23, 2025	Email	Energy Alberta acknowledged the change of attendees at the siting workshop.
C-05117	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-03387	September 30, 2025	Email	Kapawe'no Consultation requested copies of the siting workshop presentation slides for an open house they were planning for the community.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03388	October 1, 2025	Email	Energy Alberta indicated it was working on pulling all the presentation materials together to share with participants, along with a form for reimbursement of the Honorarium and reasonable expenses and would have it to the Nation as soon as possible. Energy Alberta indicated it would welcome the opportunity to make a presentation at the community Open House, depending on dates and its Team Member's availability.
C-03390	October 1, 2025	Email	Kapawe'no Consultation inquired if Energy Alberta would be available on October 15 from 5 to 7 to attend the Open House.
C-03391	October 1, 2025	Email	Energy Alberta indicated it would check the date and get back to the Nation as soon as possible.
C-03393	October 3, 2025	Email	Kapawe'no Consultation informed Energy Alberta that October 22 would not work for the Nation as the hall was already booked and that they must move forward with the Open House on October 15.
C-03405	October 6, 2025	Email	Energy Alberta indicated it would have its team available for October 15, 2025, and inquired if there was a virtual option for attendance.
C-03406	October 6, 2025	Email	Kapawe'no Consultation indicated that virtual was not an option.
C-01920	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop and attached the workshop materials and a form for honorarium and expense reimbursement.
C-01961	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03407	October 10, 2025	Email	Energy Alberta informed Kapawe'no Consultation that the poster boards would not make it to the Nation in time for the open house, and instead they would bring a PowerPoint presentation instead. Energy Alberta inquired about the availability of a screen and projector in the meeting room.
C-01899	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-03408	October 15, 2025	Email	Kapawe'no First Nation confirmed that they had a projector and screen available in the hall.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04473	October 15, 2025	In person / community meeting	Energy Alberta provided a Project overview at Community Open House on October 15, 2025. Members in attendance inquired about: ■ The Impact Statement and if it would be available publicly ■ Why Peace River? ■ Concerns that the Project would affect water, wildlife, way of life ■ Accidents and Malfunctions ■ Emission controls ■ Why nuclear in an oil and gas province? ■ How would the Project affect their electricity bills? ■ If Energy Alberta would come back to the community again Energy indicated it would provide links to its fact sheets and other resources on its website. indicated it would provide a link to IAAC's Draft Tailored Impact Statement Guidelines.
C-03409	October 15, 2025	Email	In follow-up to the community meeting on October 15, 2025, Energy Alberta provided links to the fact sheets and other resources on its website: ■ Project Overview ■ Nuclear Energy ■ Jobs and Procurement ■ Waste Management ■ Radiation Safety ■ Water Use ■ Land Use ■ Nuclear Safety ■ Community Resource Guide Energy Alberta also provided a link to IAAC's Draft Tailored Impact Statement Guidelines.
C-02499	October 17, 2025	Email	Kapawe'no Consultation indicated that the information Energy Alberta provided would be included in its upcoming newsletter to members. Kapawe'no Consultation indicated that once the survey forms had been compiled, the results would be shared with Energy Alberta. Kapawe'no Consultation indicated they would reach out with questions or request for further meetings.
C-01986	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02126	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02155	November 11, 2025	Email	Energy Alberta sent a reminder for the participant in the Indigenous Siting Workshop held on September 25, to submit the form for reimbursement of the honorarium and reasonable expenses.
C-02154	November 11, 2025	Email	Energy Alberta received an out of office notice to the email sent on November 11.
C-02465	November 19, 2025	Email	The Nation submitted an expense for the Indigenous Siting Workshop.
C-02466	November 19, 2025	Email	Energy Alberta confirmed that it would process the expense form through its accounting department.
C-02498	November 20, 2025	Email	Energy Alberta provided a link to the CNSC website for information on nuclear emergencies, as requested in the community meeting held on October 15, 2025. Energy Alberta inquired about the summary of survey questions that the Nation was preparing and if it was available to share with Energy Alberta. Energy Alberta indicated its interest in discussing next steps with the Nation and requested possible dates/times to meet.
C-02742	November 27, 2025	Email	Energy Alberta advised that expenses from the September Siting Workshop had been processed and reimbursement had been made to Kapawe'no First Nation.
C-04495	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02897	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03293	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03328	December 10, 2025	Email	Hereditary Chief Halcrow indicated they have questions about how studies were being done.
C-03338	December 10, 2025	Email	Energy Alberta indicated it would be happy to schedule a meeting to address questions related to its proposed Project and how studies would be done. Energy Alberta suggested scheduling a meeting for in the new year.
C-03331	December 11, 2025	Email	Hereditary Chief Halcrow requested Energy Alberta work with the consultation office to find a meeting date in the new year.
C-03705	December 18, 2025	Email	Energy Alberta wished Kapawe'no First Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

KIKINO MÉTIS SETTLEMENT

for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR KIKINO MÉTIS SETTLEMENT (KMS)

ID	Date	Interaction Type	Summary
C-02537	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.
C-03411	July 16, 2025	Email	Energy Alberta introduced its team members to Kikino Métis Settlement and provided a capacity funding application and EFT form. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs, that interested Indigenous Nations could participate in baseline environmental studies beginning in July 2025 and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested KMS follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.
C-05139	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02618	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project, and requested KMS's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta provided information and an invitation to its planned Project siting workshop, noting all nuclear projects were required to undergo a comprehensive site selection assessment to ensure the selected site adhered to the social, safety, and technical criteria set by Canadian and international regulatory authorities. Energy Alberta advised participants would be provided information regarding the criteria for site selection during the workshop and an information package in advance of the workshop. Energy Alberta provided information about the workshop's arrangements and advised an honorarium would be provided to all participants. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02650	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03412	September 15, 2025	Email	Kikino Métis Settlement indicated it would send two representative to participate in the Siting Workshop .
C-03413	September 18, 2025	Email	Kikino Métis Settlement requested confirmation of the date for the Siting Workshop .
C-03414	September 18, 2025	Email	Energy Alberta provided the date, time and location for the siting workshop.
C-03415	September 18, 2025	Email	Energy Alberta inquired about dietary restrictions for the attendees.
C-03416	September 19, 2025	Email	Kikino Métis Settlement requested a phone call.
C-04726	September 19, 2025	Phone	Energy Alberta phoned Kikino Métis Settlement, left a voice mail requesting a call back.
C-03417	September 19, 2025	Email	Kikino Métis Settlement requested clarification that there was going to be an Indigenous session on September 24 in Peace River, and that the other engagement sessions outlined were for the general public. Kikino Métis Settlement requested a meeting with Council after elections on October 6, 2025, and requested possible dates.
C-03418	September 19, 2025	Email	Energy Alberta confirmed the meeting dates and times for both the Indigenous siting workshop and the public information session.
C-00024	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05116	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01925	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01895	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02010	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02125	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02702	November 24, 2025	Email	Energy Alberta informed it had requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options are attached for review. Input from Indigenous communities is sought before finalizing site selection and moving into the Impact Assessment process. A virtual information session can be arranged to discuss the Project and gather feedback.
C-04496	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02928	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.

LAC STE. ANNE MÉTIS COMMUNITY ASSOCIATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR LAC STE. ANNE MÉTIS COMMUNITY ASSOCIATION (LSAMCA)

ID	Date	Interaction Type	Summary
C-03419	July 31, 2025	Email	Energy Alberta was copied on a letter that LSAMCA has sent to IAAC regarding consultation on the proposed Peace River Nuclear Power Project.
C-03420	July 31, 2025	Email	Energy Alberta confirmed receipt of the letter submitted to IAAC.
C-03421	August 1, 2025	Email	LSAMCA provided dates and times it was available for a meeting with Energy Alberta.
C-03422	August 6, 2025	Email	Energy Alberta indicated it would be available of a virtual meeting on Wednesday, August 13th from 9 AM to 10:00 AM and requested potential agenda items.
C-03423	August 8, 2025	Email	LSAMCA confirmed the date and time and indicated it would send the calendar invite and agenda.
C-03424	August 11, 2025	Email	Energy Alberta advised that the meeting tentatively scheduled for August 13, 2025 from 9 to 10 am was no longer available and offered alternat dates the week of August 25 to 29, 2025.
C-03425	August 11, 2025	Email	Lac Ste. Anne Métis Community Association indicated that it had sent an updated calendar invite for August 26, 2025 from 8 AM to 9:30 AM.
C-03426	August 12, 2025	Email	Energy Alberta is introduced its Indigenous engagement team members. Energy Alberta reminded Lac Ste. Anne Métis Community Association that IAAC and CNSC were seeking comments on the draft integrated TISG and draft IEPP. Energy Alberta provided information regarding the summer 2025 field work program and capacity funding. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs. Energy Alberta provided links to additional resources on its webpage.
C-05140	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-03427	August 21, 2025	Email	Lac Ste. Anne Métis Community Association provided its completed capacity funding application forms.
C-03428	August 22, 2025	Email	Energy Alberta indicated it would review the forms and get back to Lac Ste. Anne Métis Community Association.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00847	August 26, 2025	Virtual / Online meeting	Energy Alberta provided an overview of its proposed Project near Peace River, Alberta. Energy Alberta informed that they were currently in a 3–6 months pause. LSAMCA provided historical context in that area and raised the following: ■ provincial permitting process ■ regulatory pause and the timeline for restarting the process ■ waste management and long-term storage ■ future engagement opportunities
C-03429	August 26, 2025	Email	Energy Alberta thanked Lac Ste. Anne Métis Community Association for the meeting earlier that day and advised that it had approved capacity funding to support LSAMCA's review of the planning phase documents.
C-02631	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline, acknowledged LSAMCA's prior engagement on the Project, and expressed its interest in ongoing dialogue during the pause period. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03430	September 5, 2025	Email	Lac Ste. Anne Métis Community Association confirmed receipt of Energy Alberta's August 26, 2025 email regarding its capacity funding offer and indicated it would reach out if they had any questions.
C-02651	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-05115	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-00068	October 1, 2025	Email	Energy Alberta provided the slide deck from the meeting on August 26. Energy Alberta inquired about the potential for an Agreement, whereby LSAMCA could share that information with Energy Alberta for its awareness and understanding in context to its proposed Project.
C-01926	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01875	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02688	October 14, 2025	Email	LSAMCA thanked Energy Alberta for the slide deck and indicated that it was working on a report that it would share once a non-disclosure agreement was place. The community requested that Energy Alberta provide a draft agreement for review. The community requested spatial data relevant to the Project.
C-02009	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02146	November 6, 2025	Email	LSAMCA indicated it had a non-disclosure agreement (NDA) in progress and would send it to Energy Alberta. LSAMCA indicated it had a completed report on LSAMCA traditional land use and preliminary fieldwork, both of which would be shared after the NDA is formalized. LSAMCA indicated its historical report is expected later this year or early next year. LSAMCA requested spatial data in shapefile and kmz format for the Project.
C-02124	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02147	November 11, 2025	Email	Energy Alberta thank the community for the update on the NDA and forthcoming reports. Energy Alberta provided the requested shapefile for the Project.
C-02689	November 17, 2025	Email	LSAMCA provided a draft confidentiality agreement for Energy Alberta's review and comment. LSAMCA noted highlighted sections in the document that would need to be amended pending the formalization of the agreement.
C-03431	November 17, 2025	Email	Energy Alberta acknowledged receipt of the draft confidentiality agreement and indicated it would get back to Lac Ste. Anne Métis Community Association as soon as possible.
C-02787	December 1, 2025	Email	Energy Alberta shared its edits to the draft confidentiality agreement provided by the Nation.
C-04511	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02929	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03295	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03305	December 9, 2025	Email	Lac Ste. Anne Métis Community Association indicated it had passed Energy Alberta's edits to the draft data sharing document, on to their lawyers and would get back to Energy Alberta as soon as possible.
C-03304	December 9, 2025	Email	Lac Ste. Anne Métis Community Association indicated it would send a member to attend the January 13, 2026 workshop and would provide the name as soon as possible.
C-03303	December 9, 2025	Email	Lac Ste. Anne Métis Community Association thanked Energy Alberta for the information on the reactors and indicated they would reach out if they had any questions.
C-03320	December 10, 2025	Email	Energy Alberta thanked the President for the update and asked that she provide the name of the attendee as soon as it is known.
C-03396	December 12, 2025	Email	LSAMCA advised that it had reviewed the edits from Energy Alberta and they had further edits that they would like to discuss in a meeting, and indicated that 11 AM to 12 PM on Tuesday, December 16, 2025 worked for them.
C-03545	December 16, 2025	Virtual / Online meeting	Meeting to discuss proposed confidential edits to the agreement.
C-03980	December 16, 2025	Email	Lac Ste. Anne Métis Community Association provided its edits and comments related to the Confidentiality Agreement, in follow-up to the meeting earlier that day. Energy Alberta will provide a revised copy that addresses confidentiality matters discussed in the meeting.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03981	December 16, 2025	Email	Lac Ste. Anne Métis Community Association provided a link to IAAC's Guidance regarding Protecting Confidential Indigenous Knowledge referenced in the meeting earlier that day.
C-03599	December 16, 2025	Email	Energy Alberta confirmed receipt of LSAMCA edits to the Agreement document and indicated it would forward to its legal counsel to prepare revised wording related to the confidentiality matters raised on the call. Energy Alberta indicated it would provide the edits as soon as possible.
C-03598	December 16, 2025	Email	Energy Alberta thanked LSAMCA for the links to the IAAC materials referenced in the meeting.
C-03714	December 18, 2025	Email	Energy Alberta wished LSAMCA a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

LAKELAND MÉTIS NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR LAKELAND MÉTIS NATION (LMN)

ID	Date	Interaction Type	Summary
C-03432	June 7, 2025	Email	Energy Alberta was copied on an email sent by LMN to IAAC. LMN requested IAAC: - Place LMN on the consultation list for the Peace River Nuclear Power Project, - Consider LMN for participant funding to support meaningful engagement, technical review, and community outreach, particularly given its lack of core operational funding, - Provide information on how and when Indigenous engagement sessions will occur, and how LMN input would be integrated into the site selection and impact evaluation processes.
C-02538	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.
C-03435	July 16, 2025	Email	Energy Alberta introduced its team member leading engagement for its proposed Peace River Nuclear Power Project. Energy Alberta reminded LMN that IAAC was seeking feedback on draft guidelines and plans. Energy Alberta advised LMN of its summer field work program for baseline environmental studies beginning in July. Energy Alberta advised that capacity funding was available to support Indigenous Nations in reviewing the Impact Assessment process and attached application forms. Energy Alberta provided links to resources on its webpage.
C-03437	July 17, 2025	Email	LMN provided its completed capacity funding application. LMN advised they were not interested in participating in joint fieldwork for the baseline studies and that they would review the IPD and TISGs within IAAC's required timelines. LMN requested suggested times and dates for a virtual Introductory Meeting.
C-05141	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: 2025 Summer Fieldwork Program - Water Intake Siting Inspection - Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies - An ongoing review and refinement of technology

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03438	August 26, 2025	Email	Energy Alberta informed LMN that it had approved capacity funding for review of Planning Phase documents. Energy Alberta requested potential dates/times for a virtual introductory meeting.
C-03439	August 27, 2025	Email	LMN provided September 2, 3, 8, 9, or 10 between 11:00 a.m. and 3:00 p.m. as potential meeting dates.
C-02630	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline, acknowledged LMN's prior engagement on the Project, and expressed its interest in ongoing dialogue during the pause period. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03440	August 29, 2025	Email	Energy Alberta advised that it was available for a virtual meeting on September 9, 2025 from 1 to 2 pm, and that it would send a calendar invite.
C-03441	September 2, 2025	Email	Energy Alberta requested the meeting time for September 9, be adjusted to noon to 1 pm.
C-03442	September 2, 2025	Email	LMN confirmed that the adjusted time worked.
C-03443	September 2, 2025	Email	LMN requested confirmation of the meeting date, as the calendar invite indicated September 8.
C-03444	September 2, 2025	Email	Energy Alberta confirmed that the date that worked for them was the 8 and inquired if that date worked for LMN. Energy Alberta inquired about the additional attendee and if that was legal counsel for LMN.
C-03445	September 2, 2025	Email	LMN confirmed that September 8 would work, and that the additional attendee was their legal counsel.
C-03446	September 8, 2025	Email	LMN confirmed its participation in the siting workshop on September 24, 2025 in Peace River and inquired if there had been any requests to host a Public Engagement Session in Fort McMurray.
C-03447	September 8, 2025	Email	Energy Alberta requested the name of the attendee who would be at the siting workshop and if that person had any dietary restrictions. Energy Alberta advised that it was currently focusing its Public Information Sessions in the general Peace River Area, given the proximity of those communities to the potential site options.
C-00025	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02690	September 25, 2025	Email	LMN attended indicated she had been unable to attend the Indigenous Siting Workshop in Peace River on September 24 due to unforeseen circumstances and thanked Energy Alberta for the invitation and the pre-reading materials provided. Energy Alberta requested copies of the slides from the session.
C-03448	September 25, 2025	Email	LMN requested confirmation of when the capacity funding would be disbursed.
C-05114	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-02691	September 29, 2025	Email	Energy Alberta indicated it would check with its accounting group and get back to LMN regarding the capacity funding payment.
C-01928	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01876	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02008	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02123	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02692	November 14, 2025	Email	Legal counsel for LMN indicated it was following-up in relation to the meeting held on September 8, 2025 and its understanding that Energy Alberta was to provide a list of studies and arrange a meeting to discuss development of a work plan. Legal counsel for the community requested an update.
C-02694	November 17, 2025	Email	Energy Alberta apologized and indicated that it had thought the information had already been sent. Energy Alberta attached a copy of the slide deck from the September 8, 2025 meeting and indicated that the list of studies had evolved into a slide deck that it was reviewing with communities in a meeting with Energy Alberta's Subject Matter Experts (SME). Energy Alberta requested a potential meeting date to commence that conversation with its SMEs and begin a conversation around the development of a work plan.
C-02477	November 18, 2025	Email	LMN confirmed it would like to sit down and discuss next steps with Energy Alberta. LMN indicated its availability on November 26, December 10 or 11 and December 15 to 19, 2025. LMN inquired about payment of capacity funding

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02696	November 20, 2025	Email	Energy Alberta indicated that December 11, from 9:30 to 10:30 worked for its team to meet with LMN and requested confirmation that date/time works for the community. Once confirmed, Energy Alberta indicated it would send a Teams invite. Energy Alberta confirmed that its records indicate that the funds were paid to LMN on October 22, 2025.
C-02737	November 21, 2025	Email	LMN confirmed December 11 from 9:30 to 10:30 worked for them to meet with Energy Alberta. Additionally, they confirmed capacity funding was received on October 22.
C-02738	November 22, 2025	Email	Energy Alberta apologized for the error in date and confirmed that its team was available to meet with LMN on December 10, from 9:30 to 10:30 am.
C-02763	November 28, 2025	Email	Energy Alberta followed up and requested confirmation of the proposed meeting date.
C-02777	November 28, 2025	Email	LMN confirmed that December 10 worked for them.
C-04497	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02930	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03296	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03383	December 10, 2025	Virtual / Online meeting	Energy Alberta met with LMN to discuss preliminary feedback on Siting Option #1 or #2, to review list of studies and begin a conversation around the development of a work plan. The following interests were discussed: ■ Lack of video conferencing for town halls ■ Interest in socio-economic studies and community profiles ■ Developing an MOU ■ Scheduling follow-up meetings ■ Collaboration on identifying data gaps and vulnerable groups ■ Developing a workplan based on community interests
C-03389	December 12, 2025	Email	Energy Alberta provided the slide deck and action items from the December 10 meeting: ■ Energy Alberta to provide presentation and siting background materials ■ Energy Alberta to provide guideline for community profiles ■ Energy Alberta to provide draft MOU for discussion ■ LMN will send date options for a meeting regarding siting, workplan, and MOU, and will review the draft TISGs
C-03542	December 12, 2025	Email	LMN acknowledged the action items from a meeting held on December 10.
C-03713	December 18, 2025	Email	Energy Alberta wished LMN a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

LITTLE RED RIVER CREE NATION
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR LITTLE RED RIVER CREE NATION (LRRCN)

ID	Date	Interaction Type	Summary
C-00871	December 18, 2024	Email	LRRCN advised their community was near the Peace River and would be impacted by the Project. LRRCN commented on the lack of engagement from Energy Alberta regarding its proposed Project and advised they would reject the Project until a meeting with Chief and Council was scheduled to discuss the Project.
C-00870	December 20, 2024	Email	Energy Alberta advised it was in the early stages of engagement activities and the draft IPD had not been submitted to the IAAC. Energy Alberta advised it was committed to engaging with communities listed in the draft IPD and requested confirmation of the LRRCN primary contact for further Project engagement. Energy Alberta advised it would follow up with additional Project updates in the New Year.
C-00873	January 6, 2025	Email	LRRCN confirmed receipt of Energy Alberta's email regarding the IPD.
C-00866	January 7, 2025	Email	LRRCN raised a concern regarding the lack of communication about the Project despite being listed in the draft proposal and being directly located along the Peace River.
C-00867	January 8, 2025	Email	LRRCN requested a meeting between their Chief and Council and Energy Alberta to discuss their concerns.
C-00868	January 8, 2025	Email	Energy Alberta advised the draft IPD mistakenly included both its recently completed engagement activities and its upcoming planned activities. Energy Alberta advised that a correction would be provided to the appropriate parties. Energy Alberta advised it was in the early stages of the Project and had planned to engage with LRRCN in Q1 of 2025. Energy Alberta provided an early Project information package and advised it would follow up to provide the updated draft IPD.
C-00869	January 8, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00872	January 9, 2025	Email	LRRCN thanked Energy Alberta for the notification package and advised that an in-person meeting with Chief and Council was required to discuss the Project. LRRCN provided a list of inquiries and interests: - List of the regulatory applications and regulators required for the Project, including information on whether each regulator recognized the standing of affected First Nations in its process. - List of other Indigenous communities being consulted for the Project, to facilitate a co-operative approach between LRRCN and its neighbouring communities. - Policies, position statements, or other information developed by Energy Alberta on the impact of UNDRIP on Energy Alberta's work and its relationships with affected First Nations, views on reconciliation, and the incorporation of the TRC's Calls to Action and the MMIWG's Calls to Justice in its business dealings. - Information about funding provided to Indigenous communities affected by Energy Alberta's Project to effectively participate in the various regulatory and engagement processes contemplated in the information package. - Needs assessment and rationale for the Project. - Project mapping delineating the boundaries of the Project's location. - Any and all past TLRU information relating to LRRCN. - Archaeological reports and studies of the area.
C-00874	January 9, 2025	Email	Energy Alberta advised it would follow up to arrange a meeting to discuss the Project. Energy Alberta requested LRRCN's availability to meet and advised it would be in Peace River, Alberta on January 21 and 22, 2025.
C-00875	February 21, 2025	Email	Energy Alberta advised it was still working on the inquiries made by LRRCN in its email dated January 9, 2025. Energy Alberta requested LRRCN's availability for an in-person meeting in March 2025 and advised it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta advised the IAAC would follow up with LRRCN for an introduction to their process.
C-00876	February 26, 2025	Phone	Energy Alberta left a voicemail following up on its February 22, 2025 email. Energy Alberta requested LRRCN's availability for a community meeting on March 10, 2025.
C-00877	February 28, 2025	Email	LRRCN confirmed they were interested in meeting to discuss the Project and inquired who should attend.
C-00878	March 5, 2025	Phone	LRRCN phoned Energy Alberta to schedule an introductory meeting. Energy Alberta provided an overview of the Project.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00879	March 7, 2025	Email	LRRCN advised they would follow up to provide their availability for a meeting in March or mid-April 2025.
C-00886	March 31, 2025	Phone	LRRCN requested Energy Alberta's availability on April 3, 2025 for an in-person meeting with LRRCN leadership.
C-00881	April 1, 2025	Email	LRRCN advised it would follow up after April 9, 2025 to arrange a meeting to discuss the Project.
C-02370	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02395	April 14, 2025	Email	Energy Alberta followed up on its earlier notification of the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02425	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification and requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-00887	May 12, 2025	Phone	Energy Alberta phoned LRRCN to discuss the Project, capacity funding, and to schedule a meeting with LRRCN leadership. LRRCN requested an email providing potential meeting dates in June 2025 and advised they would follow up with their availability. LRRCN emphasized the importance of meeting with leadership to kickoff Project engagement. Energy Alberta requested contact information for LRRCN leadership. LRRCN advised they would forward the email to the Chief.
C-03449	May 12, 2025	Email	Energy Alberta followed up on their phone call earlier that day and provided potential dates for an in-person meeting the week of June 2 or 9, 2025. Energy Alberta attached a letter from its President of Energy regarding capacity funding. The letter requested Energy Alberta be contacted if LRRCN required additional funding and provided contact information. The letter outlined the purpose of the Project and its guiding principles and advised Energy Alberta was available for further discussion.
C-00891	May 20, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding related to the Project. LRRCN replied by text indicating he would call back later.
C-03450	May 20, 2025	Email	The consultation contact indicated that June 2 and 3 were the only dates that wouldn't work, and he was awaiting confirmation of the Chief and Councils availability.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02585	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-02540	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta encouraged LRRCN to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03451	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program, emphasizing the importance of Indigenous knowledge in the Impact Statement. Energy Alberta advised it would be conducting baseline environmental studies starting in July. Energy Alberta requested an indication of interest in having a representative from the Nation participate in the environmental fieldwork, and that it remained open to engaging with the Nation about the Peace River Nuclear Power Project.
C-05151	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02620	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested LRRCN's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02653	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-05113	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01930	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01896	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02006	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02121	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02677	November 24, 2025	Email	Energy Alberta reminded LRRCN that it had requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. Energy Alberta provided an information package, and a map of two proposed siting options are attached for review and indicated they would be happy to arrange a meeting to discuss the Project and gather feedback.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04498	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02899	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03298	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03728	December 18, 2025	Email	Energy Alberta wished LRRCN a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

LOON RIVER FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR LOON RIVER FIRST NATION (LRFN)

ID	Date	Interaction Type	Summary
C-00918	October 23, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-00897	January 17, 2025	Email	Energy Alberta requested LRFN's availability for a virtual meeting in February 2025 to discuss the Project.
C-00898	February 12, 2025	Email	Energy Alberta followed up on its January 17, 2025 email and requested LRFN's availability for a virtual meeting to discuss the Project.
C-00899	February 21, 2025	Email	Energy Alberta advised it was interested in continuing engagement with LRFN and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with LRFN for an introduction to their process.
C-00900	February 24, 2025	Email	LRFN advised they were electing a new Chief and Council and were interested in meeting Energy Alberta in regard to the Project.
C-00901	February 24, 2025	Phone	Energy Alberta thanked LRFN for the election update and requested LRFN's availability for a meeting.
C-02369	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02394	April 14, 2025	Email	Energy Alberta followed up on its notification of the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02426	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification and requested confirmation that the Nation had received the IPD for the Peace River Nuclear Power Project. Energy Alberta inquired as to whether they had any questions or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-02560	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's Impact Assessment and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. Contact information for further inquiries and funding requests was provided.
C-02513	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period and corrected information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02584	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-03452	May 30, 2025	Email	LRFN indicated that due to a fire near the community and recent outages, its capacity funding forms would be sent as soon as possible.
C-03453	May 30, 2025	Email	LRFN submitted its capacity funding application forms.
C-03454	June 3, 2025	Email	Energy Alberta advised LRFN that it had approved capacity funding to support the Nation's efforts in reviewing the Planning Phase documents.
C-03455	June 8, 2025	Email	Energy Alberta thanked LRFN for the update and sent thoughts and prayers for members of the community to remain safe.
C-03456	June 19, 2025	Email	Energy Alberta advised that the capacity funding payment had been sent on June 13.
C-02539	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03457	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs. Energy Alberta advised interested Indigenous Nations could participate in baseline environmental studies beginning in July 2025 and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested LRFN follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.
C-03458	July 16, 2025	Email	LRFN requested the dates for the environmental studies and indicated the Nation was interested in sending someone to participate.
C-03459	July 16, 2025	Email	Energy Alberta indicated it was still finalizing the dates and indicated her colleague would get back to him the following week with more information.
C-03460	July 23, 2025	Email	Energy Alberta followed up on LRFN's expression of interest in participating in the fieldwork for the baseline studies. Energy Alberta provided information about the water intake siting inspections planned tentatively in mid-August 2025. Energy Alberta advised due to limited capacity only one representative from each participating Nation could be accommodated and provided requirements for participation including training and PPE requirements.
C-03461	July 24, 2025	Email	Director of Consultation indicated that they would like to send two participants and inquired about reimbursement of costs to participate.
C-03462	July 24, 2025	Email	Energy Alberta provided details about the honorarium and reasonable travel costs it would cover and indicated that once dates were finalized, she would provide the nation with that information.
C-03463	August 14, 2025	Email	Energy Alberta provided details for the preliminary water intake siting tour that was scheduled for September 3, 2025 starting at 8:00 AM. Energy Alberta provided details regarding the honorarium and travel expenses that would be covered. Energy Alberta requested the name and contact information for the participant by August 22, 2025.
C-05152	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03464	August 21, 2025	Email	Energy Alberta advised that during the pause in the Impact Assessment Agency's regulatory timeline for the planning phase, it planned to proceed with the water intake siting tour to accommodate Nation's interest in participating. Energy Alberta requested LRFN provide the name and contact information for the person who would be participating in the tour.
C-03465	August 25, 2025	Email	The Chief Executive & Financial Officer inquired a status update on their capacity funding application.
C-03466	August 27, 2025	Email	Energy Alberta confirmed that the capacity funding payment was issued June 13, 2025.
C-02619	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02652	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-05112	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01927	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01897	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02007	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02122	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02700	November 24, 2025	Email	Energy Alberta has requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options are attached for review. Input from Indigenous groups is sought before finalizing site selection and moving into the Impact Assessment process. A virtual information session can be arranged to discuss the Project and gather feedback.
C-04499	December 4, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02878	December 3, 2025	Email	LRFN confirmed attendance at the Nuclear Fundamentals Workshop scheduled for January 13, 2026.
C-02898	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations of candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out to potential candidates whose services align with their needs.
C-03297	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. RECORD FOR LUBICON LAKE BAND (LLB)

ID	Date	Interaction Type	Summary
C-00922	October 16, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-00923	October 21, 2024	Phone	Energy Alberta phoned and left a voicemail following up on the October 16, 2024 initial Project introduction email and requested a text or call back to arrange a meeting.
C-00924	October 22, 2024	Email	LLB confirmed receipt of the initial Project introduction and requested a meeting to discuss the Project.
C-00925	October 23, 2024	Email	Energy Alberta requested LLB's availability for a meeting in November 2024 to discuss the Project.
C-00926	October 28, 2024	Phone	Energy Alberta phoned LLB and requested their availability for a meeting to discuss the Project. LLB advised they would follow up.
C-00927	October 28, 2024	Email	LLB proposed a new time for the November 8, 2024 meeting.
C-00928	October 28, 2024	Email	LLB inquired about Energy Alberta's preference for meeting in person or virtually. Energy Alberta advised they preferred a virtual meeting. LLB provided their availability for a virtual meeting on November 8, 2024 and an in-person meeting on November 27 or 28, 2024.
C-00929	October 28, 2024	Phone	LLB phoned Energy Alberta and advised they were not available until November 27, 2024. Energy Alberta advised they would confirm their availability for November 28, 2024. LLB provided a potential time for November 28, 2024 meeting.
C-00930	October 28, 2024	Phone	Energy Alberta phoned LLB and requested to reschedule the November 8, 2024 meeting to November 12 or 13, 2024. LLB advised they would follow up with their availability and provided their availability for an in-person meeting in November 2024. Energy Alberta noted they preferred to meet virtually in advance of the in-person meeting.
C-00935	October 28, 2024	Email	Energy Alberta provided the website link for the virtual meeting on November 8, 2024.
C-00934	October 28, 2024	Email	LLB indicated that the time would not work and requested a new meeting time.
C-00933	October 29, 2024	Email	Energy Alberta provided a meeting invite for November 28, 2024 meeting.
C-00932	November 8, 2024	Email	LLB provided the location for the meeting on November 28, 2024 with Chief and Council and its Management team.
C-00931	November 21, 2024	Email	Energy Alberta requested additional information regarding meeting arrangements.
C-00969	November 21, 2024	Email	LLB provided the updated meeting location.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00968	November 21, 2024	Email	Energy Alberta confirmed receipt of LLB's email regarding meeting arrangements.
C-00970	November 21, 2024	Email	LLB emailed a letter that provided overview information regarding community initiatives and a request for funding. LLB requested a meeting.
C-00971	November 21, 2024	Email	LLB provided updated meeting arrangements.
C-00973	November 22, 2024	Email	Energy Alberta confirmed receipt of the updated meeting arrangements.
C-00972	November 22, 2024	Email	LLB confirmed receipt of the email.
C-00938	November 28, 2024	Virtual / Online meeting	Energy Alberta met with LLB to discuss the Project. Topics of discussion included Project introduction, water use, safety, Project timing, capacity and employment opportunities.
C-00937	December 9, 2024	Email	Energy Alberta followed up on the November 28, 2024 meeting advising the draft IPD would be provided and requested a follow up call to discuss frameworks for capacity funding. Energy Alberta provided the Project presentation.
C-00974	December 9, 2024	Email	LLB advised they would confirm their availability for a meeting with Energy Alberta in the new year.
C-00936	December 13, 2024	Email	Energy Alberta provided the draft IPD for review and indicated that it would be submitted to IAAC in Q1 of 2025. Energy Alberta advised capacity funding was available for the Project and requested LLB provide correspondence outlining how the funding would be used. Energy Alberta requested LLB's availability for a meeting in January 2025.
C-00939	January 3, 2025	Email	Energy Alberta followed up on its request for a meeting in January 2025 to discuss the IPD and provided its availability for an in-person meeting in Peace River, Alberta on January 21 or 22, 2025. Energy Alberta requested information on how the proposed capacity funding would be used and provided a link to its updated website.
C-00940	January 16, 2025	Email	Energy Alberta provided a revised copy of the draft IPD with corrections to Section 2.3.2. and requested LLB's availability for a meeting in February 2025 to discuss it. Energy Alberta requested an in-person meeting on January 29, 2025 in Peace River, Alberta.
C-00941	January 31, 2025	Email	Energy Alberta requested LLB's availability for an in-person meeting in February 2025 to discuss the Project. Energy Alberta provided its availability, a tentative agenda for the meeting and advised it would follow up to coordinate the next steps.
C-00942	February 5, 2025	Virtual / Online meeting	Energy Alberta met with discussed various topics including IPD, community engagement, safety, land use studies, and economic opportunities. LLB raised several inquiries: making communication accessible for Elders, expected waste generation, decommissioning plans, equitable opportunities for communities, potential payment of power bills, focus on Indigenous businesses, initiation of training programs, power provision estimates, and water use details. Energy Alberta responded by offering to arrange discussions, expressing interest in community capacity building, and confirming ongoing engagement with other communities.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00943	February 21, 2025	Email	Energy Alberta followed up on the February 5, 2025 meeting and advised it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta advised the IAAC would follow up with LLB for an introduction to their process.
C-00944	February 28, 2025	Phone	Energy Alberta phoned LLB and confirmed a meeting for February 28 to discuss IPD input.
C-00945	February 28, 2025	Email	Energy Alberta followed-up on its phone call earlier that day with LLB to discuss inputs into the IPD. Energy Alberta provided the IPD workbook reviewed during their meeting earlier that day. Energy Alberta confirmed LLB's input would be included in the IPD submission to the regulators in March 2025. Energy Alberta advised it would follow up to confirm its availability for the March 10, 2025 meeting with Chief and Council.
C-00946	March 5, 2025	Phone	Energy Alberta left a voicemail requesting to reschedule the March 10, 2025 meeting with Chief and Council and provided its availability. Energy Alberta advised it would follow up with a letter regarding the meeting with Chief and Council the April in-community meeting.
C-00947	March 7, 2025	Email	Energy Alberta provided a letter requesting to reschedule the March 10, 2025 meeting until April 2025 and provided its availability and contact information. Energy Alberta received an out-of-office response from LLB.
C-00948	March 18, 2025	Email	Energy Alberta followed up on its request to reschedule the meeting with LLB Chief and Council. Energy Alberta provided its availability in April and May 2025 and advised the meeting could be in-person or virtual.
C-00951	March 28, 2025	Email	Energy Alberta followed up to reschedule the Chief and Council meeting. LLB advised their office was closed until April 11, 2025. Energy Alberta committed to following up after April 11, 2025.
C-00952	April 3, 2025	Email	Energy Alberta requested confirmation of the Chief's contact information to provide a draft MOU. LLB confirmed the information was accurate and advised they would follow up on the dates provided in the March 10, 2025 letter to reschedule the Chief and Council meeting.
C-02373	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-03467	April 7, 2025	Email	Energy Alberta shared a draft MOU for LLB review and comment. Energy Alberta indicated it had hoped to establish a framework for collaboration to ensure meaningful involvement of the LLB in the Project's development, focusing on environmental stewardship, community engagement, and economic participation. Energy Alberta requested a meeting to discuss the MOU further.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02393	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02427	May 5, 2025	Email	Energy Alberta requested confirmation that the Nation had received the IPD for the Peace River Nuclear Power Project. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-02514	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02561	May 13, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-03468	May 15, 2025	Email	LLB requested a meeting with Energy Alberta on June 27, 2025, in Calgary.
C-03469	May 15, 2025	Email	Energy Alberta indicated it would check June 27, 2025 for a meeting in Calgary. Energy Alberta indicated it would also be in the Peace River area the first two weeks of June, 2nd to 6th and 9th to 13, and inquired if a meeting either of those weeks would be a possibility.
C-00958	May 21, 2025	Email	Energy Alberta advised
C-03472	May 21, 2025	Email	Energy Alberta reminded LLB it would be available for an in-person meeting in Peace River, Alberta between June 2 and June 6, 2025 as well as June 9 and June 10, 2025.
C-03470	May 21, 2025	Email	Energy Alberta confirmed its availability to meet with LLB, in Calgary on June 27, 2025 and suggested a meeting time of 3 pm. Energy Alberta inquired if that time worked and if they had a meeting location in mind.
C-03471	May 21, 2025	Email	LLB advised that June 27 no longer worked as they would be holding the Annual Lubicon Cultural Camp. The Consultation Manager indicated that he would look for another suitable date and would get back to Energy Alberta.
C-00964	May 22, 2025	Phone	Energy Alberta had a phone call with LLB to discuss capacity funding. Energy Alberta advised it would provide a follow-up email with additional information about capacity funding.
C-00962	May 22, 2025	Email	Energy Alberta followed up on its phone call with LLB earlier that day and provided a copy of the May 13, 2025 email and attached letter to the Chief regarding available capacity funding.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02586	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-02541	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03474	July 10, 2025	Email	LLB submitted its capacity funding application and indicated that the amount requested would be to conduct a Project specific Cree Knowledge and Land Use Study to determine the location of land use, cultural heritage sites, sacred sites, and ecologically sensitive sites near the proposed Peace River Nuclear Power Project. LLB suggested a meeting either virtually or in-person to discuss Energy Alberta's approach to consultation and engagement and ensure they are aligned with LLB expectations. LLB requested a few dates and locations for the meeting.
C-03475	July 10, 2025	Email	Energy Alberta confirmed receipt of the Band's funding application. Energy Alberta indicated that it may be able to provide some initial funding and suggested a meeting to discuss the specific scope of work identified with a goal of documenting those activities in some for of Agreement that would include an applicable budget to complete activities.
C-03476	July 10, 2025	Email	A consultant for LLB indicated they would check on potential dates and get back to Energy Alberta.
C-03477	July 14, 2025	Email	LLB provided the EFT form to accompany the funding application.
C-02602	July 16, 2025	Email	Energy Alberta shared that it aimed to incorporate Indigenous knowledge into the Impact Statement for the Peace River Nuclear Power Project by inviting participation in summer field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05142	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02633	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03478	August 29, 2025	Email	Energy Alberta followed up to see if LLB had been able to confirm any potential meeting dates.
C-02697	August 29, 2025	Email	LLB indicated it would check availability and get back to Energy Alberta. LLB indicated that the summer had been busy and challenging due to forest fire impacts.
C-02654	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River area should members wish to attend.
C-05111	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01929	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01893	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02698	October 13, 2025	Email	Energy Alberta indicated that its Team members would be area and would have time to stop by for a visit on October 16 if Lubicon staff were available to meet.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02005	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards. Energy Alberta noted that they are steadily making progress toward the selection of a reactor design for the Project.
C-02120	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02764	November 27, 2025	Email	Energy Alberta followed up to see if it would be possible to get a few potential dates for an Introductory meeting.
C-04501	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02900	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals in LLB that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03299	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of the proposed Project, and that all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Energy Alberta mentioned that selection of a specific nuclear reactor technology and detailed design is not required for early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that looks at ranges for key features such as cooling water needs, building size and land area, that covers general requirements for many designs rather than for a specific reactor. Energy Alberta provided links to two potential reactors that were under consideration: the CANDU Monark and the Westinghouse AP1000.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03312	December 10, 2025	Email	LLB informed Energy Alberta that their consultation department had undergone changes and introduced their new consultation manager. LLB proposed a meeting January 21st in Edmonton or Calgary, as the Chief and Council will be in Calgary on the 22nd. The context involved ongoing discussions regarding a funding application and consultation related to the Peace River Nuclear Power Project, with a focus on conducting a Cree Knowledge and Land Use Study.
C-03337	December 10, 2025	Email	Energy Alberta thanked the Nation for an update regarding changes in the LLB's Consultation Department and indicated that its contact list had been updated. Energy Alberta indicated that an in-person meeting on January 21, 2025 in Calgary would work for an Introductory Meeting. Energy Alberta requested confirmation of the suggested time inquired about a preferred location for the meeting.
C-03339	December 11, 2025	Email	The LLB Consultation Manager confirmed that January 21, 2026 in Calgary would work for Chief and Council to meet with Energy Alberta.
C-03340	December 11, 2025	Email	LLB inquired if they could use the meeting room for a couple of hours privately before Energy Alberta arrives, and that a downtown location would work.
C-03348	December 11, 2025	Email	Energy Alberta advised it would look to arrange meeting room and suggest a proposed agenda.
C-03353	December 11, 2025	Email	The LLB Consultation Manager indicated they would check with Council regarding start time and advise Energy Alberta.
C-03354	December 11, 2025	Email	Energy Alberta requested confirmation of the start time for the meeting, and how much time would be allocated to LLB's internal meeting before the discussion with Energy Alberta.
C-03356	December 11, 2025	Email	LLB suggested a morning meeting for Chief and Council only, followed by lunch and a presentation from Energy Alberta.
C-03358	December 11, 2025	Email	Energy Alberta confirmed agreement with the proposed timing of the meeting on January 21, 2026 and requested feedback on the proposed agenda.
C-03691	December 18, 2025	Email	Energy Alberta wished Lubicon Lake Band a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR MIKISEW CREE FIRST NATION (MCFN)

ID	Date	Interaction Type	Summary
C-01034	January 31, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-03479	February 27, 2025	Email	Energy Alberta introduced its engagement team members for the Peace River Nuclear Project, emphasizing the importance of dialogue and collaboration. Energy Alberta indicated it anticipated submitting its draft Initial Project Description by the end of March. Energy Alberta requested availability for a meeting. Energy Alberta provided an early Project Information Package.
C-01049	March 4, 2025	Email	MCFN advised they would be available to meet and requested meeting information.
C-01050	March 7, 2025	Email	Energy Alberta provided its availability to meet virtually on April 10, 2025.
C-01051	March 17, 2025	Email	Energy Alberta provided a calendar invite for the April 10, 2025 virtual introductory meeting.
C-02372	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-01055	April 4, 2025	Email	Energy Alberta received an automated response from MCFN advising the representative was no longer with MCFN and provided alternative contact information for future inquiries.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04486	April 10, 2025	Virtual / Online meeting	Energy Alberta met with MCFN and provided a Project Overview, discussed the regulatory process, the Initial Project Description and next steps for engagement with the Nation. MCFN raised the following: ■ Site selection process ■ Percentage of total volume of water stored compared to evaporative loss on an annual basis ■ Discharge into the river from the facility other than potable wastewater ■ Impact Benefit Agreement (IBA) on life of Project with commitments to clean up and liabilities ■ Equity ownership ■ Types of studies including impacts on Indigenous rights and cumulative effects ■ Total Project cost from day one through to Project operations ■ Process for provincial consultation for land permitting ■ Where the electricity would go ■ Biggest issue for MCFN is the lack of action of the federal government since the UNESCO petition and lack of follow through on commitments from the federal government
C-02392	April 14, 2025	Email	Energy Alberta followed up on its earlier notification of the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-01037	April 15, 2025	Email	MCFN confirmed receipt of the April 14, 2025 email regarding the 30-day IPD public comment period.
C-03480	April 15, 2025	Email	MCFN thanked Energy Alberta for the April 10, 2025 meeting and to the April 14, 2025 email regarding the IPD notification and the public comment period information. MCFN requested Energy Alberta outline how capacity funding would be provided, review MCFN's draft consultation protocol and provide comments, share preliminary mitigation measures early for evaluation, and provide initial comments on contracting opportunities, equity participation and Impact Benefit Agreements. MCFN requested Energy Alberta provide specific MCFN opportunities. MCFN requested clarification on the 180-day pre consultation period and the timing for initiating community specific studies. MCFN offered to share examples from previous work for reference.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03481	April 15, 2025	Email	Energy Alberta confirmed receipt of the April 15, 2025 email and indicated it would provide a more fulsome response to the questions as soon as possible.
C-02428	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta provided a reminder of upcoming deadlines including the 30-day public comment period on the IPD closing on May 14, 2025 and the application for IAAC's participant funding program closing on May 16, 2025. Energy Alberta advised a notification would be provided in May 2025 for the 30-day comment period on the TISG. Energy Alberta received an out-of-office response from MCFN.
C-03482	May 13, 2025	Email	Energy Alberta provided responses to MCFN's inquiries from the April 15, 2025 email and advised a meeting could be arranged to discuss ongoing engagement plans. Energy Alberta requested examples of past projects MCFN had undertaken and advised capacity funding was available. Energy Alberta provided a capacity funding letter that advised Energy Alberta was prepared to provide additional capacity funding to support the communities in their review of the IPD. Energy Alberta requested it be contacted if MCFN required additional funding and provided its contact information. Energy Alberta acknowledged the importance of mitigation and accommodation measures, provided a list of potential preliminary mitigation measures, and advised it was interested in further engagement. Energy Alberta advised it was in the process of developing the framework for Indigenous economic participation, provided a list of potential economic opportunities, and advised it was open to negotiating an Impact Benefit Agreement. Energy Alberta provided an overview of its priorities for the 180-day pre-consultation period, and advised it was preparing an internal framework. Energy Alberta advised it anticipated a community-led studies to commence in the summer and fall of 2025 and provided its contact information for any inquiries.
C-02515	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period. Energy Alberta advised previously provided information about the IAAC capacity funding application deadline was only for public and NGO participants and did not apply for Indigenous communities. Energy Alberta advised the start date for the TISG comment period had not been finalized and that IAAC would notify them as to when it would begin.
C-02599	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta noted the application form would support it in understanding MCFN's capacity funding requirements and the EFT form would facilitate quick payments. Energy Alberta advised funding was intended to support MCFN's review of the IPD and the TISGs within the IAAC's timeframes, and requested the forms be completed and returned by May 30, 2025 if MCFN wished to receive the funding.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03483	May 27, 2025	Email	MCFN indicated it had reviewed the capacity funding document and requested a phone call to discuss some questions they had. MCFN inquired if Energy Alberta was open to reworking the funding conditions language.
C-03484	May 27, 2025	Email	Energy Alberta indicated that they would be available for a call on May 28, anytime between 1 and 3 pm.
C-03485	May 27, 2025	Email	MCFN indicated that time would work and would send a meeting invite.
C-01053	May 28, 2025	Phone	Energy Alberta and MCFN had a phone call to discuss capacity funding. MCFN requested revisions to the capacity funding application and advised they would follow up with their proposed amendment.
C-03486	May 30, 2025	Email	MCFN provided its proposed edits to the capacity funding Application form and indicated that if the amended wording was acceptable to Energy Alberta, that it send a revised document that the Nation would send and return.
C-03487	May 30, 2025	Email	Energy Alberta confirmed receipt of the amended text and indicated it would review and respond as soon as possible.
C-03488	June 4, 2025	Email	Energy Alberta provided a revised copy of its capacity funding Application form that incorporated the edits requested by the Nation. Energy Alberta included the Electronic Funds Transfer (EFT) form and request the Nation return the documents at its earliest convenience.
C-03489	June 6, 2025	Email	MCFN provided a signed copy of Energy Alberta's capacity funding form.
C-03490	June 6, 2025	Email	Energy Alberta thanked the Nation for the signed form and indicated that in order to process payment, it also need the EFT forms.
C-03491	June 6, 2025	Email	MCFN indicated its finance team would provide the EFT form shortly.
C-03492	June 11, 2025	Email	MCFN provided the completed EFT banking details form.
C-03493	June 11, 2025	Email	Energy Alberta confirmed receipt of the EFT form.
C-03494	June 13, 2025	Email	Energy Alberta confirmed it had approved capacity funding for MCFN to support efforts in reviewing the Planning Phase documents including the IPD and TISGs within the timeframe specified by IAAC.
C-02542	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02603	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including Indigenous knowledge in the Impact Statement by participating in field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.
C-03495	July 22, 2025	Email	MCFN advised it was working on comments related to the TISGs and that prompted him to inform Energy Alberta about the upcoming cultural event with MCFN Elders and Land Users. MCFN indicated it would provide a copy of the event registry in case it was something Energy Alberta would like to support.
C-03496	July 22, 2025	Email	MCFN extended an invitation to Energy Alberta to the 20th anniversary of its Cultural Retreat and requested a sponsorship to assist with food, events, entertainment, transportation, and door prizes. MCFN attached a sponsorship package with further details for consideration.
C-03497	August 11, 2025	Email	Energy Alberta inquired if MCFN was still able to accept funding and expressed interest in providing a sponsorship for the Elder's Retreat.
C-05143	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-03498	August 18, 2025	Email	MCFN indicated it was still accepting sponsorships and requested that Energy Alberta complete the sponsorship form.
C-03499	August 18, 2025	Email	Energy Alberta followed up with MCFN regarding an email it had received via info@ regarding NationsConnect. Energy Alberta requested clarification as to whether MCFN would like all consultation submissions sent via NationsConnect or if this is just for the GIS data.
C-03500	August 18, 2025	Email	Energy Alberta provided its completed sponsorship form, its logo and information on how to submit an invoice for the sponsorship.
C-03501	August 18, 2025	Email	MCFN thanked Energy Alberta for the sponsorship and indicated it would submit an invoice shortly.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03502	August 19, 2025	Email	MCFN informed that Nations Connect – Community Knowledge Keeper was a consultation repository that multiple communities use in Northeast Alberta use to process and save consultation material, so it's not lost in staff transitions and in a central repository along with shape files and overlaid with traditional land use information and other environmental and cultural interests. MCFN requested that all Energy Alberta information be uploaded to the CKK at or near the same time that it's emailed out. MCFN requested a meeting within the next few weeks to discuss MCFN's approach to the Project.
C-03503	August 19, 2025	Email	Energy Alberta provided possible meeting dates and requested confirmation from MCFN on the preferred date and time.
C-03504	August 19, 2025	Email	MCFN indicated that August 28 would work for them.
C-03505	August 19, 2025	Email	Energy Alberta sent a calendar invite and MCFN attendees confirmed attendance at the August 28, 2025 meeting.
C-04487	August 28, 2025	Virtual / Online meeting	Energy Alberta meet with MCFN to discuss the studies that Energy Alberta planned and as required by the TISG, and how those align with MCFN's expectations. MCFN inquired about: ■ Provincial or federal standards for acoustic and visual ■ Purpose of the community profile ■ Baseline health conditions in Fort Chipewyan ■ Indigenous knowledge ■ Incidents and malfunctions ■ Energy Alberta Indigenous Relations organizational structure ■ Meet or exceed consultation requirements ■ Major project designation status ■ Seismic events and non-natural seismic activity in the area ■ Regional Study Area (RSA) or Local Study Area (LSA) ■ Employment and training ■ Mitigation measures MCFN indicated it would like to do its own HCIA and SEIA.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02632	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline, acknowledged MCFN's prior engagement on the Project, and expressed its interest in ongoing dialogue during the pause period. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03506	August 29, 2025	Email	MCFN thanked Energy Alberta for a productive discussion on August 28, 2025 and followed up on its action item to schedule a virtual meeting with member of the Arrowsmith Gold team who MCFN proposed to undertake its HIA, HHRA, and SEIA its members who reside in the potentially affected areas of the proposed Project. MCFN requested potential dates in September for an introductory call. MCFN indicated that with support from AGI it would submit a scope of work to undertake this requirement for the Projects assessment.
C-03507	September 3, 2025	Email	Energy Alberta provided a copy of the slide deck used in the recent meeting and indicated that it needed some time to determine the scope of HIA/HHRA, as well as reach a final siting decision before work on these assessments could be initiated. Energy Alberta offered potential meeting dates in late September/early October and requested an indication for MCFN on a preferred date.
C-03508	September 3, 2025	Email	MCFN indicated it would check on dates and get back to Energy Alberta.
C-02771	September 12, 2025	Email	MCFN submitted an invoice for Energy Alberta's sponsorship of the 2025 Elders Cultural Retreat.
C-02655	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03509	September 12, 2025	Email	MCFN invited Energy Alberta to attend its Water Quality Guidelines & Caribou Restoration Strategy, at the University of Calgary on October 1st and 2nd, 2025
C-03510	September 22, 2025	Email	MCFN advised it was unable to travel to this town hall meeting, and it would prefer to meet bilaterally on the siting issue when time is available.
C-03511	September 25, 2025	Email	MCFN invited Energy Alberta to its Water and Sediment Criteria for Indigenous Use and their Caribou Stewardship Plan on October 1st or 2nd.
C-05110	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03512	September 29, 2025	Email	MCFN advised it was not able to meet as planned on November 3 and requested the meeting be moved to the morning, anytime before lunch.
C-03513	September 29, 2025	Email	Energy Alberta indicated it would check team member calendars before it could confirm whether the time could be adjusted.
C-03514	September 30, 2025	Email	Energy Alberta confirmed it could meet from 9 to 10 am and amended the list of its attendees at the meeting.
C-03515	September 30, 2025	Email	Energy Alberta indicated its team was available from 9 to 10 am (MST), otherwise its calendars were fairly full and would need to look for an alternate time next week.
C-03516	September 30, 2025	Email	MCFN indicated it had reach out to its attendees to see if the proposed time would work and if it didn't, they would look to find another time to meet.
C-03518	October 6, 2025	Email	MCFN introduced Energy Alberta to its new Industry Relations Manager who would be the primary contact moving forward. MCFN noted that the previous manager would support the transition. MCFN acknowledged that the previously scheduled meeting to discuss HHRA, HIA, and SEIA would be deferred.
C-01932	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03519	October 8, 2025	Email	Energy Alberta welcomed the new Industry Relations Manager for MCFN and offered a meeting to provide a Project overview. Energy Alberta requested a date and time to meet.
C-03520	October 8, 2025	Email	MCFN indicated availability for October 9 at 9 am or after 1 pm.
C-02772	October 8, 2025	Email	Energy Alberta requested a meeting the week of October 20, 2025.
C-02773	October 9, 2025	Email	MCFN extended an invitation to sponsor the 2025 Elders Christmas Celebration and indicated the sponsorship deadline was Friday, November 14th, 2025.
C-01894	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-03521	October 13, 2025	Email	Energy Alberta provided the org chart for the Indigenous Engagement team as requested.
C-02004	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02774	November 4, 2025	Email	MCFN indicated it had received the sponsorship funds from Energy Alberta on October 22, 2025 and requested a copy of the Electronic Funds Transfer slip for its records.
C-03522	November 5, 2025	Email	MCFN provided a memo indicting that its email domain had change for the MCFN Government & Industry Relations (MCFN GIR) team and requested the contact list be updated.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02119	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they are included in all future communications. Energy Alberta requested a meeting date. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02152	November 10, 2025	Email	MCFN suggested some date for a possible introductory meeting with the new consultation contact.
C-02153	November 11, 2025	Email	Energy Alberta confirmed the times it would be available on November 26 for an Introductory Meeting with the new consultation contact for MCFN. Energy Alberta requested confirmation that the times work for MCFN and it would send a Teams invite.
C-02775	November 12, 2025	Email	MCFN inquired if Energy Alberta had made any progress on its health assessment framework and indicated MCFN interest in submitting a scope of work for consideration. MCFN suggested a meeting on November 26, 2025.
C-02776	November 12, 2025	Email	MCFN submitted a sponsorship request for its Elders Christmas Celebration and indicated the deadline for sponsorship forms was November 14, 2025.
C-02744	November 13, 2025	Email	Energy Alberta indicated it needed a bit more time to review and scope its understanding of the assessment based on the current draft TISGs and suggested a meeting to discussion MCFN's interests related to assessment.
C-02769	November 13, 2025	Email	MCFN indicated its agreement to a meeting to refresh a discussion related to MCFN's interest in the assessment.
C-02768	November 13, 2025	Email	MCFN advised Energy Alberta of a change in the Nation's domain name and requested Energy Alberta update its records accordingly.
C-02767	November 14, 2025	Email	Energy Alberta sent a meeting invite and proposed agenda.
C-02766	November 19, 2025	Email	Energy Alberta indicated that November 26, 2025 was no longer available to meet and inquired if the meeting could be moved to November 28, 2025 at the same time.
C-03523	November 19, 2025	Email	MCFN attendees accepted the meeting invite for November 26.
C-02458	November 19, 2025	Email	MCFN consultation contact indicated that the rescheduled time on November 28 would not work and offered alternate times to meet.
C-02765	November 19, 2025	Email	MCFN confirmed attendance at the November 28, 2025 meeting.
C-04488	November 28, 2025	Virtual / Online meeting	Energy Alberta met with MCFN and provided a general Project overview for new staff at MCFN, and a discussion related to MCFN interests in HHRA, HIA, and SEIA. MCFN raised the following: ■ Shapefiles to review and comment on siting options 1 and 2 ■ Size of water ponds and storage tanks

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02761	November 28, 2025	Email	Energy Alberta indicated that slides and a mapping shapefile from a recent meeting had been uploaded to Nations Connect suggested that further discussions would be scheduled to review siting options and studies.
C-04500	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02877	December 3, 2025	Email	The consultation contact indicated its disappointment in Energy Alberta not following the Nation's protocol that states the proponent should be dealing directly with the consultation team and not involving the Chief directly. The consultation contact requested an explanation for Energy Alberta's decision to communicate directly with the Chief, so as to better understand the working relationship being developed between Energy Alberta and the Nation.
C-02902	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out to potential candidates whose services align with their needs.
C-03300	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of the proposed Project, and that all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Energy Alberta mentioned that selection of a specific nuclear reactor technology and detailed design is not required for early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that looks at ranges for key features such as cooling water needs, building size and land area, that covers general requirements for many designs rather than for a specific reactor. Energy Alberta provided links to two potential reactors that were under consideration: the CANDU Monark and the Westinghouse AP1000.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03698	December 18, 2025	Email	Energy Alberta wished MCFN a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.
C-03732	December 18, 2025	Email	Energy Alberta received an auto-reply from MCFN noting an out of office period from December 19, 2025, to January 6, 2026.

O'CHIESE FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR O'CHIESE FIRST NATION (OCFN)

ID	Date	Interaction Type	Summary
C-03524	August 12, 2025	Email	Energy Alberta introduced its team member leading engagement for its proposed Peace River Nuclear Power Project. Energy Alberta informed O'Chiese First Nation that IAAC was seeking feedback on draft guidelines and plans. Energy Alberta advised it had begun conducting baseline environmental studies and would continue throughout the summer and into the early fall. Energy Alberta advised that opportunities to participate in these early studies are limited and had been offered to Indigenous Nations and Communities who had already indicated an interest. Energy Alberta advised it would continue to seek opportunities for Indigenous participation in future studies as the Project progresses. Energy Alberta encouraged OCFN to contact its Lead, Indigenous Engagement with any questions, or to share OCFN's interest in having a representative considered for environmental fieldwork, in the event there was additional capacity in the upcoming field visits. Energy Alberta advised that capacity funding was available to support Indigenous Nations in reviewing the Impact Assessment process and attached application forms that specified that OCFN's acceptance of the funding indicated an agreement to: ■ Review the Planning Phase documents in a timely fashion. ■ Engage with and providing Energy Alberta with timely feedback respecting any potential adverse impacts of activities proposed related to Indigenous interests. ■ Working collaboratively with Energy Alberta to identify reasonable options to mitigate any potential adverse impacts identified. Energy Alberta inquired whether OCFN would be agreeable to partnering with other Nations to complete the work contemplated in the correspondence. Energy Alberta provided links to resources on its webpage.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02788	August 12, 2025	Email	O'Chiese First Nation acknowledged Energy Alberta's email dated August 12, 2025 and provided information for its primary contact for the proposed Project for the duration of the regulatory process. O'Chiese First Nation indicated it was currently reviewing the Draft Indigenous Engagement and Partnership Plan and Draft Integrated Tailored Impact Statement Guidelines. O'Chiese First Nation indicated it fully expected an agreement for sufficient capacity funding with Energy Alberta. OCFN advised that it had reviewed the form, and fully intended to review and submit comments to the Regulator "in a timely fashion", however, OCFN indicated that it was premature to accept funding if Energy Alberta's expectation was that OCFN would be in a position to provide "timely feedback respecting any potential adverse impacts of activities proposed related to Indigenous interest" at that point in the regulatory process. OCFN further advised that it would not be in a position to work with Energy Alberta to identify options to mitigate any such impacts at that time, and that was the purpose of the regulatory process. OCFN suggested a Teams call to discuss further.
C-05150	August 18, 2025	Email	Energy Alberta emailed the Chief and attached a letter that provided an update on its request to IAAC and CNSC for a Regulatory Timeline Suspension for the Peace River Nuclear Power Project's Impact Assessment process. Details about the pause were included in the letter and contact information for any questions or discussions was provided. Energy Alberta advised that its Project Team would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program to accommodate those Nations and Communities who had already indicated an interest in participating, ■ Water Intake Siting Inspection, which was important to the provincial water licencing process, ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies, and ■ An ongoing review and refinement of technology consistent with its goal of building a world class, zero-emission nuclear facility.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02622	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated it was interested in feedback on how best to share information and criteria with OCFN more broadly so that it could gather additional input into the siting decision. Energy Alberta assured OCFN that these workshops would not replace direct and ongoing engagement between Energy Alberta and OCFN on all aspects of the Project, including siting decisions. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02789	August 28, 2025	Email	O'Chiese First Nation indicated it could not attend the siting workshop in person on the scheduled date and requested a virtual attendance option. OCFN indicated its Consultation Office was responsible for the internal dissemination of information to its members. OCFN indicated it would not be participating in public workshops, as it did not consider that meaningful consultation. OCFN requested a copy of the site selection criteria so that the Consultation Office could disseminate information to its members.
C-03525	September 3, 2025	Email	Energy Alberta followed up on OCFN's August 28, 2025 email and advised it did not have an option for virtual participation for the September 24, 2025 Project Siting Workshop. Energy Alberta offered to review the siting workbook with O'Chiese First Nation when it is finalized to gather feedback. Energy Alberta noted that they could hold an introductory meeting with O'Chiese First Nation and inquired about O'Chiese First Nation's availability the week of September 29 to October 3.
C-01931	October 7, 2025	Email	Energy Alberta emailed the Chief and attached a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01892	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02003	October 21, 2025	Email	Energy Alberta emailed the Chief and provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02111	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta suggested a virtual meeting be scheduled so that it could provide a Project Overview and Update and requested a meeting date. Energy Alberta advised that OCFN was the only community that requested a virtual option for the Siting Workshop that OCFN was invited to in September. Energy Alberta provided links to some of its recent Facebook posts for sharing within O'Chiese First Nation's community.
C-02701	November 24, 2025	Email	Energy Alberta has requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options are attached for review. Input from Indigenous groups is sought before finalizing site selection and moving into the Impact Assessment process. A virtual information session can be arranged to discuss the Project and gather feedback.
C-02790	November 24, 2025	Email	O'Chiese First Nation requested a meeting to learn about the Project.
C-02719	November 25, 2025	Email	Energy Alberta indicated its availability to meet virtually with O'Chiese First Nation on December 8 or 9, 2025. Energy Alberta inquired if those dates would work for the Nation.
C-02791	November 25, 2025	Email	O'Chiese First Nation confirmed that December 9 worked for an Introductory meeting.
C-02797	December 2, 2025	Email	Energy Alberta recognized the importance of engaging early and often to understand the unique interests of Indigenous Nations and communities with respect to the Peace River Nuclear Power Project. Energy Alberta indicated that it had heard consistently through its interactions with Nations and communities that there was a strong desire to increase community awareness and education related to the nuclear energy sector. Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one representative member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02810	December 2, 2025	Email	O'Chiese First Nation inquired if there would be a virtual option to attend the workshop.
C-02827	December 2, 2025	Email	Energy Alberta advised that they did not have a virtual option for the workshop but would make note of this request. Energy Alberta advised that the workshop was designed to be quite interactive.
C-02880	December 2, 2025	Email	The Director, Consultation Office informed Energy Alberta that the information session planned would not work for O'Chiese First Nation, and inquired if capacity funding would be provided for attendance.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02830	December 2, 2025	Email	Energy Alberta informed OCFN that it would not be covering travel costs for the optional training opportunity, however it was covering the consultant's cost to deliver the training, the venue, and a lunch prior to the start of the training.
C-02905	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03597	December 9, 2025	Virtual / Online meeting	Energy Alberta had an Introductory meeting with the Director, Consultation Office for O'Chiese First Nation and two of its consultants. OCFN raised the following interests: ■ Capacity funding ■ Impacts on Treaty and NRTA rights ■ Taking up of crown land ■ Project's water management ■ Meaningful consultation and the importance of including O'Chiese in the process
C-03254	December 9, 2025	Email	Energy Alberta provided the slide deck from the meeting and action items from the discussion including: ■ Provide O'Chiese First Nation with a copy of the presentation ■ Provide O'Chiese First Nation with capacity funding forms ■ Provide O'Chiese First Nation with a link to the Indigenous Engagement and Partnership Plan ■ O'Chiese First Nation's to provide Energy Alberta a letter regarding their involvement expectations

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03301	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03322	December 10, 2025	Email	The Director, Consultation Office requested the contact information for Wayne Henuset and Scott Henuset.
C-03327	December 10, 2025	Email	Energy Alberta indicated it would provide the requested information and requested an indication of what would be communicated so that its President could be briefed.
C-03310	December 10, 2025	Email	O'Chiese First Nation provided Energy Alberta with a letter dated December 10, 2025 that provided its position and expectations for involvement: ■ Request for Consultation and concerns with tiered approach (i.e. Energy Alberta's list may be broader and more inclusive than IAAC's list) ■ Proponent vs. Crown capacity funding, OCFN indicated it should not have to subsidize activities associated with the regulatory process. ■ Energy Alberta Capacity Application Form ■ Project Water Needs, particularly troubling from a treaty-rights perspective ■ Cumulative Effects ■ Future Communication with O'Chiese First Nation O'Chiese First Nation also provided a copy of its comments submitted to IAAC for reference. A copy of this letter is attached at the end of this Engagement and Communications Record.
C-03363	December 11, 2025	Email	Energy Alberta emailed and introduced the Consultation Director, O'Chiese First Nation to its President.
C-03364	December 11, 2025	Email	OCFN Consultation Director indicated the context for requesting the information was that Energy Alberta had sent correspondence to its Chief and OCFN wanted to ensure that it had similar contact information for the most senior representatives of Energy Alberta.

Zoe Pruss
Indigenous Engagement Advisor
Peace River Nuclear Project
Energy Alberta
c. 403.771.2582
e. zoe.pruss@energyalberta.com

Dear Ms. Pruss,

This letter is sent on behalf of O'Chiese First Nation's Chief and Council to Energy Alberta for the Peace River Nuclear Project.

The Chief and Council of O'Chiese First Nation have the elected authority and responsibility to protect the Inherent and Treaty rights of O'Chiese First Nation. The Inherent and Treaty rights of O'Chiese First Nation are recognized by Treaty 6 and Section 35 of the *Constitution Act*, 1982.

O'Chiese First Nation is bound by *Kaa-Ke-Chi-Ko-Moo-Nan*, O'Chiese First Nation's Great Binding Law ("Natural Laws"). As such, O'Chiese First Nation operates under its own distinct set of legal principles and laws that have been in place since time immemorial, which we understand and expect are protected by Treaty 6 and Section 35 of the *Constitution Act*, 1982. Our Natural Laws are the foundation for O'Chiese First Nation Peoples.

Representatives from the O'Chiese First Nation Consultation Office met with you and your team on December 9, 2025. Please accept this as fulfillment of one of the action items resulting from this meeting ("*O'Chiese First Nation will provide a letter to EA regarding O'Chiese's position and expectation of involvement.*")

Request for Consultation

O'Chiese First Nation formally requested consultation in a meeting with IAAC on the Project on July 23, 2025. O'Chiese First Nation clarified O'Chiese First Nation members have the right, under the terms of the *Natural Resources Transfer Act*, 1930 (NRTA, 1930) to exercise their right to harvest on all unoccupied Crown lands, and other lands to which there is a right of access. We also expressed a fundamental disagreement with the current approach of consulting Indigenous nations whose Indian Reserves are located within the boundaries of Treaty 8.

We have not received a response to that formal request from IAAC.

Energy Alberta stated that a list compiled by the company for identification of who will be

consulted may be different (i.e., broader and more inclusive) than Indigenous groups triggered for consultation by IAAC.

It is our past experience when duty to consult efforts are approached using a 'tier method', there are inconsistencies in approach and results for lower tier Nations.

Proponent vs. Crown Capacity Funding

O'Chiese Consultation Office applied for and received \$5,000 capacity funding to participate in **bi-lateral** Crown consultation thus far, including:

- Met with IAAC and CNSC representatives on July 23, 2025
- Reviewed and provided comments on the Planning Phase documents on August 8, 2025,
- Attended IAAC information session "Nuclear 101" on August 7, 2025

Capacity funding provided by the Crown is specific for Crown consultation activities. Crown consultation and proponent consultation activities for the most part, do not overlap, as the proponent is expected to identify both positive and negative effects arising from their project.

We expect capacity funding provided by the proponent for **all** procedural aspects of consultation, including:

- Reviewing project information
- Meeting with proponent
- Disseminating project information internally within O'Chiese First Nation,
- Preparing information regarding impacts to O'Chiese First Nation Section 35 rights,
- Preparing appropriate mitigation and accommodation measures and,
- Facilitating economic benefit discussions.

O'Chiese First Nation should not subsidize activities associated with the regulatory process themselves.

To date, O'Chiese First Nation has:

- Reviewed project emails sent from proponent on October 7, October 21, November 24, and December 9, 2025.
- Met with Energy Alberta on December 9, 2025.
- Prepared (as requested by Energy Alberta) correspondence specifically outlining "position and expectation of involvement" in addition to the comments provided to IAAC (which proponent only accessed on December 8, 2025)
- Review "Application for Capacity Funding – Impact Assessment Planning Phase"

These activities were conducted without capacity funding provided by the proponent.

O'Chiese First Nation would like to highlight the Nation does not receive core capacity funding from the Government of Canada, and limited core capacity funding for provincial consultation activities from the Government of Alberta. Our clear position is O'Chiese First Nation will not subsidize proponent activities, and we will fully participate in this project regulatory process.

Our expectation for involvement in this consultation process is consistent with the principles of free, prior and informed consent.

Energy Alberta Capacity Application Form

Upon review, O'Chiese cannot sign or accept the capacity funding offered as currently described.

“By accepting this funding O'Chiese First Nation agrees to engage with Energy Alberta on the Project by:

- Reviewing the Planning Phase documents in a timely fashion.
- Engaging with and providing Energy Alberta with timely feedback respecting any potential adverse impacts of activities proposed related to our Indigenous interests.
- Working collaboratively with Energy Alberta to identify reasonable options to mitigate any potential adverse impacts identified.”

The underlined activities are not accomplished with the planning phase of a large, regulated project. Identification and mitigation of impacts to Section 35 rights occurs during the assessment phase (and beyond). The presentation used in our meeting of December 9, 2025 made this clear. As currently written, if O'Chiese First Nation accepts the unilateral offer of capacity, the deliverables are broader than what the capacity can support.

Further, O'Chiese First Nation does not delegate the duty to consult to other First Nations or organizations to act on their behalf. O'Chiese First Nation is not agreeable to “partnering with other Nations”.

Project Water Needs

This is a large and novel project proposed for Alberta. However, as explained to you in the December 9th meeting, the Project's need for water is particularly troubling from a treaty-rights perspective.

Cumulative Effects

Cumulative effects (specifically how much Crown land is available and preferred for the exercise of harvesting rights) is of particular interest to O'Chiese First Nation.

Future Communication with O'Chiese First Nation

I would like to highlight that project information, including technical updates are currently and inappropriately sent to Chief Phyllis Whitford. I would request you change this practice. I am the appropriate contact for duty to consult purposes, as well as my Consultation Officer. Contact information is as follows:

Consultationoffice@ochiesebc.ca

Andrew.Scott@ochiesebc.ca

Finally, I've attached our comments submitted to IAAC for your reference.

We look forward to meaningful consultation on this project.

Sincerely,

Andrew Scott
Director
O'Chiese Consultation Office

cc: Claudette Bois, Crown Consultation Coordinator, IAAC

Comments Submitted to IAA

1. Inadequate Consultation Approach

The duty to consult O'Chiese First Nation is required for large resource development projects in Alberta, regardless of if that project falls outside the boundaries of Treaty 6. O'Chiese First Nation has rights, as described in the *Natural Resource Transfer Agreement, 1930* to harvest on all unoccupied Crown land, and other lands to which we have a right of access throughout the Province of Alberta. These rights are recognized and protected under Section 35, *Constitution Act, 1982*.

In addition, almost 65% of all lands within the boundaries of Treaty 6 are now 'taken up' and are now unavailable for the exercise of Treaty 6 rights. O'Chiese First Nation routinely travels outside of Treaty 6 boundaries to exercise rights, due to the mismanagement of Crown lands throughout the Province of Alberta.

2. Issues with draft Indigenous Engagement and Partnership Plan

a. Consultation List of Indigenous Nations and Communities

In Section 3.1 of the draft Indigenous Engagement and Partnership Plan ("IEPP") outlines 19 Indigenous Nation identified for consultation, which does not include O'Chiese First Nation. As stated, O'Chiese First Nation has rights in the vicinity of the Project with a likelihood of being adversely impacted. The IEPP states this list may be updated throughout the consultation and engagement process as the IAAC and CNSC receive more information.

However, in Section 3.2, it states the IAAC and the CNSC will plan on engaging the Indigenous Nations and communities whose rights are unlikely to be impacted by the Project but who have interests or concerns related to the Project based on information and who have expressed an interest in participating in the assessment process.

The IEPP states the degree of consultation or engagement will vary and will be proportionate to the information provided by Indigenous Nations and communities regarding potential pathways of impact from the project on Indigenous or Treaty rights and interests.

O'Chiese First Nation requires clarification on how these "degrees" of consultation are being determined and how information shared by O'Chiese First Nation will be categorized.

b. Participant Funding

Section 7 of the IEPP outlines participant funding available for the planning phase. The funding available through IAAC is insufficient to gather and provide community comments on the planning phase of the Project within the short timelines need to be met. However, it is important to O'Chiese First Nation that we participate, and our comments are fully taken into consideration.

Although limited capacity is available for this initial submission, additional capacity is required for O'Chiese First Nation to continue to be able to be engaged in this engagement process. A lack of capacity funding cannot facilitate fulsome engagement

by O'Chiese First Nation. To participate fully, O'Chiese First Nation must be provided with capacity that covers costs of meeting attendance (both internal and external), document reviews, information gathering, community engagement, and other tasks as they may arise.

3. Issues with the draft Integrated Tailored Impact Statement Guidelines

a. Issues Identification and Resolution

Section 6.3 states "where requested by Indigenous Nations and communities, collaborate and work with Nations and communities to incorporate information from each Nation into topic-specific parts of the Impact Statement, such as the biophysical environment or alternative sections". It is the responsibility of the Proponent to ensure this information is incorporated. The burden should not be placed on the Nation to "request" this information be incorporated.

In our experience, companies often follow the minimum requirements set out by Regulators and take advantage of any exceptions or permissive requirements that are available. The IAAC and CNSC needs to be strict and provide clear instructions on how information provided by Indigenous Nations must be incorporated.

b. Identification of Valued Components

O'Chiese First Nation routinely uses two measurable parameters in our analysis of potential impacts to Inherent and Treaty rights from natural resource projects: (1) Increased Legal Restrictions and (2) Increased Disturbance.

Legal restrictions are defined as lands that are already under private ownership, provincial or federal Crown land under dispositions (project dispositions, grazing leases etc.), Indian reserves, railways, roadways, provincial or national parks and protected areas, military bases etc., prior to Project approval where O'Chiese First Nation members require permission to exercise their rights. In other words, in areas where no right of access exists.

Disturbance, or human activity, also creates conditions or features on the lands that are incompatible with the exercise of Inherent and Treaty rights in accordance with O'Chiese First Nation Natural Laws. Disturbance may occur within the boundaries of dispositions with restricted access, but disturbance also may exist outside of disposition boundaries. Further, the effects of disturbance can migrate off a specific site and affect the surrounding area. Noise, air pollution, dust, signage, increased traffic, increased presence of people are some examples of conditions that migrate off a project site.

If a project creates conditions or features that are not preferred and/or are incompatible with Natural Laws, O'Chiese First Nation members will elect to avoid these areas whenever possible while exercising their Inherent and Treaty rights. Conversely, if a project decreases or eliminates conditions or features that are preferred or required in accordance with Natural Laws, that will also trigger avoidance behaviours by O'Chiese First Nation members exercising their rights.

To date, the Government of Alberta does not set, nor do they recognize acceptable limits of change to the exercise of Inherent and Treaty rights for either of these two

measurable parameters. O'Chiese First Nation is forced to identify themselves the current state of these two conditions, and how a project may add to them. It is O'Chiese First Nation's position that rights held by O'Chiese First Nation are already at infringement levels, due to a lack of understanding and recognition by federal and provincial regulators of this state of affairs.

It is imperative the Proponent conduct an analysis of the existing conditions of these two measurable parameters in Project's spatial extent, both local and regional. O'Chiese First Nation will be conducting our own analysis of these measurable parameters for comparison with the Proponent's analysis.

c. Characterization of Change

As stated, the Government of Alberta does not set, nor do they recognize acceptable limits of change to the exercise of Inherent and Treaty rights for Increased Legal Restrictions and Increased Disturbance. O'Chiese First Nation is forced to identify themselves the current state of these two conditions, and how a project may add to them. It is O'Chiese First Nation's position that rights held by O'Chiese First Nation are already at infringement levels, due to a lack of understanding and recognition by federal and provincial regulators of this state of affairs.

We expect the Proponent will identify and explain the methodology used in their assessment to characterize change for these two conditions, as stated in Section 7 of the draft Integrated Tailored Impact Statement Guidelines.

When O'Chiese First Nation provides analysis of the levels of change to these two conditions, it is our expectation this analysis will be incorporated into the assessment.

d. Consideration of Cumulative Effects

O'Chiese First Nation is concerned with the lack of proper consideration to cumulative effects being carried out by the Government of Alberta and the Government of Canada. Siloed approaches to developing policies, regulating projects, and other government initiatives and the lack of thresholds regarding the taking up of lands have resulted in the infringement of O'Chiese First Nation's Inherent and Treaty rights.

The Project is being proposed in an area that has been subjected to considerable development and human activity already. Since the Project would be the first nuclear generating plant to be proposed and constructed in western Canada and Alberta, O'Chiese First Nation is extremely concerned about nuclear safety and how this will be considered within the Impact Assessment.

O'Chiese First Nation has no confidence that the current approaches to cumulative effects within the Impact Assessment process will address current, or reduce future, cumulative effects in any meaningful and proactive manner.

Cumulative effects must be managed proactively through the creation of targets or thresholds so triggers and limits never need to be reached. These targets would protect against continued cumulative impacts that negatively impact O'Chiese First Nations Inherent and Treaty rights.

The Proponent must conduct a cumulative effects analysis using the measurable parameters of legal restrictions and disturbance. The analysis of these two measurable parameters will establish a baseline of cumulative effects in the Project area prior to Project approval.

e. Project Waste Transportation and Storage

O'Chiese First Nation is concerned with the waste resulting from the Project, specifically how the waste will be transported and stored.

The transportation and storage of project waste must be considered as part of the Project and not a separate project or license application. It is our experience, as soon as waste leaves a project site, the Proponent takes a "hands-off" approach and is no longer responsible for what happens to it. Much like the initial exclusion of shipping from the TMX project scope, transportation of waste away from the Project site must be scoped in to this Project.

The Proponent's Impact Statement must include a description and justification for how waste from the Project will be transported and stored. Specifically, how the Proponent will be responsible for the waste during the transportation of waste and during the timespan it is stored.

f. Water Management Requirements for the Project

Water management is a critical government activity that should not be done quickly or superficially. Water management planning offers protection for water, species, and

people who use the water and ought to prevent further degradation to ecosystems than has already occurred.

Water management should provide guidance for how the availability of quality water can be maintained and protected into the future. Beyond this, water management and availability directly impact O'Chiese First Nation's constitutionally protected rights and the ability for our members to exercise their Inherent and Treaty rights freely and safely, and in accordance with our Natural Laws.

If water management planning is done incorrectly, it will have far-reaching impacts to the natural environment; it cannot be stressed enough that water is the foundation for all life. Poorly done water management that fails to protect against cumulative impacts could additionally result in the facilitation of infringement to Inherent and Treaty rights.

The Proponent must include the amount of water it is proposing to remove from the Peace River or other water courses throughout the lifecycle of the Project. The Proponent must also indicate the change of quality of the water (including temperature) that exits the Project and how it will be disposed of.

g. Induced Seismicity Considerations

The Project could be susceptible to the effects of induced seismicity due to hydraulic fracking in the vicinity. This would increase the risks to health and safety of O'Chiese First Nation members who are exercising their Inherent and Treaty rights in the Project area.

The Proponent and the Crown must outline how induced seismicity was taken into consideration and describe any mitigation measures it anticipates putting in place.

h. Transmission Line

O'Chiese First Nation is unclear from the draft Integrated Tailored Impact Statement Guidelines, whether and how energy produced by the Project will be transmitted.

O'Chiese First Nation anticipates the IAAC and CNSC will take our comments on the planning phase of the Project into consideration. We plan to continue engagement with the IAAC, CSNC, and Energy Alberta in the coming phases of the Project.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR OTIPEMISIWAK MÉTIS GOVERNMENT (OMG)

ID	Date	Interaction Type	Summary
C-01264	January 31, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-01269	February 4, 2025	Email	OMG advised they were interested in engagement opportunities and requested an introductory meeting to discuss the Project.
C-01270	February 5, 2025	Email	Energy Alberta advised it was available for a virtual meeting on February 12, 2025 and advised it would provide a meeting invitation upon confirmation of OMG's availability.
C-01271	February 5, 2025	Email	OMG confirmed their availability for a February 12, 2025 meeting and suggested a potential meeting times.
C-01272	February 5, 2025	Email	Energy Alberta provided alternative meeting times for the February 12, 2025 meeting.
C-01273	February 5, 2025	Email	OMG confirmed their availability to meet at the suggested time on February 12, 2025.
C-01268	February 5, 2025	Email	Energy Alberta provided OMG with a Teams Meeting invitation for February 12, 2025.
C-01275	February 12, 2025	Virtual / Online meeting	Energy Alberta met virtually with OMG to introduce the Project and discuss the Project timeline, regulatory process, Indigenous collaboration and inclusion, the IPD, nuclear energy and related nuclear processes. The following interests were raised by OMG: ■ OMG described its specialized expertise that could contribute to the Project. ■ If the uranium would be sourced from Canada. ■ whether Energy Alberta would be the developer and operator of the Project. ■ Whether reactor technology had changed.
C-01274	February 21, 2025	Email	Energy Alberta followed up on the February 12, 2025 meeting and advised it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with OMG for an introduction to their process.
C-01277	March 12, 2025	Email	OMG provided an update on points of contact, communication protocol, and coordination efforts, and provided a presentation regarding their consultation department and structure. OMG advised they met with the CNSC and had been in contact with the IAAC. OMG requested a meeting on April 4, 2025.
C-01276	March 12, 2025	Email	Energy Alberta confirmed it was available to meet on April 4, 2025 and advised it could provide the meeting invitation.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01278	March 17, 2025	Email	Energy Alberta followed up on the March 12, 2025 email inquiring as to whether OMG was available for a meeting on April 4, 2025.
C-01280	March 31, 2025	Email	OMG provided their availability for a meeting on April 4, 2025 and advised the attendees had varying levels of familiarity with the Project. OMG advised the attendees would likely be involved in community-based engagements and requested the meeting be treated as an introductory Project meeting. OMG requested a meeting invitation.
C-03527	April 1, 2025	Email	Energy Alberta introduced its new Indigenous Engagement team on the Project and confirmed it was available for an Introductory Meeting on April 4 at 2:30 pm. Energy Alberta indicated it would send a calendar invite.
C-02371	April 4, 2025	Email	Energy Alberta advised it planned to submit the IPD to the IAAC later that day. Energy Alberta advised the application was expected to be posted by April 18, 2025 for public comment and it would provide updates and the website link once available. Energy Alberta provided its contact information and requested to be contacted for any Project inquiries.
C-04529	April 4, 2025	Virtual / Online meeting	Energy Alberta met with OMG to provide the Project introduction. Topics of discussion included a Project presentation and tritium emissions. OMG raised the following interests: ■ Cumulative effects ■ Watershed Study or Basin wide study ■ Impact Assessment ■ Interested in a joint meeting with OMG/IAAC/EA ■ Tritium – how it enters the atmosphere, the groundwater, and how it is monitored.
C-03528	April 9, 2025	Email	Energy Alberta provided the presentation from their April 4, 2025 meeting and advised it was still gathering information to respond to the tritium questions asked in the meeting and would provide that information as soon as possible. Energy Alberta provided links to its fact sheets and the poster boards from its recent public Open House, and to its Procurement and Jobs registries.
C-02400	April 14, 2025	Email	Energy Alberta followed up on its recent notification of the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised IAAC was hosting a 30-day public comment period on the IPD from April 14, 2025 to May 14, 2025. Energy Alberta provided a website link to the English and French versions of the IPD and public notice, a list of locations to access a hard copy of the IPD for public comment, and information about subscribing for Project updates.
C-03529	April 29, 2025	Email	Energy Alberta provide the requested information on tritium.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02429	May 5, 2025	Email	Energy Alberta requested confirmation that OMG had received the IPD for the Peace River Nuclear Power Project. Energy Alberta inquired if OMG had any questions about the information contained within the document, or if OMG would like to meet with Energy Alberta to get an overview of the Project. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-03530	May 5, 2025	Email	OMG advised they were reviewing the IPD and its summary and coordinating commentary with their affected Districts. OMG advised they had applied for IAAC capacity funding and provided insight on their IPD commentary. OMG advised they would follow up with an updated contact list.
C-02516	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period. Energy Alberta emailed to correct information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02572	May 15, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-01297	May 22, 2025	Email	Energy Alberta left a voicemail regarding capacity funding for the Project.
C-01290	May 22, 2025	Phone	Energy Alberta had a phone conversation with OMG to discuss capacity funding. OMG requested a copy of the May 15, 2025 email and the capacity funding letter. Energy Alberta noted it would provide the email.
C-03531	May 22, 2025	Email	Energy Alberta followed up on its phone call with OMG to provide a copy of the May 15, 2025 email and an additional copy of the capacity funding letter. Energy Alberta advised a follow-up email would be forthcoming with additional information regarding capacity funding. Energy Alberta indicated it wanted to understand the distinct needs of OMG so that they could consider the request in relation to the distinct needs of each of the Métis communities.
C-02587	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-01318	May 29, 2025	Email	OMG requested high-resolution photos to create materials for distribution to their community members.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03533	May 29, 2025	Email	Energy Alberta requested OMG send links or screenshots of images they were interested in using so that Energy Alberta could provide high resolution copies of its photos. Energy Alberta shared links to its existing fact sheets and Project overview materials on its website.
C-03534	May 30, 2025	Email	OMG provided information of the photos they would like to use.
C-03535	May 30, 2025	Email	OMG provided a signed capacity funding application form.
C-03536	May 30, 2025	Email	OMG advised Energy Alberta about a potential community meeting in Peace River, tentatively on either June 17, 18 or 19, 2025 with a potential start of 7 pm. OMG informed it would be an introductory community engagement meeting with its citizens in the Peace River area regarding the nuclear Project. OMG inquired if Energy Alberta would be able to send someone to attend the meeting .
C-03537	May 30, 2025	Email	OMG resent the signed capacity funding documents.
C-03538	May 30, 2025	Email	Energy Alberta requested a meeting on June 4 from 9:30 to 11 and 12:30 to 2 or on June 5 anytime after 9:30 to understand OMG's upcoming engagement and to make sure Energy Alberta was supporting the meeting as best as possible.
C-03539	June 2, 2025	Email	OMG requested an earlier meeting date to accommodate a deadline for print materials for the community meeting.
C-03540	June 2, 2025	Email	OMG provided Energy Alberta with a draft of the OMG communication piece for Energy Alberta's review and comment. OMG advised of their intended purpose of the document, information they hoped to include, and noted they were on a deadline for the printing of the document.
C-01292	June 2, 2025	Email	Energy Alberta inquired as to whether the community engagement meeting could be rescheduled to June 18, 2025 and inquired about what it should prepare for the meeting. Energy Alberta advised it had been contacted by an OMG representative that was preparing a pamphlet and inquired as to whether this was in preparation for the meeting. Energy Alberta provided website links to its Project factsheets and advised it could provide printed copies for the meeting.
C-03541	June 2, 2025	Email	Energy Alberta indicated it would review the document and provide high resolution photos and comments for OMG consideration as soon as possible
C-03552	June 2, 2025	Email	Energy Alberta provided its comments on OMG's document and attached the high-resolution images that had been requested. Energy Alberta provided information about the sharing permissions of the photographs.
C-01324	June 2, 2025	Email	OMG confirmed receipt of Energy Alberta's email providing feedback on their draft for the engagement session.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03551	June 2, 2025	Email	Energy Alberta share the names of team members that would join the engagement meeting with OMG citizens in the Peace River area in June and requested confirmation of the date and time. Energy Alberta shared links to its Fact Sheets and newsletter for sharing at the meeting. Energy Alberta inquired if OMG want team members to provide a presentation on the Project at the meeting.
C-03559	June 3, 2025	Email	OMG indicated it had incorporated Energy Alberta's comments into the communication piece and requested additional information on the graphics.
C-03560	June 3, 2025	Email	OMG requested a high-resolution copy of the Energy Alberta logo.
C-03561	June 3, 2025	Email	Energy Alberta confirmed it would provide the requested graphics.
C-03562	June 3, 2025	Email	Energy Alberta provided the requested graphics.
C-03563	June 3, 2025	Email	OMG indicated it had reached out to its District leadership in Peace River to confirm June 18, 2025 and would confirm as soon as possible. OMG indicated it would appreciate a presentation about the Project and any materials that Energy Alberta wanted to bring to the meeting.
C-03564	June 3, 2025	Email	OMG requested an image that portrayed the Project roadmap and suggested a call to discuss.
C-03565	June 3, 2025	Email	Energy Alberta informed OMG that it had approved capacity funding to OMG efforts in reviewing the Planning Phase documents including the IPD and TISGs.
C-03566	June 3, 2025	Email	OMG confirmed June 18, 2025 as the meeting date in Peace River, with a start time of 7 pm and dinner between 5:30 and 6 pm. OMG confirmed the venue and that it anticipated between 30 to 40 people in attendance.
C-03567	June 4, 2025	Email	Energy Alberta thanked OMG for the confirmation.
C-03572	June 12, 2025	Email	Energy Alberta inquired if there was an agenda for the meeting on June 18, 2025. Energy Alberta inquired if there were topics that OMG wanted it to specifically focus on in its presentation. Energy Alberta advised that it had a presentation that would provide information about the proposed Project, details about the Regulatory and Engagement Phases, the types of engagement planned and opportunities for OMG members to provide input.
C-03573	June 13, 2025	Email	OMG provided its draft agenda for the day and confirmed that the presentation content proposed by Energy Alberta was appropriate. OMG requested that Energy Alberta have some of its print materials available for citizens.
C-03574	June 13, 2025	Email	Energy Alberta confirmed the names of its team members that would attend the community meeting and that they planned on being in attendance for dinner. Energy Alberta inquired if there was a virtual option for some of its technical experts to join the meeting.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01300	June 18, 2025	In person / community meeting	Energy Alberta emailed OMG to confirm feedback received community members which included nuclear waste management, water usage, impacts to water, the regulatory processes and its impacts to Indigenous rights and involvement, employment and training opportunities, socio-economic impacts of the Project. During the previous meeting OMG had raised the following interests: ■ Nuclear waste management. ■ Nuclear safety. ■ Cumulative effects of the Project and its expansion of local energy transmission infrastructure. ■ Did not think the Project would provide employment nor procurement opportunities for the local communities. ■ Métis communities should have equal access to employment and training opportunities as First Nations. ■ Project's socio-economic impacts on local communities and their infrastructure.
C-01327	June 18, 2025	Email	OMG economic partner followed up on the June 18, 2025 community information session and advised they were interested in procurement opportunities.
C-03575	June 19, 2025	Email	Energy Alberta confirmed that the capacity funding payment to OMG had been sent on June 13, 2025.
C-01326	June 20, 2025	Email	Energy Alberta advised OMG economic partner that it would add them to the Project procurement registry and would follow up regarding opportunities as they arose.
C-03576	June 20, 2025	Email	Energy Alberta thanked OMG for including it in the community session and informed that there would be upcoming opportunities for deeper discussions on baseline study work over the summer and fall. Energy Alberta inquired if OMG wanted to discuss this work further and requested available dates over the next few weeks.
C-03577	June 20, 2025	Email	Energy Alberta acknowledged meeting the OMG representative at the community meeting and informed that it had reached out to OMG head office to schedule further discussions regarding opportunities for involvement in baseline studies.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03578	June 20, 2025	Email	OMG thanked Energy Alberta for its participation in the community meeting and advised that about 25 citizens participated with good questions and comments, and OMG felt that they were now up to speed on the basics of the Project and where it was at in the approval process. OMG provided a summary of the comments/questions and requested Energy Alberta's comments on the accuracy of the document. OMG requested a copy of the PowerPoint presentation to send with the summary to citizens for their reference. OMG indicated its interest in upcoming activities in the summer and fall and requested specific plans and dates to help coordinate OMG leadership and citizen participation. OMG suggested June 23, 2025 for a meeting to discuss upcoming activities further.
C-03579	June 23, 2025	Email	Energy Alberta provided a copy of the slides presented at the community meeting and indicated it would review the summary notes and provide comments as soon as possible. Energy Alberta indicated it was available to meet that afternoon at 4 pm or the following day between 10 to 11:30 am.
C-01304	June 25, 2025	Virtual / Online meeting	Energy Alberta met virtually with OMG to discuss the Project.
C-02543	June 25, 2025	Email	Energy Alberta advised that IAAC and CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged OMG to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-01329	June 27, 2025	Email	Energy Alberta provided information regarding SMR technology compared to and large-scale reactors.
C-02604	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including Indigenous knowledge in the Impact Statement by participating in field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.
C-03580	July 18, 2025	Email	OMG thanked Energy Alberta for the information and indicated its interest in joining Energy Alberta for the field work. OMG indicated it would provide the names of the attendee as soon as possible.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03581	July 21, 2025	Email	Energy Alberta acknowledged OMG's interest in the field work and indicated that given the capacity of the boat, OMG respectfully limit its participant to one representative to ensure other Nations and Communities have the opportunity to participate.
C-03582	July 23, 2025	Email	Energy Alberta advised it was holding a spot on August 1, 2025 for a representative from OMG to participate in the study and requested confirmation of the participant so that Energy Alberta could pass along further details.
C-03594	August 12, 2025	Email	Energy Alberta introduced its Indigenous engagement team for the proposed Peace River Nuclear Power Project. Energy Alberta reminded Grande Prairie Métis Local that IAAC and CNSC were seeking feedback from Indigenous Nations on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta advised of its summer field work program and that it planned to collect baseline environmental data, with opportunities for Indigenous participation. Energy Alberta advised of its capacity funding to support Indigenous Nations in reviewing Project documents. Energy Alberta provided links to additional resources, available online. Energy Alberta emphasized its commitment to responsible engagement with local communities and Indigenous Nations.
C-03584	August 14, 2025	Email	Energy Alberta provided the date, time and meeting location for the OMG participant in the water intake siting tour. Attached was a document that provided information on personal protective equipment required. Energy Alberta confirmed the honorarium and reasonable travel expenses it would cover. Energy Alberta requested a response by August 22, 2025 with the name and contact information for the OMG participant.
C-05144	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-03585	August 21, 2025	Email	Energy Alberta provided an update on its request for a pause in the Impact Assessment Agency's regulatory timeline for the planning phase and confirmed that it was planning to proceed with the water intake siting tour to accommodate Indigenous Nations and Communities interest in participating. Energy Alberta requested that OMG provide the name and contact information of the participant.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03588	August 25, 2025	Email	OMG apologized for the late reply and inquired if there would still be a possibility of OMG participating the field work. OMG indicated they could let Energy Alberta know by August 27, 2025.
C-03589	August 25, 2025	Email	Energy Alberta indicated it could still accommodate an OMG citizen on the water intake siting tour and requested confirmation of the name and contact information of the participant by EOD on August 27, 2025.
C-03590	August 27, 2025	Email	OMG requested that two of its citizens join the siting tour and provided the contact information for each.
C-03591	August 27, 2025	Email	Energy Alberta indicated it had reached capacity on the boat, so it only had room for one participant from OMG. Energy Alberta informed OMG that it may run a similar tour in the spring and would keep OMG posted.
C-03592	August 27, 2025	Email	OMG acknowledged the email from Energy Alberta regarding availability for only one representative and provided updated contact information for its one representative.
C-01330	August 28, 2025	Email	Energy Alberta provided information about the upcoming water intake siting tour including its date and time, meeting location, refreshments, personal protective equipment requirements, compensation offered, a media waiver, and contact information for logistical questions. Energy Alberta advised refreshments would be provided on the boat and requested the participants' dietary preference. Energy Alberta advised a photographer would be accompanying the tour and requested participants return the executed media waiver if they consented to having their photograph taken.
C-02634	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline, acknowledged OMG's prior engagement on the Project, and expressed its interest in ongoing dialogue during the pause period. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03604	September 8, 2025	Email	Energy Alberta acknowledge receipt of the siting workshop participant's name.
C-02658	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00055	September 23, 2025	Email	The Citizen Representative for OMG indicated he would attend the Siting Workshop.
C-05108	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01916	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01935	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01889	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02002	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards. Energy Alberta noted that it was steadily making progress towards a reactor design decision.
C-02118	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02156	November 11, 2025	Email	Energy Alberta sent a reminder to the participant in the Indigenous Siting Workshop held on September 25, to submit the form for reimbursement of the honorarium and reasonable expenses.
C-02792	November 12, 2025	Email	OMG advised of two new Consultation Coordinators that would be involved with Energy Alberta's proposed Project. OMG suggested an online engagement session with Energy Alberta, hosted by OMG with attendees registering in advance. OMG requested possible dates from Energy Alberta.
C-02805	December 2, 2025	Email	Energy Alberta received an out of office response indicating alternate contact information for urgent matters.
C-02807	December 2, 2025	Email	Energy Alberta received an automated response from the general mailbox indicating a response to the email would occur as soon as they were able.
C-02865	December 3, 2025	Email	Energy Alberta thanked OMG for introducing its new Consultation Coordinators. Energy Alberta indicated it would welcome the opportunity to join an OMG hosted online presentation and suggested an organizational meeting to discuss further. Energy Alberta requested available dates from OMG.
C-02967	December 3, 2025	Email	OMG indicated they were available for a meeting on either December 8 or 11, anytime those days.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02936	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02966	December 4, 2025	Email	Energy Alberta indicated it had sent a calendar invite for December 11, 2025.
C-03005	December 5, 2025	Email	OMG confirmed that the December 11, 2025 meeting time worked for them.
C-03334	December 8, 2025	Email	OMG provided a list of questions that they had compiled from Métis Citizens and elected officials regarding the Project.
C-03264	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that considers a range of requirements for key features (e.g., cooling water needs, building size and land area) that cover what many different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03384	December 11, 2025	Virtual / Online meeting	Energy Alberta and OMG had a planning meeting for a future presentation/meeting with Energy Alberta. The purpose of the meeting was to ensure participants are introduced to the Project before an upcoming presentation/meeting that would include elected officials and citizen representatives. The consultation department would assist communities without district captains. The meeting was scheduled for January 29, 2026, from 6-8 PM on Teams, with instructions to be included in the invite. OMG mentioned they would handle registration and provide a high-level attendee list. Questions regarding familiarity with the nuclear industry would be included in the registration. Briefing materials would be sent to registrants, and a follow-up email would include the presentation and a Q&A report. Discussions would cover the assessment of reactor options and the impact of treaty implications.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04512	December 12	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-03593	December 16, 2025	Email	Energy Alberta followed-up to identify action items, which included: - Energy Alberta sending fact sheets and video links to OMG - OMG confirming the meeting date and time, setting up the meeting with materials and a registration survey, providing a high-level attendee registration list, sending a follow-up email with the presentation and Q&A report, and sending an official letter regarding local representation.
C-03633	December 17, 2025	Email	OMG confirmed the virtual session on January 29 from 6 to 8 PM and indicated they would provide further details later.
C-03634	December 17, 2025	Email	Energy Alberta thanked OMG for confirming the presentation date and time.
C-03675	December 17, 2025	Email	An OMG member reached out to Energy Alberta to confirm they will be attending the workshop at the Peace Valley Inns Tuesday January 13.
C-03682	December 18, 2025	Email	OMG inquires about any updated graphics for outgoing materials and wishes the Energy Alberta representative a happy holiday. Energy Alberta confirms the meeting date for January 29 and mentions that they will begin preparations. A follow-up email outlines action items from a previous meeting, including sending fact sheets, confirming meeting details, and providing a registration list. Links to video presentations were also shared.
C-03683	December 18, 2025	Email	Energy Alberta advised that OMG had previously sent outgoing materials to Energy Alberta for review and to provide high-resolution graphics as required. Energy Alberta suggested OMG continue this process by running outgoing materials by the communications team before distribution.
C-03965	December 18, 2025	Email	OMG indicated it was unfamiliar with that process and indicated they would continue to use the graphics and images used for the last time. OMG inquired about an image for the AP-1000 Reactor.
C-03733	December 18, 2025	Email	A representative from OMG re-confirmed their attendance at the Peace River workshop on January 13, 2026, and stated that they have no dietary restrictions.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03716	December 18, 2025	Email	Energy Alberta wished OMG a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would be available via cell phone during this time.
C-03739	December 18, 2025	Email	Energy Alberta received an auto reply from OMG.
C-03734	December 19, 2025	Email	Energy Alberta acknowledged the OMG representative's confirmation of attendance at the Peace River Workshop on January 13, 2026, including that they have no dietary restrictions.

PADDLE PRAIRIE MÉTIS SETTLEMENT
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR PADDLE PRAIRIE MÉTIS SETTLEMENT (PPMS)

ID	Date	Interaction Type	Summary
C-01331	October 23, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-01332	October 23, 2024	Email	PPMS provided a response letter to the October 23, 2024 Project information package. The letter advised they were interested in the Project but had concerns, provided information about the Settlement including current resource projects and geographical boundaries. PPMS requested a meeting.
C-01333	January 17, 2025	Email	Energy Alberta requested PPMS's availability for a virtual meeting in February 2025 to discuss the Project.
C-01335	February 12, 2025	Email	Energy Alberta followed up on the January 17, 2025 meeting request to discuss the Project. Energy Alberta requested their meeting availability and advised it would follow up with a meeting invitation.
C-01334	February 21, 2025	Email	Energy Alberta advised it was interested in continuing engagement with PPMS and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with PPMS for an introduction to their process.
C-01353	February 24, 2025	Email	PPMS requested Energy Alberta's availability for a meeting.
C-01354	February 24, 2025	Email	Energy Alberta provided its availability for a meeting on February 28, 2025 and requested PPMS's preference for meeting arrangements.
C-02377	April 4, 2025	Email	Energy Alberta introduced its Lead for Indigenous Engagement for the Project and advised it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta indicated that the IPD would be posted to the IAAC registry, would be available for comment, and it would provide a link to the IPD as soon as it is available.
C-02399	April 14, 2025	Email	Energy Alberta followed up on its recent notification regarding the IPD submission to IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03612	April 24, 2025	Email	Paddle Prairie Métis Settlement request hard copies in English of the IPD summary as well as a couple copies of the full submission to be sent to its Administration office in Paddle Prairie.
C-03613	April 24, 2025	Email	Energy Alberta confirmed it would send the requested copies of the IPD.
C-03614	April 24, 2025	Email	Paddle Prairie Métis Settlement requested 25 copies of the summary and 2 copies of the full submission.
C-02430	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-03615	May 5, 2025	Email	Paddle Prairie Métis Settlement advised they were in the process of reviewing the IPD and its summary and would follow up with a meeting request after internal discussion.
C-02517	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period. Energy Alberta corrected information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02575	May 15, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's IA and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. The letter requested Energy Alberta be contacted if the communities required additional funding over the funding offered by the IAAC and provided its contact information. The letter requested communities provide information on how the additional funds would be used. The letter outlined the purpose of the Project and its guiding principles and advised Energy Alberta was available for further discussion.
C-02588	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-03616	May 28, 2025	Email	Paddle Prairie Métis Settlement submitted the capacity funding form and mentioned that the EFT form would be provided once completed.
C-03617	June 3, 2025	Email	Energy Alberta advised that it had approved capacity funding for Paddle Prairie Métis Settlement to support efforts in reviewing the Planning Phase documents including the IPD and TISGs.
C-03618	June 4, 2025	Email	Energy Alberta requested the EFT form in order to advance the capacity funding to Paddle Prairie Métis Settlement.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03619	June 5, 2025	Email	The Director of Finance provided the EFT form.
C-03620	June 19, 2025	Email	Energy Alberta advised that the EFT Payment had been sent on June 13, 2025.
C-03621	June 19, 2025	Email	Paddle Prairie Métis Settlement confirmed receipt of the capacity funding and indicated it was looking to arrange a meeting with the IAAC and CNSC in mid July to discuss the Project in greater detail and inquired if Energy Alberta was interested in joining that meeting or if it preferred to meet separately.
C-03622	June 19, 2025	Email	Energy Alberta indicated it would be interested in either, a joint meeting with Paddle Prairie and IAAC/CNSC, or a meeting separately with Paddle Prairie. Energy Alberta requested dates that it could check with its team members calendars.
C-03623	June 19, 2025	Email	Paddle Prairie Métis Settlement indicated it was considering the July 14-18 week for an in-person meeting. Paddle Prairie indicated it was still considering best options on whether it should be a joint meeting with IAAC or separate, or whether it should be a meeting Council or a Public Meeting.
C-02544	June 25, 2025	Email	Energy Alberta advised that IAAC and CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the community to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03625	June 30, 2025	Email	Energy Alberta requested an update on the potential for a joint meeting with IAAC/CNSC or a staff and/or Council. Energy Alberta indicated that July 16, in the afternoon was available but may not be possible for an in-person meeting given other commitments that week.
C-03626	June 30, 2025	Email	Paddle Prairie Métis Settlement indicated it would prefer to meet with Energy Alberta outside of a meeting with IAAC and requested dates in August for an in-person meeting with Council and the community.
C-03627	June 30, 2025	Email	Energy Alberta indicated it would look for possible dates in August and get back to Paddle Prairie.
C-02606	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs. Energy Alberta advised PPMS that they could participate in baseline environmental studies in July and August 2025. Energy Alberta provided the duration, number of participants, and participation requirements for the river channel depth survey, the water take siting inspection, and the wildlife survey, contact information, and the July 23, 2025 deadline to indicate interest in participating in field studies.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03628	July 16, 2025	Email	Paddle Prairie Métis Settlement introduced Energy Alberta to a new member on its consultation team who would coordinate all engagement and meetings going forward.
C-03629	July 17, 2025	Email	Energy Alberta acknowledged the new team and requested an update on the potential community meeting on August 20 or 21, 2025 to present Project information and answer questions and requested a phone call to finalize the dates.
C-03630	July 21, 2025	Email	Paddle Prairie Métis Settlement indicated it had met with IAAC and CNSC on July 16th and had tentatively scheduled a community engagement session for August 16th, with one session covering Impact Assessment and the other covering Nuclear fundamentals for community members. Paddle Prairie Métis Settlement indicated it would like Energy Alberta to present to the community after August 16th and would prefer that Energy Alberta meet with Council first. Paddle Prairie Métis Settlement inquired about dates for a council meeting and a community session.
C-03631	July 22, 2025	Email	Energy Alberta confirmed it would look for potential dates and get back to Paddle Prairie Métis Settlement as soon as possible.
C-03640	July 23, 2025	Email	Energy Alberta indicated it would be able to meet on September 3 or 4, with a slight preference for September 3, 2025. Energy Alberta inquired if it was envisioned for holding both the meeting with Council and the community engagement session on the same day.
C-03641	July 28, 2025	Email	Paddle Prairie Métis Settlement inquired if the meeting could be scheduled in November, given upcoming elections and the potential for the main portfolio to change hands.
C-03642	July 28, 2025	Email	Energy Alberta indicated it would look for potential dates in November, after the election, for a meeting with Council and then a meeting with community. Energy Alberta suggested that a date be set so that planning could commence and offered to schedule a meeting that week. Energy Alberta offered a virtual meeting with Technical Staff in August or September to provide an overview of the proposed Project and answer any questions.
C-03643	July 30, 2025	Email	Paddle Prairie Métis Settlement indicated that the current week was not good for a meeting and suggested August 5 in the afternoon, or August 6 or 8, 2025
C-03644	August 5, 2025	Email	Paddle Prairie Métis Settlement inquired if the meeting could be rescheduled to August 9 at 10 am.
C-03645	August 5, 2025	Email	Energy Alberta confirmed that it was able to reschedule the meeting to August 7.
C-03646	August 7, 2025	Email	Given that the consultation contact was travelling in the area of the Chinchaga doing a site visit and not able to meet that day, Energy Alberta emailed and offered alternate dates to meet.
C-02814	August 8, 2025	Email	Paddle Prairie Métis Settlement contact apologized for missing the meeting and indicated August 11, 2025 looked best for a rescheduled meeting.
C-03647	August 8, 2025	Email	Paddle Prairie Métis Settlement indicated it was unavailable on August 11, 2025 and requested that dates in September be considered.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05145	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02621	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested PPMS's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03648	August 29, 2025	Email	Paddle Prairie Métis Settlement acknowledge receipt of the August 28, 2025 email and indicated that they were in an election cycle and no meetings with Council would take place until after the election and organizational meetings in October. Paddle Prairie Métis Settlement indicated that potential meeting times would not be possible until after October 20, 2025. Paddle Prairie Métis Settlement indicated they would attend the siting workshop in Peace River on September 24, 2025.
C-03649	September 3, 2025	Email	Energy Alberta thanked Paddle Prairie Métis Settlement for the updates and inquired about dietary restrictions for the attendee at the siting workshop.
C-00026	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-05107	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01934	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03650	October 7, 2025	Email	Paddle Prairie Métis Settlement advised of the new Chair following the recent election and provided contact information for the new Chair.
C-03651	October 7, 2025	Email	Energy Alberta thanked Paddle Prairie Métis Settlement for the updated information for the new Chair and indicated it would update its contact list.
C-01962	October 8, 2025	Email	Energy Alberta sent a letter providing an update on its request to IAAC to pause the regulatory timeline, and on its progress regarding technology considerations.
C-01890	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02001	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02117	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they be included in all future communications. Energy Alberta requested a meeting date. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02151	November 10, 2025	Email	PPMS indicated it could arrange an introductory meeting with the newly elected Council and requested some dates.
C-02815	November 11, 2025	Email	Energy Alberta indicated that November 25, 2025 would work to provide a virtual Project Overview to the new Council and suggested 1.5 hours for the meeting. Energy Alberta requested confirmation that this date worked for Council.
C-02816	November 13, 2025	Email	Paddle Prairie Métis Settlement contact requested a calendar invite and indicated he would circulate it with Council.
C-02817	November 14, 2025	Email	Energy Alberta confirmed that a calendar invite had been sent.
C-02818	November 14, 2025	Email	Consultation contact confirmed his attendance at the November 25, 2025 meeting.
C-02457	November 18, 2025	Email	Paddle Prairie Métis e-introduced the Energy Alberta Team to the new Environmental Consultation Support person for the community. They also indicated that Council was unavailable on the meeting date and suggested December 8 as an alternate.
C-02459	November 19, 2025	Email	Energy Alberta sought clarification on November 25 for a virtual meeting with the Council.
C-02819	November 19, 2025	Email	Paddle Prairie Métis Settlement contact indicated that November 25, 2025 was not possible to meet with Council and requested alternate dates in December or early January 2026.
C-02460	November 19, 2025	Email	Energy Alberta thanked Paddle Prairie for the clarification and indicated it would check availability for a meeting on December 8, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04502	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02869	December 3, 2025	Email	Energy Alberta followed up to see if there were any available dates in December or early January, for a meeting with Council.
C-02931	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03265	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that considers a range of requirements for key features (e.g., cooling water needs, building size and land area) that cover what many different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03306	December 9, 2025	Email	The Chief Administrative Officer informed Energy Alberta that the December 9, 2025 email had been sent to the former Chair and asked Energy Alberta to correct its mistake.
C-03321	December 10, 2025	Email	Energy Alberta acknowledged it had sent the email to the wrong contact and requested possible dates to meeting with the new Council in the New Year.
C-03323	December 10, 2025	Email	The Chief Administrative Officer requested that Energy Alberta tentatively hold January 12, 2026 at 11 AM for a 30-minute discussion and presentation to Council.
C-03324	December 10, 2025	Email	Energy Alberta indicated they would hold that date/time in the calendars and may potentially be able to attend the meeting in person.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03326	December 10, 2025	Email	Paddle Prairie Métis Settlement indicated its preference for an in-person meeting if possible.
C-03346	December 11, 2025	Email	Energy Alberta requested that the meeting time on January 12, 2026 be moved to 11:30 AM.
C-03347	December 11, 2025	Email	Chief Administrative Officer requested that Energy Alberta tentatively hold January 12, 2026 from 11AM to noon, and that they would confirm the date and time once their Regular Council Meeting schedule was determined.
C-03349	December 11, 2025	Email	Energy Alberta confirmed it would tentatively hold January 12, 2026 for a meeting with Council, and requested an earlier start time or one after lunch
C-03352	December 11, 2025	Email	Chief Administrative Officer requested tentative start time of 11:30 on January 12, 2026, that may be cancelled in January.
C-03355	December 11, 2025	Email	Energy Alberta confirmed January 12, 2026 from 11:30 AM to 12:30 PM and indicated they would seek confirmation in the new year, once the regular Council meeting schedule was confirmed.
C-03721	December 18, 2025	Email	Energy Alberta wished Paddle Prairie Métis Settlement a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

PEAVINE MÉTIS SETTLEMENT

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR PEAVINE MÉTIS SETTLEMENT (PMS)

ID	Date	Interaction Type	Summary
C-01445	January 8, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-01452	January 8, 2025	Email	Peavine Métis Settlement requested a meeting to discuss the Project.
C-01451	January 9, 2025	Email	Energy Alberta advised the Project was in its early stages and it would follow up later in the year to schedule a meeting to discuss the Project.
C-01453	January 9, 2025	Email	Peavine Métis Settlement confirmed receipt of Energy Alberta's email from earlier that day.
C-01455	January 13, 2025	Email	Energy Alberta requested Peavine Métis Settlement's availability for a meeting in Peace River, Alberta on January 21 or 22, 2025.
C-01454	January 13, 2025	Email	Peavine Métis Settlement provided their availability for a meeting on January 21, 2025 in Peace River, Alberta. Peavine requested confirmation of the meeting time and location.
C-01464	January 16, 2025	Email	Peavine Métis Settlement followed up on their meeting request.
C-01456	January 17, 2025	Email	Energy Alberta advised it was no longer available for the January 21, 2025 meeting and provided its availability for a virtual meeting instead.
C-01457	January 17, 2025	Email	Energy Alberta indicated it was available to meet virtually and stated it could arrange another in-person meeting later in 2025.
C-01458	January 17, 2025	Email	Peavine Métis Settlement requested Energy Alberta's availability for a meeting and advised they were available to meet in person in Grande Prairie, Alberta.
C-01459	January 24, 2025	Email	Energy Alberta provided its availability for an in-person meeting in Peace River, Alberta on January 29, 2025.
C-01460	January 17, 2025	Email	Peavine Métis Settlement advised Energy Alberta of their preference for in-person meetings.
C-01461	January 24, 2025	Email	Energy Alberta left a voicemail for Peavine Métis Settlement following up on its email from earlier that day. Energy Alberta requested a meeting in Peace River on January 29, 2025.
C-01463	January 24, 2025	Email	Peavine Métis Settlement provided their availability for a meeting on January 29, 2025.
C-01462	January 24, 2025	Email	Energy Alberta requested an attendee list for the January 29, 2025 meeting.
C-01465	January 27, 2025	Email	Energy Alberta provided a meeting website link and advised it would share a presentation at the January 29, 2025 meeting.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01466	January 27, 2025	Email	Energy Alberta provided a meeting invitation for an in-person meeting on January 29, 2025 and advised it would provide a presentation at the meeting.
C-01471	January 29, 2025	Phone	Energy Alberta left a voicemail and advised it would not be available to attend the in-person meeting that day and requested a virtual meeting instead.
C-01467	January 29, 2025	Email	Energy Alberta provided a virtual meeting invitation for the January 29, 2025 in-person meeting and advised it would provide a presentation at the meeting.
C-01472	January 29, 2025	Email	Peavine Métis Settlement stated a virtual meeting would not be sufficient and requested to reschedule the in-person meeting. Energy Alberta advised it would schedule an in-person meeting at a later date.
C-01468	January 29, 2025	Email	Energy Alberta cancelled the January 29, 2025 virtual meeting.
C-01469	February 4, 2025	Email	Energy Alberta requested an in-person introductory meeting on February 6, 2025 in Peace River, Alberta.
C-01470	February 4, 2025	Email	Energy Alberta left a voicemail and requested an in-person meeting in Peace River, Alberta on February 6, 2025.
C-01473	February 21, 2025	Email	Energy Alberta advised it was interested in engagement with Peavine Métis Settlement and that it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with Peavine Métis Settlement for an introduction to their process.
C-01476	February 26, 2025	Email	Peavine Métis Settlement advised they preferred to meet in person.
C-01475	February 26, 2025	Phone	Energy Alberta requested an in-person meeting on March 12, 2025 in Nampa, Alberta.
C-01474	February 26, 2025	Email	Energy Alberta followed up on the phone call earlier that day and requested a Project introductory meeting for March 12, 2025. Energy Alberta advised it would follow up on February 28, 2025.
C-01478	February 28, 2025	Email	Peavine Métis Settlement confirmed their availability for a February 28, 2025 meeting in Nampa, Alberta.
C-01477	March 3, 2025	Email	Energy Alberta confirmed the February 28, 2025 meeting in Nampa, Alberta.
C-01479	March 11, 2025	Email	Energy Alberta provided attendee information for the February 28, 2025 meeting and advised it may follow up with a phone call later that day to confirm meeting logistics.
C-01480	March 12, 2025	In person / community meeting	Energy Alberta met with Peavine Métis Settlement who indicated an interest water treatment, evaporation, pond storage, Project longevity, watershed studies, participation in studies, energy service and tariffs, origin of uranium, Indigenous involvement, engagement going forward, jobs, trades, training, and local workforce needs. Energy Alberta indicated that the IPD would be submitted to IAAC and it would provide links to its fact sheets to Peavine.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02376	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-01482	April 4, 2025	Email	Peavine Métis Settlement requested updates regarding the IPD submission and provided their contact information.
C-02398	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02431	May 5, 2025	Email	Energy Alberta requested confirmation that Peavine had received the IPD for the Peace River Nuclear Power Project. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-02518	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02576	May 15, 2025	Email	Energy Alberta emailed a letter regarding available capacity funding aimed at ensuring participation of all Nations and communities in the planning phase of the Impact Assessment for the Peace River Nuclear Power Project. Contact information for further inquiries and funding requests was provided.
C-02589	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-01484	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta noted the application form would support it in understanding Peavine Métis Settlement's capacity funding requirements and the EFT form would facilitate quick payments. Energy Alberta advised funding was intended to support Peavine Métis Settlement's review of the IPD and the TISGs within the IAAC's timeframes, and requested the forms be completed and returned by May 30, 2025 if Peavine wished to receive the funding.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02545	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.
C-02605	July 16, 2025	Email	Energy Alberta shared that it aimed to incorporate Indigenous knowledge into the Impact Statement for the Peace River Nuclear Power Project by inviting participation in summer field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.
C-05149	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02635	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02656	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals would be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05106	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01933	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03654	October 7, 2025	Email	Peavine Métis Settlement informed Energy Alberta that the previous Chair was no longer on Council and would advise Energy Alberta of the new Chair when elected.
C-03655	October 7, 2025	Email	Energy Alberta thanked Peavine Métis Settlement for the update.
C-01891	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian Nuclear Sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-03656	October 13, 2025	Email	Energy Alberta inquired if Peavine Métis Settlement was available on October 16 for a quick visit while they were travelling in the area.
C-02000	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards. Energy Alberta advised that they were steadily making process toward a decision.
C-03657	October 21, 2025	Email	Peavine Métis Settlement advised that it had a new Council in place.
C-02821	October 22, 2025	Email	Energy Alberta thanked Peavine for the update and the contact who would provide updated information for the new council. Energy Alberta inquired if the consultation contact had time for a quick chat.
C-02116	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they be included in all future communications. Energy Alberta requested a meeting date. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02822	November 10, 2025	Email	The consultation contact welcomed the new Energy Alberta Team member.
C-04513	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02864	December 3, 2025	Email	Energy Alberta followed up to see if the consultation contact was available for a quick chat.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02870	December 3, 2025	Email	The consultation contact indicated that the Admin for the settlement would follow-up to provide the contact information for the new Council.
C-02932	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02964	December 4, 2025	Email	Energy Alberta suggested a phone call on December 5, 2025, and if Peavine was unavailable then, Energy Alberta requested that Peavine provide alternative times the following week.
C-03242	December 8, 2025	Email	Energy Alberta requested an opportunity to talk about next steps related to engagement and asked the consultation contact to contact Energy Alberta via the cell number provided.
C-03266	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of the proposed Project, and that all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Energy Alberta mentioned that selection of a specific nuclear reactor technology and detailed design is not required for early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that looks at ranges for key features such as cooling water needs, building size and land area, that covers general requirements for many designs rather than for a specific reactor. Energy Alberta provided links to two potential reactors that were under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03325	December 10, 2025	Email	Energy Alberta indicated it would welcome the opportunity to meet with Peavine Métis Settlement to provide a Project Update, gather feedback on siting Options #1 and #2, and begin discussions regarding studies as a part of the Impact Assessment. Energy Alberta requested a meeting either the weeks of January 12 or 19. Energy Alberta indicated it would resend the information on the nuclear training with an Indigenous, nuclear expert in Peace River on January 13.
C-03307	December 10, 2025	Email	Energy Alberta re-sent the invitation to a Nuclear Fundamentals Workshop, as per a request during a phone call.
C-03309	December 10, 2025	Email	Peavine Métis Settlement confirmed receipt of the December 10 email.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03710	December 18, 2025	Email	Energy Alberta wished Peavine Métis Settlement a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would be available via cell phone during this time.
C-03939	December 18, 2025	Email	Peavine Métis Settlement's consultation contact sent a response to Energy Alberta's holiday greeting.
C-03940	December 21, 2025	Email	Peavine Métis Settlement's consultation contact wished Energy Alberta a Merry Christmas.

PEERLESS TROUT FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR PEERLESS TROUT FIRST NATION (PTFN)

ID	Date	Interaction Type	Summary
C-01486	January 8, 2025	Instant/ Text Message	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-01487	February 12, 2025	Email	Energy Alberta followed up on its January 8, 2025 email and requested PTFN's availability for a virtual meeting to discuss the Project.
C-01488	February 21, 2025	Email	Energy Alberta advised it was interested in continuing engagement with PTFN and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with PTFN for an introduction to their process.
C-02375	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-01489	April 4, 2025	Email	Energy Alberta received an out-of-office response from PTFN.
C-03658	April 4, 2025	Email	Energy Alberta received an out of office message indicating that PTFN was taking spring break between March 31 to April 4 and would respond to email on Monday April 7, 2025 when back in office.
C-02397	April 14, 2025	Email	Energy Alberta followed up on its notification regarding the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02432	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02562	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's IA and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. Contact information for further inquiries and funding requests was provided.
C-02519	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period and corrected information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02591	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta noted the application form would support it in understanding PTFN's capacity funding requirements and the EFT form would facilitate quick payments. Energy Alberta advised funding was intended to support PTFN's review of the IPD and the TISGs within the IAAC's timeframes, and requested the forms be completed and returned by May 30, 2025 if PTFN wished to receive the funding.
C-02546	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.
C-03659	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs. Energy Alberta advised interested Indigenous Nations could participate in baseline environmental studies beginning in July 2025 and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested PTFN #478 follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05148	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02623	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested PTFN's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02657	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-05105	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-03660	September 29, 2025	Email	Peerless Trout First Nation acknowledged receipt of the September 29, 2025 email from Energy Alberta.
C-01938	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01886	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-01999	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02112	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within PTFN's community.
C-02823	November 16, 2025	Email	PTFN thanked Energy Alberta for the information and inquired about the stage Energy Alberta was at with the Project. PTFN inquired if Energy Alberta would be willing to do a 1-hour presentation on the Project with its leadership in December 2025 or January 2026.
C-02824	November 17, 2025	Email	Energy Alberta indicated it was in the Planning Phase of the Project and early engagement with Nations. Energy Alberta indicated it would welcome the opportunity to provide a 1-hour presentation to PTFN's leadership and inquired if they had dates/time in mind that would work for a meeting.
C-02706	November 25, 2025	Email	Energy Alberta indicated it had requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options was attached for review. Input from Indigenous groups was being sought before finalizing site selection and moving into the Impact Assessment process. Energy Alberta indicated that a virtual information session can be arranged to discuss the Project and gather feedback.
C-02798	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02849	December 2, 2025	Email	The Chief of Peerless Trout First Nation thanked Energy Alberta for the invitation to the Nuclear Fundamentals Workshop and requested a meeting.
C-02850	December 2, 2025	Email	Energy Alberta indicated it would welcome the opportunity to meet with Peerless Trout First Nation and suggested a virtual Introductory Meeting where members of its Team could provide an overview of the proposed Project. Energy Alberta requested possible meeting dates.
C-02866	December 3, 2025	Email	Energy Alberta followed up to see if PTFN had a chance to check for available dates with its leadership for a 1-hour presentation on its proposed Project.
C-02907	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03267	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03723	December 18, 2025	Email	Energy Alberta wished PTFN a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.
C-03740	December 18, 2025	Email	The Chief replied with a holiday greeting.

SAWRIDGE FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR SAWRIDGE FIRST NATION (SFN)

ID	Date	Interaction Type	Summary
C-01528	January 8, 2025	Open house	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-01530	February 12, 2025	Email	Energy Alberta followed up on its January 8, 2025 email and requested Sawridge First Nation's availability for a virtual meeting to discuss the Project.
C-01529	February 12, 2025	Email	Sawridge First Nation requested Energy Alberta's availability for a meeting on February 24, 2025 to discuss the Project.
C-01531	February 14, 2025	Email	Energy Alberta advised that February 24 would not work for its team and indicated its availability for March 10 or 13, 2025 and requested Sawridge First Nation's date availability for the dates.
C-01532	February 14, 2025	Email	Energy Alberta advised it was no longer available on March 10, 2025 and provided its updated availability on March 13 or 14, 2025 for a meeting to discuss the Project.
C-01533	February 14, 2025	Email	Sawridge First Nation provided their availability for March 14, 2025.
C-01534	February 14, 2025	Email	Energy Alberta provided a meeting invitation for March 14, 2025.
C-01535	February 21, 2025	Email	Energy Alberta advised a meeting was scheduled for March 14, 2025 and it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with Sawridge First Nation for an introduction to their process.
C-01537	March 14, 2025	Virtual / Online meeting	Energy Alberta met with Sawridge First Nation and provided a Project overview, discussed the regulatory timeline and the purpose of the IPD, contracting and procurement, zero-emission advantage of nuclear energy, cooling system, nuclear waste storage, and Energy Alberta's Indigenous relations policy. Sawridge First Nation raised the following interests: - Meeting with the SRFN leadership and Elders regarding economic development and nuclear safety. - Project timeline - Employment opportunities for the Project.
C-01536	March 17, 2025	Open house	Energy Alberta requested a virtual meeting in mid to late April 2025 with Chief and Council to introduce the Project.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02374	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it was available.
C-02405	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02433	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta provided a reminder of upcoming deadlines including the 30-day public comment period on the IPD ending on May 14, 2025 and the application for IAAC's participant funding program ending on May 16, 2025. Energy Alberta advised a notification would be provided in May 2025 for the 30-day comment period on the TISG.
C-02520	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02564	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's IA and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. The letter requested Energy Alberta be contacted if the communities required additional funding and provided its contact information. The letter requested communities provide information on how the additional funds would be used. The letter outlined the purpose of the Project and its guiding principles and advised Energy Alberta was available for further discussion.
C-02590	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta noted the application form would support it in understanding Sawridge First Nation's capacity funding requirements and the EFT form would facilitate quick payments. Energy Alberta advised the funding was intended to support Sawridge First Nation's review of the IPD and the TISGs within the IAAC's timeframes and requested the forms be completed and returned by May 30, 2025 if Sawridge First Nation wished to receive the funding.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03661	May 26, 2025	Email	Sawridge First Nation submitted its completed capacity funding application forms.
C-01545	May 30, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding and requested a return call.
C-01544	June 3, 2025	Phone	Energy Alberta left a voicemail regarding capacity funding and requested a return call.
C-01546	June 3, 2025	Phone	Sawridge First Nation phoned Energy Alberta to arrange a meeting with the Chief and council to discuss the Project.
C-03662	June 3, 2025	Email	Energy Alberta emailed a follow up to its phone call with Sawridge First Nation and advised that it had approved capacity funding to support the Nation's efforts in reviewing the Planning Phase documents including the IPD and TISGs. Energy Alberta provided the contact information for the person at IAAC regarding those capacity funds.
C-02863	June 3, 2025	Email	Energy Alberta followed on an email dated March 17, 2025 and inquired if a meeting with Chief and Council was still of interest. Energy Alberta indicated the meeting could be either virtual or in-person, possibly in the summer months (July/August) or early fall (September/October).
C-03663	June 19, 2025	Email	Energy Alberta advised that its EFT Payment has been sent on June 13.
C-03664	June 19, 2025	Email	Sawridge First Nation confirmed receipt of the capacity funding payment.
C-02547	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.
C-02607	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including Indigenous knowledge in the Impact Statement by participating in field data collection programs. Energy Alberta provided details on upcoming baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, along with their objectives, durations, participant requirements, and safety protocols. Energy Alberta indicated that an honorarium and travel expense reimbursement would be provided. Energy Alberta requested that interested participants contact them by July 23, 2025.
C-03867	August 1, 2025	Email	The SFN Consultation Manager indicated an interest in participating in the water intake inspection and wildlife survey, and that their monitoring crew may have a date conflict for the water intake inspection.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03868	August 14, 2025	Email	Energy Alberta acknowledged the Nation's interest in sending a member to participate in the preliminary water intake siting tour for the Peace River Nuclear Power Project. Energy Alberta provided details for the tour including date/time/meeting location, personal protective equipment required, and details regarding honorarium and reasonable travel expenses. Energy Alberta requested the name and contact information of the participant by August 22, 2025.
C-05163	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-01557	August 18, 2025	Email	Energy Alberta received an out-of-office response from Sawridge First Nation.
C-03869	August 21, 2025	Email	Energy Alberta followed up on its August 14 email and requested the name and contact information of the participant from Sawridge First Nation.
C-03870	August 22, 2025	Email	Sawridge First Nation affirmed its interest in participating in the water intake siting tour and indicated the name of the participant.
C-03871	August 22, 2025	Email	Energy Alberta acknowledged receipt of the contact information and indicated it would follow up next week with more details for the tour.
C-01555	August 28, 2025	Phone	Energy Alberta provided information about the upcoming water intake siting tour including its date and time, meeting location, refreshments, personal protective equipment requirements, compensation offered, a media waiver, and contact information for logistical questions. Energy Alberta advised refreshments would be provided on the boat and requested the participants' dietary preference. Energy Alberta advised a photographer would be accompanying the tour and requested participants return the executed media waiver if they consented to having their photograph taken.
C-02636	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02660	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals would be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03665	September 12, 2025	Email	Sawridge First Nation indicated it would attend the siting workshop.
C-03666	September 15, 2025	Email	Energy Alberta inquired about dietary restrictions for the attendee at the siting workshop.
C-00027	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-05104	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01914	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01937	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01887	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-01998	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02115	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they are included in all future communications. Energy Alberta requested a meeting date. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02157	November 11, 2025	Email	Energy Alberta sent a reminder to the participant in the Indigenous Siting Workshop held on September 25, to submit the form for reimbursement of the honorarium and reasonable expenses.
C-02741	November 27, 2025	Email	Energy Alberta informed SFN that expenses from the September Siting Workshop had been processed and reimbursed to Sawridge First Nation.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02799	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared noted that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02901	December 3, 2025	Email	Energy Alberta inquired if the Nation was still interested in an Introductory Meeting with Chief and Council.
C-02908	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02969	December 4, 2025	Email	Energy Alberta suggested it was looking at potential dates in January 2026 and inquired if the offices would be closed over the holidays.
C-04707	December 4, 2025	Email	SFN suggested looking for meeting dates in late January.
C-03001	December 4, 2025	Email	Energy Alberta indicated it would check for possible dates in January and get back to the Nation.
C-03268	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-04014	December 12, 2025	Email	Energy Alberta provided three potential dates and meeting times and asked that Sawridge First Nation indicate its preference.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03704	December 18, 2025	Email	Energy Alberta wished Sawridge First Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

STURGEON LAKE CREE NATION
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR STURGEON LAKE CREE NATION (SLCN)

ID	Date	Interaction Type	Summary
C-01574	January 8, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-01575	February 12, 2025	Email	Energy Alberta followed up on its January 8, 2025 email and requested SLCN's availability for a virtual meeting to discuss the Project.
C-01576	February 21, 2025	Email	Energy Alberta advised it was interested in continuing engagement with SLCN and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with SLCN for an introduction to their process.
C-02380	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02404	April 14, 2025	Email	Energy Alberta followed up on its notification of the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-03902	May 1, 2025	Email	Councillor, SLCN inquired about the meeting scheduled with Treaty 8 and if it had been rescheduled. She indicated she had tried to log on multiple times and was not allowed into the meeting.
C-03903	May 1, 2025	Email	Energy Alberta advised the Councillor, SLCN that it had received a request from the CAO at Treaty 8, who asked to reschedule the May 1, 2025 meeting due to an urgent matter. Energy Alberta informed that as soon as a new date/time was confirmed, the calendar invite would be updated.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02434	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-02521	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period and corrected information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02565	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's IA and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. Contact information for further inquiries and funding requests was provided.
C-02593	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta indicated its funding was intended to support SLCNs efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested SLCN complete and return the attached documents by May 30, 2025.
C-02548	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.
C-03673	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs. Energy Alberta advised interested Indigenous Nations could participate in baseline environmental studies beginning in July 2025 and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested SLCN follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05162	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02624	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested SLCN's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02659	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03674	September 24, 2025	Email	SLCN confirmed it would not be able to attend the workshop, and it would like to review materials, maps and data that could be overlayed with its system. SLCN indicated that there was a cost associated with the work that goes into its review and they are not able to accept honoraria. SLCN indicated that they would put together a budget once they had received the information from Energy Alberta and discuss some potential dates for a meeting.
C-05103	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-03731	September 29, 2025	Email	SLCN acknowledged the September 29, 2025 email from Energy Alberta
C-01936	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01888	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-03736	October 13, 2025	Email	Energy Alberta inquired about an Introductory Meeting regarding its proposed Peace River Nuclear Project. Energy Alberta indicated it was in the early stages of engagement and recognized the importance of listening and learning from SLCN's perspectives. In addition to providing a Project Overview, Energy Alberta offered to share some of the very early siting work that had been done.
C-03741	October 14, 2025	Email	SLCN indicated it would like to see the package of materials prior to a meeting, in order to have a better understanding of the Project. SLCN indicated it would look for some available dates.
C-03742	October 20, 2025	Email	SLCN requested the KML file for the Nuclear Power Plant Project.
C-03743	October 20, 2025	Email	Energy Alberta indicated it was working on gathering the KML file along with the October 14 email from SLCN.
C-01997	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-04739	October 29, 2025	Phone	Energy Alberta and SLCN Consultation Manager had a phone conversation. welcome the SLCN Consultation Manager advised that she was just now back to work and wanted to get caught up on the Project. SLCN Consultation Manager inquired if the Project was in the Goodwin area, and Energy Alberta clarified that it was not and that the proposed Project was approximately 30kms north of Peace River. Energy Alberta committed to re-sending initial communications, a kmz file of site options, and a siting presentation. Energy Alberta proposed an Introductory Meeting to discuss the Peace River Nuclear Project and indicated a virtual meeting could be scheduled in the coming weeks.
C-03746	October 29, 2025	Email	Energy Alberta followed up regarding the phone call earlier that day and welcome the Consultation Manager back to work. Energy Alberta introduced its newest team member who would be assisting with Indigenous Engagement for the Project. Energy Alberta attached the previously submitted emails from SLCN and included a zip file of initial communications, a kmz file of site options, and a siting presentation. Energy Alberta proposed an Introductory Meeting to discuss the Peace River Nuclear Project and foster dialogue and indicated a virtual meeting could be scheduled in the coming weeks.
C-03747	October 29, 2025	Email	Consultation and Land Use Director requested clarification with the two KMLs they had received and specifically in relation to the Goodwin area.
C-03748	October 29, 2025	Email	Energy Alberta indicated that the KMZ file attached was the version SLCN should be looking. Energy Alberta inquired if SLCN's reference to the Goodwin area, was the area between Debolt and Bezanson, on Highway #43.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03749	October 30, 2025	Email	Consultation and Land Use Director thanked Energy Alberta for the clarification and affirmed that the referenced Goodwin area was off of Forestry Trunk Road, off Highway 43.
C-02114	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta requested a meeting date. Energy Alberta provided links to some of its recent Facebook posts for sharing within SLCN's community.
C-02703	November 24, 2025	Email	Energy Alberta has requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options are attached for review. Input from Indigenous groups is sought before site selection and the Impact Assessment process begins. A virtual information session can be arranged to discuss the Project and gather feedback.
C-02858	November 25, 2025	Email	SLCN requested an information session with the Energy Alberta Team regarding the Peace River Nuclear Power Project, and inquired if Energy Alberta was available the week of December 1, 2025.
C-02860	November 25, 2025	Email	SLCN confirmed that the attendees at the meeting would be the same included in the email exchange, and that it would check availability of attendees and get back to Energy Alberta.
C-02801	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02801	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02859	December 2, 2025	Email	Energy Alberta indicated that the dates previously offered were no longer available and requested additional dates for consideration.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02909	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-04740	December 8, 2025	Email	SLCN requested a poster with the details for the job posting so they could put a call out for potential candidates. SLCN requested that contact information be included to share with potential candidates. SLCN indicated it would share the poster with the ISET department.
C-04741	December 8, 2025	Email	Energy Alberta clarified that it was not a specific job/role that it was looking to fill. Instead, Energy Alberta was looking to identify a roster of folks who had experience specifically with digital graphic design and as it needed those services, it would reach out to people who have the specific skills need.
C-03239	December 8, 2025	Email	SLCN thanked Energy Alberta for the clarification about the search for graphic design services. SLCN inquired if it was too late to send candidate contacts in the new year.
C-03526	December 8, 2025	Email	Energy Alberta indicated it would welcome candidate submissions for the roster in the New Year.
C-03269	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03724	December 18, 2025	Email	Energy Alberta wished SLCN a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

SUCKER CREEK FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR SUCKER CREEK FIRST NATION (SCFN)

ID	Date	Interaction Type	Summary
C-01588	October 23, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-01589	October 30, 2024	Email	SCFN advised they had reviewed the October 23, 2024 Project information package and inquired whether any actions were required on their part and whether any discussions were necessary.
C-01590	December 9, 2024	Email	Energy Alberta advised it was in the pre-engagement phase, and no action was required from SCFN at the time.
C-01592	January 17, 2025	Email	Energy Alberta requested SCFN's availability for a virtual meeting in February 2025 to discuss the Project.
C-01593	January 17, 2025	Email	SCFN requested Energy Alberta's availability for a meeting in February 2025.
C-01594	January 20, 2025	Email	Energy Alberta provided its availability for a meeting on February 12, 2025.
C-01595	February 12, 2025	Email	Energy Alberta provided its availability to meet in Peace River, Alberta on March 10, 2025 and requested SCFN's availability.
C-01597	February 13, 2025	Email	SCFN provided their availability for the March 10, 2025 meeting and requested the meeting location.
C-01596	February 13, 2025	Email	Energy Alberta advised the meeting would take place in Peace River, Alberta the week of March 10, 2025.
C-01598	February 13, 2025	Email	SCFN confirmed receipt of the February 13, 2025 email.
C-01599	February 21, 2025	Email	Energy Alberta advised it was interested in continuing engagement with SCFN and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with SCFN for an introduction to their process.
C-01603	March 11, 2025	Email	SCFN attended an Energy Alberta open house to learn about the Project.
C-02379	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03786	April 4, 2025	Email	SCFN Consultation & Lands Department confirmed receipt of the April 4, 2025 email and indicated it would review the IPD filing when available. SCFN inquired if there were any other action items for them. SCFN advised that a previous contact in the Consultation & Lands Department was no longer working for the Nation.
C-03787	April 4, 2025	Email	Energy Alberta thanked the Consultation & Lands Department for the update and indicated it would update its contact list. Energy Alberta offered to schedule a meeting to introduce its Project.
C-02403	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02435	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-02522	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period, to correct information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02566	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's IA and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. The letter requested Energy Alberta be contacted if the communities required additional funding and provided its contact information. The letter requested communities provide information on how the additional funds would be used. The letter outlined the purpose of the Project and its guiding principles and advised Energy Alberta was available for further discussion.
C-02592	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta noted the application form would support it in understanding SCFN's capacity funding requirements and the EFT form would facilitate quick payments. Energy Alberta advised the funding was intended to support SCFN's review of the IPD and the TISGs within the IAAC's timeframes and requested the forms be completed and returned by May 30, 2025 if SCFN wished to receive the funding.
C-03788	May 29, 2025	Email	SCFN Consultation Department submitted its completed capacity funding application.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03789	June 3, 2025	Email	Energy Alberta confirmed that it had approved capacity funding for Sucker Creek First Nation to support its efforts in reviewing the Planning Phase documents including the IPD and TISGs.
C-03790	June 3, 2025	Email	SCFN Consultation Department confirmed receipt of the June 3, 2025 email.
C-03791	June 3, 2025	Email	Energy Alberta offered an Introductory Meeting with the Nation, to provide an overview of its proposed Peace River Nuclear Power Project and address questions that the Nation may have. Energy Alberta suggested an in-person meeting in either July/August or early fall.
C-03792	June 4, 2025	Email	Energy Alberta attached an EFT form and requested that the Nation complete and return it so that the capacity funding could be paid.
C-03793	June 13, 2025	Email	Energy Alberta sent a reminder requesting the EFT form from the Nation, in order to advance the capacity funding.
C-02549	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.
C-03794	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including Indigenous knowledge in the Impact Statement by participating in field data collection programs. Energy Alberta advised interested Indigenous Nations could participate in baseline environmental studies beginning in July 2025 and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested SCFN follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.
C-03795	July 31, 2025	Email	The Nation submitted a letter from the Chief to Energy Alberta requesting a consultation pause on the proposed Peace River Nuclear Power Project. SCFN Consultation Department indicated he was available to follow up on this matter, if Energy Alberta had any questions.
C-02662	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03796	August 19, 2025	Email	Energy Alberta requested the attached EFT form be completed so that capacity funding could be paid to the Nation.
C-03797	August 21, 2025	Email	Sucker Creek First Nation, via its legal counsel, submitted a letter to Energy Alberta dated August 21, 2025. The letter acknowledged that the Nation was aware of Energy Alberta's proposed Peace River Nuclear Power Project and indicated its understanding that the Project would adversely impact its traditional and Treaty territory. The Nation indicated that to date, Energy Alberta had not yet meaningfully engaged with Sucker Creek First Nation in respect of the Project. The Nation indicated it wanted clarity regarding Energy Alberta's support for Sucker Creek First Nation's independent assessment of the Project's impacts and urgently request an in-person meeting.
C-03798	August 22, 2025	Email	Energy Alberta acknowledged receipt of the letter from the Nation and indicated it would reach out that day to schedule an in-person meeting as soon as practical.
C-04708	August 22, 2025	Phone	Energy Alberta left a voice mail message for SCFN and when they returned the call, they discussed a virtual Introductory meeting with SCFN Consultation Department and an in-person meeting with Chief and Council
C-03799	August 22, 2025	Email	Energy Alberta sent a follow-up email that confirmed it had scheduled a virtual Introductory meeting with SCFN Consultation Department on August 29 and had placed a hold in its Team calendars for September 4 for an in-person meeting with Chief and Council. SCFN Consultation Department was to confirm the date with Leadership and would get back to Energy Alberta.
C-03800	August 22, 2025	Email	SCFN Consultation Department thanked Energy Alberta the follow-up email and confirmed the virtual meeting for August 29. SCFN Consultation Department indicated it had sent an email to leadership requesting confirmation of an in-person meeting on September 4.
C-03801	August 22, 2025	Email	SCFN Consultation Department provided the completed EFT form.
C-03802	August 22, 2025	Email	Energy Alberta confirmed receipt of the completed EFT form
C-03803	August 27, 2025	Email	SCFN Consultation Department emailed to indicate it had left a voice mail for the in-person meeting with leadership on September 4 and requested an early morning meeting at 9:30 am. SCFN Consultation Department confirmed that the meeting on August 29 was still a go.
C-04709	August 27, 2025	Phone	Energy Alberta returned the phone call to SCFN and left a voice mail message.
C-03804	August 27, 2025	Email	Energy Alberta indicated that the proposed change of time may be possible and would confirm with its team and send a calendar appointment when confirmed. Energy Alberta requested an indication of who would be attending the meeting.
C-03805	August 27, 2025	Email	SCFN Consultation Department emailed confirmation of the meeting at 1:30 pm on September 4 at the Band office in Sucker Creek. SCFN Consultation Department provided a google pin to its office.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04710	August 28, 2025	Phone	Energy Alberta phoned SCFN and left a voice mail message regarding the meeting on September 4, 2025.
C-03806	August 28, 2025	Email	Energy Alberta acknowledged the August 27, 2025 email and provided the list of its attendees at the meeting and a proposed agenda for the meeting. Energy Alberta requested confirmation of the leadership that would be in attendance and if SCFN would have its legal counsel in attendance.
C-03807	August 28, 2025	Email	SCFN provided a letter dated July 16, 2025, that introduced its new Chief and Council, and its Consultation Protocol. The letter directed that all matters related to consultation, engagement and donations must be directed through its Consultation Office, which is the only authorized body to represent SCFN's interests. SCFN also clarified that the Sucker Creek First Nation Off Reserve Elders Group does not represent the Nation in any official capacity regarding consultation, governance or financial matters.
C-02637	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline, acknowledged SCFN's prior engagement on the Project, and expressed its interest in ongoing dialogue during the pause period. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03808	August 28, 2025	Email	SCFN Consultation Department thanked Energy Alberta for the invitation to the workshop and requested clarification of an email address added to the communication.
C-03809	August 28, 2025	Email	Energy Alberta apologized for its administrative error in its contact list that resulted in it including a contact for the Sucker Creek First Nation Off-Reserve Elders Group, in its email to SCFN. Energy Alberta clarified that it had initially been unclear of the relationship between the two groups and acknowledged that Sucker Creek First Nation had recently clarified. Energy Alberta indicated its contact list would be updated, and confirmation would be provided once completed.
C-03810	August 28, 2025	Email	Energy Alberta confirmed that its contact list had been updated to accurately reflect the distinct difference between Sucker Creek First Nation, and the Sucker Creek First Nation Off Reserve Elders Council.
C-03811	September 4, 2025	Email	SCFN provided a Zoom meeting link for a September 4 meeting with Energy Alberta.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01616	September 4, 2025	In person / community meeting	Meeting to discuss the Project. SCFN raised the following: ■ Energy Alberta only initiated outreach after receiving their July 31, 2025 letter requesting a pause in the consultation process for the Project. ■ Lack of studies on plants and animals ■ SCFN would like to conduct its own TEK/TLRU studies ■ Would like to see a nuclear plant in Ontario to understand ■ How much water would be pulled from the river ■ Capacity funding ■ Lack of education about the nuclear sector
C-03819	September 8, 2025	Email	Energy Alberta provided the Chief with a letter date September 8, 2025 in follow-up to the in-person meeting on September 4, 2025. The letter replied to comments made by the Chief in the meeting, that Energy Alberta had only reached out to meet with the Nation after receipt of the Nation's letter dated July 31, 2025. The letter further outlined Energy Alberta's prior outreach efforts related to the Project since October 2024 with an initial Project introductory letter, mapping files, an early information package, and a request for a meeting to discuss the Project. The letter advised that the initial communications were with SCFN's former Consultation Director and transitioned to the acting Consultation Director on April 4, 2025, following SCFN's notification to Energy Alberta. The letter advised Energy Alberta tried to engage with SCFN in multiple ways including emails and phone calls requesting an introductory meeting and to share information about the Project, noting that the latest Project update regarding the request to the IAAC for a regulatory timeline suspension was provided on August 18, 2025. The letter emphasized Energy Alberta intended to continue its direct engagement with SCFN.
C-04711	September 10, 2025	Phone	Energy Alberta left a voice mail message asking that the meeting on October 2 be rescheduled to October 6 due to scheduling conflicts.
C-04712	September 11, 2025	Phone	Energy Alberta left a voice mail message asking that the meeting on October 2 be rescheduled to October 6 due to scheduling conflicts.
C-00013	September 12, 2025	Email	Energy Alberta requested that the meeting on October 2 be rescheduled to October 6 due to scheduling conflicts. Additionally, there is a need to discuss the expected attendees from Sucker Creek First Nation to prepare appropriately for the meeting.
C-03820	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04713	September 18, 2025	Phone	Energy Alberta left a voice mail message asking that the meeting on October 2 be rescheduled to October 6 due to scheduling conflicts.
C-03821	September 18, 2025	Email	Energy Alberta indicated it had left another voice mail message in follow up to the email September 12, 2025 requesting a change of date for the in-person meeting scheduled for October 2. Energy Alberta requested the meeting be rescheduled to October 6, 2025.
C-03822	September 24, 2025	Phone	Energy Alberta phoned the Executive Assistant for Sucker Creek First Nation, to follow-up on a request she made via the Energy Alberta contact form on its website. Both discussed the need to reschedule the meeting that was scheduled for October 2 at 1:30 pm. Energy Alberta agreed to look at team calendars to confirm if the proposed dates would work.
C-04715	September 29, 2025	Phone	Energy Alberta left a voice mail message regarding an in-person meeting with Sucker Creek First Nation Chief and Council on October 27, 2025
C-03823	September 29, 2025	Email	Energy Alberta emailed in follow-up to its phone call with the Executive Assistant the previous week. Energy Alberta confirmed that the in-person meeting with Sucker Creek First Nation Chief and Council scheduled for October 2, could be rescheduled to October 27, 2025. Energy Alberta requested confirmation that the Nation was interested in having an afternoon meeting with Chief and Council followed by an evening session with the community, as was discussed at the last in person meeting.
C-03824	September 29, 2025	Email	The Executive Assistant for SCFN confirmed October 27 from 2-6 pm, as a meeting with Elders, that would be streamed to the Community.
C-00049	September 29, 2025	Email	Energy Alberta inquired if the intent was to provide another Project Overview, similar to the one presented at the meeting on September 4, 2025.
C-05102	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-03825	September 30, 2025	Email	The Chief acknowledged the email sent by Energy Alberta's CEO & President on September 29, 2025.
C-04714	October 2, 2025	Phone	Energy Alberta left a voice mail message asking regarding the meeting on October 27, 2025.
C-01941	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01883	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-04716	October 15, 2025	Phone	Energy Alberta left a voice-mail indicating it hoped to confirm and finalize the details of the meeting scheduled for October 27, 2025. Energy Alberta requested a call-back.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03826	October 15, 2025	Email	Energy Alberta followed up to a voice-mail left earlier that day indicating it hoped to confirm and finalize the details of the meeting scheduled for October 27, 2025. Energy Alberta provided its availability for a phone conversation that week.
C-04717	October 17, 2025	Phone	Energy Alberta left a voice-mail indicating it hoped to confirm and finalize the details of the meeting scheduled for October 27, 2025. Energy Alberta requested a call-back.
C-04718	October 20, 2025	Phone	Energy Alberta left a voice-mail indicating it hoped to confirm and finalize the details of the meeting scheduled for October 27, 2025. Energy Alberta requested a call-back.
C-03827	October 20, 2025	Email	Energy Alberta indicated it had called SCFN that day but was told that the Consultation Director was not in the office. Energy Alberta inquired about the in-person meeting on October 27, and who it would be meeting with that day. Energy Alberta indicated that it understood that the Consultation Director was going to check with Council and confirm if the meeting would be just with Council and Elders, or if it would also be meeting with the broader community.
C-03828	October 20, 2025	Email	The Executive Assistant confirmed that Chief and Council would like a presentation on the scope of the Project and the effects it will have on the community and that the meeting would be with Elders and that community members would be joining by zoom.
C-03829	October 20, 2025	Email	Energy Alberta thanked the Executive Assistant for the clarification and asked for clarification on the start and end time of the meeting as well as the location of the meeting. Energy Alberta inquired how questions would be managed, specifically for those on the Zoom call.
C-03830	October 20, 2025	Email	The Executive Assistant confirmed the time and location of the meeting, and that any questions raised via Zoom would be relayed to Energy Alberta via the Media company hired for the event.
C-03831	October 20, 2025	Email	The Nation inquired if Energy Alberta would be bringing snacks/refreshments for the meeting.
C-03832	October 20, 2025	Email	Energy Alberta suggested a phone call the following day to discuss logistics.
C-03833	October 21, 2025	Email	The Executive Assistant indicated she would be available to discuss logistics the following afternoon.
C-03834	October 21, 2025	Email	Energy Alberta indicated she would send a Team Meeting to discuss logistics.
C-03835	October 21, 2025	Email	SCFN provided Energy Alberta with an agenda for the meeting on October 27. From 2pm to 4pm, Energy Alberta was requested to dedicate time with the Elders and provide them with a clear understanding and overview of the Project. From 4pm to 6pm, Energy Alberta requested to open the meeting for community members to engage on the Project.
C-03836	October 21, 2025	Email	Energy Alberta forwarded an email from the Nation dated September 29, 2025, where they had initially confirmed the date and time of the meeting and thanked the Consultation Director for the phone conversation earlier that date for finalize logistics for the October 27 meeting.
C-01996	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards. Energy Alberta noted that it was steadily making progress towards finalizing a reactor design.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03967	October 22, 2025	Email	Energy Alberta confirmed details for the community meeting on October 27 which included: couriering fact sheets, requesting an address for delivery, ordering food for 50 attendees based on expected numbers of 15-20 Elders and 7 Council Members, using a projector provided, and bringing a microphone.
C-03966	October 22, 2025	Email	SCFN responded to EAs request for details on the October 27 community meeting. SCFN provided the address and suggested to provide fruit and vegetable trays for the community aspect of the open house. SCFN agreed to provide a projector, but Energy Alberta was to bring a microphone. The community meeting on October 27 was expected to have 15 to 20 Elders, 7 Council Members, and 40 to 50 attendees.
C-03968	October 22, 2025	Email	Energy Alberta noted that a team member would send fact sheets and meal options were discussed. The address for sending materials was provided.
C-03837	October 27, 2025	Email	Energy Alberta informed SCFN that its flight plans had been delayed but anticipated that they could still get to Sucker Creek in time for the meeting. Energy Alberta confirmed that it would provide an update once they had landed in Grande Prairie.
C-03838	October 27, 2025	Email	Energy Alberta informed the Nation that due to the flight delay they would not be able to make it to the community until 2:30 pm.
C-02996	October 27, 2025	In person / community meeting	Energy Alberta met with SCFN Elders. The discussion covered various topics regarding power generation in Alberta, specifically addressing nuclear power safety, waste management, and community impacts. Energy Alberta highlighted its engagement with Indigenous Nations, the potential for equity participation, and the socio-economic effects of increased industrial activity. SCFN Elders raised the following interests: environmental safety, decommissioning responsibilities, and the historical context of previous proposals.
C-02088	October 31, 2025	Email	SCFN requested a copy of the slide deck used at the October 27, 2025 meeting with Elders.
C-02096	November 3, 2025	Email	Energy Alberta provided a copy of the slide deck used at the meeting with Elders on October 27, 2025.
C-02664	November 10, 2025	Email	Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02665	November 11, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they are included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02903	November 26, 2025	Email	Energy Alberta requested contact information for the individual that recorded the presentation to the Elders.
C-02904	November 26, 2025	Email	The Nation provided the requested contact information.
C-02906	November 26, 2025	Email	Energy Alberta thanked the Nation for the contact information.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03398	November 27, 2025	Email	Energy Alberta inquired if the executive assistant had time for a quick question.
C-04504	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-04722	December 4, 2025	Phone	Energy Alberta left a voice mail message regarding an overpayment to SCFN.
C-02910	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02981	December 5, 2025	Email	SCFN identified an individual that may be interested in assisting with a request for Indigenous graphic design services. SCFN indicated that contact information would be forwarded if the individual was interested.
C-02982	December 5, 2025	Email	Energy Alberta thanked SCFN for sharing information about the search for Indigenous graphic design services.
C-04723	December 8, 2025	Phone	Energy Alberta left a voice mail message regarding an overpayment to SCFN.
C-03270	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of the proposed Project, and that all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Energy Alberta mentioned that selection of a specific nuclear reactor technology and detailed design is not required for early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects that looks at ranges for key features such as cooling water needs, building size and land area, that covers general requirements for many designs rather than for a specific reactor. Energy Alberta provided links to two potential reactors that were under consideration: the CANDU Monark and the Westinghouse AP1000.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03362	December 11, 2025	Email	Energy Alberta requested an update on its overpayment to SCFN. Energy Alberta provided a summary of what had been paid to SCFN thus far.
C-03726	December 18, 2025	Email	Energy Alberta wished Sucker Creek First Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.
C-03812	December 31, 2025	Phone	Energy Alberta received a voice mail message from SCFN Consultation Department regarding the upcoming meeting dates.
C-03813	December 31, 2025	Phone	Energy Alberta left a voice mail message for SCFN Consultation Department.

SUCKER CREEK OFF-RESERVE ELDERS COUNCIL

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR SUCKER CREEK OFF-RESERVE ELDERS COUNCIL (SCOREC)

ID	Date	Interaction Type	Summary
C-03840	August 8, 2025	Email	Energy Alberta indicated it had received the contact information for the SCOREC from IAAC and provided its contact information and requested a follow-up.
C-02829	August 11, 2025	Email	SCOREC responded to Energy Alberta's August 8, 2025 email and included a letter dated August 11, 2025 that requested Energy Alberta schedule an initial meeting with SCOREC to discuss: 1. Development of a community-specific engagement protocol, 2. Steps to address the comments on the Planning Documents, and 3. Opportunities for capacity-building and equity participation consistent with your stated objectives for Indigenous economic inclusion.
C-02662	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-04742	August 20, 2025	Phone	Energy Alberta and SCOREC discussed having an Introductory Meeting.
C-03841	August 20, 2025	Email	Energy Alberta followed-up to the phone call earlier that day and indicated they would like to schedule an Introductory Meeting with the SCOREC to better understand their interest in the proposed Project. Energy Alberta offered potential meeting dates and times for consideration.
C-03842	August 22, 2025	Email	SCOREC confirmed its availability for a meeting on September 2, 2025 at 1:30 p.m. and provided a proposed agenda.
C-03843	August 22, 2025	Email	Energy Alberta confirmed the September 2 meeting and requested contact information for the other attendees from the SCOREC.
C-03844	August 22, 2025	Email	SCOREC confirmed that they would all be in the same meeting room, so the calendar invite could be sent to the main contact email address.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02637	August 28, 2025	Email	Energy Alberta provided an update related to the pause in the regulatory timeline for the Project. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-04743	September 2, 2025	Virtual / Online meeting	Energy Alberta met with SCOREC and provided a Project background. SCOREC emphasized their exclusion from Sucker Creek First Nation's decision-making processes and their desire to be involved in the Project to protect treaty rights and traditional knowledge. Energy Alberta outlined their engagement plan, including regulatory phases, site preparation, and construction timelines. SCOREC requested capacity funding and collaboration on traditional land use studies. Energy Alberta indicated it would review SCOREC's society documents and consider their engagement requests.
C-03845	September 2, 2025	Email	SCOREC provided a copy of its incorporation document, dated 2020/12/07, under the Government of Alberta Societies Act.
C-03846	September 5, 2025	Email	SCOREC confirmed its attendance at the Siting Workshop in Peace River on September 24, 2025, and provided the name of an alternate for consideration.
C-03847	September 6, 2025	Email	Energy Alberta thanked the SCOREC for confirming its attendance at the Siting Workshop in Peace River on September 24, 2025.
C-00028	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-03848	September 22, 2025	Email	SCOREC requested an opportunity to meet with Energy Alberta following the meeting in workshop in Peace River.
C-00057	September 23, 2025	Email	Energy Alberta indicated it was not able to meet following the workshop as Team Members had to leave Peace River for another meeting.
C-03849	September 23, 2025	Email	SCOREC acknowledged the September 23, 2025 email and requested that Energy Alberta let SCOREC know when it was ready to meet again.
C-03850	September 24, 2025	Email	SCOREC requested forms for reimbursement of expenses and honorarium.
C-00050	September 29, 2025	Email	Energy Alberta indicated it was good to meet the attendee in person at the workshop and advised that it would send the form for expenses and honorarium shortly.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01915	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-02831	October 8, 2025	Email	SCOREC submitted an expense claim for attendance at the Indigenous Siting Workshop.
C-03851	October 9, 2025	Email	SCOREC inquired if there had been any new developments on the Project.
C-01871	October 10, 2025	Email	Energy Alberta indicated it would follow-up after returning from travel.
C-01872	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-02832	October 21, 2025	Email	SCOREC requested an update, specifically related to its interest in working on a TLRU study for the Project.
C-04744	November 13, 2025	Phone	SCOREC left a voicemail for Energy Alberta
C-02833	November 13, 2025	Email	SCOREC indicated he had left a voicemail and requested a following up, possibly by phone the following day.
C-02834	November 14, 2025	Email	Energy Alberta representative responded that she had been in the field and inquired if a meeting the following week would work.
C-02835	November 14, 2025	Email	SCOREC indicated it was available on November 18.
C-02836	November 14, 2025	Email	Energy Alberta indicated it would send a calendar invite for November 19, 2025.
C-02837	November 14, 2025	Email	SCOREC accepted the calendar invite for November 19, 2025.
C-02463	November 19, 2025	Email	Energy Alberta indicated it had waited about 15 minutes on the virtually scheduled meeting and suggested that the meeting be rescheduled.
C-02461	November 19, 2025	Email	SCOREC consultation contact apologized that he had missed the meeting time and offered alternate meeting dates/times for the following week.
C-02462	November 19, 2025	Email	Energy Alberta confirmed that the meeting had been rescheduled to November 25, 2025.
C-03852	November 19, 2025	Email	SCOREC confirmed its attendance at the meeting scheduled for November 25, 2025.
C-02998	November 25, 2025	Virtual / Online meeting	Energy Alberta met with SCOREC who reiterated its interest in involvement the Project due to concerns that they were excluded from discussions related to Sucker Creek First Nation. SCOREC expressed its desire for separate studies by SCOREC and SCFN, and Energy Alberta expressed concerns with funding two studies for essentially the same group. SCOREC advised it was currently working on governance documents and membership criteria.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02749	November 26, 2025	Email	SCOREC acknowledged Energy Alberta for its commitment keeping SCOREC informed as the Project progresses. SCOREC acknowledged that all its members were registered Sucker Creek First Nation members, and that the Council itself was not a rights-holding body under Canadian law. SCOREC expressed concern that its membership represents a large and growing portion of Sucker Creek First Nation Elders that live off-reserve—many of whom continue to harvest, hold generational land-based knowledge, and maintain deep cultural relationships to the Project area, and that they are not typically included in Sucker Creek First Nation’s internal consultation processes, TLRU studies, or Project-related decision-making. SCOREC reiterated its request for financial support and indicated a discussion on the matter was welcomed.
C-04013	November 26, 2025	Email	Energy Alberta thanked SCOREC for the additional context. Energy Alberta confirmed it would have discussions internally regarding the matter.
C-02854	November 26, 2025	Email	SCOREC requested an update regarding reimbursement of expenses for attendance at the siting workshop.
C-02855	November 26, 2025	Email	Energy Alberta indicated it would look into the reimbursement and get back to SCOREC.
C-02856	November 26, 2025	Email	Energy Alberta requested information about the major Project that SCOREC referenced where Sucker Creek First Nation and SCOREC both submitted TLRUs.
C-02728	November 26, 2025	Email	Energy Alberta provided a list of action items from the November 25, 2025 meeting including: ■ Energy Alberta to send links to employment and procurement registry pages ■ Energy Alberta to send capacity funding forms for SCOREC ■ Energy Alberta to consider SCOREC questions regarding TLRU and capacity funding ■ SCOREC to send demographic information and court decisions related to Sucker Creek First Nation
C-04503	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02840	December 2, 2025	Email	Energy Alberta indicated it had checked with its accounting group and found that reimbursed of SCOREC expenses had been paid to Sucker Creek First Nation, rather than to SCOREC as requested. Energy Alberta committed to correcting this error as soon as possible.
C-02857	December 2, 2025	Email	SCOREC indicated it was not aware that anyone from Sucker Creek First Nation was in attendance at the workshop.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02851	December 2, 2025	Email	Energy Alberta confirmed that nobody from Sucker Creek First Nation was in attendance at the siting workshop, and assured SCOREC that it would work to resolve the reimbursement error.
C-02916	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03247	December 8, 2025	Email	SCOREC inquired about the status of reimbursement of its expenses.
C-03248	December 8, 2025	Email	Energy Alberta indicated it had initiated an inquiry and was waiting for a reply.
C-03240	December 8, 2025	Email	SCOREC resent its completed EFT form and thanked Energy Alberta for its assistance in resolving the error in reimbursement of its expenses.
C-03277	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03671	December 12, 2025	Email	SCOREC inquired about the reimbursement of expenses.
C-03672	December 18, 2025	Email	Energy Alberta confirmed payment for expenses had been made to SCOREC and attached the EFT notice.
C-03702	December 18, 2025	Email	Energy Alberta wished SCOREC a happy holiday season and noted that their offices would be closed from December 19 to January 5, with a certain representative available via cell phone during the time.

March 3, 2026

Request to Amend Engagement Record – Governance and Representation Context

Dear Energy Alberta Team,

SCOREC has reviewed the Record of Indigenous Engagement and Communications for January 1, 2024 to December 31, 2025.

SCOREC requests that the record be amended to accurately reflect the governance and representation issues that were clearly communicated during meetings on September 2 and November 25, 2025.

The current summaries reference “exclusion” in general terms but do not document the structural governance barriers discussed. Specifically:

- Off-reserve Elders are excluded from participation in SCFN’s internal Elders Society structures;
- Off-reserve members are not permitted to run for Chief or Council under SCFN’s current election framework;
- As a result, off-reserve Elders lack both political and institutional representation within SCFN consultation-related processes;
- SCOREC was established to address this representational gap affecting registered SCFN members residing off-reserve;
- SCOREC’s engagement and capacity requests are intended to ensure inclusion of this defined segment of membership and are not duplicative of SCFN participation.

SCOREC recognizes SCFN as the elected Band Council government. However, the absence of representational mechanisms for off-reserve Elders is a material governance fact that was discussed and should be reflected accurately in the engagement record.

Given the regulatory context of the proposed Peace River Nuclear Power Project, accurate documentation of how different segments of SCFN membership are represented in engagement processes is important to the integrity of the record.

SCOREC requests that the engagement record be amended accordingly. If revisions are not made, SCOREC requests that this correspondence be appended to the official engagement record.

Sincerely,

SCOREC

SWAN RIVER FIRST NATION

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR SWAN RIVER FIRST NATION (SRFN)

ID	Date	Interaction Type	Summary
C-01620	January 8, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-01621	January 8, 2025	Email	SRFN requested an in-person meeting to discuss the early Project information package.
C-01622	January 13, 2025	Email	Energy Alberta advised it would be in Peace River, Alberta on January 21 and 22, 2025 and requested SRFN's availability for an in-person meeting.
C-01623	January 13, 2025	Email	SRFN advised they were not available for an in-person meeting on January 21 or 22, 2025 and provided their availability for February or March 2025. SRFN requested the meeting be conducted on Swan River First Nation land.
C-01624	January 21, 2025	Email	Energy Alberta inquired as to whether SRFN was able to meet virtually instead to discuss the early Project information package and requested their availability for the virtual meeting. Energy Alberta advised the Project was in its early stages of engagement.
C-01625	January 31, 2025	Email	SRFN requested a virtual meeting in March or April 2025 to discuss the Project.
C-01626	February 3, 2025	Email	Energy Alberta provided its meeting availability for April 8 or 9, 2025.
C-01627	February 10, 2025	Email	SRFN provided their meeting availability for April 8, 2025.
C-01628	February 10, 2025	Email	Energy Alberta advised they had limited availability on April 8, 2025 and provided its meeting availability for April 9, 2025.
C-01629	February 10, 2025	Email	Energy Alberta provided a Project introduction meeting invitation for April 9, 2025.
C-01630	February 10, 2025	Email	SRFN confirmed their availability to meet on April 9, 2025 to discuss the Project.
C-01631	February 21, 2025	Email	Energy Alberta advised a meeting was scheduled for April 9, 2025 and it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with SRFN for an introduction to their process.
C-01632	April 2, 2025	Email	Energy Alberta provided a meeting invitation for April 9, 2025 for an introduction to the Project.
C-01650	April 4, 2025	Email	Energy Alberta received an automated response from SRFN advising the April 4, 2025 email regarding the IPD submission notice was not delivered to the recipient.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02378	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it was available.
C-01642	April 9, 2025	Virtual / Online meeting	Energy Alberta had an Introductory Meeting with SRFN. The following interests were raised: ■ Waste management ■ capacity funding ■ Cumulative effects ■ Nuclear Safety ■ Seismic conditions ■ Electrical demand
C-03853	April 9, 2025	Email	In follow-up to the virtual Introductory Meeting held on April 9, 2025, regarding the proposed Peace River Nuclear Power Project, Energy Alberta provided the Nation with a copy of the slide deck used in the meeting. Energy Alberta provided hyperlinks to additional information on the Project, including public open house materials and fact sheets on various topics, that were publicly available on its website. Energy Alberta encouraged interested individuals to sign up for procurement and jobs registries, as well as to stay updated on the Project.
C-02402	April 14, 2025	Email	Energy Alberta followed up on its earlier notification of the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02436	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification and requested confirmation that SRFN had received the IPD for the Peace River Nuclear Power Project. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-04724	May 6, 2025	Phone	SCFN phoned Energy Alberta about the process to register their comments on the IPD with IAAC.
C-03854	May 6, 2025	Email	Energy Alberta connected the Manager Oil and Gas Division, Swan River First Nations, with IAAC and indicated that he had phoned Energy Alberta to inquire about how he could register with IAAC. Energy Alberta indicated it would be happy to meet with the Nation to address questions about its proposed Project and indicated they may potentially be in the Peace Region in early June, if there are any dates/times that would work for Nation.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02523	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period, and corrected information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02567	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's IA and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. The letter requested Energy Alberta be contacted if the communities required additional funding and provided its contact information. Contact information for further inquiries and funding requests were provided.
C-02594	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta noted the application form would support it in understanding SRFN's capacity funding requirements and the EFT form would facilitate quick payments. Energy Alberta advised the funding was intended to support SRFN's review of the IPD and the TISGs within the IAAC's timeframes and requested the forms be completed and returned by May 30, 2025 if SRFN wished to receive the funding.
C-03856	June 3, 2025	Email	SRFN advised that it had been busy with fires and evacuations and inquired if it would be possible to submit its completed capacity funding forms by June 5, 2025.
C-03857	June 3, 2025	Email	Energy Alberta confirmed SRFN could completed their capacity funding forms by June 5, 2025.
C-01649	June 3, 2025	Email	SRFN confirmed receipt of the email regarding the capacity funding application.
C-03858	June 4, 2025	Email	SRFN inquired as to whether the capacity funding application was the same as they had previously submitted.
C-03859	June 4, 2025	Email	Energy Alberta confirmed that there was funding available through IAAC, the regulator who will review and make a decision on its proposed Project, and that Energy Alberta, the proponent, was offering additional capacity funding. Energy Alberta indicated that the Nation could use the forms it had provided to access the additional funding.
C-03860	June 9, 2025	Email	Swan River First Nation submitted its completed capacity funding forms.
C-03861	June 9, 2025	Email	Energy Alberta confirmed receipt of the capacity funding forms.
C-03862	June 12, 2025	Email	SRFN requested documents related to the Planning Phase for the Impact Assessment and inquired if there were any deadlines for SRFN to submit comments.
C-03863	June 12, 2025	Email	Energy Alberta provided a website link to the documents related to the planning phase for the IA, advised SRFN to confirm with the IAAC regarding comments, and provided an IAAC representative's contact information.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03864	June 13, 2025	Email	Energy Alberta advised that it had approved capacity funding to support the Nation to review the Planning Phase documents including the IPD and TISGs.
C-03865	June 18, 2025	Email	Swan River First Nation copied Energy Alberta on its submission to IAAC for inclusion in the impact assessment process for the Peace River Nuclear Project.
C-03866	June 23, 2025	Email	Swan River First Nation acknowledged the email from Energy Alberta dated June 13, 2025 regarding approval of capacity funding.
C-02550	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.
C-02608	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including Indigenous knowledge in the Impact Statement by participating in field data collection programs. Energy Alberta provided a list of the baseline environmental studies beginning in July 2025, and outlined the field programs and their objectives, training requirements, and PPE requirements for field crews. Energy Alberta advised an honorarium and reimbursement of travel expenses would be available to participants. Energy Alberta provided its contact information and requested a response by July 23, 2025 to indicate SRFN interest in participating in field studies.
C-05146	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02638	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline, acknowledged SRFN's prior engagement on the Project, and expressed its interest in ongoing dialogue during the pause period. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03872	September 9, 2025	Email	The Manager, Environmental monitoring and compliance division, SRFN, indicated his interest in attending the Siting Workshop for Indigenous Nations and Communities on September 24, 2025 and inquired if there was any information that he needed to provide in advance of the workshop.
C-03873	September 9, 2025	Email	Energy Alberta inquired about dietary restrictions.
C-00029	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-05101	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01919	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01940	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01884	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-01995	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02145	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that they be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02158	November 11, 2025	Email	Energy Alberta sent a reminder to the participant in the Indigenous Siting Workshop held on September 25, to submit the form for reimbursement of the honorarium and reasonable expenses.
C-04493	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02809	December 2, 2025	Email	SRFN confirmed it would send one member to the January 13, 2026 workshop.
C-02826	December 2, 2025	Email	Energy Alberta acknowledged that SRFN would send a representative to the workshop.
C-02911	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02983	December 5, 2025	Email	SRFN said they would pass along the information about Energy Alberta seeking Indigenous graphic design services.
C-02984	December 5, 2025	Email	Energy Alberta thanked SRFN for considering its inquiry about digital graphic design and/or visual narrative services.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03271	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03703	December 18, 2025	Email	Energy Alberta wished the Swan River First Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

TALLCREE TRIBAL GOVERNMENT
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR TALLCREE TRIBAL GOVERNMENT (TTG)

ID	Date	Interaction Type	Summary
C-01656	January 8, 2025	Email	Energy Alberta provided a Project overview, introductory letter, early information package, and mapping of proposed Project sites. The letter introduced the Project team and provided an outline of the Project phase, regulatory process initiation timeline, and Energy Alberta's approach to conservation, environmental protection, and engagement. The information package included an overview of the Project purpose and benefit, regulatory timeline, proposed locations, engagement approach, regulatory process, and contact information.
C-01660	February 12, 2025	Email	Energy Alberta followed up on its January 8, 2025 email and requested Tallcree Tribal Government's availability for a virtual meeting to discuss the Project.
C-01657	February 21, 2025	Email	Energy Alberta advised it was interested in continuing engagement with Tallcree Tribal Government and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with Tallcree Tribal Government for an introduction to their process.
C-01658	March 19, 2025	Email	Energy Alberta inquired as to whether Tallcree Tribal Government was available for a Project introductory meeting in mid-April 2025.
C-01659	March 19, 2025	Email	Tallcree Tribal Government advised it was interested in learning more about the Project and confirmed they were available for a meeting.
C-02382	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02401	April 14, 2025	Email	Energy Alberta followed up on its notification of the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised IAAC was hosting a 30-day public comment period on the IPD from April 14, 2025 to May 14, 2025. Energy Alberta provided a website link to the English and French versions of the IPD and public notice, a list of locations to access a hard copy of the IPD for public comment, and information about subscribing for Project updates.
C-02438	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02525	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period and corrected information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02568	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's Impact Assessment and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. The letter requested Energy Alberta be contacted if the communities required additional funding and provided its contact information. Contact information for further inquiries and funding requests was provided.
C-02595	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided additional information including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-02552	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta advised it had submitted its response to the Summary of Issues on June 23, 2025, provided a copy of the response, and stated it would be posted on the IAAC's registry. Energy Alberta advised a meeting could be arranged to discuss the regulatory update.
C-03874	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including Indigenous Knowledge in the Impact Statement. Energy Alberta advised interested Indigenous Nations could participate in baseline environmental studies beginning in July 2025 and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested Tallcree Tribal Government follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-05161	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02625	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested TTG's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-02661	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03875	September 15, 2025	Email	Tallcree Lands indicated it was planning on attending the workshop.
C-03876	September 15, 2025	Email	Energy Alberta inquired about dietary restrictions.
C-00031	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-03877	September 23, 2025	Email	Tallcree Lands indicated that there would be two attendees at the siting workshop and provided the name and role of the second attendee.
C-05100	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01912	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01943	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03878	October 9, 2025	Email	Tallcree Tribal Government representatives provide a completed honorarium and expense form.
C-03879	October 9, 2025	Email	Energy Alberta indicated that the form appeared to be blank and requested that Tallcree Tribal Government resend the form.
C-01885	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-03880	October 11, 2025	Email	Tallcree Tribal Government resubmitted its completed honorarium and expense form.
C-03881	October 13, 2025	Email	Energy Alberta confirmed receipt of the completed form.
C-01994	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02144	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02678	November 24, 2025	Email	Energy Alberta has requested a pause in the regulatory timeline for the Peace River Nuclear Power Project to engage further with Indigenous Nations and Communities. An information package and a map of two proposed siting options are attached for review. Input from Indigenous groups is sought before finalizing the site and proceeding with the Impact Assessment process. Meetings can be arranged to discuss the Project and gather feedback.
C-02745	November 27, 2025	Email	A follow-up is requested regarding an expense form for the September Siting Workshop, specifically the completion of the attached EFT form for Tallcree Tribal Government to process the payment. Prompt completion is appreciated.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04489	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02912	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02999	December 4, 2025	Email	The consultation contact indicated he would check on potential Indigenous Graphic Design Services and get back to Energy Alberta.
C-02941	December 4, 2025	Email	Energy Alberta acknowledged the December 4, 2025 email.
C-03272	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03549	December 15, 2025	Email	Energy Alberta followed-up is requested regarding an expense reimbursement and advised that payment cannot be processed without the completed EFT form.
C-03555	December 15, 2025	Email	Tallcree Tribal Government provided the completed EFT information.
C-03556	December 15, 2025	Email	Energy Alberta acknowledged receipt of the EFT form.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03727	December 18, 2025	Email	Energy Alberta wished Tallcree Tribal Government a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

TREATY 8 FIRST NATIONS OF ALBERTA
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR TREATY 8 FIRST NATIONS OF ALBERTA (TREATY 8)

ID	Date	Interaction Type	Summary
C-01705	March 1, 2024	Email	Energy Alberta advised of its intent to engage with Treaty 8 First Nations of Alberta prior to engaging the provincial government to ensure meaningful consultation and collaboration. Energy Alberta provided an overview of its plan to develop a nuclear Project in the Peace River region. Energy Alberta advised it was interested in developing partnership opportunities, supporting community education through skills development and engaging on nuclear benefits and implications, and promoting energy security and sustainability. Energy Alberta requested Treaty 8's availability for a meeting.
C-01734	April 3, 2025	Email	Energy Alberta provided an introduction of its representative, advised the Project was in its early stages, and noted it had yet to file for regulatory review. Energy Alberta advised it had started early engagement with Indigenous Nations and communities and requested a virtual introductory meeting.
C-02383	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-03888	April 4, 2025	Email	Energy Alberta received an automated response indicating that the email address was no longer active and referred the sender to the Interim CAO until further notice. An email address was provided.
C-03889	April 4, 2025	Email	Energy Alberta forward the April 4, 2025 email to the new contact that was provided in the automated response.
C-03890	April 5, 2025	Email	The CAO for Treaty 8 responded that he had just started that week and confirmed receipt of the email. He indicated that the Project was discussed at an all-Chiefs meeting and was something Treaty 8 would be interested in.
C-03891	April 7, 2025	Email	Energy Alberta thanked the CAO for the update and indicated it would update its contact list.
C-02408	April 14, 2025	Email	Energy Alberta followed up on its notification of the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-01733	April 15, 2025	Email	Treaty 8 Grand Chief requested Energy Alberta to follow up with their CAO to arrange the introductory meeting.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01735	April 15, 2025	Email	Energy Alberta requested the CAO's contact information.
C-01736	April 15, 2025	Email	Treaty 8 Grand Chief provided the requested contact information.
C-01737	April 16, 2025	Email	Energy Alberta confirmed receipt of the CAO's contact information.
C-01713	April 20, 2025	Email	Energy Alberta contacted the CAO and provided a copy of its April 3, 2025 email chain with the Grand Chief requesting a meeting with Treaty 8 to discuss the Project.
C-01714	April 22, 2025	Email	Treaty 8 confirmed receipt of Energy Alberta's email and advised they were interested in meeting.
C-01712	April 22, 2025	Email	Energy Alberta requested Treaty 8 provide potential dates for a virtual meeting.
C-03892	April 29, 2025	Email	Energy Alberta proposed an Introductory Meeting with Treaty 8 on May 1, from 12:30 to 1:30, and requested confirmation so that a Team Calendar invite could be sent.
C-03893	April 29, 2025	Email	Treaty 8 confirmed the meeting date and time and indicated that there may be other Chiefs from the Peace River area that also join the call.
C-03894	April 29, 2025	Email	Energy Alberta requested the names of the Chiefs that might be attending, so that they could be added to the calendar invite.
C-03895	April 29, 2025	Email	The CAO indicated that the Chiefs from Sturgeon Lake Cree Nation, Woodland Cree First Nation, Duncan's First Nation and Horse Lake First Nation may potentially attend the meeting.
C-03896	April 29, 2025	Email	Energy Alberta confirmed receipt of the Treaty 8's April 29, 2025 email.
C-01725	April 29, 2025	Email	Energy Alberta provided a Team Meeting invitation for May 1, 2025.
C-03897	May 1, 2025	Email	The CAO advised Energy Alberta that they had an urgent Chief meeting and requested the meeting be deferred to 1 pm or rescheduled.
C-03898	May 1, 2025	Email	Energy Alberta indicated it would reschedule the meeting given the urgent Chief meeting and requested potential dates and times that would work. Energy Alberta asked that the CAO advised of the rescheduling of the meeting.
C-03899	May 1, 2025	Email	Energy Alberta indicated that it had checked with its team and could reschedule the meeting to May 2, anytime between 11:00 am and 2:00 pm, and requested confirmation from Treaty 8.
C-03900	May 1, 2025	Email	Treaty 8 indicated that the meeting would need to be reschedule to the following week and that they would follow-up with new proposed dates and times.
C-03901	May 1, 2025	Email	Energy Alberta thanked Treaty 8 for the update.
C-02437	May 5, 2025	Email	Energy Alberta followed up on its email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-01720	May 6, 2025	Phone	Energy Alberta phoned and left a voicemail requesting a call back to the meeting with Treaty 8.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03904	May 12, 2025	Email	Energy Alberta inquired if the CAO had time for a quick chat.
C-01728	May 12, 2025	Phone	Energy Alberta had a phone conversation with the CAO and Treaty 8 advised they would follow up to provide the confidential information requested on May 13, 2025.
C-03905	May 13, 2025	Email	The CAO provided the confidential information requested.
C-03906	May 13, 2025	Email	Energy Alberta thanked the CAO for the information.
C-02524	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period and corrected information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02570	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's IA and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. Contact information for further inquiries and funding requests was provided.
C-03907	May 13, 2025	Email	The Grand Chief acknowledged the email from Energy Alberta dated May 13, 2025
C-03908	May 14, 2025	Email	Director of Land Use and Environmental Planning, on behalf of the Grand Chief inquired about the possibility of capacity funding related to the Peace River Nuclear Power Project and requested an opportunity to discuss the matter.
C-03909	May 14, 2025	Email	Energy Alberta indicated its openness to a discussion regarding capacity funding and inquired if a meeting time should be schedule, or if the Director of Land Use and Environmental Planning wanted to call her on the cell number provided.
C-03910	May 15, 2025	Email	Director of Land Use and Environmental Planning suggested that a meeting be scheduled.
C-03911	May 15, 2025	Email	Energy Alberta indicated that she was available anytime on May 5, 2025.
C-03912	May 15, 2025	Email	Director of Land Use and Environmental Planning suggested a meeting at 2 pm, on May 22.
C-03913	May 15, 2025	Email	Energy Alberta confirmed it would send a calendar invite when she was back in the office.
C-02596	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta indicated its funding was intended to support the Nations efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02551	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta encouraged Treaty 8 to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03914	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs. Energy Alberta advised interested Indigenous Nations could participate in baseline environmental studies beginning in July 2025 and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested Treaty 8 follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.
C-05160	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02639	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline, acknowledged Treaty 8's prior engagement on the Project, and expressed its interest in ongoing dialogue during the pause period. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03915	September 1, 2025	Email	Treaty 8 indicated it would be attending September 24 Siting Workshop in Peace River.
C-03916	September 3, 2025	Email	Energy Alberta acknowledged Treaty 8 interest in the siting workshop and inquired about dietary restrictions.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-00030	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-03917	September 19, 2025	Email	Treaty 8 thanked Energy Alberta for the pre-reading materials.
C-05099	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-03918	October 1, 2025	Email	Treaty 8 thanked Energy Alberta for the information shared during the Indigenous Siting Workshop on September 24, 2025 and requested a copy of the PowerPoint presentation used in the meeting.
C-03919	October 1, 2025	Email	Energy Alberta confirmed it would send the presentation shortly and clarified that it was not proposing a Small Modular Reactor (SMR), but that it was proposing to build a world-class nuclear power generating station that would include two to four 1,000MW reactors. The facility would produce up to 4800MW of electricity to the grid, representing up to 25% of the province's existing electricity generation.
C-01922	October 7, 2025	Email	Energy Alberta thanked the participant for attending the Indigenous Siting Workshop, aimed at gathering Indigenous feedback on site selection criteria that will adhere to strict technical, safety, and social standards. Energy Alberta attached the workshop materials and a form for honorarium and expense reimbursement.
C-01939	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01924	October 9, 2025	Email	Energy Alberta received an error message in relation to its October 7, 2025 email.
C-01869	October 9, 2025	Email	Energy Alberta requested confirmation of the correct email address due to an error message in relation to its October 7, 2025 email.
C-03920	October 9, 2025	Email	Treaty 8 confirmed that Energy Alberta had the correct email address.
C-03921	October 10, 2025	Email	Treaty 8 submitted an expense form and receipts for their attendance at the Indigenous Siting Workshop
C-01873	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-03922	October 13, 2025	Email	Energy Alberta indicated that Treaty 8 had submitted the wrong expense form and resent the expense for Energy Alberta required to be completed.
C-02914	October 15, 2025	Email	Treaty 8 attendee at the Indigenous Siting workshop submitted forms for reimbursement of expenses.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01993	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02143	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02746	November 27, 2025	Email	Energy Alberta followed-up regarding an expense form for the September Siting Workshop. Energy Alberta advised that the EFT form for Treaty 8 needed to be completed to process the payment.
C-04490	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02937	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-03233	December 7, 2025	Email	Treaty 8 indicated they would see if they could provide a list of contacts for graphic design services. Treaty 8 also recommended reaching out to the individual nations.
C-03234	December 8, 2025	Email	Energy Alberta advised that it had reached out to the individual Nations regarding graphic design services.
C-03404	December 9, 2025	Email	Energy Alberta inquired if Treaty 8 would be interested in a meeting in the New Year.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03273	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03394	December 12, 2025	Email	CAO suggested a meeting in the new year.
C-03402	December 13, 2025	Email	Energy Alberta inquired what dates in the new year worked for Treaty 8.
C-03544	December 15, 2025	Email	Energy Alberta confirmed that reimbursement payment was sent to Treaty 8 on December 1, 2025.
C-03711	December 18, 2025	Email	Energy Alberta wished Treaty 8 a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

VALLEYVIEW MÉTIS LOCAL
Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR VALLEYVIEW MÉTIS LOCAL

ID	Date	Interaction Type	Summary
C-03607	August 12, 2025	Email	Energy Alberta advised the IAAC and the CNSC were seeking comments on the draft integrated TISG and draft IEPP and provided information regarding the summer 2025 field work program and capacity funding. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs. Energy Alberta advised it had begun conducting baseline studies and noted opportunities to participate were available. Energy Alberta advised the capacity funding was meant to support the participation in the IA and planning phase of the Project and provided the application form and electronic funds transfer form for completion. Energy Alberta provided website links to access the English and French versions of the IPD and requested to be contacted for any questions.
C-05147	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02626	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested Grande Prairie Métis' availability for a meeting to discuss the Project and engagement efforts. Energy Alberta provided information and an invitation to its planned Project siting workshop, noting all nuclear projects were required to undergo a comprehensive site selection assessment to ensure the selected site adhered to the social, safety, and technical criteria set by Canadian and international regulatory authorities. Energy Alberta advised participants would be provided information regarding the criteria for site selection during the workshop and an information package in advance of the workshop. Energy Alberta provided information about the workshop's arrangements and advised an honorarium would be provided to all participants. Energy Alberta provided information about four planned public engagement sessions from September 22 to 25, 2025 and provided a website link to register for the sessions.
C-03600	September 1, 2025	Email	The President of the Grande Prairie Métis Local, copied the President of Valleyview Métis Local and a consultant supporting both locals in Grande Prairie Métis District, and requested a meeting on September 5, 2025 between 1:00-2:00 pm.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02494	September 3, 2025	Email	Energy Alberta indicates it was not available on September 5, 2025 and inquired about days the following week the Métis Locals might be available
C-03601	September 3, 2025	Email	The President of the Grande Prairie Métis Local, copied the President of Valleyview Métis Local and a consultant supporting both locals in Grande Prairie Métis District, and indicated that September 18, 2025 would work for them for a meeting.
C-03609	September 12, 2025	Email	Energy Alberta sent a reminder for the Siting Workshop for Indigenous Nations and Communities on September 24, 2025. Energy Alberta indicated that an honorarium, travel expenses, and meals will be provided. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-05098	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01942	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-01874	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-01992	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02496	October 24, 2025	Email	President of the Grande Prairie Métis Local advised that the President of Valleyview Métis Local and a consultant should both be copied on emails to the Grande Prairie Métis Local.
C-02142	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02455	November 19, 2025	Email	Grande Prairie Métis and Valleyview Métis locals requested an Introductory Meeting sometime after November 29, 2025.
C-02497	November 19, 2025	Email	Energy Alberta confirmed it would be happy to arrange a meeting the first or second week of December and requested dates/time in either of those weeks that could be checked against Energy Alberta calendars. Energy Alberta indicated it would send a Teams invite once a date/time could be confirmed.
C-02686	November 19, 2025	Email	The President indicated that they would send a few potential dates once President Brown was back.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04508	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02933	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02960	December 4, 2025	Email	Valleyview Métis Local provided a recommendation for Indigenous Graphic Design Services.
C-02961	December 4, 2025	Email	Energy Alberta acknowledged the recommendation.
C-03251	December 8, 2025	Email	The Métis Local suggest December 16th at 1:00pm as a potential meeting date.
C-03252	December 9, 2025	Email	Energy Alberta indicated that December 16th at 1:00pm was already booked and inquire about possible dates in the New Year.
C-03315	December 9, 2025	Email	The President suggested January 8, 2025 at 10 am for the Introductory Meeting.
C-03274	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03313	December 10, 2025	Email	Valleyview Métis Local provided the name of its member is interested in attending a workshop on Nuclear Fundamentals

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03314	December 10, 2025	Email	Energy Alberta acknowledge the workshop attendee and inquired about dietary restrictions
C-03329	December 10, 2025	Email	Energy Alberta confirmed that January 8 at 10 am worked and would send a calendar invite.
C-03369	December 11, 2025	Email	Valleyview Métis Local confirmed no dietary restrictions.
C-03370	December 12, 2025	Email	Energy Alberta acknowledge acknowledged the email regarding dietary restrictions
C-03632	December 16, 2025	Email	Energy Alberta received a request that the meeting time on January 8 be moved to 1 pm
C-03667	December 17, 2025	Email	Energy Alberta confirmed it could move the meeting time and would send an updated calendar invite.
C-03668	December 17, 2025	Email	Energy Alberta requested the meeting time be adjusted to 1:30 instead of 1:00 pm.
C-03669	December 17, 2025	Email	Attendees confirmed that the adjusted time would work.
C-03719	December 18, 2025	Email	Energy Alberta wished Valleyview Métis a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR WHITEFISH (GOODFISH) LAKE FIRST NATION #128 (WLFN 128)

ID	Date	Interaction Type	Summary
C-03883	August 6, 2025	Email	The Nation submitted a letter dated August 6, 2025, from the Consultation Coordinator to Energy Alberta's CEO and President requesting a six month Pause on the Impact Assessment for the Peace River Nuclear Power Project. The Nation indicated its reasons for requesting the pause, including the need for technical expertise, demands on limited resources, expediated process and impacts on the effectiveness of consultation, and inadequate funding.

WHITEFISH (ATIKAMEG) LAKE FIRST NATION #459

Record of Indigenous Engagement and Communications
for the period of January 1, 2024 to December 31, 2025

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR WHITEFISH (ATIKAMEG) LAKE FIRST NATION #459 (WLFN 459)

ID	Date	Interaction Type	Summary
C-01763	October 23, 2024	Email	Energy Alberta provided an initial Project introductory letter, mapping files, and an early information package. The letter provided an introduction to Energy Alberta, preliminary Project details, and a request to meet to discuss the Project. The early information package provided details regarding the purpose and benefits of the Project, proposed site locations, high-level overview of Federal Impact Assessment Process timelines, an overview of the Project's engagement approach, and regulatory requirements.
C-01764	January 17, 2025	Email	Energy Alberta requested WLFN 459's availability for a virtual meeting in February 2025 to discuss the Project.
C-01765	February 12, 2025	Email	Energy Alberta followed up on its January 17, 2025 email and requested WLFN 459's availability for a virtual meeting to discuss the Project.
C-01766	February 21, 2025	Email	Energy Alberta advised it was interested in continuing engagement with WLFN 459 and planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta requested a meeting to discuss the Project and advised the IAAC would follow up with WLFN 459 for an introduction to their process.
C-02381	April 4, 2025	Email	Energy Alberta identified their Lead for Indigenous Engagement for the Project and that it would be submitting its IPD for the Peace River Nuclear Power Project to the Impact Assessment Agency of Canada that day. Energy Alberta understood that the IPD would be posted to the IAAC registry and would be available for public comment. Energy Alberta indicated it would provide a link to the IPD as soon as it is available.
C-02407	April 14, 2025	Email	Energy Alberta followed up on its notification of the IPD submission to IAAC and CNSC and advised the submission would trigger IAAC's impact assessment and CNSC's License to Prepare site. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-02439	May 5, 2025	Email	Energy Alberta followed up on its April 14, 2025 email regarding the IPD submission notification. Energy Alberta requested confirmation of receipt of the IPD, inquired as to whether they had any questions, or wanted to arrange a meeting to discuss the submission. Energy Alberta provided a reminder of upcoming deadlines including the 30-day public comment period on the IPD ending on May 14, 2025 and the application for IAAC's participant funding program ending on May 16, 2025. Energy Alberta advised a notification would be provided in May 2025 for the 30-day comment period on the TISG.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02526	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period and corrected information it had provided related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-02569	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's IA and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. Contact information for further inquiries and funding requests was provided.
C-02598	May 23, 2025	Email	Energy Alberta followed up on its May 13, 2025 email regarding its offer of capacity funding and provided an application form and an EFT form. Energy Alberta indicated its funding was intended to support WLFN 459s efforts in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested WLFN 459 complete and return the attached documents by May 30, 2025.
C-02553	June 25, 2025	Email	Energy Alberta advised that the IAAC and CNSC had opened a new comment period on the planning phase documents for the Project. Energy Alberta provided website links to the draft integrated TISG, draft Indigenous engagement and partnership plan, and IAAC's registry. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03882	July 16, 2025	Email	Energy Alberta provided an update regarding its 2025 summer fieldwork program. Energy Alberta advised it was committed to including IK in the Impact Statement by participating in field data collection programs. Energy Alberta advised interested Indigenous Nations could participate in baseline environmental studies beginning in July 2025 and noted it would continue to seek opportunities for Indigenous participation as the Project progressed. Energy Alberta requested WLFN 459 follow up with any inquiries or their interest in environmental fieldwork and advised it was interested in continued Project engagement.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02663	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-02627	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline and requested WLFN 459's availability for a meeting to discuss the Project and engagement efforts. Energy Alberta extended an invitation to attend an Introduction to Siting Workshop for Indigenous Nations and Communities scheduled for September 24, 2025. The workshop was intended to gather Indigenous feedback on site selection criteria. Energy Alberta indicated that an honorarium and travel expenses would be covered. Energy Alberta provided additional information about public engagement sessions that would be held from September 22 to 25, 2025, across various locations in the Peace River Area should members wish to attend.
C-03884	September 3, 2025	Email	WLFN 459 indicated an interest in participating in the siting workshop.
C-03885	September 3, 2025	Email	Energy Alberta acknowledged WLFN 459's interest in participating in the workshop and requested the contact information of the participant and any dietary restrictions.
C-00032	September 19, 2025	Email	Energy Alberta provided an information package and start times for the Indigenous Siting Workshop on September 24, 2025 in Peace River. Energy Alberta advised that the workshop would include a Project overview, discussion of siting criteria, and a discussion of community engagement strategies for gathering feedback from community members on site selection.
C-03886	September 19, 2025	Email	Energy Alberta received an automated response indicating the contact would answer emails periodically.
C-05097	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01945	October 7, 2025	Email	Energy Alberta emailed a letter that provided an update on its request to IAAC to pause the regulatory timeline, and on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-03887	October 7, 2025	Email	Energy Alberta received an automated response indicating the contact would answer emails periodically.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01881	October 10, 2025	Email	Energy Alberta shared a list of Indigenous leaders with knowledge of the Canadian nuclear sector. This was in support of the strong interest among communities to connect with Indigenous leaders experienced in the nuclear sector for education and awareness.
C-01991	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.
C-02141	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within WLFN 459's community.
C-04492	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02887	December 4, 2025	Email	WLFN 459 confirmed its attendance at a workshop on Nuclear Fundamentals led by Tracy Primeau, scheduled for January 13, 2026.
C-02913	December 4, 2025	Email	Energy Alberta inquired about Indigenous businesses or individuals that could potentially provide Digital Graphic Design and/or Visual Narrative services. Energy Alberta welcomed recommendations for candidates with relevant experience and expertise, along with any available portfolios or websites. Energy Alberta indicated it would reach out directly to potential candidates whose services align with their needs.
C-02917	December 4, 2025	Email	Energy Alberta acknowledged WLFN 459 attendance at the Nuclear Fundamentals led by Tracy Primeau, scheduled for January 13, 2026.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03275	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-03690	December 18, 2025	Email	Energy Alberta wished WLFN 459a happy holiday season and noted that their offices would be closed from December 19 to January 5, with a certain representative available via cell phone during the time.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

RECORD FOR WOODLAND CREE FIRST NATION (WCFN)

ID	Date	Interaction Type	Summary
C-01779	March 17, 2024	Email	Energy Alberta requested WCFN's availability for an in-person meeting on March 20, 2024, in Edmonton, Alberta.
C-01814	October 1, 2024	Email	Meeting to provide an update on the pre-submission IPD. Topics of discussion included waste management, water use, and WCFN's role in the Project.
C-01777	October 16, 2024	Email	Energy Alberta issued an introductory letter that included mapping files and an early information package outlining the Project's purpose, benefits, proposed site locations, Federal Impact Assessment Process timelines, engagement approach, and regulatory requirements.
C-01860	October 23, 2024	Phone	Energy Alberta asked if WCFN had reviewed the initial Project introduction package from October 16, 2024, and requested a meeting. WCFN responded that they had not reviewed it and would follow up to provide their availability for a meeting.
C-01861	October 28, 2024	Email	Energy Alberta followed up on its October 23, 2024 phone call regarding the Project introduction package and requested WCFN's availability for a meeting. WCFN inquired when the initial Project information package was provided and if it was part of the ACO process. Energy Alberta advised the initial Project information package had been provided on October 16, 2024 and that the Project was not part of the ACO process. WCFN and Energy Alberta arranged a meeting for November 6, 2024.
C-01862	October 28, 2024	Email	Energy Alberta sent a meeting invitation for November 6, 2024, to discuss the Project.
C-01815	October 31, 2024	Email	WCFN requested to postpone the November 9, 2024 meeting pending confirmation of their Chief and council's availability.
C-01865	November 1, 2024	Email	Energy Alberta emailed to confirm that the Introductory meeting with Woodland Cree First Nation regarding the Peace River Nuclear Energy Project had been canceled per the email received on October 31, 2024.
C-01780	December 13, 2024	Email	Energy Alberta provided its draft IPD for WCFN review and advised that it would be submitted to the IAAC in Q1 of 2025. Energy Alberta advised capacity funding was available for the Project and requested WCFN provide correspondence outlining how the funding would be used. Energy Alberta requested WCFN's availability for a meeting in January 2025.
C-01783	January 3, 2025	Email	Energy Alberta followed up on its request to meet in January 2025 to discuss the IPD and provided its availability for an in-person meeting in Peace River, Alberta on January 21 or 22, 2025. Energy Alberta requested information on how the proposed capacity funding would be used and provided a link to its updated website.
C-01782	January 7, 2025	Email	WCFN advised they would follow up to confirm their availability for a meeting on January 21 or 22, 2025.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01781	January 8, 2025	Email	WCFN advised they were not available for a meeting on January 21 or 22, 2025 and provided their availability for January 20, 2025. WCFN advised they could provide alternative dates for January and February 2025.
C-01785	January 10, 2025	Email	Energy Alberta advised it was not available for a meeting on January 20, 2025 and requested WCFN's availability later in January 2025 or in February 2025. Energy Alberta requested a half-day or full-day working session to discuss engagement and the IPD.
C-01786	January 10, 2025	Email	WCFN advised there had been a change in the calendar, so Chief and Council could no longer accommodate January 21 for a meeting.
C-01784	January 10, 2025	Email	WCFN requested Energy Alberta's preferred time, morning or afternoon, for the January 21, 2025 meeting.
C-01787	January 10, 2025	Email	Energy Alberta confirmed its availability for the January 21, 2025 meeting.
C-01788	January 13, 2025	Email	WCFN confirmed their availability and preferred time for the January 21, 2025 meeting.
C-01816	January 16, 2025	Email	Energy Alberta advised WCFN that it was no longer available to meet on January 21, 2025 and requested WCFN's availability on January 29, 2025. Energy Alberta provided a revised copy of the draft IPD with corrections to Section 2.3.2. and followed up on its requested for a half-day or full-day meeting in February 2025 to discuss the IPD.
C-01817	January 17, 2025	Email	WCFN advised they were not available for a meeting on January 29, 2025 and requested alternative dates.
C-01789	January 18, 2025	Email	WCFN confirmed their availability for a meeting on January 29, 2025.
C-01790	January 24, 2025	Email	WCFN requested confirmation and a meeting invitation for their January 29, 2025 meeting.
C-01798	January 27, 2025	Email	Energy Alberta advised they were unable to meet in person and provided a virtual meeting invitation for January 29, 2025.
C-01795	January 27, 2025	Email	Energy Alberta advised it would provide a presentation at the meeting.
C-01791	January 27, 2025	Email	Energy Alberta advised the January 29, 2025 meeting was confirmed and would follow up with a meeting invitation. Energy Alberta advised it would follow up regarding other engagement process-related items.
C-01818	January 27, 2025	Email	Energy Alberta requested WCFN's contact information and provided its contact information.
C-01796	January 28, 2025	Email	Energy Alberta provided an updated virtual meeting invitation for the Project information meeting on January 29, 2025 and advised it was unable to attend in person.
C-01819	January 28, 2025	Email	WCFN provided their contact information.
C-01793	January 28, 2025	In person meeting	Meeting to discuss the Project. Topics of discussion included nuclear power generation, data centre energy consumption, ongoing developments in the Peace River region, an invitation for

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
			WCFN to attend the SMR Canada conference with Energy Alberta, a potential in-community meeting, an MOU for the Project, letter of support, and economic benefits of the Project.
C-01794	January 29, 2025	In person meeting	Meeting to discuss water, water use, land selection and facility location, participation, capacity, cumulative effects, risk mitigation and equity. Energy Alberta committed to having a WCFN member join a field crew.
C-01792	January 29, 2025	Email	Energy Alberta followed up on the January 28, 2025 meeting and provided positive comments regarding the future of the relationship.
C-01821	January 30, 2025	Phone	Energy Alberta had a phone conversation with WCFN regarding the Letter of Interest (LOI) and other agreements.
C-01820	January 31, 2025	Email	Energy Alberta requested WCFN's availability for a meeting on February 5, 6, 10, 11 or 12, 2025 to discuss the Project. Energy Alberta provided a tentative agenda for the meeting and advised it would follow up to coordinate the next steps.
C-01866	January 31, 2025	Phone	Energy Alberta left a voicemail regarding the LOI and other agreements for consultation and reconciliation.
C-01822	February 4, 2025	Email	WCFN requested Energy Alberta's meeting availability and its availability for a phone conversation the following day.
C-01823	February 4, 2025	Email	Energy Alberta provided its availability for a phone conversation the following day.
C-01832	February 6, 2025	Phone	WCFN phoned to discuss the Project. Topics of discussion included an IPD follow-up and the consultation and engagement process.
C-01825	February 13, 2025	In person meeting	Meeting to discuss the Project and IPD input. Topics of discussion included wildlife, water use and riverbank stability, hunting, trapping, seismicity of the area, safety, Treaty days, ongoing and future engagement, agreements, fieldwork, and participation.
C-01824	February 21, 2025	Email	Energy Alberta followed up on the February 13, 2025 meeting and advised it planned to file a draft IPD in Q1 of 2025. Energy Alberta advised it was conducting preliminary land investigations and would provide updates as it progressed. Energy Alberta advised the IAAC would follow up with WCFN for an introduction to their process.
C-01827	February 27, 2025	Email	WCFN requested Energy Alberta's availability for a desktop review of the Project on March 5, 2025.
C-01826	February 28, 2025	Email	Energy Alberta confirmed it was available to meet for a desktop review on March 5, 2025 and requested a suggested meeting time.
C-01828	March 4, 2025	Email	WCFN requested confirmation of Energy Alberta's availability for the March 5, 2025 meeting.
C-01829	March 4, 2025	Email	Energy Alberta confirmed its availability to meet on March 5, 2025 and advised it would provide a meeting invitation.
C-01831	March 5, 2025	Online meeting	Meeting to review Woodland Cree Nation comments on Energy Alberta's Draft IPD.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-01830	March 6, 2025	Email	Energy Alberta provided a document summarizing the March 5 meeting, the IPD and Engagement Workbook. Energy Alberta advised it planned to file the IPD in March 2025 and would follow up the following week.
C-04223	March 25, 2025	Fieldwork	WCFN participated in Wildlife ARU and remote camera update field work.
C-01776	April 1, 2025	Email	Energy Alberta requested confirmation regarding WCFN's contact information to provide a draft MOU. WCFN advised the information was accurate.
C-01799	April 4, 2025	Email	Energy Alberta provided an introduction of its new Indigenous engagement representatives and advised it would submit the IPD to the IAAC later that day. Energy Alberta advised the application was expected to be posted by April 18, 2025 for public comment and it would provide updates and the website link once available. Energy Alberta provided its contact information and requested to be contacted for any Project inquiries.
C-03923	April 7, 2025	Email	Energy Alberta sent the Chief a draft MOU between the Nation and Energy Alberta. He welcomed any comments, suggestions, or revisions the Chief may wish to propose prior to formalizing the agreement. He offered to meet in person or virtually to walk through the MOU and answer any questions.
C-02045	April 8, 2025	Email	WCFN confirmed receipt of the Memorandum of Understanding and that it would be shared with the team for review. The representative advised they would be in touch with questions/comments.
C-02406	April 14, 2025	Email	Energy Alberta advised it had submitted the IPD for the Peace River Nuclear Power Project to the IAAC and the CNSC, which initiated a regulatory process. Energy Alberta advised of the 30-day comment period on April 14, 2025, with comments due by May 14, 2025. Energy Alberta provided hyperlinks to the IPD and the summary which were made available online in English and French. Hyperlinks to additional information about Energy Alberta was also provided.
C-01778	April 17, 2025	In person meeting	Meeting to discuss partnership opportunities, Project footprint, safety, landowner interest, parks, bison farms, greenhouses, construction projects, tourism, regulators, and partnership opportunities.
C-04224	April 23, 2025	Email	WCFN informed Energy Alberta that its team was working through the MOU and would send over a red line version. WCFN requested a word version of the document for editing.
C-01867	April 23, 2025	Phone	Energy Alberta left a voicemail with Woodland Cree Councillor regarding the translation of fact sheets and requested a call back.
C-02440	May 5, 2025	Email	Energy Alberta requested confirmation that the Nation had received the IPD for the Peace River Nuclear Power Project. Energy Alberta advised of key deadlines related to the comment period and a funding application deadline.
C-01837	May 13, 2025	Email	Energy Alberta followed up on its May 5, 2025 email regarding the IPD comment period. Energy Alberta advised previously provided information about the IAAC capacity funding application

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
			deadline was only for public and NGO participants and did not apply to Indigenous communities. Energy Alberta advised the start date for the TISG comment period had not been finalized and that IAAC would notify them as to when it would begin.
C-01836	May 13, 2025	Email	WCFN confirmed receipt of Energy Alberta's May 13, 2025 email regarding the IPD comment period deadline correction.
C-01835	May 13, 2025	Email	Energy Alberta confirmed receipt of WCFN's May 13, 2025 email regarding the IPD comment period deadline correction.
C-01802	May 13, 2025	Email	Energy Alberta provided a Project capacity funding letter noting it was aware the IAAC had offered capacity funding to Indigenous communities during the planning phase of the Project's IA and that it was prepared to provide additional capacity funding to support the communities in their review of the IPD. The letter requested Energy Alberta be contacted if the communities required additional funding and provided its contact information. The letter requested communities provide information on how the additional funds would be used. The letter outlined the purpose of the Project and its guiding principles and advised Energy Alberta was available for further discussion.
C-02527	May 13, 2025	Email	Energy Alberta emailed to correct information it had provided in a previous email related to IAAC grant funding during the planning phase and the target date for the start of the comment period on the draft TISGs. Energy Alberta indicated it would welcome an opportunity to schedule an in-person or virtual meeting to discuss the Project.
C-01805	May 14, 2025	In person meeting	WCFN met with Energy Alberta and provided a letter in response to the filing of the IPD. The letter acknowledged the filing of the IPD for environmental assessment and recognized it as an important milestone for Energy Alberta. WCFN raised following interests through the letter: ■ Establish a formal and fully-funded process. ■ Significant potential impacts of the Project on their land and their rights. ■ Creation of an environmental working group funded by Energy Alberta. ■ Capacity funding for future studies to gather Indigenous Knowledge, for a community-led consultation and planning process. ■ Partnership agreement WCFN indicated they had submitted to the IAAC a detailed response on the IPD and had requested a pause in the IA process to establish an agreement with EA.
C-01806	May 15, 2025	Email	WCFN provided a digital copy of the letter they provided to Energy Alberta in person on May 14, 2025.
C-01846	May 22, 2025	Phone	Energy Alberta phoned WCFN to discuss capacity funding related to the Project.
C-02597	May 23, 2025	Email	Energy Alberta provided additional information regarding its offer of capacity funding including relevant forms. Energy Alberta indicated its funding was intended to support the Nations efforts

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
			in reviewing this current phase of the Impact Assessment process and specifically the Planning Phase documents within the timeframe specified by the IAAC. Energy Alberta requested the Nation complete and return the attached documents by May 30, 2025.
C-03925	May 23, 2025	Email	Woodland Cree First Nation indicated it was reviewing the capacity funding Application and would respond the following week.
C-01838	May 26, 2025	Email	Energy Alberta advised it would provide event sponsorship for an upcoming WCFN community event and inquired about the payment process.
C-03926	May 26, 2025	Email	Energy Alberta advised that it was looking at being in the Peace River area the following week and wondered if WCFN wanted to meet with Energy Alberta in person. Energy Alberta provided dates and locations and requested confirmation of WCFN's interest meeting with Energy Alberta.
C-03927	May 28, 2025	Email	WCFN indicated that scheduling would depend on agenda and attendees and inquired if this be a technical session or a leadership session.
C-01810	May 29, 2025	Email	WCFN followed up on their inquiry regarding the intent of the meeting and provided their availability for the meeting.
C-01809	May 29, 2025	Email	Energy Alberta advised it was not available for a meeting on June 2 or 9, 2025 and inquired about other available dates. Energy Alberta noted the meeting was to discuss the MOU and next steps to advance the relationship and engagement with WCFN. Energy Alberta advised it could collaborate with WCFN on refining the agenda once a meeting date was established.
C-03928	May 29, 2025	Email	WCFN indicated that June 2 or 9, 2025 looked best for the Nation to meet.
C-03929	May 29, 2025	Email	Energy Alberta indicated that those dates were no longer available. Energy Alberta indicated that it had an Introductory meeting with some members of Woodland Cree First Nation on January 29, 2025. The current proposed meeting was to introduce its new engagement team members to the Nation and to follow-up on the MOU sent by its CEO & President to the Chief on April 7, 2025. Energy Alberta suggested the meeting could be used to discuss the next steps needed to advance its relationship and engagement with the Nation.
C-01841	May 30, 2025	Email	Energy Alberta followed-up to its May 26, 2025 email regarding event sponsorship.
C-01808	June 2, 2025	Email	WCFN advised they would pause their response to the MOU and the capacity funding application until it updated the process documentation. WCFN advised it would follow up with a copy of the document and was open to informal meetings. WCFN provided an invitation to Energy Alberta to their community event on June 20 to 22, 2025 and noted they would follow up on an outstanding invoice from a site visit.
C-01839	June 2, 2025	Email	Energy Alberta advised it would attend the community event on June 20, 2025, and that it had not heard from WCFN regarding payment for its event sponsorship and provided an EFT form for payment processing. Energy Alberta requested an invoice for the outstanding payment and inquired as to whether it could provide a logo for the event.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-04225	June 2, 2025	Email	WCFN indicated it would send paperwork to its finance team for processing of an invoice.
C-04226	June 2, 2025	Email	Energy Alberta provided logos for the Woodland Cree Treaty Days program.
C-04227	June 2, 2025	Email	WCFN requested contact information for Energy Alberta attendees at Woodland Cree Treaty Days.
C-01840	June 2, 2025	Email	WCFN advised they would provide an itinerary to their community event and provided an invitation to the event. WCFN inquired as to whether a WCFN representative had been in touch regarding payment information.
C-03930	June 2, 2025	Email	WCFN advised that it had a team working on a revised approach to the MOU which would include more terms around the relationship and process and also contemplates capacity funding. WCFN mentioned the recent meeting between the Chief and Energy Alberta's CEO & President when a letter was shared. WCFN indicated it was open to informal meetings and informed Energy Alberta of its Treaty Days on June 20 to 22, which would be an opportunity to meet folks and get to know the community. WCFN mentioned an invoice that was pending from a site visit by one of its members.
C-03931	June 2, 2025	Email	Energy Alberta provided an EFT form for payment of its sponsorship at the Woodland Cree Treaty Days.
C-01847	June 3, 2025	Email	Energy Alberta followed up on the June 2, 2025 email.
C-01842	June 5, 2025	Phone	Energy Alberta advised it would review the letter and follow up.
C-01843	June 5, 2025	Email	WCFN provided a digital copy of the letter that was provided in person on May 14, 2025. WCFN advised it would follow up with the draft document the following week.
C-01849	June 9, 2025	Email	WCFN requested a donation for a community project regarding playground repairs.
C-01845	June 9, 2025	Email	WCFN provided a follow-up to their request for a donation for a community project regarding playground repairs.
C-03932	June 13, 2025	Email	Energy Alberta provided a reminder of its initial capacity funding offer sent to the Nation on May 23, 2025. Energy Alberta provided copies of its capacity funding documents and requested that if WCFN was interested in Energy Alberta's offer of some initial capacity funding, that they return the completed documents at their earliest convenience.
C-01844	June 17, 2025	Email	Energy Alberta advised it was unable to provide a donation for the community project regarding playground repairs and inquired as to whether they wanted it to provide a message to the organizers.
C-01848	June 20, 2025	Community Event	Energy Alberta representatives attended Woodland Cree's Treaty Days. Conversations with businesses and individuals in attendance involved Project details, where the Project was at in the regulatory phase and employment and procurement opportunities. Energy Alberta encouraged people to register on its website for procurement and job.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02554	June 25, 2025	Email	Energy Alberta advised that the IAAC and the CNSC had initiated a comment period for the Planning Phase documents of the Peace River Nuclear Power Project. Energy Alberta encouraged the Nation to review and provide feedback on the draft Integrated Tailored Impact Statement Guidelines and the draft Indigenous Engagement and Partnership Plan. Energy Alberta indicated it had submitted a response to the Summary of Issues on June 23, 2025, which would be posted to IAAC's registry. Energy Alberta indicated that a meeting could be scheduled to address any questions regarding the documents.
C-03933	June 25, 2025	Email	Energy Alberta received an out of office message indicating that WCFN's consultation contact would be away from the office until June 25. WCFN's consultation contact provided a cell number for urgent matters.
C-03934	June 27, 2025	Email	Energy Alberta thanked WCFN for hosting its team members at Treaty Days and followed up on a conversation had that indicated some members of leadership may be in Calgary for Stampede.
C-01858	June 30, 2025	Phone	Energy Alberta had a phone conversation with Woodland Cree. Energy Alberta followed-up with an email that summarized the discussion and the potential meeting with Chief and Council, and possibly technical staff, while in Calgary to attend Stampede. Energy Alberta requested potential dates and times that would work so that arrangements for a conference room could be made.
C-03935	July 1, 2025	Email	Energy Alberta followed up on a phone conversation had the day prior regarding WCFN joining some Energy Alberta team members at Stampede. Energy Alberta indicated that it would be open to a meeting with Technical Staff to review WCFN's draft Agreement Document and some of Energy Alberta's upcoming studies to understand the Nation's potential interest in participating in the studies. Energy Alberta also clarified that its initial offer of capacity funding sent to the Nation on May 23, 2025, was intended to support the Nation's efforts in reviewing Impact Assessment Planning Phase documents and acceptance of that funding would not preclude its ongoing conversations including Agreement and potential funding related to ongoing work related to the Project.
C-04228	July 7, 2025	Phone	Phone conversation when Energy Alberta and WCFN discussed an in-person meeting the last week of July / first week of August, and their members attendance at Stampede.
C-04222	July 9, 2025	Phone	Phone conversation when Energy Alberta and WCFN discussed Stampede and the potential meetings in Calgary. WCFN advised they would be asking IAAC for an extension related to the current comment period.
C-02061	July 16, 2025	Email	Energy Alberta emailed WCFN indicating it was seeking Indigenous knowledge for the Impact Statement of the Peace River Nuclear Power Project through participation in summer field data collection programs. The email detailed planned baseline studies, including a River Channel Depth Survey, Water Intake Siting Inspection, and Wildlife Survey, with specific objectives, durations, participant limits, and requirements for each study. Energy Alberta indicated an

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
			honorarium and travel reimbursement would be provided. Energy Alberta requested WCFN indicate its interest by July 23, 2025.
C-01852	July 16, 2025	Email	WCFN provided an automated response to the July 16, 2025 fieldwork notification.
C-01854	July 23, 2025	Email	WCFN followed up on Energy Alberta's email providing Project baseline studies information advising their office was closed for the week. WCFN requested Energy Alberta's availability for a meeting in August 2025 to discuss their participation in the baseline studies, consultation framework, and a process for TLRU studies, data creation, and data sharing.
C-01853	July 24, 2025	Email	Energy Alberta advised the baseline studies were early data gathering activities and it intended to continue working with WCFN to develop and workplan and engagement program. Energy Alberta advised it would follow up with dates for the water intake siting study and inquired as to whether WCFN wanted to meet virtually or in person.
C-01856	July 28, 2025	Email	WCFN advised their participation in the Project was a necessary aspect of its successful development and reiterated their request for a pause in the baseline studies until they could confirm their participation. WCFN requested a virtual meeting and an in-person follow-up to discuss the Project's consultation and engagement efforts.
C-01855	July 30, 2025	Phone	Energy Alberta and WCFN had a phone conversation regarding their July 28, 2025 email. Energy Alberta provided an email that summarized the discussion that advised in lieu of pausing the baseline studies, WCFN representatives could participate in the river channel depth survey and noted it would provide potential dates. Energy Alberta requested a copy of the draft relationship agreement and advised it was interested in developing a workplan with WCFN to understand their interest and plan their participation in various studies. Energy Alberta advised the acceptance of the capacity funding would not preclude ongoing engagement, including the agreement and potential funding related to ongoing Project work. WCFN advised they would provide potential dates for the virtual meeting.
C-01857	July 30, 2025	Email	Energy Alberta provided a summary of its phone conversation with WCFN on July 30, 2025.
C-04232	August 5, 2025	Email	Energy Alberta clarified the roles of the people included in the email exchange and WCFN thanked Energy Alberta for the clarification.
C-02075	August 11, 2025	Email	In follow-up to an Energy Alberta email dated July 30, 2025 where Energy Alberta noted that in lieu of pausing the field program, Energy Alberta offer an opportunity to have WCFN join Energy Alberta on the water so that the Nation could share its use of the river and areas that are important to the community. Energy Alberta provided three options for the day on the water and requested a response from WCFN to confirm the preferred date.
C-02076	August 11, 2025	Email	Energy Alberta received an out of office message in response to its August 11, 2025 email.
C-00341	August 18, 2025	Email	Energy Alberta informed that it would submit a formal request to the IAAC, requesting a Timeline Suspension for the Impact Assessment process of 3 to 6 months. Energy Alberta indicated during

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
			the pause it would continue to seek opportunities to meet with the Nation and would continue to progress its essential Project planning work including: ■ 2025 Summer Fieldwork Program ■ Water Intake Siting Inspection ■ Involvement of Nations and communities, in the planning and preparations for future environmental and socio-economic studies ■ An ongoing review and refinement of technology
C-04233	August 19, 2025	Email	Energy Alberta and WCFN had a phone conversation and Energy Alberta followed up by email with a summary of the conversation. Energy Alberta indicated it looked forward to hearing from WCFN regarding dates for a day on the water, the water intake site visit and the wildlife camera retrieval. Energy Alberta requested information on WCFN's security company.
C-02073	August 21, 2025	Email	In response to the August 19 email, WCFN advised she would connect with the lands staff after an office closure due to community losses. She aimed to have updates soon.
C-04234	August 27, 2025	Email	WCFN indicated it had circulated the email containing information on dates for Woodland Cree First Nation water tour on the Peace River and that they still had concerns linked to timelines and how studies would tie into the overall consultation approach. WCFN indicated she would be speaking to the Chief and would likely have a response by the end of the week. She still hoped to have someone to participate in the wildlife cam retrievals and wondered about the possibility of moving that into the following week.
C-01859	August 28, 2025	Email	Energy Alberta followed up on its August 18, 2025 notification regarding a request for pause in the regulatory timeline, acknowledged WCFN's prior engagement on the Project, and expressed its interest in ongoing dialogue during the pause period. Energy Alberta provided information and an invitation to its September 24, 2025 Project siting workshop and advised that participants would be provided information regarding the criteria for site selection during the workshop and an information package in advance of the workshop. Energy Alberta provided information about the workshop's arrangements and advised an honorarium would be provided to all participants. Energy Alberta provided information about four planned public engagement sessions from September 22 to 25, 2025 in Peace River, Webberville, Grimshaw, and Manning, Alberta respectively and provided a website link to register for the sessions.
C-02083	September 29, 2025	Email	Energy Alberta acknowledged September 30 as the National Day for Truth and Reconciliation and Orange Shirt Day.
C-01990	October 21, 2025	Email	Energy Alberta provided an update on its progress in selecting reactor technology for the Peace River Nuclear Power Project, prioritizing safety and compliance with Canadian standards.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02094	October 28, 2025	Email	Energy Alberta received a letter from the Chief of Woodland Cree First Nation expressing concern including appropriate engagement, lack of funding and capacity support, and proposed a series of next steps that would establish a mutually respectful relationship.
C-02085	October 28, 2025	Email	Energy Alberta acknowledge receipt of the Chief's letter sent by email on October 28, 2025.
C-02920	November 3, 2025	Email	Energy Alberta provided its response to the letter from the Chief, dated October 10, 2025. Energy Alberta indicated it would contact the consultation contact the following day to begin working on the next steps noted in the letter. Energy Alberta introduced the Nation to a new member of its Indigenous Engagement team.
C-02140	November 10, 2025	Email	Energy Alberta introduced a new member on its Indigenous Engagement team and requested that she be included in all future communications. Energy Alberta provided links to some of its recent Facebook posts for sharing within the Nation's community.
C-02923	November 10, 2025	Email	WCFN indicated that it looked forward to meeting with the Energy Alberta Engagement team, that there was much work to be one within the timeline of the pause to ensure processes and people in place to engage in a way that builds mutually beneficial outcomes. WCFN indicated it would coordinate calendars Energy Alberta to have an introductory session.
C-04235	November 10, 2025	Phone	Energy Alberta and WCFN had a phone conversation about the upcoming election on November 17. WCFN indicated it was resulting in various staffing shortages within the Nation as staff has stepped down to run for various positions. WCFN advised of its recent Election Code which added one new seat to Council. In terms of next steps related to EA's November 3 letter, WCFN indicated they would schedule a meeting soon to start working on the workplan and Agreement. Energy Alberta provided its available dates. With the potential for a new Council, WCFN suggested a meeting in the New Year, after we have been able to make some progress on the workplan and Agreement and we have something to share with them beyond just a Project update. WCFN indicated that its legal counsel was currently reviewing the lates edits to the Process Agreement.
C-02445	November 11, 2025	Email	Energy Alberta shared possible dates for meeting with Woodland Cree First Nation and requested confirmation of who from the Nation would be attending.
C-02443	November 12, 2025	Email	Woodland Cree First Nation requested additional options for meeting dates and time.
	November 14, 2025	Email	Energy Alberta sent a Teams meeting invite for November 18, 2025 to WCFN representatives. Energy Alberta proposed an agenda that included: ■ Discuss/review EA's proposed edits to the Process Agreement, with a goal of formalizing the Agreement before year's end. ■ Begin development of a workplan and capacity funding budget that clearly defines WCFN's participation in the detailed impact assessment studies, anticipated to commence in early 2026.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02442	November 17, 2025	Email	Woodland Cree First Nation representatives confirmed attendance for the November 18, 2025 meeting.
C-03237	November 18, 2025	Online meeting	The discussion covered Project timelines, engagement opportunities, and regulatory phases. WCFN emphasized the need for longer lead times for engagement and highlighted the importance of social impacts on treaty rights. Energy Alberta introduced the Project. Concerns about water usage and economic impacts were raised, with a focus on workforce opportunities. Financing strategies were outlined, relying on private capital and federal funding. The need for alignment in workplans and a table of studies for review was also mentioned, along with plans for future meetings to address these topics.
C-02446	November 18, 2025	Email	Presentation slides from the meeting were sent to the WCFN consultation representative.
C-02935	November 19, 2025	Email	Energy Alberta followed up to see if a date for the next meeting could be scheduled. Energy Alberta suggested an in-person meeting with sufficient time to work through the development of a workplan. Energy Alberta inquired about potential dates that would work for the Nation.
C-02938	November 25, 2025	Email	WCFN indicated that its team would be meeting with the new Council that week and would get back to Energy Alberta by end of day on November 27, 2025 with an agenda for the next meeting. WCFN inquired about potential meeting dates the first week of December.
C-02939	November 25, 2025	Email	Energy Alberta thanked WCFN for the update and provided three dates the first week of December for the next meeting.
C-02755	November 27, 2025	Email	WCFN submitted a Christmas Hamper donation request.
C-02940	December 1, 2025	Email	Energy Alberta followed up regarding the dates provided for the first week of December and indicated that December 3 was no longer available. Energy Alberta wondered if December 4 was still a possibility or if it should look for alternate dates.
C-04491	December 2, 2025	Email	Energy Alberta shared information regarding a half-day workshop on the Fundamentals of Nuclear Energy, led by prominent Indigenous figure in the nuclear sector. Energy Alberta shared that the workshop aimed to enhance community awareness and education about nuclear energy among Indigenous Nations and communities. Energy Alberta shared that the workshop would cover topics such as the science and safety of nuclear energy, its role in Canada's clean energy future, regulatory frameworks, and Indigenous perspectives in nuclear development. Energy Alberta shared that the event was scheduled for January 13, 2026, in Peace River and invited one member to attend. Energy Alberta requested an RSVP by December 19, 2025.
C-02915	December 4, 2025	Email	Energy Alberta is looking to identify Indigenous businesses or individuals that provide Digital Graphic Design and/or Visual Narrative services. Recommendations for contacts with relevant experience and expertise are requested, along with any available portfolios or websites. The aim is to explore economic opportunities for members of the Nation.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-02972	December 4, 2025	Email	The WCFN consultation contact indicated that they had commenced work to scope out a work plan based on what they had learned in the November 18, 2025 meeting. She indicated that they should have something ready in December and suggested a meeting in January. She indicated that due to the volume of files that Council was working on, she had not yet had an opportunity to review Energy Alberta's Project or status with them, and anticipated doing that the week of December 8, 2025
C-02973	December 4, 2025	Email	Energy Alberta thanked the WCFN consultation contact for the update and suggested booking a meeting date in January, so that both the Nation and Energy Alberta have a date to work towards. Energy Alberta inquired if there were dates in January that would work best for her. Energy Alberta offered its support, either as the technical team worked on the scope for the workplan, or in her Project update to Council.
C-03002	December 4, 2025	Email	The WCFN consultation contact suggested meeting dates after January 16, 2026, after she had returned to work.
C-03003	December 4, 2025	Email	Energy Alberta indicated it would check for possible date in the new year and get back to the Nation.
C-03276	December 9, 2025	Email	Energy Alberta provided an update on its ongoing review and refinement of technology considerations for its proposed Peace River Nuclear Power Project. Energy Alberta advised it was currently considering more than one option for the nuclear reactor portion of its proposed Project, and all proposed nuclear power projects in Canada must follow a regulatory process that is divided into stages of project development based on a series of required approvals. Energy Alberta advised it was early in the process of applying for the first set of regulatory approvals, which includes the Impact Assessment and the License to Prepare Site. Selection of a specific nuclear reactor technology and detailed design is not required for these early-stage approvals. To assess potential impacts, Energy Alberta advised it would use a Plant Parameter Envelope (PPE), a typical approach used in Canada for nuclear projects and that rather than focusing on a single technology, this method looks at ranges for key features such as cooling water needs, building size and land area that cover what different reactor types could require. Energy Alberta provided links to the two potential reactors under consideration: the CANDU Monark and the Westinghouse AP1000.
C-04015	December 12, 2025	Email	Energy Alberta provided three potential dates and meeting times and asked that Woodland Cree First Nation indicate its preference.
C-03688	December 18, 2025	Email	Energy Alberta advised it would contribute to Woodland Cree's Christmas Hampers. An EFT form was attached for payment processing.
C-03689	December 18, 2025	Email	WCFN expressed appreciation for the Christmas donation.
C-03694	December 18, 2025	Email	Energy Alberta requested the EFT form for its contribution to Woodland Cree's Christmas Hampers.

Record of Indigenous Engagement and Communications for the period of January 1, 2024 to December 31, 2025

ID	Date	Interaction Type	Summary
C-03695	December 18, 2025	Email	Energy Alberta wished the Nation a happy holiday season, noting their office closure from December 19 to January 5 and that an Energy Alberta team member would available via cell phone during this time.
C-03707	December 18, 2025	Email	Woodland Cree provided EFT form as requested.
C-03776	December 19, 2025	Email	Energy Alberta indicated that funds had been sent that day for Woodland Cree's Christmas Hampers.
C-03780	December 19, 2025	Email	Woodland Cree First Nation acknowledged the December 19, 2025 email from Energy Alberta.

Appendix B: Stakeholder Engagement and Communications Records

Record of Stakeholder Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Town of Peace River

ID	Date	Interaction Type	Summary
C-01686	June 9, 2025	In-person meeting	Energy Alberta presented a Project overview to the Town of Peace River, including two site options, Project stages, nuclear waste management, regulatory oversight, and engagement phases. The town's interests included: questions regarding the capacity of the cooling ponds; the amount of land required for the Project; the regulatory oversight and process for decommissioning; and Energy Alberta's openness to meeting with other organizations requesting engagement.
C-03639	December 18, 2025	Online meeting	Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. Discussion centered around further details on the socio-economic working group. Energy Alberta advised that it would be presenting the concept and seeking a decision from council on whether to appoint a representative at their upcoming delegation in January.

Northern Sunrise County

ID	Date	Interaction Type	Summary
C-01100	June 10, 2025	In-person meeting	Energy presented a Project overview to the Northern Sunrise County, covering two site options, Project stages, nuclear waste management, regulatory oversight, and engagement phases. Following the presentation, questions and comments were raised on: ■ on-site storage pools; ■ site selection and timing; ■ potential for hydrogen and medical isotope production; ■ who will operate the facility; ■ powerline scope, regulatory process, and power costs; ■ data centers and whether the Project could support them in the region; ■ potential impacts to the grid; and ■ public perception.
C-02844	December 2, 2025	Online meeting	Energy Alberta met with staff representatives from the Northern Sunrise County to provide feedback from the Fall 2025 engagement sessions and discuss next steps in collaboration with Northern Sunrise County. Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. Northern Sunrise County expressed an interest in participating and also discussed infrastructure capacity and potential provincial funding for community growth to accommodate the Project.

Record of Stakeholder Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

County of Northern Lights

ID	Date	Interaction Type	Summary
C-00383	June 24, 2025	In-person meeting	Energy Alberta attended a joint meeting with the County of Northern Lights and the Town of Manning, and presented a Project overview, covering two site options, Project stages, nuclear waste management, regulatory oversight, and engagement phases. Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. Following the presentation, questions and comments were raised on: ■ Project location and site considerations; ■ permitting and municipal involvement; ■ infrastructure and community impacts; ■ technology considerations; ■ Project funding; ■ power distribution, including cost and ratepayer impacts; and ■ environmental assessment and safety considerations.

Town of Manning

ID	Date	Interaction Type	Summary
C-00383	June 24, 2025	In-person meeting	Energy Alberta attended a joint meeting with the County of Northern Lights and the Town of Manning, and presented a Project overview, covering two site options, Project stages, nuclear waste management, regulatory oversight, and engagement phases. Following the presentation, questions and comments were raised on: ■ Project location and site considerations; ■ permitting and municipal involvement; ■ infrastructure and community impacts; ■ technology considerations; ■ Project funding; ■ power distribution, including cost and ratepayer impacts; and ■ environmental assessment and safety considerations.
C-02845	December 2, 2025	Online meeting	Energy Alberta met with the Chief Administrative Officer (CAO) from the Town of Manning to provide feedback from the Fall 2025 engagement sessions and discuss next steps in collaboration with the Town of Manning. Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. The CAO expressed an interest in participating in both the working group and quarterly virtual meetings with CAOs from the region.

Record of Stakeholder Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Town of Grimshaw

ID	Date	Interaction Type	Summary
C-00695	June 25, 2025	In-person meeting	Energy Alberta presented a Project overview to the Town of Grimshaw, covering two site options, Project stages, nuclear waste management, regulatory oversight, and engagement phases. Following the presentation, questions and comments were raised on: ■ source of uranium and how it would be transported; ■ interest in participating in workshops and hosting community events; ■ requested quarterly updates on the Project.
C-02885	December 3, 2025	Online Meeting	Energy Alberta met with the new Chief Administrative Officer (CAO) of Grimshaw to discuss the proposed Project overview, site selection, regulatory oversight, stakeholder engagement, nuclear fundamentals, impact assessment, socio-economic assessment, and next steps in collaboration. Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. The CAO expressed interest in quarterly updates with other CAOs and requested a one-page summary regarding the concept of a quarterly meeting with local municipalities and service providers.

M.D. of Peace No. 135

ID	Date	Interaction Type	Summary
C-01067	June 10, 2025	In-person meeting	Energy Alberta presented a Project overview to the M.D. of Peace, covering two site options, Project stages, nuclear waste management, regulatory oversight, and engagement phases. Following the presentation, questions and comments were raised on: ■ wildfire mitigation considerations as part of the Impact Assessment; ■ Impact Assessment Agency of Canada's (IAAC's) public comment period for input into the draft Integrated Tailored Impact Statement Guidelines (TISGs); ■ training and employment opportunities and transferability of skills.
C-03250	December 5, 2025	Online meeting	Energy Alberta met with the Chief Administrative Officer (CAO) from the M.D. of Peace to provide feedback from the Fall 2025 engagement sessions and discuss next steps in collaboration with the M.D. of Peace. Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. The CAO expressed an interest in participating in both the working group and quarterly virtual meetings with CAOs from the region. Discussion also included the status of the regulatory pause and the work that remains ongoing throughout the pause.

Record of Stakeholder Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

M.D. of Smoky River No. 130

ID	Date	Interaction Type	Summary
C-03255	December 9, 2025	Online meeting	Energy Alberta met with the Chief Administrative Officer (CAO) of the M.D. of Smoky River to discuss the proposed Project overview, site selection, regulatory oversight, stakeholder engagement, nuclear fundamentals, impact assessment, socio-economic assessment, and next steps in collaboration. Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. The CAO expressed interest in quarterly updates with other CAOs and requested a one-page summary regarding the concept of a quarterly meeting with local municipalities and service providers. Discussion also included power grid capacity and new powerline infrastructure, jobs and training opportunities and potential grant funding, workforce accommodation plans, technology selection, and whether jobs are technology specific.

Town of Fairview

ID	Date	Interaction Type	Summary
C-05029	December 10, 2025	Online meeting	Energy Alberta met with the Chief Administrative Officer (CAO) of the Town of Fairview to discuss the proposed Project overview, site selection, regulatory oversight, stakeholder engagement, nuclear fundamentals, impact assessment, socio-economic assessment, and next steps in collaboration. Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. The CAO expressed interest in quarterly updates with other CAOs and requested a one-page summary regarding the concept of a quarterly meeting with local municipalities and service providers. Discussion also included the number of jobs, water use at the facility, the closure of the Fairview Campus, and whether the campus could be useful for the Project in the future, and the workforce accommodation plan.

Town of Falher

ID	Date	Interaction Type	Summary
C-05030	December 8, 2025	Online meeting	Energy Alberta met with the Chief Administrative Officer (CAO) of the Town of Falher to discuss the proposed Project overview, site selection, regulatory oversight, stakeholder engagement, nuclear fundamentals, impact assessment, socio-economic assessment, and next steps in collaboration. Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. The CAO expressed interest in quarterly updates with other CAOs and requested a one-page summary regarding the concept of a quarterly meeting with local municipalities and service providers. Discussion also included water withdrawal at the facility and the location of the proposed deep geological repository.

Record of Stakeholder Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Birch Hills County

ID	Date	Interaction Type	Summary
C-05032	December 11, 2025	Online meeting	Energy Alberta met with the Chief Administrative Officer (CAO) and Reeve of Birch Hills County to discuss the proposed Project overview, site selection, regulatory oversight, stakeholder engagement, nuclear fundamentals, impact assessment, socio-economic assessment, and next steps in collaboration. Energy Alberta introduced the idea of forming a regional socio-economic working group with representatives from local municipalities within a 100-km radius of the proposed site locations. Discussion also included siting and land acquisition, technology selection, regional power demand and Alberta Electric System Operator (AESO) regulatory process, water requirements, facility operator identification and how Birch Hills County could be impacted given their relative distance from the proposed sites.

Village of Nampa

ID	Date	Interaction Type	Summary
C-02871	November 25, 2025	Email	Energy Alberta reached out to the Village of Nampa in November 2025 to introduce the Project. As of the time of submission, Energy Alberta has booked a meeting to present to the Village of Nampa council on April 21, 2026 as a formal delegation.

Record of Stakeholder Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Peace Regional Energy Committee (PREC)

ID	Date	Interaction Type	Summary
C-01401	January 16, 2025	Online meeting	Energy Alberta met virtually with the Peace Regional Energy Committee (PREC) to provide an update on the Project, including a meeting with municipalities, chambers of commerce and economic development associations on January 29, 2025. Energy Alberta also provided notice of its March 11, 2025 open house and an update on timing for the filing of the Initial Project Description (IPD).
C-01390	February 13, 2025	Online meeting	Energy Alberta met virtually with the PREC to discuss the March 11, 2025 open house, an update on Indigenous engagement efforts, and the filing of the IPD.
C-01391	March 13, 2025	Online meeting	Energy Alberta met virtually with the PREC to discuss the Project, open house, future public engagement, Impact Assessment Process Participant Funding, Impact Assessment Agency of Canada (IAAC) and Canadian Nuclear Safety Commission (CNSC), Indigenous engagement, and future open house. Further discussion included participant funding, water use at the facility and connecting with the Mighty Peace Watershed Alliance.
C-01395	April 7, 2025	Online meeting	Energy Alberta met virtually with the PREC to discuss the IPD, Impact Assessment process, Indigenous engagement, IAAC feedback, CNSC approval, small modular reactor technology, transmission lines, media and communications strategy, and committee goals. PREC raised a concern regarding Project misinformation in the community.
C-01392	May 9, 2025	Online meeting	Energy Alberta met virtually with the PREC to discuss engagement timeline, recommendations for third-party nuclear experts to engage, direct engagement with local governments, infrastructure and service development, and anticipated tax revenue structures for municipalities.

Mighty Peace Watershed Alliance

ID	Date	Interaction Type	Summary
C-02704	November 21, 2025	Online meeting	Energy Alberta met virtually with the Mighty Peace Watershed Alliance to present Project scope, site locations, and discuss regulatory oversight, Project stages, and engagement phases. The team provided an overview of nuclear energy, including waste management, Impact Assessment, and upcoming studies, while addressing questions on reactor operation and long-term storage responsibilities. Discussion following the presentation included reactor technology, safety considerations such as seismic risk, resource requirements like water usage, and differences in fuel use. Long-term waste storage was noted as a federal responsibility, with national organizations leading site identification.

Record of Stakeholder Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Northwestern Polytechnic

ID	Date	Interaction Type	Summary
C-05082	November 28, 2025	Online meeting	Energy Alberta met with Northwestern Polytechnic to introduce Energy Alberta's proposed Peace River Nuclear Power Project and gather information regarding the announced closing of the Northwestern Polytechnic Fairview Campus.

Peace River & District Chamber of Commerce

ID	Date	Interaction Type	Summary
C-01412	January 29, 2025	Online meeting	Energy Alberta provided a Project introduction to municipalities, chambers of commerce, and economic development association. Discussion included technology selection, workforce expectations, facility footprint compared to wind and solar, types of studies involved in an Impact Assessment, and how participant organizations can support and participate in the process.
C-01424	March 11, 2025	In-person meeting	Energy Alberta presented in person to the Peace River & District Chamber of Commerce. Discussion included a Project overview, the Impact Assessment process, the March 11, 2025 open house, future engagement activities, employment opportunities, water usage, Project location, federal support, Project timelines, and socio-economic issues.

Appendix C: Landowner Engagement and Communications Records

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
Multiple	March 5, 2025	In person/Phone	Energy Alberta provided landowners with notification of March 11, 2025 open house.
C-01181	March 24, 2025	In person	Energy Alberta representative met with landowner to discuss the Project and the geotechnical well program. Landowner requested information on what else needed to be completed on site. Energy Alberta advised that drilling, well development, and testing was required. Landowner inquired about water in the wells and whether that would affect construction and inquired about additional factors that could affect the construction site. Energy Alberta contractor advised that it was too early to make a conclusion regarding the feasibility of the construction site and referred them to Energy Alberta for additional information.
C-01238	March 27, 2025	In person	Energy Alberta representative met with landowner to discuss the geotechnical field program. Energy Alberta representative discussed access route and timeline, access road conditions, and recommendations for an alternate access route, and site schedule. Landowner raised the following interests: ■ Advised they could grade the access route once the temperature increased and personnel were off-site. ■ Inquired about the completion timeline for the geotechnical field work. Energy Alberta contractor advised that the Project fieldwork would be completed shortly, and all equipment and rentals would be gone by March 31, 2025. ■ Requested information on when Energy Alberta contractor would return. Energy Alberta contractor advised it planned to return in summer or fall 2025 and noted the visit had not been scheduled.
C-01234, C-01232	April 13, 2025	Email	Landowner requested clarity on why the Project's funding source was misrepresented to the public. Landowner advised that they were located near the proposed Project site in Weberville, Alberta, and advised that they were not contacted about the Project's effects on their property or farming business. Energy Alberta provided information about the Project funding related to land use and ownership of a potential Project site. Energy Alberta provided information about the Project's impact to infrastructure in Peace River, Alberta and how the regulatory process included oversight of the Project's impacts to local communities. Energy Alberta advised mitigation measures would be identified and proposed wherever necessary. Energy Alberta provided a website link for subscription to receive updates about the Project.
Multiple	April 13 to 14, 21 2025	Email, mail	Energy Alberta provided landowners with a notification letter regarding the submission of the Initial Project Description (IPD). The letter provided a link to the IPD and advised on the timeline for the public comment period.
C-01241	April 30, 2025	Phone	Energy Alberta spoke with landowner by phone, who indicated they support the Project and would register on the procurement registry.
C-01179	May 2, 2025	Email	Landowner emailed Energy Alberta to indicate their opposition to the Project. Landowner advised their area was a farming community with over 100 years of history.
C-01203	May 7, 2025	Phone	Energy Alberta spoke with landowner by phone. Discussion included Project timeline, need for four vs. two reactor units, impact on cost of electricity, and local employment and training opportunities.

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
C-01178	May 15, 2025	Email	Energy Alberta responded to landowner email, advising that the Project was in its initial phases of the Impact Assessment Agency of Canada's (IAAC's) regulatory process, and noted that studies would be conducted to assess the impact and identify mitigations to protect the environment and nearby communities. Energy Alberta advised that there would be opportunities to provide feedback regarding the Project, provided a website link to the IAAC Registry, and advised the following public comment period would focus on the summary of issues.
C-01233	May 20, 2025	Email	Energy Alberta responded to landowner email, advising it had received funding from Government of Canada programs to support the development of nuclear power technologies. Energy Alberta advised that it was a private entity and intended to own the land on which the Project site was located. Energy Alberta advised it was in the early stages of assessment and would engage with impacted and nearby landowners once the site option was determined. Energy Alberta advised a phone call could be arranged to discuss concerns regarding potential impacts to their property, and requested their contact information and availability.
C-01192	June 6, 2025	Email	Landowner emailed Energy Alberta and advised the proposed Project would be on their land, inquired as to why they had not received notification, and requested additional Project information.
C-01245	June 9, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project. Landowner raised the following interests: ■ Commented they were not contacted by Energy Alberta since fall 2024. ■ Requested information regarding the Project's final location. ■ Energy Alberta indicated that final site selection would be made in early 2026.

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
C-01175	June 9, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project's location, engagement efforts, safety precautions, workforce, cumulative impacts, and recreation in the community. Landowner raised the following interests: ■ Commented the potential location on the east side of the Peace River would be more suitable for the Project due to being less populated and having more access options compared to the west side. ■ Inquired as to why the Project would be located in the Peace Region instead of a remote location. ■ Commented they were not consulted before drilling took place near their property. ■ Inquired what the buffer zones around the Project location were. ■ Inquired what steps would be taken to keep the community members safe with worker camps being set up around the community. ■ Inquired as to whether a worker camp was planned to be set up in the community. ■ Commented the workforce would impact the quality of life and recreational activities in the community and cause potential increase in theft. ■ Inquired about the Project's workforce accommodations and size. ■ Raised a concern related to the Project's impact on noise and traffic in the community. ■ Inquired as to how the potential increase in traffic and noise would be managed and if public transport was a solution being considered. ■ Inquired when the location of the Project would be finalized.
C-01170	June 10, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project. Topics of discussion included: ■ Project benefits to the local community and the Project location. ■ Commented they were interested in the Project's benefits to the local community. ■ Inquired as to where the Project's final location would be.

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where

Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
C-01215	June 11, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project. Landowner raised the following interests: ■ Commented they were not supportive of the Project. ■ Raised a concern that the Project's approval could depreciate the value of land. ■ Raised a concern about an increase in traffic and noise levels in the community. ■ Raised a concern about seismicity in the region. ■ Inquired about the Project's need and purpose. ■ Inquired as to whether geothermal energy was considered. ■ Inquired as to whether Energy Alberta took water temperature data during the drilling program. ■ Inquired about the safety of waste storage. ■ Commented that they would prefer to sell their property as part of the Project's development. ■ Raised a concern about the Project's impact on population growth.
C-01186	June 11, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project. Landowner raised the following interests: ■ Raised a concern regarding the disposal of nuclear waste and advised other sources of energy were easier to dispose. ■ Raised a concern regarding the location of the Project and advised the Project should be set up in Ottawa, Ontario. ■ Raised a concern regarding the Project's impact to their farming operations. ■ Raised a concern regarding the mental and physical health impacts of the development of the Project in the community. ■ Raised a concern regarding the Project's impact to local real estate prices. ■ Inquired as to when the Project location would be finalized. ■ Raised a concern regarding buyer interest in the real estate after the Project was developed in the area. ■ Commented they were offered a tour of the Darlington, Ontario nuclear power plant and it was never followed up on. ■ Raised a concern regarding the impacts on community safety with the potential population increase and advised that importing a workforce would lead to an increase in hunting. ■ Raised a concern regarding an offer from MLA Dan Williams regarding a potential land exchange that was never followed up on.
C-01164	June 11, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project and its location. Landowner raised the following interest: ■ Inquired about the Project's location.

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where
Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
C-01207	June 16, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project. Landowner raised the following interest: Inquired as to whether their property could be surveyed as the Project developed.
C-01214	June 17, 2025	In person	Energy Alberta representatives met with landowners to discuss the Project. Landowners commented they were supportive of the Project and raised the following interests: - Inquired about the environmental setbacks for the Project. - Inquired about the safety buffer zones for the Project. - Commented they were supportive of the Project.
C-01167	June 17, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project. Landowner raised the following interests: - Inquired about the Project's impact to hunting. - Inquired as to whether there would be restrictions on hunters who were not from local communities.

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where

Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
C-01237	June 18, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project. Landowner raised the following interests: ■ Raised a concern about the Project's location and the potential risks associated with having a nuclear facility near their property. ■ Commented they had zero risk tolerance for the Project. ■ Inquired about the necessity of using taxpayer dollars for Project funding. ■ Inquired about the necessity of performing new environmental studies instead of using prior data. ■ Commented that there was only one access route on the west side option as opposed to having multiple options on the east side and noted there was not enough access or egress for safety and to handle the increased volume of traffic. ■ Commented that Energy Alberta should speak with Ron Ling. ■ Inquired as to who the landowners were and the necessity for them to deal with the Project proposal. ■ Raised a concern about engagement efforts and opportunities for input at the Project open house. ■ Raised a concern about the corporate entities involved in the Project's nuclear reactor technology. ■ Raised a concern regarding the local political entities and their influence on the Project and public. ■ Commented that the local political entities and public were not in a position to make an informed decision about the Project due to insufficient research. ■ Requested information regarding the actual size of the construction and operations workforce and which jobs would be available to the local workforce. ■ Inquired how the local workforce would be recruited and trained to carry out specialized work. ■ Raised a concern about Energy Alberta's corporate expertise and transparency. ■ Raised a concern about the Project's impact on local traffic and commented that there would not be enough access for safety measures. ■ Raised a concern that the generated energy would likely not be distributed within Canada. ■ Commented that Energy Alberta should study assessments related to nuclear energy production conducted for Calgary or Edmonton.

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where

Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
C-01198	June 24, 2025	Phone	Energy Alberta phoned landowner to discuss the Project. ■ Landowner advised they were not in support of the Project and commented that the access route to the Project location was not safe and needed to be paved. ■ Landowner raised a concern regarding the corporate entities involved in the Project and inquired about the Project's water usage. ■ Landowner inquired as to whether the Project's benefits to local communities included electricity costs and property taxes and commented that the east site option was preferable but saw the benefits to both proposed Project sites.

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
C-01157	June 24, 2025	In person	Energy Alberta representatives met with landowner to discuss the Project's location, Project funding, and environmental studies. Landowner raised the following interests: ■ Raised a concern about the Project's location and the potential risks associated with having a nuclear facility near their property. ■ Commented they had zero risk tolerance for the Project. ■ Inquired about the necessity of using taxpayer dollars for Project funding. ■ Inquired about the necessity of performing new environmental studies instead of using prior data. ■ Commented that there was only one access route on the west side option as opposed to having multiple options on the east side and noted there was not enough access or egress for safety and to handle the increased volume of traffic. ■ Commented that Energy Alberta should speak with Ron Ling. ■ Inquired as to who the landowners were and the necessity for them to deal with the Project proposal. ■ Raised a concern about engagement efforts and opportunities for input at the Project open house. ■ Raised a concern about the corporate entities involved in the Project's nuclear reactor technology. ■ Raised a concern regarding the local political entities and their influence on the Project and public. ■ Commented that the local political entities and public were not in a position to make an informed decision about the Project due to insufficient research. ■ Requested information regarding the actual size of the construction and operations workforce and which jobs would be available to the local workforce. ■ Inquired how the local workforce would be recruited and trained to carry out specialized work. ■ Raised a concern about Energy Alberta's corporate expertise and transparency. ■ Raised a concern about the Project's impact on local traffic and commented that there would not be enough access for safety measures. ■ Raised a concern that the generated energy would likely not be distributed within Canada. ■ Commented that Energy Alberta should study assessments related to nuclear energy production conducted for Calgary or Edmonton.
C-01193	July 15, 2025	Phone	Energy Alberta phoned landowner to follow up on their July 9, 2025 email. Landowner advised they supported the Project and inquired about the Project's land use and impacts to local real estate values. Landowner requested specific location of the Project in the option 1 area and inquired what buffers and safety zones were being set up for the Project. Landowner requested to be added to the procurement list for future opportunities and commented that they were interested in learning more about the Project. Energy Alberta provided the Project website link and its contact information. Landowner commented that they were interested in public engagement activities scheduled in fall 2025.

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where

Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
C-01246	August 25, 2025	Phone	Energy Alberta phoned landowner to discuss access for the August 27 and 28, 2025 wildlife camera retrieval.
C-01187	August 25, 2025	Phone	Energy Alberta phoned landowner to discuss access for the August 27 and 28, 2025 wildlife camera retrieval. Landowner raised a concern that crops would be impacted by the retrieval of wildlife cameras. Energy Alberta advised the crews would be using existing road access only. Landowner advised that they did not support the Project.
C-01224	September 10, 2025	Email	Landowner inquired about the companies that Energy Alberta had contracted to conduct environmental studies. Energy Alberta provided information about the contractor conducting the environmental assessment component of the Impact Statement. Energy Alberta indicated that, as the scope of the environmental assessment was further refined, additional consultants might be onboarded on the Project. Energy Alberta provided a website link to its procurement registry, information about upcoming public engagement sessions, and a website link to register for the engagement sessions.
C-03947	November 14, 2025	In person	Energy Alberta team members met with landowner at their residence. Landowner confirmed their opposition to the Project and cited health, nuclear waste disposal, lifestyle, visual disturbances, and increased traffic as some of their concerns. Landowner indicated they may sell their property regardless of whether the Project proceeds.
C-03949	November 28, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner indicated that they are not concerned about the Project. If it proceeds and they do not like it, they will just move. Landowner indicated a preference for siting option 2 as there is not as many people on that side. Landowner indicated an aspiration to get work hauling gravel during construction.
C-03948	November 28, 2025	In person	Landowner is opposed to the Project and plans to move if it proceeds. Landowner attended the initial meeting in Weberville but has not received updates since. Landowner indicated an openness to receiving more information via email or text.
C-03817	November 28, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner indicated they are strongly opposed to the Project, citing concerns about waste handling and transport. Landowner believes it will not help retain young people in the area. Landowner has lived there since 1992, works for Alberta Energy, and states that jobs are readily available for those who want to work.
C-03815	November 28, 2005	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner supports the Project, believing it will create jobs for young people. Landowner indicated a preference for phone communication going forward.
C-03962	December 1, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner expressed support for the Project.
C-03961	December 1, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner expressed opposition to the Project, indicating that they did not want it in the area.
C-03960	December 1, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner indicated they support the Project but plans to sell their house in early 2026 to move to Peace River to be closer to their family. Landowner emphasized the need for secondary highway 743 to be paved due to insufficient gravel, making it dangerous in snow or mud conditions.

Record of Landowner Engagement and Communications for the period of January 1, 2024 to December 31, 2025

*This table does not include all communications undertaken by Energy Alberta but focuses on more substantial communications where
Project inquiries and feedback were received

ID	Date	Interaction Type	Summary
C-03957	December 1, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner expressed distrust of other Energy Alberta team members they had spoken with. Landowner expressed concern that the Project could lead to having their land expropriated. Energy Alberta representative clarified that while the government could expropriate land, it would require compensation at market value.
C-03952	December 1, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner indicated they are aware of the Project but lack details. Energy Alberta team member provided an overview of the Project. Landowner indicated that they are not very concerned about the Project.
C-03951	December 1, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner indicated that they had moved to the area a year ago. Landowner was unaware of the Project but will share the provided information with their spouse.
C-03950	December 2, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner did not have a lot of detailed information on the Project but had no questions following a Project overview. Landowner indicated they feel the Project may be beneficial.
C-03959	December 2, 2025	In person	Energy Alberta team member met with landowners to discuss the Project. Landowners indicated they are knowledgeable about the Project and inquired only about the final site decision.
C-03814	December 2, 2025	In person	Energy Alberta team member met with landowner to discuss the Project. Landowner indicated their spouse had attended the Weberville open house and indicated they had no further questions about the Project.

Appendix D: Feedback Received at March 2025 Open House

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

March 11, 2025 Open House

*Repeated participant responses have been merged. The record is therefore not reflective of the number of incidences where the same answer was provided.

ID	Feedback Form Question	Participant Response
C-02828	What was your main reason for attending the open house?	■ Employment/procurement. ■ Interested in project. ■ Share feedback. ■ What the Project can do for the area and people. ■ Was hoping for an open mic session. ■ Totally against this (we sit on top of oil and gas co gen). ■ Protest.

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

ID	Feedback Form Question	Participant Response
	What are your top three interests and/or concerns associated with the Project?	■ Opportunity for local business participation in the Project. ■ Project timeline. ■ Waste management and long-term storage solution. ■ Decommissioning plan. ■ How many permanent jobs? ■ Water and potential for contamination. ■ Presentation overall was good, however had a tough time getting a chance to talk to anyone. ■ More information on the dangers to soothe fears. ■ Safety measures, qualified employees to ensure safety. ■ More information on notable nuclear disasters and why they happened. ■ The corrupt nature of who is backing this; Corrupt SNC Lavalin stealing taxpayer dollars. ■ Potential earthquakes and its effect on the facility. ■ Employment opportunities for local residents. ■ Water use. ■ Spent fuel storage. ■ Potential health concerns. ■ Potential impact on the Peace River. ■ Accident and malfunction planning, who is accountable for emergency response? ■ Making certain it happens. ■ No concerns. Get 'er done. ■ Map of possible sites poorly labelled; no context, surely the company can do better than this! And no brochure with the info, very poor planning. ■ Will we have grid to support? ■ How will the power generated from the plant affect our community's power costs? ■ Economic benefits. ■ Environmental impact and protection. ■ Cooling, pump fails/fail safes. ■ Project location. ■ Regulatory hurdles. ■ How is it going to affect the community? How much difference will it cost for power?

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

ID	Feedback Form Question	Participant Response
	If you have any outstanding questions, please list them below.	■ Opportunity for local businesses during construction and operations, also during initial development. ■ What about the surrounding areas and landowners? ■ Why don't you go back to Quebec? We have enough corruption here already. ■ Are there to be two stages to the plant? ■ How long before it's operational? ■ Will local jobs be generated from this Project or will it be imported workers? ■ Role of MLA Dan Williams and UCP in the Project. ■ Project funding and guaranteed funding for decommissioning. ■ Will there be taxpayer funding for this? ■ Is this energy for Albertans or will it be exported?

Appendix E: Feedback Received at September 2025 Engagement Sessions

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

September 2025 Engagement Sessions

*Repeated participant responses have been merged and is not reflective of the number of incidences where the same answer was provided

Peace River – September 22, 2025	
Topic Station	Participant Comments
Nuclear Fundamentals	Participants inquired about the short- and long-term storage of nuclear waste
	Participants inquired about how many spent fuel bundles can be stored in each dry storage container
	Participants inquired about the reactor design for this facility
	Participants inquired about the life expectancy of the facility
	Participants inquired about the anticipated carbon footprint of the facility
	Participants inquired about alpha radiation
	Participants inquired about whether the public would have access to any real-time radiation data
	Participants inquired about the approval time frame for the Project
	Participants inquired about the amount of water needed for the facility
	Participants inquired about the cooling towers
	Participants inquired about the risk and potential for seismic activity in the region and general facility area and what measures are in place to safeguard the reactor
	Participants inquired about the emergency setback zone around Peace River
	Participants inquired about how frequently nuclear waste would be transported from the facility
	Participants inquired about the radioactivity levels of spent fuel
	Participants inquired about the number of workers on site at one time
	Participants inquired about international standards
	Participants inquired about the length of the construction period
	Participants inquired about the proposed site locations
	Participants inquired about the generator and cooling tower technologies and designs
	Participants inquired about how often the reactors need to be refuelled
	Participants inquired about whether the facility would produce medical isotopes
	Participants inquired about where the uranium would come from

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Peace River – September 22, 2025	
Topic Station	Participant Comments
Siting	Participants inquired about siting a facility on an earthquake zone
	Participants commented that Energy Alberta should look at expanding the siting criteria assessment to a 50 km radius
	Participants inquired about why this area was selected
	Participants inquired about why Option 1 IPD boundary was larger than Option 2
	Participants commented that there is a geological graben under Option 1 that might be compromised under the weight of the facility
	Participants commented that there are existing dams on the Peace River that could compromise water flow
	Participants commented that Energy Alberta should model “what if” scenarios of a hydro dam failure upstream of the facility and ensure proper and safe setback distance from the riverbanks
	Participants commented that there is a deep well injection site near or within Option 2 boundaries that has the potential to cause human-induced earthquakes
	Participants inquired about the land acquisition strategy from Energy Alberta
	Participants inquired about where we are at in the siting assessment process and selection of a site
	Participants inquired about whether there were other locations or areas considered both locally and provincially for this facility
	Participants inquired about engagement with landowners
	Participants inquired about siting of the powerlines and who is responsible for that scope
	Participants commented that Energy Alberta should make the workforce proximity radius larger, since many are willing to drive for work opportunities
	Participants inquired about whether any data from the pulp mill were considered
	Participants inquired about GIS data sources
	Participants inquired about the distance from the proposed site to the Grimshaw Aquifer
	Participants inquired about topography and the slopes of the riverbanks
Environment	Participants inquired about interprovincial agreements between Alberta and British Columbia to ensure sufficient water supply
	Participants commented that water intakes can be harmful to the fish population
	Participants suggested Energy Alberta contact the Northern Alberta Institute of Technology (NAIT) Centre for Boreal Research in Peace River for input into studies
	Participants commented about the Swan Hills Hazardous Waste Treatment Centre in Alberta and unplanned releases from this facility

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Peace River – September 22, 2025	
Topic Station	Participant Comments
Environment (continued)	Participants commented on species at risk to avoid and minimize impact
	Participants inquired about what historical fieldwork studies were undertaken when the Project was first proposed
	Participants suggested that Energy Alberta connect with the Mighty Peace Watershed Alliance
	Participants inquired about the cooling ponds evaporating and whether it could affect the area around the site
	Participants commented that the Peace River constantly changes its sandbars and local boating associations can help provide more information
	Participants commented that Energy Alberta needs to understand where existing community water intake pipes are located
	Participants commented that there is an inversion layer over the Peace River valley and inquired about whether the evaporation will affect seasonal clarity
	Participants commented that the Kimiwan Bird Walk and Boreal Centre for Bird Conservation are downwind of the proposed facility
	Participants commented on ensuring current and projected drought conditions are considered
	Participants commented on a desire for ongoing monitoring for radiation levels to be available online and to sign up for advisory alerts for increased levels
	Participants inquired about what the potential health effects could be from a facility like this on the local population
	Participants inquired about tritium release and the potential impact on humans, animals and plants over the life of the reactor
	Participants inquired about the potential effects on crops, and retention of “certified organic” status
	Participants inquired about the differences between alpha, beta and gamma radiation and the estimated range of travel
	Participants inquired about the backup diesel generators, how much fuel they use and carbon dioxide emissions
	Participants inquired about whether emissions from cooling towers would cause ice fog in the winter
	Participants inquired about whether site preparation would be impacted by the European Union Deforestation Regulations
	Participants inquired whether Energy Alberta has access to Bruce Power’s historical studies
	Participants inquired about whether the air dispersion study reviews the impact of evaporated water on farming in the area
	Participants suggested Energy Alberta consider historical projects in the region, such as the pulp mill, Shell’s Carbon Creek, etc.
	Participants inquired about water withdrawal and whether it would be returned to the river
	Participants inquired about the extent of engagement with Indigenous Nations and Communities on the environmental assessment of potential impacts
	Participants inquired about whether there are closure/reclamation bond requirements for decommissioning

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Peace River – September 22, 2025	
Topic Station	Participant Comments
Environment (continued)	Participants inquired about whether Energy Alberta will use existing studies and data from other industries
Employment, Training, and Procurement	Participants commented that Energy Alberta needs to share the economic viability of existing business
	Participants requested that information for local businesses on how to get involved or qualified be easy to access
	Participants commented that Energy Alberta should engage local businesses on how best to mitigate potential impacts and optimize opportunities
	Participants commented that they would like to see Energy Alberta prioritize hiring local workers and working with local businesses to plan for the future
	Participants suggested that Energy Alberta engage local and regional educational institutions (Northern Lakes College, Northwestern Polytechnic)
	Participants inquired about whether Energy Alberta would consider donating a potential workforce accommodation structure to the region to be repurposed for homeless people
	Participants inquired about whether Energy Alberta has set commitments on what percentage would be local employment and business opportunities on the Project
	Participants commented on the need for Energy Alberta to engage and present to youth so they know the opportunities to pursue
	Participants inquired about the duration of the construction period and how long companies could be contracted for
	Participants commented on whether contracts would be awarded based on cost, knowing that local businesses might cost more
	Participants inquired about what the required and necessary certifications would be to work at the facility
	Participants commented that the compensation for workers at the facility needs to be on par with other industries in the region to have a fair market
	Participants commented on a desire for bursaries for students
	Participants commented that youth are leaving the community to pursue employment opportunities elsewhere
Community Impacts	Participants commented that the housing and rental market in the region is slow
	Participants inquired whether this Project would compete with the pulp mill, forcing up their costs
	Participants inquired about how Energy Alberta will address workforce accommodation and risks to Missing and Murdered Indigenous Women and Girls
	Participants inquired about how a potential Alberta separation would affect the Project
	Participants commented on letting workers integrate into local communities to support the economy

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Peace River – September 22, 2025	
Topic Station	Participant Comments
Community Impacts (continued)	Participants inquired about how Energy Alberta would address transient workers in the community
	Participants inquired about capacity building for local, social, and emergency services to match increased demand
	Participants inquired about the property value of surrounding residences
	Participants inquired about whether Energy Alberta would fund local emergency response
	Participants commented on the increased health risks associated with the Project
	Participants commented on the strain on healthcare and how Energy Alberta will work with the province to address this
	Participants inquired about how Energy Alberta is collaborating with the province on the necessary infrastructure upgrades required in the region
	Participants inquired about whether Energy Alberta will invest in infrastructure and housing
	Participants inquired about how the Project could impact tourism
	Participants inquired about re-opening the Peace River Airport to support the Project
	Participants expressed concerns about increased traffic levels associated with construction and operations of the facility
	Participants commented on an increase in substance use at the pulp mill and inquired how Energy Alberta would address this in its workforce
	Participants commented that improvements to the bridge would be required to accommodate an influx of workers and traffic

Weberville – September 23, 2025	
Topic Station	Participant Comments
Nuclear Fundamentals	Participants inquired about why the plant would need to be decommissioned after 70 years
	Participants inquired about whether medical isotopes would be produced from this facility
	Participants inquired about whether any of the existing facilities encounter as many wildfires as the Peace region does
	Participants inquired about whether an oil and gas incident could impact the facility
	Participants inquired about facility operations in extreme cold weather
	Participants inquired about historical major disasters and how this facility would ensure that did not happen
	Participants inquired about spent fuel and where it would be stored/transported
	Participants inquired about the amount of energy in the fuel bundles upon placement and removal
	Participants inquired about whether Alberta has uranium

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Weberville – September 23, 2025	
Topic Station	Participant Comments
Nuclear Fundamentals (continued)	Participants inquired about who the international nuclear regulatory/oversight is
	Participants inquired about site security and whether it would be contracted to an external service provider
	Participants inquired about the wet storage on site and what happens to the water after the fuel moves into dry storage
	Participants inquired about the length of time that the spent fuel is stored in the dry storage casks
	Participants inquired about whether spent fuel rods can be repurposed and how much spent fuel is produced in a year
	Participants inquired about the reactor technology and how many reactors are currently operational in Canada
Siting	Participants commented that the site assessment should expand the assessment radius to 100 km for the proximity to the workforce
	Participants inquired about whether the use of agricultural land for the facility would affect surrounding fields at either site options
	Participants commented on the Peace River Arch
	Participants commented that there is salt in the groundwater near the proposed site options
	Participants inquired about the land acquisition strategy and whether any land has been purchased
	Participants commented on the lack of proper roads out to Option 2
	Participants inquired about a timeline for a potential site option decision
	Participants inquired about whether agricultural land can be used up to or within the facility fence
	Participants inquired as to why Energy Alberta was not considering alternative sources of energy such as wind or solar
	Participants inquired about whether Energy Alberta considered other areas within Alberta to site the facility
	Participants inquired about the amount of water used at the facility
Environment	Participants commented on the regulatory process, noting a lack of transparency from the regulatory bodies
	Participants inquired about the criteria that determines appropriate setback distances from fens, waterways, and other sensitive areas is sufficient
	Participants inquired about what type of farming/agricultural operations are located next to existing facilities in Canada
	Participants commented on what the use of LIDAR in the environmental fieldwork studies would yield as a result
	Participants commented on whether environmental studies would consider frost from the plant on farmland
	Participants inquired about the amount of water required for the facility if the facility uses a closed-loop system
	Participants inquired about the potential effects on local farmland and livestock

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Weberville – September 23, 2025	
Topic Station	Participant Comments
Environment (continued)	Participants inquired about the summer fieldwork program and whether those took place and what the results were
	Participants inquired about WSP's role on the Project, who they are and where they are located
	Participants inquired about the timeline for the Project being revitalized and why now
	Participants commented they understand Alberta needs more power, but noted that they would feel more comfortable with a solar farm
	Participants noted concerns about impacts to rain and weather patterns
	Participants commented that Energy Alberta needs to balance development/progress with protecting the environment and the community
	Participants commented that they were concerned about monitoring and compliance regarding the environment, air, water, and evaporation causing changes in temperature
	Participants inquired whether the environmental assessment was a recommendation or requirement
	Participants inquired what the findings from the environmental assessment are used for, whether they are accepted or if there is a third-party review to validate and assess the findings
	Participants inquired about whether the studies and findings will be published
	Participants inquired about the difference between an Impact Assessment and an Environmental Assessment
	Participants inquired about whether Energy Alberta will use data and research from other industries
	Participants inquired about whether a water treatment facility would be needed on site to service the facility
	Participants inquired how the regulatory process is different for nuclear compared to oil and gas
	Participants inquired about whether there is any certainty or security for the region if the Project is abandoned or if Energy Alberta walks away
	Participants inquired about whether the facility would have its own environmental monitoring department on site
	Participants commented that the employment numbers for a facility like this are shocking and would mean a significant increase in population
	Participants inquired about water use, including what is already allocated from the Peace, what the water act licence volumes would be, and whether steam from evaporation would create more precipitation in the region, noting freezing rain is already an issue
	Participants inquired as to whether there is sufficient lead time for the Province to act on infrastructure upgrades required to accommodate the facility, and how these upgrades would be sequenced or timed in alignment with Project timelines
Employment, Training, and Procurement	Participants commented that a huge construction workforce would be required for this Project and inquired about Energy Alberta's strategy to accommodate for worker shortages
	Participants commented on the challenge of attracting a workforce to northern Alberta
	Participants inquired about a plan for transportation of workers from different parts of the region

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Weberville – September 23, 2025	
Topic Station	Participant Comments
Employment, Training, and Procurement (continued)	Participants inquired about how to self-identify or become nuclear qualified
	Participants inquired about Energy Alberta's plan to engage post-secondary institutions, including a plan for scholarships or bursaries for training programs
	Participants commented that Energy Alberta needs to clearly define what "local" means
	Participants inquired about what businesses can do now, while the Project is still not certain
	Participants inquired if Energy Alberta will use unions to engage a workforce
	Participants inquired about what the province's role is in supporting youth and adult education and training
Community Impacts	Participants inquired about funding for upgrades to services and infrastructure (i.e., schools, doctors, municipal services like sewage systems, etc.)
	Participants commented that they would like to see the workforce integrated into the community rather than camps or fly-in/fly-out
	Participants commented that an increased population could mean upgrades like an air ambulance or re-opening the airport
	Participants commented that it would be beneficial to have government representatives from Pickering meet with town councils to discuss their experiences and share learnings
	Participants commented that they have concerns about losing the small-town rural community feel with a project like this, putting the region on a global scale
	Participants commented that there are concerns of increased risk of being a target for terrorist activity
	Participants commented that schools in the region are already full and inquired about how Energy Alberta would accommodate new families in the region
	Participants commented that the development of the community should include recreational development, such as trails and parks
	Participants inquired whether Energy Alberta would consider creating housing for low- or no-income individuals or create spin-off jobs for less educated individuals
	Participants suggested opening a community office in Peace River
	Participants commented that Energy Alberta needs to consider Indigenous Rights and impacts when studying health, social, and economic impacts
	Participants commented that expanded emergency and protective services will be required to support an influx of workers
	Participants inquired whether Energy Alberta will conduct a health study, noting that local health districts do not have sufficient data to establish accurate baseline conditions

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Weberville – September 23, 2025	
Topic Station	Participant Comments
Community Impacts (continued)	Participants inquired about the methodology of the community impact assessment and how it will be conducted to gather correct baseline data
	Participants commented concerns on an increase in traffic in the area, primarily on the road leading to site Option 1, noting conflicts with the pulp mill shift change traffic could be a cause for concern
	Participants expressed concerns with changes to the rural lifestyle and community characteristics
	Participants inquired whether doctors would have extra training to handle radiation-related illnesses
Grimshaw – September 24, 2025	
Topic Station	Participant Comments
Nuclear Fundamentals	Participants inquired as to how nuclear waste would be transported and how it would be tracked
	Participants inquired about how many reactors are currently operating in northern climates with extreme cold weather conditions
	Participants inquired about the uses of cooling water in the facility and what the volumes are for cooling the reactor versus cooling spent fuel in wet storage
	Participants inquired about the historical nuclear disasters, why they happened, and how they can be prevented
	Participants inquired as to why you cannot use all of the fuel in the bundle and if there are advancements in technology that would look at repurposing spent fuel bundles
	Participants inquired about safe levels of radiation
	Participants inquired at what point the International Atomic Energy Agency (IAEA) would become involved in the Project
Siting	Participants commented that the County of Northern Lights had to fight to get inundation maps for flooding from British Columbia dams, noting that this could affect both sites
	Participants inquired about how the siting indicators were identified and studied
	Participants commented on the seismic activity in the area and if it was considered when selecting the site options
	Participants inquired about the ideal proximity to the river
	Participants inquired about data validation, noting that desktop data can be different from boots on the ground analysis
	Participants commented that using Letty Lake as a landmark on the map of the two siting options would be helpful
	Participants inquired as to whether Indigenous input was collected into the selection of the site options
	Participants inquired about the process for siting the water intake pipe

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Grimshaw – September 24, 2025	
Topic Station	Participant Comments
Siting (continued)	Participants inquired as to why Option 1 is bigger than Option 2
	Participants commented that Option 1 is situated on a graben and could pose further earthquake risk
Environment	Participants inquired as to whether the community can expect increases in precipitation caused by the evaporation from the facility
	Participants inquired as to whether Energy Alberta has engaged local trappers and guides who hunt to gather information on the land
	Participants inquired about a monitoring system for water, noting that if made publicly available to the public, would reassure the community on the water quality before and during operations of the facility
	Participants commented that there needs to be more clear data on the effects of evaporation on the environment
	Participants commented that engagement with the Peace River Area Monitoring Program would be beneficial for data collection and monitoring
	Participants inquired about wildlife assessments and how the facility would protect wildlife
	Participants inquired about traditional and culturally significant plants and medicine and how they would be protected
	Participants commented on the timeline for the impact assessment and regulatory process
	Participants inquired about whether the Alberta Energy Regulator would be involved in reviewing the Project
	Participants inquired about water usage and whether the river can sustain increased usage
	Participants commented that the Shaftesbury already does not freeze like it used to and inquired about whether the facility would further affect it
	Participants inquired as to whether the province would fund additional water monitoring stations for continuous monitoring programs
	Participants inquired about what the longest operating facility in Canada is and whether there is available data to view
	Participants inquired about who WSP is and what is their role on the Project
	Participants inquired about the engagement required in the regulatory process when the Project has not yet been approved
	Participants inquired about water withdrawal and how much of that will be used to replenish water loss due to evaporation
	Participants inquired about what the monitoring radius would be for the operational facility
	Participants inquired as to whether air modelling from the emission stack itself would be conducted to measure particulates and do deposition modelling
	Participants inquired about how the steam from the facility would interact with wildfire smoke, and whether it would make the smoke more or less harmful to inhale
	Participants suggested engaging with Ducks Unlimited

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Grimshaw – September 24, 2025	
Topic Station	Participant Comments
Environment (continued)	Participants suggested engaging with the Mighty Peace Watershed Alliance
Employment, Training, and Procurement	Participants commented that Energy Alberta should engage local school board to discuss the Project with youth
	Participants suggested Energy Alberta set up a storefront office to discuss the Project and business opportunities with the community
	Participants suggested Energy Alberta sponsor recreation facilities in Grimshaw to engage youth
	Participants commented that expanded programs in high schools and post-secondary for trades and other career pathways into nuclear would help prepare the youth
	Participants commented on the need to train and focus hiring on local population first
	Participants inquired about the timelines for construction and operation jobs to start becoming available
	Participants commented that they are excited for their kids to get educated in the region and not have to move away
Community Impacts	Participants commented on urban vs rural infrastructure concerns with tax revenue and ensuring all municipalities can benefit
	Participants commented on a desire to re-open the Peace River Airport to accommodate an increased population
	Participants inquired about engagement with local Indigenous Nations and Communities, and ensuring their rights and interests are considered
	Participants inquired about the expansion of social services to support an increase in population, noting that healthcare is already very scarce in the region
	Participants commented on the existing housing shortage in the area and inquired as to whether Energy Alberta has a plan to address this
	Participants inquired about increasing protective services if transient workers are coming into the community
	Participants inquired about local government involvement in Project planning to determine community development strategies and collaboration needed with the province on infrastructure and service upgrades

Manning – September 25, 2025	
Topic Station	Participant Comments
Nuclear Fundamentals	Participants inquired about the transportation of nuclear materials, including timelines, regulatory oversight in Canada, and potential impacts on traffic and public safety
	Participants inquired about the storage and management of used nuclear fuel, including long-term storage availability in Canada, fuel handling and containment, tracking systems and the management of water associated with fuel storage

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Manning – September 25, 2025	
Topic Station	Participant Comments
Nuclear Fundamentals (continued)	Participants inquired about water use and supply at the facility, including system, volumes, purposes, and the separation of water systems
	Participants inquired about reactor cooling methods, including the use of water and potential alternative technologies
	Participants inquired about the management and treatment of water containing radioactive materials associated with fuel storage systems
	Participants inquired about reactor technology selection and performance, including cooling methods and reactor lifespan
	Participants inquired about the regulatory framework for nuclear projects, including oversight, decision-making, and the safe handling, transport, and tracking of nuclear materials
	Participants inquired about the management and monitoring of radioactive materials, including fuel handling, storage, and regulatory oversight
	Participants inquired about the rationale for the Project, including technology selection and cost comparison with other energy sources
	Participants inquired about Project timelines and lifecycle considerations, including economic uncertainty in early phases and reactor lifespan
	Participants inquired about Project costs and economic considerations, including uncertainty in early Project stages and comparisons with other energy sources
	Participants inquired about air emissions and the management of radioactive contaminants, including potential releases from steam and evaporation
	Participants inquired about facility safety and security, including the management of radioactive materials, operator error, fuel handling, regulatory oversight, and protections against external threats and extreme events
	Participants inquired about climate-related design considerations, including reactor cooling technologies and potential alternatives to water-based systems
	Participants inquired about effects assessment and supporting data, including evidence related to potential airborne releases from facility operations
	Participants inquired about the consultation process, including whether outstanding questions would be addressed prior to Project decisions
	Participants inquired about community safety, including protection measures and risks related to potential security threats
	Participants inquired about emergency management, including potential evacuation requirements in the event of an incident
	Participants inquired about potential accidents or malfunctions, including the risk of human error and possible emergency response measures
	Participants inquired about environmental risk considerations, including potential impacts under extreme scenarios and the long-term behaviour of radioactive materials
	Participants inquired about risks to human health, including the potential for human error in plant operations

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Manning – September 25, 2025	
Topic Station	Participant Comments
Nuclear Fundamentals (continued)	Participants inquired about environmental obligations related to nuclear waste, including long-term storage availability in Canada and the duration and behaviour of radioactivity over time
	Participants inquired about facility security, including protection against unauthorized access, potential threats and safeguards to prevent malicious or unintended actions
	Participants inquired about physical protection measures, including safeguards against unauthorized access and potential external threats such as drones and malicious acts
	Participants inquired about transportation impacts and road use, including increased traffic and public safety considerations, and regulatory requirements for transporting nuclear materials in Canada
Siting	Participants inquired about potential effects on wildlife and habitat, including animal presence, behaviour and methods for monitoring wildlife in the area
	Participants inquired about effects assessment related to wildlife, including potential changes in animal presence and methods used to monitor populations
	Participants inquired about site evaluation and selection, including the rationale for the Peace River location and the proximity of site options to geographic features
	Participants inquired about surface water considerations, including river flow variability, upstream infrastructure risks, water allocation, and the proximity of site options to the river
	Participants inquired about land and resource use, including the proximity of site options to one another and surrounding features
	Participants inquired about geological conditions and hazards, including site geology and related environmental considerations
	Participants inquired about water use and supply, including river flow variability, water allocation and availability under low-flow conditions
	Participants inquired about surface water hazards, including potential impacts of upstream dam failure
	Participants inquired about baseline conditions and methodology, including the duration of data collected to support the assessment
	Participants inquired about the need for the Project, including the rationale for the Peace River location and how the generated power would be used
	Participants inquired about the regulatory process for water allocation, including how water use is managed and prioritized under low-flow conditions
	Participants inquired about potential climate effects and meteorological conditions and hazards, including the influence of the facility on local weather and broader climate conditions
	Participants inquired about facility safety, including contingencies and safeguards related to water availability

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Manning – September 25, 2025	
Topic Station	Participant Comments
Siting (continued)	Participants inquired about emergency management, including response measures for water supply disruptions and potential upstream dam failure
	Participants inquired about energy supply, including how the electricity generated by the Project would be distributed and used
Environment	Participants inquired about the regulatory process, including oversight by multiple authorities, roles and responsibilities for review, monitoring and compliance, interprovincial coordination and economic considerations
	Participants inquired about facility safety, including regulatory oversight, monitoring and compliance and the selection of reactor cooling methods
	Participants inquired about the impact statement review process, including which organizations would be responsible and whether multiple authorities are involved
	Participants inquired about the effects assessment, including oversight, baseline and pre-construction studies, monitoring results from existing nuclear facilities, reporting transparency, and potential environmental impacts
	Participants inquired about the Tailored Impact Statement Guidelines, including which authorities would review the assessment and whether multiple organizations are involved
	Participants inquired about environmental obligations, including compliance and monitoring requirements, lessons learned from existing nuclear facilities, reporting transparency, and measures to prevent environmental contamination
	Participants inquired about radioactivity, including monitoring results from existing nuclear facilities, reporting transparency, past spills or failures, and radiation safety thresholds for people and the environment
	Participants inquired about technology selection, including existing nuclear experience in Canada, alternative energy options, reactor design maturity, cooling methods and broader industry context
	Participants inquired about the need for the Project, including existing nuclear operations, alternative energy options, and the broader energy context in Canada
	Participants inquired about groundwater conditions, including aquifer presence, existing well issues, potential effects of site compaction, and appropriate setbacks from groundwater and oil wells
	Participants inquired about site evaluation and selection, including baseline studies, groundwater conditions, local site knowledge, and appropriate setbacks from wells and other features
	Participants inquired about topography, soil and sediment conditions, including soil analysis, site compaction and potential interactions with groundwater and aquifers
	Participants inquired about baseline studies, including whether assessments were completed prior to site selection and any identified constraints or findings

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Manning – September 25, 2025	
Topic Station	Participant Comments
Environment (continued)	Participants inquired about meteorological conditions and hazards, including potential effects of steam or mist on visibility, weather patterns and road conditions, as well as seasonal factors such as freezing
	Participants inquired about water quality and temperature considerations, including the potential for freezing and the formation of steam or mist from cooling systems
	Participants inquired about water supply and use, including river flow availability, withdrawal requirements, allocation, interprovincial coordination and potential effects on local services
	Participants inquired about surface water conditions, including river flow, water allocation, and potential effects on local water use
	Participants inquired about climate-related considerations, including water availability and potential local effects of facility operations on weather and atmospheric conditions
	Participants inquired about radiation safety thresholds for human health and the environment
	Participants inquired about environmental risk assessment, including prevention of contamination and risks associated with early-stage Project design
	Participants inquired about measures to prevent contamination, beyond monitoring alone
	Participants inquired about the consultation process, including trust, accountability and local site awareness
	Participants inquired about transparency and accountability, including the roles of different government and Project entities
	Participants expressed views related to trust in government and broader societal perspectives on climate change
	Participants inquired about economic considerations, including Project costs, taxpayer impacts, taxes and comparisons with other energy sources
	Participants expressed views comparing nuclear energy to other energy sources
	Participants inquired about transportation-related effects, including potential impacts of steam or weather conditions on road safety
	Participants inquired about land and resource use, including setbacks from wells, water allocation, and potential impacts on local services
	Participants expressed views on economic trade-offs, including potential benefits of job creation
	Participants expressed interest in employment opportunities associated with the Project
Employment, Training, and Procurement	Participants inquired about procurement opportunities, including qualifications for local contractors and the use of local vendors for construction and camp services
	Participants inquired about workforce requirements, including training, local workforce capacity, seasonal employment considerations, and access to training opportunities

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Manning – September 25, 2025	
Topic Station	Participant Comments
Employment, Training, and Procurement (continued)	Participants inquired about workforce qualifications required to safely support construction and operations
	Participants inquired about workforce training requirements associated with nuclear technology
	Participants inquired about community health services, including the capacity to support workforce and population growth
	Participants inquired about transmission infrastructure and how electricity from the Project would be delivered
	Participants inquired about transportation logistics, including workforce access and bussing
	Participants inquired about airport infrastructure and access
	Participants inquired about social impacts, including effects of work camps, housing pressures, and community integration
	Participants inquired about local economic impacts, including support for local business and potential spin-off opportunities
	Participants inquired about emergency services capacity, including the availability of local responders
	Participants inquired about community safety, including the capacity of local emergency services
	Participants inquired about local industry engagement, including opportunities for skilled trades and business growth
	Participants inquired about ongoing engagement, including continued communication, accessibility of information, and opportunities for local input
	Participants inquired about community investment, including ongoing engagement and support for local training activities
	Participants inquired about clear and accessible communication, including the need for information to be easy to understand and relatable
	Participants inquired about capacity funding, including support for training and associated costs
Community Impacts	Participants expressed concerns that higher salaries from the facility could impact other industries in the region, cause inflation and negatively affect buying power for locals not working at the facility
	Participants commented on social service shortages, including hospitals, schools, housing, and rental properties
	Participants commented on potential supply chain shortages for goods and services
	Participants expressed concerns about increased traffic in the region, particularly out to site Option 1, where workers from the pulp mill drive the same route
	Participants commented that transportation infrastructure would need to be upgraded to accommodate this facility
	Participants expressed concerns regarding an increase in crime, homelessness, and transient workers
	Participants commented that a facility like this would make the region lose its small-town lifestyle and charm

Record of Public Engagement and Communications for the period of January 1, 2025 to December 31, 2025

*This table does not include all communications but is reflective of larger communications initiatives that Energy Alberta undertook

Manning – September 25, 2025	
Topic Station	Participant Comments
Community Impacts (continued)	Participants inquired about who Energy Alberta would be engaging with to coordinate upgrades to infrastructure and services, including who is responsible for funding the upgrades
	Participants commented that an overbuilding of housing during construction could lead to an oversupply of houses once the facility is constructed and operational
	Participants commented that it is not uncommon for people to drive an hour to get to work in the region and that other nearby communities should be considered to house workers

Appendix F: Fact Sheets and Event Advertising

Powering Alberta's Clean Energy Future

Alberta has the opportunity
to lead in clean energy innovation.

Nuclear energy offers a zero-emission source of electricity, ensuring a reliable supply and stable pricing. By leveraging this technology, we can create a made-in-Alberta solution to secure long-term energy stability while advancing both our environmental and economic objectives.

Project Overview

Utilizing Globally Recognized Nuclear Technology

Energy Alberta is proposing to build a nuclear power generating station in the Peace River area of Northern Alberta that would include two to four large-scale reactors. The facility could produce up to 4,800 MW of electricity for the grid, representing up to 25% of the province's existing electricity generation.

Project Status

Bringing Expertise Together

Energy Alberta has assembled a team with extensive nuclear experience and initiated the planning required to advance a nuclear generation project in Canada, including early consultations with government, community leaders and Indigenous groups.

Impact Assessment Process

Energy Alberta has submitted an Initial Project Description in April 2025 that has initiated a federal Impact Assessment (IA) for the Peace River Nuclear Power Project. The IA process, led by the Impact Assessment Agency of Canada (IAAC) and the Canadian Nuclear Safety Commission (CNSC), will evaluate the potential effects of the project on the environment, health, society and economy. It will also assess the impact on Indigenous Peoples and their rights. [Visit IAAC's page for the Peace River Nuclear Power Project.](#)

Decision on Public Interest

An IA is a phased planning process spanning over multiple years, involving extensive community and public engagement, as well as comprehensive environmental and socioeconomic studies. Upon completion of the IA process, the federal government determines whether the project is in the public interest and grants approval for it to proceed.

The Advantages of Nuclear

Harnessing the power of innovation.

Canada's nuclear industry is one of the most regulated in the world and its facilities are the most protected critical infrastructure in Canada. Canada's nuclear industry is an economic engine, offering high-paying jobs to skilled workers, and significant revenue for provincial and federal governments.

Jobs

89,000 people employed.

Revenue

\$22 billion in annual GDP contribution.

Output

15% of Canada's electricity.

Environmental Advantage

80 million tonnes of CO2 emissions per year are avoided.

Energy Security

Nuclear Energy can run 24/7, providing a reliable, constant and stable supply of electricity.

Supply

Canada is the second largest uranium producer in the world.

Decades of Safe, Reliable Nuclear Power

65 years of safe operations.

Canada's nuclear industry is one of the most regulated in the world and its facilities are the most protected critical infrastructure in Canada.

Operating Excellence

Today, there are about 440 commercial reactors operating in 30+ countries. Civil nuclear power can now boast approximately 20,000 reactor years of operating experience. In addition, there are about 220 research reactors operating in more than 50 countries.

Clean, Green Power

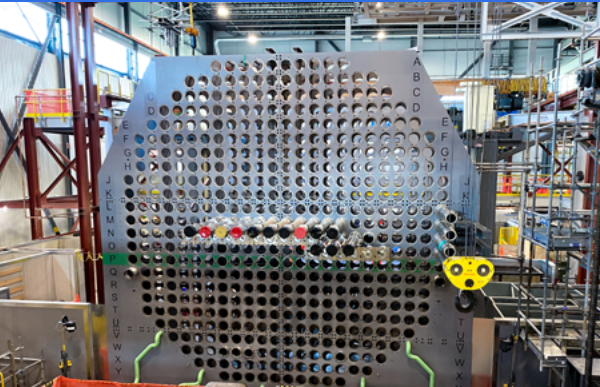

Nuclear provides 9% of global electricity and about 25% of the world's low-carbon power, making it the second-largest clean energy source.

Energy Alberta

Greening the power supply.

Energy Alberta an Alberta-based company led by an experienced group of innovators, nuclear industry experts and leaders in environmental sustainability. We are dedicated to building and operating a world-class nuclear electricity generating station that will transform energy production in the province. Founded in 2005, our vision is to diversify Alberta's energy portfolio by providing safe, secure energy for Albertans while creating high-quality jobs and economic opportunities.

Nuclear Energy: A Clean and Reliable Power Source

Energy Alberta is proposing to build a nuclear power generating station in the Peace River area of Northern Alberta that would include two to four large-scale reactors. The facility could produce up to 4,800 MW of electricity for the grid, representing up to 25% of the province's existing electricity generation.

The Advantages of Nuclear

Greening the Power Supply.

Nuclear power is the only readily scalable, zero-emission energy source capable of delivering reliable and affordable electricity around the clock.

Efficient Footprint.

Unlike some renewable energy sources that require large land areas (like wind farms or solar fields), nuclear power plants have a small **physical footprint** for the energy they produce.

Economic Growth and Job Creation.

Canada's nuclear industry is an economic engine, offering high-paying jobs to skilled workers, and significant revenue for provincial and federal governments.

Abundant Supply.

Canada is one of the largest producers of uranium in the world, the fuel used in the production of nuclear energy.

Healthcare Benefits.

Nuclear reactors can produce medical isotopes, which are used for diagnostic imaging, cancer treatment and sterilizing medical supplies.

Power Points: Key Facts about Nuclear Energy

Reliable & Consistent.

Nuclear power plants can operate 24/7 providing a reliable, constant and stable supply of electricity to the grid. Their ability to operate continuously for extended periods makes them a dependable source of baseload power that helps ensure grid stability.

Zero Emissions.

Nuclear energy produces **virtually zero greenhouse gas emissions** during operation, making it one of the cleanest sources of energy. It plays a critical role in reducing carbon footprints and combating climate change.

Energy Security.

In an increasingly volatile global energy market, Canadian nuclear power generation offers a path to energy independence. Nuclear energy provides a stable, secure supply of electricity - essential for the growth and development of communities.

High Energy Density.

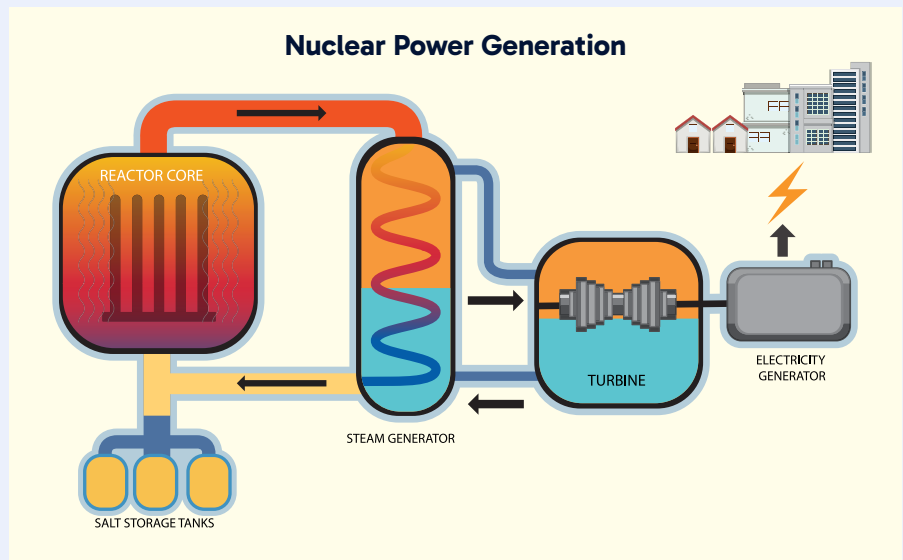

A small amount of nuclear fuel can generate a tremendous amount of energy. For example, a single uranium fuel pellet is about the size of a sugar cube and can produce the same energy as 907 kg of coal, 564 litres of oil, or 480 cubic metres of natural gas.

Robust Safety Systems.

Modern nuclear reactors are equipped with advanced safety systems that make them incredibly safe. The industry is one of the most regulated in the world and facilities are inspected regularly to ensure they meet or exceed strict safety standards established by the Canadian Nuclear Safety Commission and adhere to global safety recommendations set by the International Atomic Energy Agency (IAEA).

The Science of Nuclear Power

Nuclear energy is the energy released from the nucleus (core) of atoms, primarily through a process known as **nuclear fission**. Fission is a reaction that occurs when atoms of uranium are split into two or more smaller nuclei. The process releases large amounts of energy in the form of heat, which is converted into electricity by creating steam in a nuclear power plant.

How Does a Nuclear Power Plant Work?

Nuclear Fission.

The process begins in the reactor, where uranium atoms are split by neutrons. This releases a significant amount of heat.

Steam Generation.

The heat produced by fission is transferred to a separate system where it is used to turn water into steam.

Turbine Rotation.

The steam spins a turbine connected to a generator, which produces electricity.

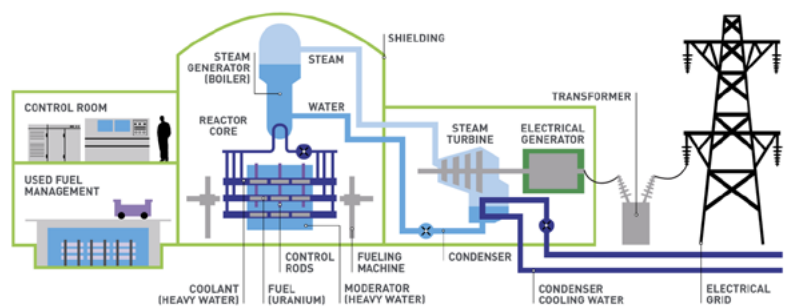

Cooling.

After passing through the turbine, the steam is cooled and returned to water, which is then heated again to repeat the cycle. The cooling water used in this process is kept separate from the steam cycle and does not come into contact with the reactor core.

Waste Management.

All of Canada's used nuclear fuel is safely managed at licensed storage facilities.

CANDU REACTOR SCHEMATIC

Graphic Source: Canadian Nuclear Association

Fueling the Future

Canada has been producing nuclear energy since the 1960s. A reactor needs 10 uranium pellets to power a house for a year. Each pellet weighs about 20g, less than a AA battery.

Generating the same amount of electricity as one uranium pellet would require 410 litres of oil. A typical generator supplying power for one million people will produce about three cubic metres of waste per year.

Powering Alberta's Future: Creating Lasting Economic Opportunities

Energy Alberta is committed to maximizing local and Indigenous employment and procurement for the Peace River Power Project during development, construction and operations. By supporting thousands of well-paying jobs and boosting local businesses, the Project is an investment in people, communities and a thriving future for the Peace Region.

Building the Future: Jobs During Construction (2028-2041)

The construction phase will be one of the largest employment opportunities in Alberta's history, supporting thousands of workers over more than a decade.

Skilled Trades:

Electricians, welders, pipefitters, carpenters and heavy equipment operators will be in high demand to build the plant's physical infrastructure.

Civil & Structural:

Concrete workers, ironworkers and crane operators will be essential in laying foundations, constructing containment structures and assembling specialized components.

Support Roles:

Behind every worker on the ground are safety officers, quality inspectors and administrative staff ensuring the project runs safely and efficiently.

Technical Leadership:

Engineers, project managers and supervisors will guide the project from start to finish.

Long-Term Careers: Powering Generations (2035-2115)

Once the facility is operational, it will support hundreds of stable, full-time positions for 80+ years. These are career-track jobs with strong wages, benefits and training opportunities.

Plant Operations.

Control room operators and maintenance technicians will ensure the plant runs smoothly and safely, 24/7.

Safety & Security.

Safety specialists and security officers will protect both workers and the surrounding community.

Administration.

HR, finance, procurement and management staff will provide the backbone of long-term operations.

Technical Support.

Engineers, analysts and inspectors will apply cutting-edge expertise to keep the plant efficient.

Indirect jobs will ripple out through the economy - from equipment suppliers to fuel services to local contractors - creating opportunities for thousands of additional Albertans.

Local Business Opportunities

The Peace River Nuclear Power Project will be a once-in-a-generation boost for local and regional businesses. Energy Alberta’s goal is to maximize the participation of local and Indigenous businesses throughout the life of the project. Opportunities include:

- Construction Materials & Supplies
- Equipment & Maintenance Services
- Transportation & Logistics
- Food Services & Accommodations
- Professional Services

Not Just Science & Engineering Jobs

The nuclear industry is about much more than engineers and scientists. It creates lasting, high-paying jobs across dozens of professions, drawing talent from universities, community colleges, the trades and even the military. Nuclear plants provide quality employment that strengthens entire communities, with opportunities for people from all backgrounds. Highlighted here are some of the many career paths you can explore.

Skilled Trades	Professions	Engineering, Technicians & Specialists
Carpenters	Accountants	Chemists
Electricians	Cybersecurity specialists	Chemical engineers
Heavy equipment operators	Communicators	Radiation protection specialists
Masons	Health physicists	Reactor operators
Pipefitters	Lawyers	Scientists
Sheet metal workers	Subject matter experts	Nuclear engineers
Welders	Policy analysts	Safety & environmental monitoring specialists
Mechanics	Entrepreneurs	Civil engineers
Project managers	Financial managers	Mechanical engineers

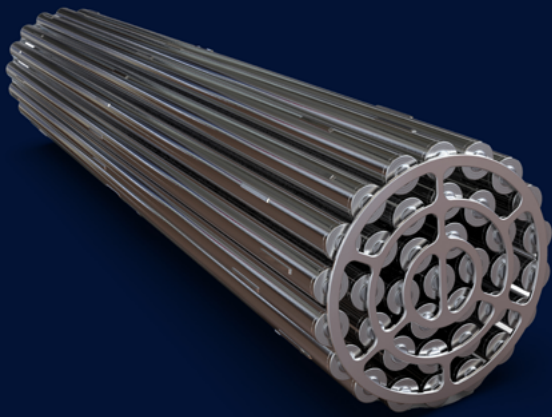

How to Get Involved

Procurement Opportunities

Local and Indigenous suppliers are encouraged to join our vendor registry. Be part of the supply chain that will build Alberta’s energy future. www.EnergyAlberta.com/Procurement-Registry

Employment Opportunities

Stay informed about upcoming training and job opportunities. Register to receive updates and be the first to know when hiring begins. www.EnergyAlberta.com/Jobs-Registry

Commitment to Safety: Understanding Nuclear Waste Management

Canada has been a global leader in nuclear energy research, technology and development for 65 years. Nuclear energy is one of Canada's safest and cleanest energy sources and is recognized globally as a critical tool in reducing greenhouse gases and fighting climate change.

In Canada, the Canadian Nuclear Safety Commission rigorously oversees every stage of nuclear waste management, from handling and transport to storage and final disposal.

Power Points: What You Need to Know About Used Nuclear Fuel

Radioactivity decreases over time.

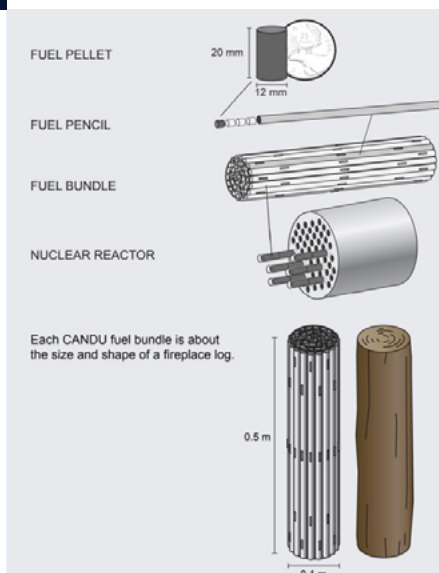

With modern containment strategies, risks are minimized while technology continues to improve long-term storage solutions.

Properly managed waste does not pose immediate threats.

Safety protocols and containment measures are strictly followed to protect people and the environment.

Tailored solutions.

Each type of waste requires specific management techniques, ensuring tailored solutions that align with its unique characteristics.

Source: Nuclear Waste Management Organization.

What is Used Nuclear Fuel?

Used nuclear fuel is a byproduct of nuclear power and it must be safely managed long-term. Although its radioactivity level decreases rapidly with time, the used fuel must be contained and isolated from people and the environment, essentially indefinitely.

Canada follows proven practices used globally and used fuel is first stored on-site in pools, then in dry storage using concrete casks before being sent to long-term disposal.

Once a used nuclear fuel bundle is removed from a reactor, it is placed in a water-filled pool where its heat and radioactivity decrease over time. After seven to 10 years, the bundle is placed in a dry storage container, a method that has been in use worldwide since the 1980s.

A Safe Approach to Managing Waste

Energy Alberta is committed to the safe disposal of nuclear waste using proven technology to mitigate any potential risks associated with the management and storage of nuclear waste. Our facility would adhere to the robust regulations and best practices set by the Canadian Nuclear Safety Commission and international regulators to ensure all forms of conventional and nuclear waste are handled in a safe, secure and responsible manner.

Canada's Long-Term Plan

Safe, long-term management of used nuclear fuel.

The Nuclear Waste Management Organization (NWMO) is the not-for-profit organization tasked with the safe, long-term management of Canada's used nuclear fuel in a manner that protects people and the environment for generations to come.

Canada's deep geological repository for used nuclear fuel will use a multiple-barrier system designed to safely contain and isolate used nuclear fuel over the very long term.

Wabigoon Lake Ojibway Nation and the Township of Ignace will be the host communities for the future site for Canada's deep geological repository for used nuclear fuel. Learn more at nwmo.ca.

Types of Nuclear Waste

65 years of safe operations

Canada's nuclear industry is one of the most regulated in the world and its facilities are the most protected critical infrastructure in Canada. All nuclear waste is safely managed in compliance with stringent regulations and in accordance with international standards.

Low-Level Waste.

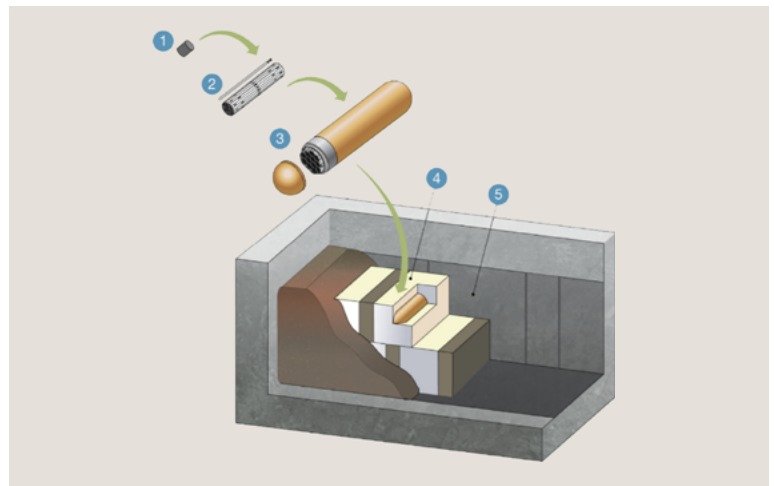

These materials can be handled with minimal protective measures and include items such as used protective clothing, tools and lab waste.

Intermediate-Level Waste.

These materials require shielding during handling and include items such as reactor components, resins from water treatment and certain chemicals.

High-Level Waste.

These materials require robust containment, cooling measures and long-term management and include items such as spent nuclear fuel and reactor components, such as control rods and piping.

Source: Nuclear Waste Management Organization.

The Peace River Nuclear Power Project

Utilizing Canada's proven nuclear technology.

Energy Alberta is an Alberta-based company led by an experienced group of innovators, nuclear industry experts and leaders in environmental sustainability. We are proposing to build a nuclear power generating station in the Peace River area of Northern Alberta that would include two to four large-scale reactors. The facility could produce up to 4,800 MW of electricity for the grid, representing up to 25% of the province's existing electricity generation.

Radiation Safety

Canada has been producing nuclear energy since the early 1960s. Nuclear power plants in Canada are subject to strict health and safety regulations and are routinely inspected to ensure they meet or exceed rigorous safety and environmental standards established by the Canadian Nuclear Safety Commission and international organizations.

Protecting People and the Environment

Canada's nuclear industry is subject to some of the **strictest radiation safety standards** in the world. The Canadian Nuclear Safety Commission regulates the life cycle of nuclear plants and has a team of technical experts and onsite inspectors to maintain rigorous oversight of plant operation. Nuclear power plants adhere to rigid radiation protection regulations under the Nuclear Safety Control Act, as well as recommendations from international organizations such as the International Atomic Energy Agency (IAEA) that provide global safety standards for radiation exposure.

Minimizing radiation releases.

Nuclear power plants have control and safety systems in place to minimize radiation releases. During normal operations, they release very small amounts of radiation into the air and water. These releases come from the reactor and its system and from waste management activities.

In order to reduce airborne releases, highly efficient filters and radiation monitors are installed as part of the ventilation systems. Filters remove more than 99% of the radiation from the air before it is released to the environment.

Used Nuclear Fuel.

After nuclear fuel has been used in a reactor, it is removed and stored securely in a water-filled pool for a period of 7 to 10 years. The water in the pool continues to cool the fuel and provides shielding against radiation. All of Canada's fuel pools are built in ground, in separate buildings at the nuclear power plant, and are designed to withstand earthquakes.

After 7-10 years, the bundles are placed in dry storage containers, silos or vaults. After 50 years, the life of the container could be extended, or the used fuel could be repackaged. The Nuclear Waste Management Organization has announced their selection of the Wabigoon Lake Ojibway Nation-Ignace area in Ontario as the site for Canada's deep geological repository for used nuclear fuel. Learn more at nwmo.ca.

Safety Measures in Canadian Nuclear Plants

Canadian nuclear power plants are equipped with multiple, independent **robust control and safety systems** designed to prevent accidents and mitigate the effects should an accident occur. The systems perform three fundamental safety functions: controlling the reactor, cooling the fuel and containing radiation.

Containment Structures.

These are thick concrete walls designed to isolate the radioactive materials inside the reactor. Even in the unlikely event of an accident, the containment structures are built to prevent radiation from spreading.

Radiation Shielding.

Materials such as water, concrete and lead are used to absorb radiation and protect workers and the surrounding environment.

Monitoring Systems.

Continuous radiation monitoring systems are in place inside and outside the plant. These systems ensure that radiation levels remain within strict safety limits, both for plant workers and the nearby community.

A Safe and Sustainable Future

Nuclear power is one of Canada's safest and cleanest energy sources and offers one of the best ways to meet Alberta's constant and growing electricity demands.

Reliable & Consistent.

Nuclear power plants can operate 24/7 providing a constant, stable and affordable source of electricity that is readily scalable.

Zero Emissions.

Nuclear energy produces virtually zero greenhouse gas emissions during operation, making it a critical tool in combating climate change.

Energy Security.

In an increasingly volatile global energy market, nuclear power offers a path to energy independence by reducing reliance on imported fossil fuels.

Understanding Radiation

We are exposed to natural and man-made sources of radiation in our daily lives every day. Radiation is energy that travels through space in the form of electromagnetic waves or particles.

Ionizing Radiation.

This type of radiation has enough energy to break an electron away from an atom causing that it to become charged. It is the type produced by nuclear power plants and x-ray machines.

Non-Ionizing Radiation.

This type, such as visible light or radio waves, does not have enough energy to affect atomic structure. It is the type produced by microwaves and Wi-Fi.

Naturally Occurring Radiation.

Radioactive elements like potassium-40 and carbon-14 are a part of the world around us. Potassium-40 is present in the foods we eat, like bananas and potatoes. Carbon-14 is found in the atmosphere and makes its way into us through the food chain.

Ionizing radiation is produced during nuclear fission, the process that powers nuclear reactors. The use of nuclear power in clean energy production is tightly regulated and monitored to ensure the highest standards of public and environmental safety.

Workers in a nuclear power plant are exposed to far less radiation than what you'd experience from a single medical X-ray. Stringent safety protocols, advanced shielding and state-of-the-art monitoring ensure that radiation exposure for plant workers remains extremely low – often comparable to the natural background radiation we're all exposed to daily.

Protecting Water Resources

Energy Alberta cares deeply about environmental stewardship and promoting sustainable water management practices to minimize the impact of its proposed operations on local water resources and protect the Peace River watershed.

Energy Alberta's Commitment to Water Management

Energy Alberta is proposing to build a nuclear power generating station on the shoreline of the Peace River, one of the largest rivers in Alberta. Water from the Peace River would be used for cooling and other processes required for safe operations. Advanced technology will be utilized to recycle the cooling water and reduce the amount of water needed.

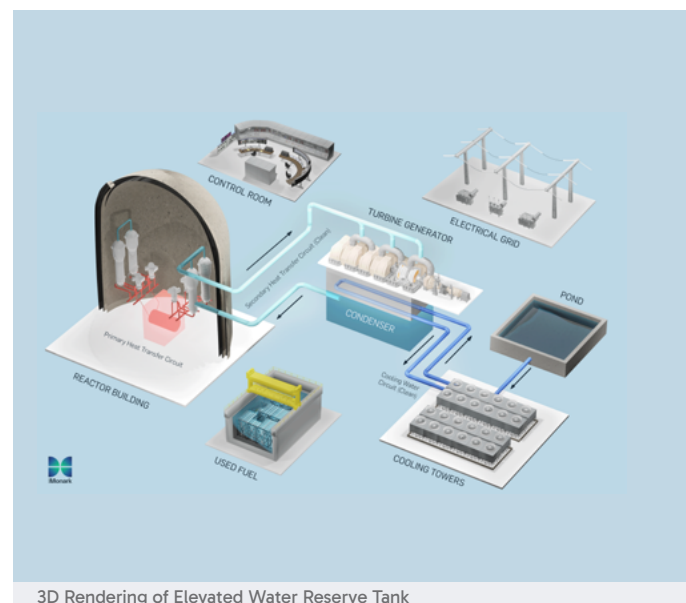

The expected volume of water required for each 1000 MW operating reactor and turbine unit when producing power, will be between 1.03 and 1.35 cubic metres per second.

With all four units operating, the facility would use approximately 0.2% of the river's medium annual flow to make up for water that evaporates as part of the power generation cooling system.

The water management process in nuclear power plants is highly regulated, including permits and mitigation requirements put in place by local, provincial and federal governing bodies to ensure effective conservation and stewardship. Significant efforts are undertaken to protect the habitat of the local watershed, including rigorous environmental programs that monitor, track and analyze surrounding ecosystems to safeguard the health of people and the environment.

Understanding the Water Cooling System

A consistent supply of water from the Peace River, primarily used for the steam cycle power generation cooling, will be an integral part of the Peace River Nuclear Power Project. No heated water will be discharged directly back into the river. Nuclear power plants use multiple, and separate water systems to safely transfer heat, generate steam and cool equipment. In this process, heat from the reactor is used to produce steam, which drives turbines to generate electricity. Afterward, the steam is cooled back into water so it can be used again. These water systems are kept completely separate, with heat transferred across sealed pipes and barriers to ensure safety and prevent any mixing.

Cooling Water Infrastructure

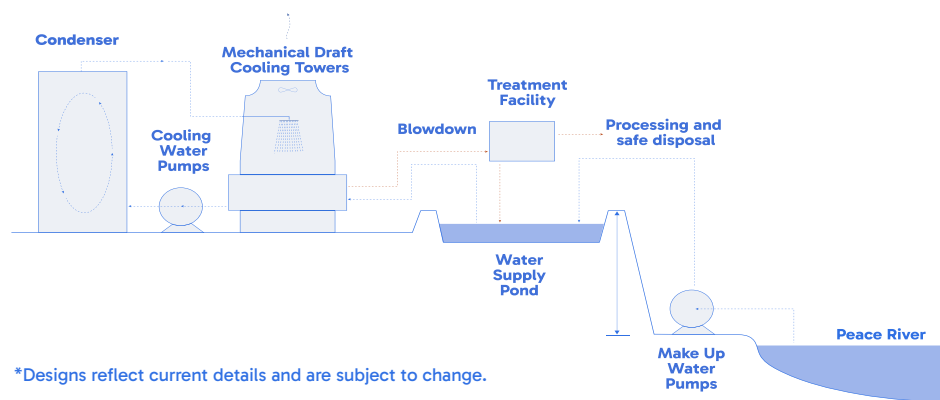

The proposed project plans to utilize a mechanical draft cooling system to remove the leftover heat from the steam circulating through the turbine system after the electricity is generated. This method allows less water to be pumped from the river and prevents heated water being released back into the Peace River. Instead, the water is evaporated, or consumed, in the heat removal process.

Key components of the plant's cooling water infrastructure include:

- Water intake, pipeline and access road to the river.

- Water storage ponds to hold a reserve of water for power production if the amount of water coming from the river is reduced because of ice conditions or low water levels.

Mechanical draft cooling towers which use fans to move all the air required to transfer heat from the steam driving the turbines to the air. Water is consumed and evaporated as a result of the warm circulating water interacting with relatively dry and cool air.

A Safe and Sustainable Future

Nuclear power is one of Canada's safest and cleanest energy sources and offers one of the best ways to meet Alberta's constant and growing electricity demands.

Reliable & Consistent.

Nuclear power plants can operate 24/7 providing a constant, stable and affordable source of electricity that is readily scalable.

Zero Emissions.

Nuclear energy produces virtually zero greenhouse gas emissions during operation, making it a critical tool in combating climate change.

Energy Security.

In an increasingly volatile global energy market, nuclear power offers a path to energy independence by reducing reliance on imported fossil fuels.

Water Act Licence. A licence under the Water Act is required to divert and use surface or groundwater in Alberta for a specified purpose such as irrigation, a municipal water system or energy production. A licence identifies the water source as well as the location of the diversion site, quantity, rate, and timing of withdrawal as well as the conditions of the licence. Energy Alberta is currently studying the area of the Peace River that would require the withdrawal of water for the Project as the initial step in the process to apply to the Government of Alberta for a water licence.

The Peace River Nuclear Power Project

Energy Alberta is proposing to build a nuclear power generating station in the Peace River area of Northern Alberta that would include two to four large-scale reactors. The facility could produce up to 4,800 MW of electricity for the grid, representing up to 25% of the province's existing electricity generation.

How We Evaluate a Site

Energy Alberta conducted an extensive regional and local site evaluation process to find potential options for the Project. From there, a closer review of the most promising sites is completed to ensure they meet key technical, environmental, social/cultural and safety requirements. The criteria come from a number of sources, including technical essentials in the Canadian Nuclear Safety Commission regulations outlining site suitability evaluation requirements.

Our goal when selecting a site is to:

- Reduce environmental impact by choosing a location that minimizes disruption to the environment.
- Ensure safe operations by selecting a site where environmental factors won't affect the facility's ability to function safely.
- Plan for risk management by identifying any potential security, health or environmental risks and putting strong mitigation strategies in place.

The Site Selection Process Happens in Three Key Phases:

Site Survey.

Exploring potential locations and ruling out any that didn't meet basic requirements.

Environmental, Community & Cultural Impact.

Shortlisting potential sites and carefully assessing and comparing them based on safety and suitability criteria to determine the best options.

Site Evaluation.

Taking a closer look at the chosen sites and analyzing factors that could impact safety and ensuring the location is a good fit for the facility.

What Makes a Good Site for a Nuclear Power Plant?

There are some fundamental considerations in assessing a potential site for a nuclear power plant:

Site Safety.

Assessing the location's natural and physical characteristics might impact the plant, such as earthquakes, surface water flooding risk and meteorological events, as well as addressing the risks associated with potential human-caused incidents.

Environmental, Community & Cultural Impact.

Assessing the potential impact of the plant on the surrounding area, population and environment including historic or culturally sensitive areas and sensitive wildlife or aquatic habitat.

Technical Needs.

Ensuring the site requirements are met such as the need for a supply of water for cooling, access to transportation and transmission infrastructure, reasonable access to skilled labour, equipment and supplies as well as the space required for safety such as Exclusion Zones

More Power, Less Land: The Efficiency of Nuclear Energy

Nuclear power delivers massive amounts of energy while using far less land than other sources, making it one of the most space-efficient ways to generate electricity. Nuclear is the most land-efficient means of clean electricity production, requiring only 103 acres per million-megawatt hours. Other low-carbon options, such as solar and wind, require far more land at 3200 acres and 17800 acres respectively.

Site Preparation and Construction: Key Steps in Nuclear Development

The site preparation phase would be the first step in getting everything ready for construction. This includes building access roads, clearing and leveling the land, as well as setting up essential utilities like power and water. Materials and equipment, including cranes and heavy machinery, are brought in and support facilities like warehouses, storage areas and offices are built to keep everything running smoothly during construction.

The construction phase involves building both the nuclear and non-nuclear infrastructure, including facilities for water intake, storage, treatment, and cooling, as well as waste storage, reactors, control rooms, and support buildings. Other key structures, like communications centers, laboratories, turbine buildings, and electrical stations, are also put in place to ensure everything runs efficiently and safely.

A Responsible Transition: How Nuclear Plants Are Safely Decommissioned

The Canadian Nuclear Safety Commission (CNSC) oversees every stage of a nuclear power plant's life, including its safe decommissioning. Their role is to make sure decommissioning follows strict regulations that protect workers, the public and the environment, while also meeting Canada's international commitments.

Before a nuclear power plant can receive its operating license, the operator must submit a decommissioning plan that details how the plant will eventually be dismantled safely. To ensure these plans are backed by proper funding, a financial guarantee is required, allowing CNSC staff to assess how decommissioning costs will be covered when the time comes.

Protecting What Matters: Energy Alberta's Commitment to Safety

Energy Alberta is deeply committed to protecting the water, air, land and people around our proposed project. Safety is not just a priority—it is at the core of our values. The use of nuclear power in clean energy production is tightly regulated and monitored to ensure the highest standards of public and environmental safety.

A Legacy of Robust Safety Standards

Canada is a global leader in nuclear safety and has a long history of safe nuclear energy production dating back to the 1960s. The Canadian Nuclear Safety Commission (CNSC) oversees the life cycle of nuclear plants, with technical experts and on-site inspectors monitoring plant operations to ensure compliance with rigorous safety and environmental standards. With stringent regulation at the national and international levels, including oversight from the United Nations' International Atomic Energy Agency (IAEA), nuclear power generation is one of the safest energy technologies.

Multiple Layers of Protection

The safety of workers and nearby communities will be our utmost priority. Canadian nuclear power plants are equipped with robust, independent control systems that ensure safety at all stages of operation. In addition, other systems are designed to perform three fundamental safety functions:

Containment Structures.

Thick concrete walls isolate radioactive materials inside the reactor. In the unlikely event of an incident, these structures prevent radiation from spreading.

Radiation Shielding.

Materials such as water, concrete and lead absorb radiation, ensuring the safety of both workers and the surrounding environment.

Continuous Monitoring.

Radiation levels are continuously monitored both inside and outside the plant. This ensures that radiation exposure remains within the strictest safety limits.

Safe Radiation Practices: Keeping Workers and Communities Safe

Radiation is a natural part of life. We are exposed on a daily basis to radioactive elements like potassium-40 and carbon-14. Radiation exposures from an operating nuclear power plant are very low. A person who lives near a plant could receive a radiation dose that is at least 1,000 times lower than the dose from natural background sources radiation and plant workers are exposed to far less radiation than the average person experiences from a single medical X-ray.

Nuclear power plants are equipped with advanced control and safety systems, as well as highly efficient filters and radiation monitors, designed to minimize any radiation releases. These filters remove more than 99% of radiation from the air before it is released into the environment, ensuring that the public and local ecosystems are protected.

Site Safety and Security

Canada's nuclear facilities are the most protected critical infrastructure in Canada.

Nuclear security is regulated by the CNSC, which sets out detailed security requirements designed to safeguard nuclear facilities against threats, including cyber security, and ensure that nuclear material stays in the right hands. Though security measures have been developed over time in response to potential threats, a breach of the physical, personnel or information security of Canadian nuclear facilities has never happened.

Lessons Learned and Safety Advances

No industry is immune from accidents, but all industries learn from them. With nuclear power, the potential hazards have been factored into the design of nuclear power plants in order to protect the public, the environment and workers. Modern-day facilities contain numerous safety improvements based on operational experience. In addition to engineering and procedures which significantly reduce the risk and severity of incidents, all plants have guidelines for accident management and mitigation.

Managing Used Nuclear Fuel: Safe Storage and Disposal

One of the most critical aspects of nuclear safety is the handling of used nuclear fuel. Fuel storage and handling at the site will be conducted within a designated Exclusion Zone, a 500-metre buffer around each reactor building where access is restricted. After fuel is used in a reactor, it is removed and stored securely in a water-filled pool for 7 to 10 years. This process allows the water to continue cooling the fuel and providing necessary radiation shielding. The pools are built in-ground, designed to withstand earthquakes, and are located in separate buildings on-site to ensure safety.

Once the fuel has sufficiently cooled, it is moved to dry storage containers or vaults for safe on site storage. These storage systems are licensed and regulated by the CNSC, built to withstand seismic events and extreme weather and are carefully monitored to ensure that the fuel remains safely contained. The Nuclear Waste Management Organization has announced their selection of the Wabigoon Lake Ojibway Nation-Ignace area in Ontario as the site for Canada's deep geological repository for used nuclear fuel.

Emergency Management

Although nuclear accidents are very rare, it is still important to prepare should one occur. The Canadian Nuclear Safety Commission (CNSC) mandates that all major nuclear facilities maintain comprehensive emergency preparedness programs, including dedicated response facilities, specialized equipment and trained personnel. The CNSC requires all nuclear facilities to conduct regular tests of their emergency management systems and response organizations. In the unlikely event of an incident, facility staff along with trained and enabled emergency response personnel are prepared to respond quickly, safely and effectively in line with the strict planning, training and testing programs governed by the CNSC. CNSC staff with extensive experience and expertise in nuclear emergency response would oversee the response to ensure that appropriate actions are taken to limit the risk to health, safety, security and the environment.

Peace River Nuclear Power Project

Energy Alberta is proposing to build a nuclear power generating station in the Peace River area of Northern Alberta that would include two to four large-scale reactors. The facility could produce up to 4,800 MW of electricity for the grid, representing up to 25% of the province's existing electricity generation.

Let's talk about the potential for nuclear energy in Alberta

Stop by to meet the Energy Alberta team and learn more about our proposed Peace River Nuclear Power Project.

Date: March 11, 2025 **Time:** 4:00 – 8:00 p.m

Location: Weberville Community Hall – 220078 Range Road 850, located in the County of Northern Lights

A made-in-Canada solution for safe, secure and reliable energy

Join us at Energy Alberta's Open House

Stop by to learn about our proposed Peace River Nuclear Power Project.

March 11, 2025
4:00 – 8:00 p.m
Weberville Community Hall

You're Invited:

Peace River Nuclear Power Project Community Engagement Sessions

Join Energy Alberta for a community engagement session to learn more about the proposed Peace River Nuclear Power Project. These interactive sessions will focus on the topics that matter most to your community.

Register Now

Community Engagement Sessions:

All sessions run from 4:30 – 8:00 PM and follow the same format — please register for one:

4:30 – 5:00 PM: Registration

5:00 – 7:30 PM: Presentations and Discussions

7:30 – 8:00 PM: Follow-up Questions
and One-on-One Conversations

Sept 22 – Peace River, Chateau Nova Hotel

Sept 23 – Weberville, Weberville Community Hall

Sept 24 – Grimshaw, Mile Zero Regional Multiplex

Sept 25 – Manning, Manning Elks Hall

We want to hear from you
& we hope to see you there!
